$100,000 less in his lifetime than the high school graduate: the high school graduate will earn $140,000 less than the college graduate. The youth who completes one of our retraining projects will earn as a result, $50,000 more in his lifetime.

The Negro with an elementary school education is likely to have an income of $3,400 while the high school graduate is likely to have an income of $4,600 and those with a college degree will probably earn $7,900. Education does pay off. It is worth struggling for, sacrificing for.

Let me make this same point in other terms. The unemployment rate for workers between 25 and 54 who have less than a grade school education is twice as high as the rate for high school graduates and four times as high as the rate for workers with some college education.

Let me give you the same figures but for young Negroes only. One out of every 3 Negro youths with only an eighth grade education is unemployed compared with one out of 6 for the high school graduate and one out of 8 for those with one or more years of college. And note that less than one out of 22 Negroes over 24 years of age with one or more years of college is unemployed.

The more education a Negro gets, the nearer his income approaches that of the white. The Negro elementary school graduate gets only 68 percent of the income of the white with the same education; this increases to 71 percent for the Negro high school graduate and to 85 percent for the Negro college graduate.

Keep in mind that these figures are based on the situation today. As automation increases, as jobs become even more complex, the relative income of the uneducated will become lower and their unemployment rate will become

higher. There is no future for the unskilled, unskilled, unschooled worker. Blue collar jobs are expected to increase by only 14 percent in the 60's, and these will be mainly skilled jobs requiring an education, but white-collar jobs will increase by 30 percent.

About one-quarter of a million Negroes are today, attending colleges and universities, of whom 100,000 are in the South or the District of Columbia. Negro enrollment in higher education is higher than total enrollment in Great Britain or Italy, and nearly as high as in West Germany or France even though the Negro population in America is less than half the population of any of these nations.

But the high financial cost of certain types of professional education, such as medicine, is a serious obstacle to Negro youth--34 percent of the Negro youth compared with the 13 percent of white youth report financial handicaps as barring the way for graduate and professional school. Part of our efforts must therefore be to get special funds provided for the post-graduate education of Negro youths; they must study harder so that they can get more scholarships.

An interesting and significantly development is the interest of the white student in attending colleges which were formerly all Negro; Lincoln University in Missouri reports more than 500 white students and West Virginia State College is now evenly split between Negroes and whites.

More barriers are breaking down. For the first time in history, three outstanding medical schools with southern traditions--Johns Hopkins, Duke, and Emory, have admitted Negroes on a competitive basis. Each of them had won a National Medical Fellowship.

What has the Government done? Many things.

For the first time in American history, we have a positive program to get more qualified Negroes into the Federal Government, and to get them into better jobs.

By a positive program we mean recruiting at Negro schools, looking over personnel records to find cases of under-utilization, making clear to all levels of management that equal opportunity means equal opportunity, and providing counseling and training to employees to help them get ahead.

The percentage of Negroes in responsible positions in the U.S. Department of Labor has doubled--a 100 percent increase in less than three years. In many places in the Government, for the first time in history, there are Negroes in supervisory jobs and in management jobs.

One of the most important activities of the Department of Labor related to the theme of this meeting is in advising schools and colleges which Negroes attend on the educational requirements to increase their employability. As part of this effort, under the auspices of the Secretary of Labor, Mr. W. Willard Wirtz, we conducted conferences at four locations this winter and spring where the top officials of Negro colleges and the Federal Government met so that college officials could discuss their curriculum, counseling, and placement needs in order to increase the utilization of their students.

The same Federal leadership applies to Federal Government contractors. They are no longer allowed to say that they have no Negroes because no Negroes applied; they are no longer allowed to say that they have Negroes only in menial jobs because no trained Negroes are available. They are told that they can't expect Negroes, trained or untrained, to apply to an employer who has practices discrimination. It's the employers's job to find the Negro and

and to train him. Employers spend millions in recruiting on colleges campuses and in advertising for employees; and then training these young graduates. They spend millions to test and to train the people of foreign countries in which they operate. Equal opportunity means that they will use positive efforts to find Negroes, adapt their selection methods, as they have done overseas, in evaluating them, and then train them for their first jobs and for upgrading. This is the program of the Federal Government--the leadership for this program goes right to the top.

We have another special training program that can mean a lot to the Negro--training done under the Manpower Development and Training Act. More than 20 percent of all trainees in this program are Negroes.

This program is important because it places special emphasis on those people who are now qualified only for jobs that don't exist anymore. It upgrades them, helps to make them employable and at a higher level, and it gives them an allowance while they are being trained. We have, for example, recently completed work with the Ingalls Shipbuilding Corporation in Mississippi to provide training under this Act for people in low-level jobs to qualify them for skilled jobs.

It is now the firm policy of the U.S. Department of Labor to insure that the employment services of the States operate on a nondiscriminatory basis; that they will not accept orders from employers which prescribe race or color and that they will not refer applicants on this basis.

We have recently established procedures to insure that we do not certify apprenticeship programs that discrimination; more important, our field representatives have a mandate from the Secretary of Labor to promote equal opportunity on a positive basis.

# # # # #  (S64-1150)

Secretary Wirtz Says Nonwhite Child Does Not Lack Ability, Only Opportunity

Secretary of Labor W. Willard Wirtz, speaking before the National Committee on Employment of Youth and calling for "emergency measures" in combatting youth unemployment, said of minority group youth:

"We are approaching the point where the key element in what we call racial discrimination is the denial of motivation to the nonwhite child. It isn't lack of ability. If there was inequality of opportunity before--and there was--this inequality is being rapidly reduced. What remains is primarily that form of discrimination, or disadvantage, which puts him at his desk in the first grade with no more motivation than what he brings from a home which was blighted by discrimination.

"Rather than a race problem it is more a poverty problem. There are about 11 million youngsters in this country today who are members of families whose annual family incomes are less than $3,000. We must some way break the cycle of their disillusionment, and get through to them the fact that they can push open doors in what they know only as walls.

"A distressingly large number of boys and girls are isolated, more dangerously than we realize, from the healthy society we know. Many of them have in a very real sense inherited their present condition--not through human genes, but through the social and economic genes of slums, broken homes, discrimination, and a poverty that snuffs out the essential spark of

(MORE)

motivation. A boy whose father has not been able to support his family thinks of welfare payments and unemployment compensation as a way of life. He actually knows nothing of what work really is, or nothing at least of the dignity and satisfaction of it.

"It is not only the absence of the roots of family life that causes these young reeds to be shaken in the winds. It is often also the absence of any other effective social organizations; no union, for they have no jobs, no church, for poverty inhibits the building of churches as it does living by our moral code. A boy finds that only gangs made up of others like himself will welcome him. He may face, ironically, the alternative of a disciplined life in crime or an aimless existence of marginal employment.

"We don't know how to speak to these youth. As our experience in life has not been theirs, so neither are our language nor our customs, nor our dress, nor our goals theirs.

"The person who is best able to stop the minority-group inheritance of poverty and ignorance is the teacher. She can take the boy or girl who comes into her classroom knowing no reason to try--because life at home offers no reason--and give that handicapped child the motivation which the American majority has as its birthright. But this won't happen in classrooms in which one teacher faces 40 children, and works through a course of study based on the fallacious assumption that they are all going on to college. Today's educational system is designed for winners, and it ignores losers--perhaps because we don't like to admit there are losers in our society.

"Think what would happen in this country if we declared war on ignorance--by elevating the standards of teachers to the levels the importance of their job demands, by paying them the salaries which the required skills

(MORE)

would warrant, by cutting the students-to-teachers ratio to the point good sense would require, by building the schoolrooms which are needed, and by giving every child in the country the educational opportunity--from first grade through college--which a few have today. Education would become our largest economic enterprise, as it ought to be. This would, in itself, create full employment. It would wipe out ignorance. It would virtually end the intolerance and bigotry of racial and religious discrimination. It would give young Americans the skills they need in an automated work force, and the broader knowledge a working majority of people must have if a government by the people is to make sense in a world where most of nature's forces are now being brought within human control."

Arthur Chapin Addresses the Greater New Orleans Urban League Conference

Excerpts from an address by Arthur A. Chapin, Special Assistant to the Secretary of Labor before a Motivation Workshop and Conference by the Greater New Orleans Urban League at Xavier University in New Orleans:

"Your chosen them: 'Education--The Negro's Tool for Economic Advancement During the Critical 60's,' is very timely, and of great importance to all of us.

"Let us send our children into the employment arena with a chance for survival.

"What a shame, what a wasted opportunity it is, when the employer finally says 'Yes, I won't discriminate, I'll look for Negroes for these jobs,' and none is available.

"For example, only one out of 100 engineers in the United States is a Negro--we have lost a golden opportunity.

(MORE)

"As we in the Department of Labor see the picture, education for today's youth cannot be overly stated, particularly for Negro boys and girls. For the man who has not completed grade school will earn $100,000 less in his lifetime than the high school graduate; the high school grade will earn $140,000 less than the college graduate. The youth who completes one of our retraining projects will earn as a result, $50,000 more in his lifetime.

"The Negro with an elementary school education is likely to have an income of $3,400 while the high school graduate is likely to have an income of $4,600 and those with a college degree will probably earn $7,900. Education does pay off. It is worth struggling for, sacrificing for.

'Let me make this same point in other terms. The unemployment rate for workers between 25 and 54 who have less than a grade school education is twice as high as the rate for high school graduates and four times as high as the rate for workers with some college education.

"Let me give you the same figures but for young Negroes only. # TEACHER INSTITUTES: AN OUTLINE

A proposed approach for

teachers of urban disadvantaged children

Frank Riessman

URBAN STUDIES CENTER
Rutgers - The State University
New Brunswick, N. J.

May, 1964

The proposed outline is intended for teachers of disadvantaged children in integrated, multi-classed schools and classrooms. While the approaches suggested may be especially suited for low-income children, they should also be extremely valuable for middle-class white youngsters in terms of broadening their styles of learning and general outlook.

# Teacher Institutes

Frank Riessman
Rutgers University
May, 1964

The aim would be to provide teacher and other school personnel with knowledge about low income cultures and styles, particularly the strengths in this culture (attitudes toward education, cooperativeness, extended family, physical style, etc.).

1. Through reading and discussion of relevant novels (e.g., Warren Miller, The Cool World), hiptionary, seeing films, other art forms.

2. Through reading relevant urban sociology (e.g., Herbert Gans, The Urban Villagers).

3. Through an introduction to Negro history, using the magazine, Negro Heritage for example. The aim is to develop interest in and respect for low income culture; as distinct from appreciation of the difficulties of the low income environment. The theory is that this will lead to an honest "expect more and get more" from the children and their parents.

In addition, various technologies that seem suited to low income children will be discussed and where possible, illustrated. The reasons for special technologies being especially useful for this population will be elaborated in terms of these children's physical style, games - orientation, down-to-earth informality, etc. Among the technologies to be introduced are:

1. Organics -- S. A. Warner (also Senesch)
2. Montessori techniques.
3. Role playing
4. Use of "hip" language.
5. Games such as "In the manner of the Adverb."
6. Robbins' technique for developing auditory set.
7. Methods of diagnosing strengths of disadvantaged children.
8. Team learning and the "helper" principle.

Role Play techniques would be used to have teachers try out new approaches to classroom teaching and to develop their own individual styles and repertoire (to fashion the techniques to their own potential).

Various "successful" styles for teaching low income children would be presented (the "compulsive," the "maverick," the "coach," the "quiet one," the "secular intellectual," etc.). Teachers would have an opportunity to actually observe some of these styles, or see films of them in action, or have them role played. The aim is to suggest a range of possibilities from which the teachers could then develop their own repertoires.

Finally, the Institutes would include consideration of ways in which teachers can multiply their effectiveness by the extensive use of helping technicians -- nonprofessional teacher aides.

INSTITUTE OF EDUCATIONAL RESEARCH, INC.,
*Washington, D.C., March 8, 1963.*

Subject: Statement regarding bill on S. 1, Youth Employment Act, submitted to the Senate Committee on Labor and Public Welfare by the Institute of Educational Research, Inc., and the Occupational Training Center.

Mr. EDWARD FRIEDMAN,
*Counsel, Senate Committee on Labor and Public Welfare, U.S. Senate, Washington, D.C.*

DEAR MR. FRIEDMAN: Pursuant to our conversations of recent weeks, the undersigned are submitting herein a statement regarding bill S. 1, the Youth Employment Act.

The proposed Youth Employment Act has been analyzed and reviewed by the undersigned. We are in full agreement with its purposes and goals and consider that it could offer a powerful instrument for providing many young men with their only chance to become productive members of our society. The alternative to education and training will often be the greater cost of relief, institutionalization, and the transmission of squalor, crime, and dependency to the young.

In our judgment, the most important problem is to provide means to insure that these young men return to their home communities with greater employability than when they left. The development of modern job skills requires classification, specification of job training goals, efficient methods of training, and objective evaluation directed to continuous program improvement.

In addition, modern educational technology has advanced to the point where programed learning methods offer great advantages over conventional methods where large-scale training is required. The mass training demanded by the Youth Employment Act requires rapid and economical training and is ideally suited to these new methods. Appendix A ("Some Operational Recommendations") is an attempt to picture how these new methods could function to both simplify and accelerate this program.

Sincerely yours,

MYRON WOOLMAN, Ph. D.,
*Director, Institute of Educational Research, Inc.*
JEROME BERNSTEIN, M.A.,
*Director, Occupational Training Center.*

## APPENDIX A

### SOME OPERATIONAL RECOMMENDATIONS FOR S. 1 YOUTH EMPLOYMENT ACT

The following points have been discussed at some length with various specialists in the field of education with special emphasis on the use of new methods in development of literacy and job skills. The following individuals represent a cross section of those with whom this general problem area has been discussed:

Dr. Edward Brice, Director, Adult Education, Office of Education, Department of Health, Education, and Welfare; Mr. Raymond Larsen, Assistant to the Director, Automation and Manpower, Department of Labor; Dr. Harold Hildreth, Office of Program Development, National Institute of Mental Health; and Dr. Donald Stedman, Director of Research, Joseph P. Kennedy, Jr., Foundation.

1. Training methods should be economical, flexible, and provide for different rates of growth of proficiency, skill development, and understanding. Present classroom methods of vocational training tend to be inefficient.

(*a*) They force all students to move at relatively similar rates of speed.

(*b*) They require extensive physical plants, large numbers of trained instructors and large masses of specialized equipment.

(*c*) Teaching effectiveness of instructors varies widely, with many instructors having minimal instructor capabilities.

(*d*) Training is expensive, time consuming, and often limited to highly specific job skills which limit learner opportunity.

(*e*) Training tends to be artificial and reflects school methods rather than those in actual use.

(*f*) Industrial school methods tend to reflect industrial practices based on obsolete equipment.

2. The hard-core problem is one which focuses on men and women who have failed to obtain the necessary minimum of skills required for economic survival in technological age.

(*a*) The program should be directed to those persons who have been economically disenfranchised by reason of (1) literacy level, (2) dropouts from public school, (3) shifts in industrial characteristics of the community and (4) undertraining.

(*b*) Fundamental problems of motivation exist and methods must be incorporated into the training in order to overcome inertia and defeatism.

(*c*) The training must be designed to accommodate flexibly to persons of vastly differing intelligence, interests, and backgrounds; it must also be synchronous with existing and projected industrial requirements.

3. Programmatic training methods can provide mass training at relatively low cost. This training can be made practical, job related, and reflect current methods and practices. Programmatic methods can increase training efficiency by:

(*a*) Permitting enrollees to progress at their own rate based on experience, capacity, and motivation.

(*b*) Using nonprofessional teachers to provide instruction. This reduces costs and reduces the ratio of students to instructors.

(*c*) Training reflects actual practices; enrollees can be trained in the work setting. This reduces school cost while increasing the realism of the training provided.

(*d*) Training can be provided for:

(1) training of illiterates and functional illiterates in the development of reading skills necessary for job performance.

(2) training of job skills involving the use of names, procedures, and techniques.

(3) training for learning of concepts necessary for job performance (basic electricity, computer programing, drafting, etc.)

4. Enrollees should initially be evaluated with reference to their backgrounds, interests, and general level of capability. These factors should then be considered with relation to the job needs existing in the community to which the enrollee expects to return. The enrollee should then be assigned to a job area which—

(1) is expected to increase his employability on discharge, and

(2) is consistent with his own interests and capabilities as possible.

The enrollee should enter the program to achieve a job skill consistent with his general capabilities and existing job requirements. His work as a trainee should be systematically evaluated to determine the degree to which he progresses to the point of full employability on discharge. A quality control program should be performed by a nongovernmental agency.

The evaluation of programs under the Youth Employment Act should be objective, systematic, and thorough. The training methods, levels of proficiency attained by graduates, proportion of graduates employed, areas of skill deficiency in graduates, etc., should be made available to responsible Youth Conservation Corps personnel and other officials responsible for elimination of defects in the interest of systematic program improvement. It is necessary that these evaluations be performed by an objective nongovernmental agency to avoid confusing evaluation with justification of policy, or rationalizing the necessity for an existing state of affairs to avoid embarrassing a superior, etc., etc. Objective evaluation of the program should provide the basis for continuous program improvement and reduced program cost per enrollee.

5. All training should be directed to the enrollee's ultimate employment in his home community. During the period of enrollment the enrollee should learn a number of job tasks within a job area, such as carpentering. The enrollee must ultimately straddle the inner face between the Youth Conservation Corps and his ultimate responsibilities as a citizen. All training within the corps should be directed toward simplify this step across the inner face between these two discrete phases of the enrollee's career. Thus the Youth Conservation Corps objectives are specifiable in the requirement for simplifying this transition.

THE CENTER FOR VOCATIONAL TRAINING (PCVT)

The manor vehicle for carrying out the present plan is a facility designed to develop, test, and revise training programs. This facility, the Programmatic Center for Vocational Training (PCVT) would be responsible for:

1. Developing programs to produce reading skills.
2. Developing programs to produce academic certification (high school diploma).
3. Developing programs to produce job skills.
4. Developing methods of evaluating programs and enrollees.
5. Developing methods for overall program evaluation.

(*a*) *Level I, basic reading level.*—Illiterate persons can be taught to read by means of programs. The content should be related to adult interests and is focused on developing job-related reading skills. Enrollee change in reading skills will be evaluated frequently by methods intrinsic to the reading program. Various motivational devices would then be used to develop and maintain a reasonable rate of progress. Basic reading level materials will be written for adults. Enrollees will remain in the program until they attain approximately a fourth-grade reading level which it is estimated should require approximately 3 months for normally motivated learners. At this point, these enrollees become functionally literate and proceed to level II where reading skills function to increase their rate of progress toward developing job proficiency.

(*b*) *Level II, elementary vocational training.*—Reading: Low-skilled readers will be phased into vocational areas which require learning of (1) names of job-related objects, (2) job-rated actions and behaviors, and (3) critical supervisory worker relationships.

The reading materials in level II require the enrollee to master such materials as:

(1) The most important 100 terms (realistically and concretely defined) in the particular trade he is studying.

(2) Typical pieces of equipment, pictured and described along with functions and critical terminology.

(3) The steps involved in the process of manufacture (nontechnical presentation) of typical items produced in the trade.

(4) The typical supervisory structures which he would most likely find in the job situation along with titles, responsibilities, and critical aspects of various job descriptions.

(*c*) *Level III, operational context training.*—After the enrollee has mastered the basic terms and relationships involved in a job area such as fire protection, construction worker, carpenter, etc., steps should be taken to have him function in the more specific context. Enrollees would work in their job work situations for a minimum of 5 to 6 hours a day when they satisfied the level III criteria. For the remaining hours of each day they would (1) perform calisthenics and competitive sports, (2) work in other job areas, (3) discuss job-related problems such as how to get along on the job, and (4) contact home community for job opportunities, etc. In the work situation itself, trainees would be assigned to already skilled persons (two trainees to one skilled person). The skills they learn are specific to the needs of current industrial production methods. The object of the vocational training would be to assure enrollees at least a level II achievement (familiarization with names, objects, functions, and supervisory structures characteristic of a semiskilled vocational area). Men who attained level II or level III could be given certificates establishing the fact which could be used by USES to certify competency in the job area; they would also receive emphasis by USES for job placement. Where the evaluation indicated competency, efforts would be made to (1) obtain jobs in adjoining

job and geographic areas, or (2) extend the training to a related job skill to provide a dual jobholding capability, or (3) increase the depth of training in the area by additional programs with greater technical and informational scope. This would provide the enrollee with a specialized high-strength area within the job area as a whole.

(*d*) *Level IV, technical skill programs.*—Reading skills represent a necessary but not a sufficient ground for employment. Men who possess adequate reading skills may be unemployable for many reasons such as:

(1) Lack of specific area of specialized knowledge and/or skills.

(2) Possession of archaic and/or obsolete skills with lack of opportunity to learn new skills.

(3) Lack of motivation for seeking employment; feelings of apprehension and general uncertainty.

(4) Inability to cope with other workers and/or supervisors in the job environment.

Thus, there are large numbers of youth who possess the basic level of literacy necessary to absorb information rapidly who nevertheless remain unemployed because of factors related to training, personality, geography, and our rapidly changing technology. We can make rapid attack in these areas as the necessary reading skills would already be available; the enrollee can move into higher level technical training which takes advantage of his existing higher literacy level.

The basic area of emphasis in these programs should be related to the ever-increasing requirement for technologists. However, clearly, those who can learn technical materials can learn level II and level III materials and could be assigned to these training areas where appropriate. The effort, however, should be (within limits) to provide opportunities for learning consistent with learner capability. Several illustrative level IV type programs follow:

TECHNICAL ELECTRICITY

A series of programs would be developed to provide understanding and skills in areas requiring comprehension of practical electrical concepts necessary for skills in both title I and title II of this act. This training would be functional in both rural and urban areas, as modern industry on the farm, the field, and in the city is largely powered by electricity. These fundamental concepts are basic to modern technology at every level and should therefore be an important training area for the Youth Conservation Corps.

*Program A, basic electricity.*—This program would be modeled on program developed for industry. Certain features would differ: (*a*) it would be more concrete and provide more work-related illustrations; (*b*) certain areas would be eliminated as they are specific to the company rather than job relevant; (*c*) certain pedagogical changes would be made to reduce time and improve comprehension. However, the program would still provide (1) progress based on demonstrated proficiency, (2) continuous evaluation, (3) internal motivational devices, (4) continuing evaluation of performance, and (5) features to provide continuing revision and improvement.

*Program B, basic electronics.*—This program would be an extension of electronics (involving diodes, triodes) of program A and would be available only to students who satisfactorily completed program A.

*Program C, basic transistors.*—This program would involve recent changes in basic theroy connected with solid-state physics (transistors and dielectrics) which would make the trainee conversant with terminology, basic concepts, circuitry, and computations.

In programs A, B, and C, the learners would be required to work on actual materials as well as perform the abstract manipulations involved in the formulas and definitions. These materials should be economical, specially designed to illustrate the points covered in the course, should be sturdy enough to take continued abuse, should be reusable, and above all, should be typical of job-related skills in the field.

The use of programatic methods should permit very rapid training. It is estimated that literate motivated trainees could complete the three programs within a 6-month period. On completion, they should be familiar with current electrical concepts, basic computations, and useful methods for adjusting and correcting typical malfunctions.

Some areas would tend to emphasize program A only; some programs A and B; in some areas it might be necessary to provide all three levels to a large proportion of trainees. The employment situation in the home community must, of course, contribute to the training which would be given.

### COMPUTER INFORMATION AND SKILLS

*Program D.*—This program would provide basic information relating to the function of computers, including the rudiments of computer logic and an overview of computer programing methods and techniques.

*Program E.*—This program would provide computer information relative to computer board-diagrams, board-wiring techniques and associated technical language, definitions, etc. Programs A, B, and C could be presented also where appropriate and necessary for enriching computer training.

### KEYBOARD AND KEYBOARD-RELATED SKILLS

*Program F.*—This is a programatic method for teaching typing based on the use of a machine developed to teach typing skills programatically. This method should be rapid, economical, and self-pacing. Equipment is now being patented and should be available shortly.

*Program G, stenographic and shorthand programs.*—These materials are readily programed and could be taught with very few instructors through tape-recording techniques synchronized with written programs. Monitors could be used to insure proper operation of the equipment, standardization of testing procedures, classroom attendance, etc.

*Program H.*—This is training in areas such as IBM key punch, typing and coding, use in accounting machines, desk computers, etc.; can also be accomplished programatically. Cooperating of manufacturers in this area of the enterprise should be sought to reduce costs of equipment and to obtain resource personnel. However, the methods used for training should be developed rather than adapted from current techniques as training methods in these areas tend to be overly elaborate, very sketchy, or sales related.

### SUMMARY

The PCVT would of course provide an ever-expanding and ever-changing body of programs. Each of these programs would be continuously tested and revised. New programs would emerge and old programs dissipate in response to changes in the job requirements through continuous evaluation of the programs and the enrollees in their home communities. The programs would evolve in the direction of increased efficiency.

Programed method is economical, direct, and suited to large-scale mass training of the type required by this act.

# YOUTH AND THE CHANGING SOCIETY

for

"Youth and Work" issue of

Journal of Social Issues

S. M. Miller

Syracuse University
Youth Development Center
926 South Crouse Avenue
Syracuse 10, New York

April, 1963

Morgan, Kolko, et al.--has led to the awareness that at least one of every five Americans lives as an outsider, frequently "invisible" to mainstream Americans. It is shocking to learn that one of every 25 Americans in 1961 was on some form of welfare assistance (excluding social security and unemployment insurance payments); it may well be that one of every 15 Americans has had to rely on welfare aid at some point in his life. The problems of obtaining and keeping employment are difficult for many youth; they are especially acute for the children of the poor, many of whom also suffer from the doubled handicap of ethnic and racial discrimination.

The great changes taking place especially impinge upon youth as they enter the labor market. We cannot adequately understand the processes of youth development and the future of youth without understanding the economic, political and social systems which structure their experiences. It is the purpose of this article to provide some general background for the understanding of problems of youth born into low-income families.

## The Weight of Uncertainty

Youth face an uncertain future. The labor force is changing rapidly and probably will be changing even more rapidly. Several forces are affecting the composition of the labor force. Basic economic changes are driving many from the land into cities, which no longer have a use for their labor in contrast to the past. Within manufacturing, a major reshuffling seems to be occurring: once important industries are dying while new ones are reaching their apogee; many established communities are losing their economic base as out-moded plants and

declining firms are closed. Parelleling the changing nature of economic activity are the changing technological demands within both new and old industries, due to the introduction of various kinds of machinery and procedures. In many industries, the occupational mix is shifting so that the percentage of white-collar workers, especially the technical and professional salaried, is increasing. Many of these changes have been crudely subsumed under the term "automation", covering all types of technological changes as well as the more limited cases of the introduction of self-regulatory processes. Despite confident statements about the skill impact of automation, narrowly defined, a clear and consistent picture of increased demand for high-level skills has not emerged. It seems to be premature to make firm predictions about automation skill demands, particularly since automation installations vary enormously. What does seem to be definite is that many of today's jobs will soon not be in demand while many new jobs--at what skill level is still unclear--will appear.

In this situation, the young job-holder has to face the prospect over his working life-time of not only changing employers but, more importantly, changing skills. Apprenticeships, in the form of graded training for specific skills, will decline even further; indeed, it is not much of an exaggeration to contend that apprenticeships exist mainly in occupations which have been able to insulate themselves from technological innovations and thereby maintain old craft skills. Outside of apprenticeable occupations, the flow of occupational movement is not clear and predictable. Though it is customary to speak of "entry" jobs for young workers, it is unclear what they enter into except the general domain of paid work. While there is a pyramid of wage scales, systematic and graded progression

within it is limited.

Dahrendorf has contended that for much of British industry the unskilled category is a temporary occupation which people work at during relatively short periods of crisis (beginning job, after loss of long-term job, in old age). In the United States, it seems that for many, especially those in service occupations and for ethnic groups affected by strong discrimination, the unskilled category, an omnibus classification, is not a temporary refuge but a permanent level of operation. The demand for unskilled labor is drying up and intermittent or chronic unemployment may become even more important in this group. At the same time, those in skilled and semi-skilled occupations may also face more frequent or more prolonged unemployment as technological and economic changes redirect labor demand.

Little is being done to handle these problems of vast social change. The burdens of adjusting to change will rest most heavily on those least able to afford these additional pressures.

The need is for a "training in versatility", but the low-income group that needs it most is least likely to have this kind of training and the requisites for rapid adjustment to new training.[2] Those who are in a risk situation in regard to one job may not be the most rapid to move to another job which may have more long-run but not short-run stability.

Clearly, the demand for versatility is in conflict at many points with the demand for security. The latter, the over-riding demand of workers, requires seniority and long-term service in today's industrial structure. Job versatility and flexibility--which may yield more security over the long-run--may require giving up a present job for

a future possibility. Irving Bluestone, Special Assistant to Walter Reuther, has recognized these problems and has suggested that long-service workers may be benefited if they are laid off first rather than the traditional last if defense industries cut back. An early release would give them a better chance to get jobs in other industries. If they used their seniority to keep their jobs as long as possible in declining defense industries, then their chances of relocating might be reduced. Such a suggestion is unlikely to be institutionalized as traditional methods are maintained in changed circumstances.

It is not only that short-run and long-run security may be in conflict but that the unpredictability of events is pronounced. In these circumstances, the possibility of building walls of protection is limited. Those who recognize the precariousness of their situation become anxious.

Youth, faced with this uncharted and choppy sea of expectations, may figure that not having an emotional investment in work is the best protection.

## The Instability of Stability

The post-war period has been marked by what have been euphemistically called "recessions" in which sizable numbers of people have been unemployed, especially youth. The rate of unemployment among youth is more than twice that of adult workers and the rate is even higher among minority youths. The likelihood is that at least those who enter non-white collar occupations will suffer recurring periods of unemployment.[3] And not a few white-collar occupations will be faced with periods of unemployment as the overhead costs of office work increase.

The hope that the post-war period would see the elimination or at least sharp dampening of unemployment has proven illusory. True,

massive unemployment of the order of the 1930's has not occurred but the notions that governmental intervention through fiscal policy, monetary manipulation or public works would serve to prevent sizable unemployment have proven illusory. In recent years, the fear of deflation on the part of certain interest groups, especially in the banking field but not restricted to it, has dominated national economic policy regardless of which political party has controlled the White House or Congress. At best, and this is a sad best at the current writing, some attempt is made to stimulate economic activity and thereby reduce unemployment only after the fact of unemployment. Our efforts are not preventive but remedial in regard to the economy. The halcyon hopes of the '40's have been supplanted by the dismal acceptance of unemployment and economic stagnation in the '60's. In February, 1963 the Kennedy administration's private hope was that the unemployment rate might drop to 4% in 1965 from its then current rate of almost 6%! These policies may change but seem at present unlikely to be reshaped. In this context youth entering the labor market, especially at the lower levels where unemployment is heaviest, will face recurring crises of unemployment with their attending emotional strain for the individuals involved and their their families.

One of the few certainties for youth in the coming days is that if they are not able to get certain kinds of white-collar jobs, they face the likelihood of repeated crises of unemployment.

The Credential Society

There is increasing stress on credentials rather than performance in American society. Emphasis is on the possession of formal qualifications as certified by diplomas rather than on the evidence of the

ability to perform at a particular level. Those who can do a satisfactory job but who do not possess educational credentials are ruled out of consideration for certain jobs. At dramatic levels, an Admiral Rickover or an Einstein would have been barred from teaching in a public school because they did not have required courses in pedagogy or in their "specialty." At less spectacular but more important levels, those who cannot make it on the educational track are barred from a whole host of jobs by virtue of their lack of a satisfactory educational credential.

Education increasingly becomes the route for social advance and in doing so it forces youth to do satisfactorily in school in order to be eligible for a whole host of jobs. As Abramovitz has said:

> "...if one side of the coin of industrialization is the greater opportunity which is afforded to skill and education, the reverse is the barrier it sets up against the employment and advancement of young people who are deprived of formal training." The extension of training "...has aggravated the disabilities imposed on the sustantial fractions of our youth who may be deprived of a chance to gain all the formal training from which they are able to benefit."[4]

Many youth who do poorly in school are able to perform well in many jobs. Nonetheless they cannot obtain these jobs. Higher demands are being placed on students at the same time that educational achievement becomes more important. The effects are to retard advance for those who are not able to fit readily into the school mold.

The variety of routes to social and economic advance which once existed in American life have been narrowed down to mainly one, the educational route. Consequently, the character of social stratification in the United States will be sharply attuned to the pattern of educational stratification. If schools are unable to operate so that

those from low-income families stay in schools and benefit from educational processes, then the pool of long-term problems of American society will deepen.

Growing Income Differentiation

Income data by level of education show the advantage of increasing education, with the exception that those with "some college" but not a college diploma do not have an income advantage over high school graduates who have not gone on to college. (The high dropout rate from college as well as from high school is usually ignored in statements about what percentage of a high school graduating class have enetered college.) The "break" in the income statistics is between, in Vance Packard's phrase, the "diploma elite" of college graduates and all the others. The former are distinctly advantaged.

This advantage of the diploma elite is increasing. Consequently, we are facing the likelihood in the United States of increasing income differentiation. The long-term decline in wage differentials between skilled and unskilled blue collar workers has been reversed in the last decade and the spread is increasing. The narrowing of the gap between white and blue collar workers has also been reversed. The income advantage of high-level white collar workers over low-level white collar workers is also increasing. These occurrences may be temporary reversals of the 1900-44 equalization trend, but the likelihood is that they are harbingers of long-term developments which will accentuate income inequality in the United States.

While there has been a pronounced general shoring up of income levels in the United States, high-income and especially middle-income families are improving more rapidly than low-income families.

Relative deprivation may become, therefore, more accentuated.

The Wastage

American society is suffering an enormous underutilization of human resources. John Miner, in a neglected book (Intelligence in the United States) has estimated that 85% of all those in unskilled labor have the capacity to do high level work. William V. Lockwood, in a doctoral dissertation at Johns Hopkins University ("Realism in Vocational Choice") gauged Baltimore high school students' occupational expectations against their occupational potentials, as judged by three knowledgeable judges. The surprising conclusions were that only 5% of the students were unduly optimistic, while 37% were aiming below their potential. At least one-third of all youth do not complete high school; the vast majority of them are intellectually capable of graduating from high school. These data reveal the wastage in American society. Changing the job prospects and possibilities of many low-income youth requires action at both national and community levels.

Two Types of Welfare States

In Britain, Titmuss and his associates have written of "the casualties of the welfare state", those who are getting inadequate help from the government to meet their needs. In this country, the high, sustained level of unemployment has been disturbing in that it has revealed that economic conditions will not improve mainly through the operation of the private economy without intensive efforts on the part of the federal government, efforts which appear to be politically unlikely. The recent rediscovery of "the other America", has shocked many into a recognition that our "welfare state" is not operating very

effectively. While we have a substantial poor, they are no longer a majority as they were in industrial life a century ago. Nontheless, there is little hope that they are rapidly declining in numbers and that their plight is being adequately handled by the various governmental assistance schemes. Indeed, "the other America" --Harrington's counterpart to Disraeli's depiction in the last century of the "two nations", divided by class, that made up England--raises severe doubts about whether we have a "welfare state" except in slogan.

The concept of welfare state is an amorphous one. It has been used to refer to a wide variety of nations and conditions: its implications are varied. To some, it seems to mean that "poverty", as defined by a particular society, has been eliminated; to others, the stress is on the willingness of the government to assume responsibility to alleviate the economic distress by providing funds and/or social services. To the extent that we can speak of the United States having a welfare state, it is that we have a limited commitment to do something about the impact of the market economy. Our welfare state does not attempt to regulate in great detail the operations of the private economy, though certainly more than formerly. While the Employment Act of 1946 charges the government with the responsibility in insuring that high-level employment occurs, the absence of action is shown by the effort of a group of economists to plan a conference with the theme, Implementing the Full Employment Act of 1946. The welfare state apparatus is primarily to clean and clear up some of the social debris produced by the operation of the private economy, rather than to prevent such debris from being created. One indication of this perspective is that it probably is easier to get appropriations for welfare assistance and the

like to youth than it is to secure legislation which will provide jobs for youth. The fear of inflation has supplanted the fear of unemployment and has overwhelmed attempts to do something effective about faltering growth and high unemployment, especially among youth and minority persons.

Political Directions

The likelihood of a redirection of national economic policy depends, to a large extent, on whether low-income groups become politically effective in insisting on change. A large-scale politicalization of the low income in the United States is a real possibility. Racial and ethnic factors are important among the poor, interweaving class (economic) issues of poverty with ethnic and racial issues. The intermeshing of these concerns may lead to the political mobilization of the poor. Mexican-Americans are becoming politically active and winning office; Negroes, a rapidly growing segment of the urban poor, are likely to be exercising more effective political citizenship rights. If political movements of the poor grow and are more sharply related to class as well as to ethnic issues, then the economic environment in which youth have to operate may change drastically.

Youth Employment Programs

One of the difficult problems of the present is to gauge with some precision what problems of youth are amenable to changes in the stance and behavior of professionals and their helping organizations and to what extent and what kind of national economic action is necessary.

Obviously, job opportunities have to increase if youth are to be employed but their increase does not automatically insure that jobs will

be available for low skilled, minority youth. With the changing occupational mix of industry and the dimunition of jobs for the low-skilled, the prospect may be that even a general overall increase in production will not bring about more jobs for youth of little skill. The existence of openings for skilled workers at the same time that many are unemployed underlines the absence of a rational, organized labor market. If those presently employed at limited jobs below their skill potential (as is true of a great variety of individuals in mass production and other industries) were to move up and obtain the more skilled jobs, then the jobs they vacated might be available for the young unskilled. But this is unlikely to happen because of the balkanization of labor markets, the absence of organized, structured recruitment and promotion procedures, the breaking of accumulated seniority reducing security and a host of other factors.

It may consequently be necessary to develop work programs specifically beamed at providing employment for low-skilled youth and coupling these programs with training so that these youth have a chance to break out of the cycle of low income, low education, low-level, insecure jobs breeding low income with its consequences.

Variation Among Youth

The variability among low-income youth is enormous and it is important to avoid stereotyping all of them into "hard-core unemployables." Many school dropouts of low skill are able to obtain fairly good jobs without any help; others, even though they find jobs or are placed on jobs by agencies are unable to keep them. Our studies in Syracuse suggest that the difficulty of these "hard-to-employ" youth is not

that they have values of anti-authority and anti-restraint which bar them from working smoothly in many places; indeed, they recognize, for example, that authority and punctuality are important. Their difficulties seem to be much more dealing with issues at a concrete level; for example, they recognize that a boss may have to criticize but they may find it difficult in practice to accept such criticism, for it seems frequently to be a personal indictment or perhaps indication of weakness to accept it without a strong response. Various kinds of training, sheltered experiences, may be necessary in order to make some low-income youth more permanently employable.

Robert Schrank has pointed out that many of the problems of low-income youth are age problems, that if they could be "aged" to 25, many of their difficulties in employment would be eliminated: employers would be more willing to hire them, they would be more accepting of the routine and demands of working. Is there a functional equivalent of aging that can be developed? Can youth learn to accept work more easily? And be more easily accepted for work?

## The Limits of Professionalism

One implication of the foregoing analysis is that the traditional operations of the professions oriented to youth will not be adequate. If the behavior of the economy is such as to limit the opportunities of youth, then the effectiveness of the remedial services of the professions is severely restricted. Existing services have the danger of "cooling out the mark" if they continue to operate as though they are of substantial help when, in actuality, they may be able to accomplish little or are effective with only very limited numbers of their clientele. This stricture

applies to vocational guidance personnel, school officials and teachers, psychologists offering therapy, and the like.

The changed nature of the economic setting--one which provides limited rather than broad chances for many--requires that the outlook of the "helping professions" be widened. Occupations have gained professional status by an interwoven process of expansion and concentration--expansion to claim that certain tasks are theirs exclusively, concentration by focusing on certain activities as central to the professional role. We are at a point where an expansion is needed in professional focus. Today, in many professions it is necessary to recognize how the matrix of the larger society is affecting (and frequently limiting) the operation of the profession. If one is concerned, for example, with improving guidance for low-income youth, one must be concerned with the limited opportunities that many face. And the profession as a profession should be in the forefront of active (including political) concern about these issues, just as many are about licensure provisions affecting the status of the members of the profession.

What seems to have happened in many professions that are presumably beamed at a clientele with many difficulties is that the profession has less and less dealt with those in greatest difficulty. Rather, the concentration is upon those who are already in more advantaged circumstances or upon those disadvantaged who have extremely good chances of moving in to middle class styles. (Recently, there does seem to be a counter-movement aiming at working with those in most dire straits, e.g., the "hard-to-reach", "multi-problems", "hard-core cases." In some situations, however, this movement seems to reflect a new "glamour" group and activity for the professional and ignores the wide range of youth and of the poor who are

not in the worse circumstances but needful of help.)

In general, the emphasis on the techniques and methods of the profession has led away from working with the disadvantaged. This is not because of repugnance with the disadvantaged (though for some professionals that may be a problem) but that in the nature of the changes in American economy and society, the effectiveness of these professional approaches and techniques is frequently limited or useless for the disadvantaged. It is a tragedy that the improvement in the quality of professional work has not directed the professions towards those who most need help.

For the professions to be more effective with the disadvantaged, important changes must take place in American life. And the professions as professional pressure groups should have a significant role in trying to promote action which would enhance the possibilities and opportunities of the disadvantaged.

Professionalism is having a negative role in another regard. The so-called "helping professions" are in great demand at the same time. Shortages of personnel are acute and growing. What is the response of many professions to this demand for more trained personnel? To upgrade standards of entrance into training and requirements for completion of training. The result is frequently to increase even further the shortage of skilled personnel. One cannot argue as such against having highly qualified people in professions. If the more highly trained people functioned so as to make it possible for more people to operate at some level in providing the services which concern the profession, then the improved training could meet the social need of increased personnel. Such a step would involve a finer graduation of activities so that the

professional task is broken down in to a series of tasks which less trained people could perform under the supervision of the more highly trained. But this is frequently not the case.

Another effect of the increased training is that it leads many professionals to want to respond to the prestige status of tasks as defined by the profession rather than to the social needs as defined by society. For example, as psychotherapy becomes treasured by social workers, less social workers become available for other kinds of tasks which do not involve this activity. Since there is a shortage of psychotherapists, the likelihood of moving out of other activities grows. The possibilities decline of recruiting staff mainly concerned with the needs of wide numbers of people.

Further, if only highly trained people are available, they are unwilling to perform the variety of tasks which may be important for youth. For example, a special experimental employment program had social workers who were in close contact with potential dropout students. One social worker reported that a girl was flunking out of school because of her deficient performance in shorthand classes. The supervisor inquired if the social worker knew shorthand. She did, but sharply and immediately refused the suggestion that she help the girl in shorthand. It would be "unprofessional" to provide this kind of direct aid. It may well be that such aid would have been undesirable, but the important thing is that there was not even consideration of the possibilities of direct aid in this particular case.

Frequently, highly trained professionals may not be willing to act as intercessors, as "fixers" to help youth over the bureaucratic hurdles,

when they have the training and capacity to do more subtle and sensitive operations.

Professions are in tension between their internal needs and development and the needs and demands of the community. Acceeding automatically to the demands of communities can be extremely detrimental to the effective development and behavior of a profession. Responding mainly or exclusively to the exigencies of the professions internal development and codes may lead to its becoming irrelevant and self-seeking. At various points one side or the other of the tension has been accentuated. In the post-war years the emphasis has been by and large on the internal professional development with limited concern for changing social needs. Less and less attention was paid in our "semi-affluent society" to those below the poverty line. Recently there has been criticism within many professions of the lack of attention to broader community problems, especially the inappropriateness or non-usufulness of many professional tactics and strategy for the "other America" of the poor. This tendency needs strengthening; particularly in terms of changing professional strategy and tactics so that the professions become more directly aimed at the target population of the poor.

## Conclusion

Melvin Herman has told me of a revealing incident: The work programs of Mobilization for Youth obtained work uniforms for neighborhood youth employed in various work projects. The uniforms were too large for the 16 and 17 year olds since it is impossible today to obtain work uniforms in the small sizes which fit youth.

Our society does not have a clearcut role for those who have been pushed or have pulled themselves out of school--they are frequently "too old for school, too young for work." If strong attempts are not made to find or make work for youth (including more effective training), then many will be direct charges to the state. Perhaps, alternative roles and routes may be developed but they are unlikely to occur without conscious effort. We are not failing in diagnoses and jeremiads but in concerted action.

Footnotes

[1]On-going research at the Syracuse University Youth Development Center on school dropouts and their prospects (supported by the Social Security Administration and the New York State Division for Youth) and on the problems of poverty underlines many of the conclusions reported here. The work of my colleagues, Betty Saleem and Ira Harrison, has been particularly stimulating. Some of the ideas presented here have developed in my role as a consultant to Mobilization for Youth where I have had intensive discussions with the heads of its World of Work programs--Melvin Herman, Robert Schrank, and Martin Moed. I am, of course, alone responsible for the formulations of the present paper.

[2]The age at which adjustments have to be made may be important, though the notion of the decline with age of versatility or flexibility undoubtedly has been overstressed.

[3]Harold Wilensky has analyzed work lives and has argued that professionals have less time for leisure than blue collar workers. Among other reasons, he argues that workers are frequently unemployed (i.e., not working) during their work careers while professionals are continuously employed. Nels Anderson (Work and Leisure) has suggested that not working because one is unemployed is not the same thing as having leisure time above and beyond the work time.

SEPTEMBER 1964

# HUMAN RELATIONS NEWS OF CHICAGO

Vol. 6 Employment No. 5

PUBLISHED PERIODICALLY BY THE CHICAGO COMMISSION ON HUMAN RELATIONS

## 8 Skilled Trades Admit First Negroes

Negroes have been admitted into eight skilled trades in the Chicago area that previously had no Negro members.

These breakthroughs have taken place since the first of 1963, according to Jim Burns, coordinator of the investigations and law enforcement division of the Chicago Commission on Human Relations.

Burns, who directs the Commission's intensive program in the building trades, said recent developments indicate the admittance of Negroes to trade unions seems to be on the upswing.

Since the first of 1963, Negroes have become the following:

- An apprentice tilesetter, a member of Tile Layers and Helpers—Mosaic and Acoustical, Local 25.
- An apprentice architectural ironworker, in the Architectural and Ornamental Iron Workers Union, Local 63.
- Two apprentice sprinkler fitters, in the Sprinkler Fitters and Apprentices Union, Local 281.
- Two apprentice pipe coverers in the Heat, Frost Insulators and Asbestos Workers Union, Local 17.
- Two sheet metal workers, who are currently employed and who are scheduled to take trade entrance examinations on October 15.
- Four elevator constructor helpers, in Elevator Constructors Local 2, who have been hired by Westinghouse and Otis Elevator.
- Operating engineer, a member of International Union of Operating Engineers, Local 150, who has been promoted by the City of Chicago.
- An oiler, in training to be an operating engineer, a member of International Union of Operating Engineers, Local 150, also hired by the City.
- A machine shop apprentice, in training at Washburne Trade School.

Negroes are on the waiting lists for indentureship in the following unions for the first time: Bridge and Structural Ironworkers, Local 1; Pipefitters Association, Local 597, and Composition Roofers, Local 11.

## Commission Seeks Nominees For Human Relations Awards

It's time once again to nominate candidates for the Chicago Commission on Human Relations annual awards in human relations.

Awards are given annually by the Commission to individuals and organizations that have made outstanding contributions to the improvement of human relations in Chicago.

A special award, a memorial to the late Thomas and Eleanor Wright, is given to a professional human relations worker. Mr. Wright was at one time executive director of the Commission and his wife was director of public information.

"We need your help in locating those who deserve to be so honored," Lee Schooler, chairman of the awards committee, said. "Your nominations are the basis for selections. We invite you to send us your choices for the awards on nomination forms available from the Commission."

Entry forms can be obtained from the Commission, Room 1310, 211 West Wacker Drive, Chicago, Illinois 60606, telephone 236-4912. Nominations must be in the Commission office by Monday, October 5.

The awards will be presented at the Commission's Nineteenth Annual Awards Luncheon which will be held at noon Wednesday, December 2, in the Grand Ballroom of the Sherman House.

Those eligible for an award are any business or industrial enterprise, any civic or community organization, religious institution, organ of communication, government department, trade union, or any individual who has made an outstanding contribution to good human relations in Chicago. Human relations agencies and organizations are not eligible.

Schooler, who is president of the Public Relations Board, Inc., heads the committee of 13 who will select the winners.

Members of the committee are: Charles A. Davis, of Charles A. Davis and Associates; the Rev. William E. Hogan, of St. Martin Church; Howard G. Mayer, of Mayer and O'Brien, Inc.; Sister Mary Ann Ida, of Mundelein College; Attorney Lewis Manilow; Irwin Klass, of

*(Continued on Page 4)*

*The Mayor's Committee on New Residents' eight-panel, revolving exhibit on the volunteer tutoring program in Chicago is currently in the main corridor of City Hall where it will remain until September 28. In photo at left, Robert C. McNamara, Jr., left, chairman of the Mayor's Committee, discusses one of the photographs on the exhibit with Miss Adrienne Griffin and Miss Helen Beck, volunteer tutors at Hyde Park Neighborhood Club Center. Miss Griffin is a personnel counselor at Star Employment Service. Miss Beck is a teacher at Burke Elementary School. In photo at right, Miss Carol Scalamera, a junior at the Art Institute of Chicago, and Leonard Greetis, an actuarial technician for Continental Assurance Company, view the display. Both are volunteer tutors at centers directed by Chicago Area Lay Movement; Miss Scalamera at Our Lady of Sorrows parish and Mr. Greetis at St. Agatha parish. After September 28, the exhibit will be in the Museum of Science and Industry.*

# CIC to Honor M. L. King

Dr. Martin Luther King, Jr., will receive the Catholic Interracial Council of Chicago's 1964 John F. Kennedy Award.

Dr. King, president of the Southern Christian Leadership Conference, will be given the award at the CIC's annual benefit dinner to be held October 29 at the Pick-Congress Hotel.

Edward M. Kralovec, Jr., president of the Catholic Interracial Council, said Dr. King will receive the award as a tribute to his distinguished leadership on behalf of the dignity of all men.

## Lawyers Volunteer to Serve As Defense Counsel in Rights Cases

American Jewish Congress, Council of Greater Chicago, has announced that a group of lawyers have volunteered to serve as defense counsel in litigation arising from civil rights activity in this area and in the South.

Paul H. Vishny, president, said 21 lawyers have indicated a desire to make themselves available to serve as trial lawyers, or in a research capacity, to indigent defendants in such litigation.

Maurice Klinger, executive director of the Congress, asks that persons and organizations that know of such cases advise the Congress office, 22 W. Monroe Street, telephone 332-7355.

# *Annual High School Press Conference Set for Oct. 12*

The fourth annual Chicago Commission on Human Relations press conference for high school students will be held from 10 a.m. to 1:30 p.m. October 12 in the Prudential Building auditorium at Prudential Plaza.

Student editors and student council presidents from city and county public, private, and parochial schools have been invited to attend the event.

Hale Nelson, a member of the Chicago Commission on Human Relations and a vice president of Illinois Bell Telephone Company, will serve as conference chairman.

Ely M. Aaron, Commission chairman, other Commission officials and staff members, will report on the status of human relations in Chicago today. Students will have an opportunity to question the officials.

The conference will subdivide into smaller workshops on such areas of Commission work as housing, education, civil rights, health, aid to newcomers, and employment. In each of these workshops, students will have an opportunity for intensive questioning of Commission staff.

A buffet luncheon will be served the pupils.

A contest for the best news story or editorial on human relations will be held following the conference. Last year, four high school seniors won the contest and were honored at a regional dinner meeting of Sigma Delta Chi, national professional journalism society.

# Record More 'Firsts' In Jobs for Non-Whites

Chicago Commission on Human Relations records show that since the first of 1964, numerous business firms throughout the city have hired Negro men and women for positions—mostly white-collar—never before filled by them.

The Commission has assisted in many of these placements, along with other government and private agencies.

The firms and the positions include:

Sinclair Refining Company, 155 N. Wacker Drive, hired a Negro secretary in May and now employs 12 Negro white collar workers.

Acme Steel Company, 135th Street and Perry Avenue, hired two Negro secretaries—one in industrial relations and another in the safety department.

United States Steel Corporation and its division American Bridge, 208 S. La Salle Street, has hired 19 Negroes for white collar jobs.

Chicago Teachers Pension Fund, 228 N. LaSalle Street, hired a Negro woman as a counsellor on retirement plans.

Stop & Shop, 16 W. Washington Street, hired a Negro management trainee.

Material Service Division of General Dynamics Corporation, 300 W. Washington Street, hired a Negro as a dispatcher.

Beverly Bank, 1357 W. 103rd Street, hired a Negro teller trainee.

Sherman House, Clark and Randolph Streets, hired a Negro desk clerk.

Lambrecht Food Company, 2334 N. Kilbourne Avenue, hired a Negro receptionist.

Seymour Richards Construction Company, 7127 N. Clark Street, hired two carpenter apprentices.

Borg-Warner Corporation, 200 S. Michigan Avenue, hired a Negro secretary in the sales department, and later hired five more Negroes in various departments of the office.

Inland Steel Company, 30 W. Monroe Street, hired two Negroes as engineer trainees working on their fleet of Great Lakes ore boats.

Quaker Oats Coporation, with offices in the Merchandise Mart, hired a Negro secretary in its public relations department.

Fred S. James and Company, insurance, 1 N. LaSalle Street, hired a Negro clerk-typist.

Skil Corporation, 5033 N. Elston Avenue, hired a Negro secretary in industrial relations.

James Lyon Company, 310 S. Peoria Street, hired a Negro plasterer, truck driver and carpenter apprentice.

American National Bank, 33 N. LaSalle Street, hired 12 Negroes this year in various white collar capacities.

Pullman Bank and Trust Company, 400 E. 111th Street, hired two Negro tellers, a secretary and an office clerk.

# 20 Cities Adopt Fair Housing Laws in Past 17 Months

Twenty-four cities and fourteen states throughout the nation now have fair housing practices laws, a continuing survey by the Chicago Commission on Human Relations reveals.

Twenty of these cities, including Chicago, and two states, adopted fair housing legislation since April 1, 1963.

The cities are: Akron, Ohio; Albuquerque, N. M.; Ann Arbor, Mich.; Beloit, Wis.; Chicago; Des Moines, Ia.; Duluth, Minn.; East St. Louis, Ill.; Erie, Penna.; Grand Rapids, Mich.; Indianapolis, Ind.; Madison, Wis.; New Haven, Conn.; New London, Conn.; Peoria, Ill.; Philadelphia, Penna.; St. Louis, Mo.; Schenectady, N. Y.; Washington, D. C., and Yellow Springs, Ohio.

The four cities that earlier passed fair housing practices ordinances are: New York City; Pittsburgh, Penna.; Toledo and Oberlin, Ohio.

Fair housing practices legislation takes consideration of race or religion out of the housing market.

The two states in which fair housing legislation was passed in the last seventeen months are California, whose law became effective September 20, 1963, and Michigan, by virtue of a new state constitution which went into effect at the first of 1964.

King County, Washington, adopted a fair housing practices law which went into effect March 3, 1964.

The City Council of Freeport, Ill., adopted on November 5, 1963, a resolution urging fair housing practices.

Three cities adopted laws which are limited to outlawing "panic peddling." They are: Kansas City, Mo., effective January 20, 1964; Buffalo, N. Y., enacted January 7, 1964, and Wichita, Kan., effective June 5, 1964. Four other cities adopted "panic peddling" laws earlier.

"Panic peddling" is the term used to describe the process of exploitation of racial prejudices by real estate brokers in an effort to obtain property listings from white homeowners in a racially changing neighborhood.

Copies of the original fair housing survey, "A Report to the Mayor and the City Council of Chicago on the Present Status and Effectiveness of Existing Fair Housing Practices Legislation in the United States as of April 1, 1963," and the latest memorandum, are available from the Commission, 211 West Wacker Drive, Chicago, Illinois 60606.

*The Volunteer Tutoring Program August 1964 Supplement*
*You and Chicago*, English and Spanish editions

## Fair Housing Handbook

A "Fair Housing Handbook" has just been published by the American Friends Service Committee and the National Committee Against Discrimination in Housing.

"A practical manual for those who are working to create and maintain inclusive communities," the handbook contains guidelines and program activities for those who wish to organize a local fair housing committee, and for new groups which may feel a need for guidance.

The book states that the number of voluntary citizens groups working for fair housing practices grew from 18 in 1959 to approximately 400 in 1964.

Copies are available from the National Committee Against Discrimination in Housing, 323 Lexington Avenue, New York 16, N. Y. Single copies cost 50 cents each; in quantities of 100 or more, 35 cents each.

## Study Metropolitan Chicago

A course designed for persons who have a civic or professional interest in the Chicago metropolitan area will be given at the University of Chicago downtown center, 64 E. Lake Street, from 7 to 9 p.m. beginning Monday, October 5.

Entitled "Metropolitan Chicago," it will seek to place the current problems of the city and the region into the perspective of long-range development, past as well as future.

Professor Harold M. Mayer of the department of geography, formerly research director for the Chicago Plan Commission, is in charge.

OFFICE OF THE MAYOR

CITY OF CHICAGO

RICHARD J. DALEY
MAYOR

To The People of Chicago:

Our city has risen to greatness through the vigor and the spirit of millions of people from all parts of the globe. Their ambitions, their hopes and their ideals brought these people to Chicago where a climate of democratic freedom has permitted them to grow, along with the city.

We are determined that the rights and privileges and opportunities of all the citizens of Chicago shall be protected equally. The Chicago Commission on Human Relations is an official arm of the city government created to see that no individual or group is the victim of unfair treatment for reason of race, religion or place of birth. The city administration stands firmly behind this purpose and program.

Sincerely,

RICHARD J. DALEY
Mayor

# COMPLAINTS

**Take your complaint to the**
**CHICAGO COMMISSION ON HUMAN RELATIONS**

However, before making a complaint, there are several basic steps which should be taken when you believe you have been discriminated against because of your race, religion or nationality.

1. **Get the names and exact addresses** of those you believe to be guilty of discrimination. For example, the names of business organizations or companies, real estate brokers, public or private institutions or agencies. Get the name of the person who refused to employ you or refused service to you in a restaurant, tavern, theater, hotel, etc. If you have been refused emergency treatment in a hospital get the name of the doctors, nurses or clerks involved. If a real estate broker has refused service to you, get his name. If you have been refused admission to a private school, get the name of the principal, dean, or clerk refusing you.

2. **Gather evidence**—any evidence that seems important to you. Describe what happened in detail. Write down the job for which you applied and your qualifications for it. If the complaint involves a public place, record whether there were empty seats, tables or hotel rooms. Indicate if there was an attempt to charge you more than the regular charge. In all cases include any statements made by those you believe guilty of discriminating against you.

3. **Keep, and have ready for use, all written evidence** including letters, printed material, and statements by those involved. If you have written in advance for reservations or for admission to a hospital or school and received a reply, keep it as part of the evidence.

4. **You can call and ask for help from the Police Department** in a public accommodation

complaint—they can help you.

5. **Remember—report your complaint to the Chicago Commission on Human Relations.** You can call any time of the day or night—the Commission has 24-hour telephone service. A complaint under the Chicago Fair Housing ordinance must state the name and address of the person making the complaint and of the persons you believe to be guilty of discrimination. Give the facts concerning the alleged violation of the ordinance. It must be written and signed. There is a variety of city, state and federal ordinances, laws and executive orders which deal with civil rights matters. If you think your rights have been violated you may not know which law or which government agency is involved. The staff of the Chicago Commission will refer you to the proper person or agency.

# RESPONSIBILITIES OF PUBLIC OFFICIALS

The Chicago Commission on Human Relations has jurisdiction within the city. The Illinois Commission on Human Relations operates throughout the state. The Illinois Fair Employment Practices Commission has jurisdiction in cases of employment discrimination anywhere in the state.

In general, it is the duty of the attorney general or the state's attorney in the county where the offense occurred to prosecute an offender as the law provides.

Some of the laws and administrative rulings in this book, however, specify other agencies or officers to carry out enforcement procedure. So you will make no mistake in informing the right public office, call the Chicago Commission on Human Relations.

# PUBLIC PLACES

(privately owned)

## do you know that

Under the Illinois civil rights law all persons without regard to race, color, creed, or national ancestry are entitled to full and equal enjoyment of all public transportation operating under public license; all places of public accommodation such as restaurants, hotels, taverns, cafes; all stores where merchandise is sold; all service establishments such as barber shops, and rest rooms; all public places of recreation such as theaters, skating and bicycle rinks, golf driving ranges, public golf courses, and swimming pools.

Persons violating this law by denying to others full and equal enjoyment of these places may be arrested for each offense; and, upon conviction, may be fined any amount up to one thousand dollars ($1,000) or imprisoned for a period not greater than six months, or both.

The law requires the state's attorney or the attorney general to take steps to halt the discrimination or to prosecute the offender in the name of the state.

Also a civil suit may be started. If the offender is found guilty, the court must order the payment of from one hundred ($100) to one thousand dollars ($1,000) to the person against whom the discrimination was directed.

Licenses to sell alcoholic beverages may be revoked if a tavern keeper or other license holder permits race or color discrimination.

• **For Legal Reference See Page 17**

# PUBLIC PLACES

(publicly owned)

## do you know that

All facilities under the care of the city, park district, county, or state are open to full and equal use by all persons without regard to race, color, or religion. This includes services offered to the general public in city halls, county buildings, and state buildings. It also includes all services and facilities offered in public educational institutions and services rendered by city fire departments, street cleaning units, garbage disposal units, and the like.

It is unlawful for any public employee to compel people, because of their race, color or religion, to confine their recreational activities to any specific public park, forest preserve district, beach, or playground, or to specific portions of such public areas.

If any employee of the state, county, or city is found guilty of practicing discrimination, the head of the department, or agency, must discharge the offender. If he fails to discharge the offender, the person discriminated against can file a complaint for enforcement in the circuit court of the county in which the offender is employed. If the offender is an appointed head of a department, the law requires that he be discharged by the officer who appointed him.

• **For Legal Reference See Page 17**

# EMPLOYMENT

## do you know that

Discrimination because of race, color, creed, national origin or ancestry is forbidden in employment by the City of Chicago, the State of Illinois, and the United States government, and in companies holding contracts with them; and, in Illinois, by a large number of private employers, employment agencies and labor unions.

### UNITED STATES GOVERNMENT

The President's Committee on Equal Employment Opportunity, established in 1961, recommends steps which should be taken by executive departments and agencies to realize more fully the national policy of nondiscrimination within the executive branch of the government.

In addition, it provides that all contracts with business organizations made by the federal government shall include an agreement by the contractor not to discriminate against any employee or applicant for employment because of race, creed, color, or national origin.

• **For Executive Order See Page 21**

### STATE OF ILLINOIS

Strong and broad protection is given workers by the Illinois Fair Employment Practices Act. The measure prohibits discrimination in employment because of race, color, religion, national origin or ancestry. The law applies to employers, State of Illinois government bodies, employment agencies, and labor unions.

• **For Legal Reference See Page 25**

No person may be refused employment or be discriminated against because of race or color, in the course of any employment, work, or

service performed for the state or a political subdivision of the state.
This law forbids discrimination by public officers, and by private contractors and subcontractors who perform work for the state. The provisions of the statute automatically become a part of any contract or agreement to perform public work. For each calendar day of discrimination and for each person discriminated against, the state or the political subdivision concerned must subtract five dollars ($5) from the amount due the contractor. Under this law, any person discriminated against may file civil suit for damages against the persons who take part in the discrimination. For each act of discrimination, damages may be from one hundred ($100) to five hundred dollars ($500).
In criminal proceedings, the offender may be fined from one hundred ($100) to five hundred dollars ($500) or imprisoned from 30 to 90 days, or both fined and imprisoned.

• **For Legal Reference See Page 29**

**STATE CIVIL SERVICE.**

No questions in any State Civil Service examination may relate to religious opinions or affiliations.
A penalty of from fifty dollars ($50) to one thousand dollars ($1,000) or imprisonment up to six months or both may be imposed upon any person who willfully or through culpable negligence violates this provision of the Civil Service Act.

• **For Legal Reference See Page 30**

**TEACHERS.**

It is illegal in Illinois for a school board member or employee to inquire into the race, religion or religious affiliation of a teacher or teacher applicant.

• **For Legal Reference See Page 31**

**HOUSING CORPORATIONS.**

No housing corporation organized under the State Housing Act nor any contractor employed by it may deny employment to any person because of race, creed, or color.
Discrimination under this law requires the State Housing Board to file a complaint in the Circuit Court to stop or prevent it.

• **For Legal Reference See Page 31**

## CITY OF CHICAGO

By ordinance, it is unlawful in the City of Chicago for any city department, official, or employee to refuse employment to any person because of his race, color, creed, national origin, or ancestry, or to discriminate in any way as to terms or conditions of employment. Nor may any person, for such reason, be denied

promotion or salary increases, or otherwise penalized. Violators may be fined up to two hundred dollars ($200).
Under a clause in his contract with the City every contractor and subcontractor is forbidden to discriminate against any employee or applicant for employment because of race, color, creed or national origin.

• **For Legal Reference See Page 32**

**TAXI DRIVERS.**

There shall be no discrimination against taxi drivers because of race, color, creed, religion, national origin or ancestry with respect to hire, promotion, tenure, terms, conditions and places of employment.

• **For Legal Reference See Page 33**

# HOSPITALS

## do you know that

Chicago hospitals are prohibited from discriminating on the basis of race, creed, color, or national origin in the admission of persons, employment of physicians, and appointment of medical staffs. Any hospital, or hospital official, violating the anti-discrimination amendment of the hospital ordinance, or which fails to post the penalties for violation of them in the proper places, is subject to a fine of from one hundred ($100) to two hundred dollars ($200).

• **For Legal Reference See Page 33**

A state law requires hospitals to give emergency medical treatment or first aid to any person who has been injured in an accident or who suffers from an acute medical condition which could result in death, severe injury, or serious illness.

• **For Legal Reference See Page 34**

# SCHOOLS

## do you know that

Persons excluding, or helping to exclude, because of color, any child entitled to the benefits of the public schools are subject to being fined from five dollars ($5) to one hundred dollars ($100). Also, anyone who, by threats or intimidation, prevents any child because of his color from attending any public school which he is entitled to attend, is subject to a fine up to twenty-five dollars ($25). It is unlawful for any public Board of Education to exclude any pupil from any school, or to segregate any pupil, because of his color, race or nationality. The Illinois Department of Registration and Education has the responsibility of determining which schools preparing students for certain trades, professions or occupations are to be considered as reputable and in good standing. No such school or college is to be considered reputable and in good standing if it refuses to admit applicants solely because of color.

• **For Legal Reference See Page 35**

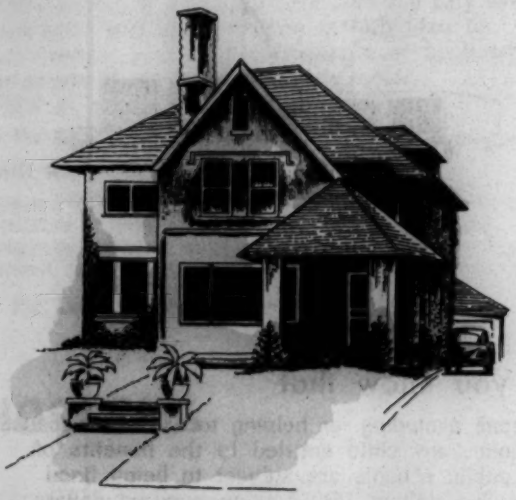
School boards are required from time to time to change attendance units or create new units in a manner which will take into consideration the prevention of segregation and the elimination of separation of children in public schools because of color, race or nationality.

• **For Legal Reference See Page 35**

The Illinois Private Business School Board may refuse to issue a certificate of approval or permit or may revoke a permit of any school which refuses to admit applicants solely on account of race, color or creed.

• **For Legal Reference See Page 36**

# HOUSING



## do you know that

Discrimination on the grounds of race, creed, color, national origin or ancestry is forbidden in all federally owned and some federally assisted housing, and is forbidden in the sale and rental by real estate brokers of residential real estate in the city of Chicago.

Executive orders by the President of the United States forbid discrimination in all public housing and in properties repossessed by the Veterans Administration or by the Federal Housing Administration.

• **For Executive Order See Page 41**

The Chicago Fair Housing Ordinance forbids "panic peddling" and bars discrimination by real estate brokers in the sale or rental of residential real estate for reasons of race, creed, color or national origin. The ordinance declares it to be the policy of the city of Chicago to assure full and equal opportunity to all residents of the city to obtain fair and adequate housing without discrimination.

• **For Legal Reference See Page 37**

# LEGAL REFERENCES

## public places and services both publicly and privately owned

### VIOLATION OF CIVIL RIGHTS

**Chapter 38—Illinois Revised Statutes (Excerpts)**
**13-1. Definitions.)**

(a) **Public Place of Accommodation or Amusement.** A public place of accommodation or amusement includes: inns, restaurants, eating houses, hotels, soda fountains, soft drink parlors, taverns, roadhouses, barber shops, department stores, clothing stores, hat stores, shoe stores, bathrooms, restrooms, theaters, skating rinks, public golf courses, public golf driving ranges, concerts, cafes, bicycle rinks, elevators, ice cream parlors or rooms, railroads, omnibusses, busses, stages, airplanes, street cars, boats, funeral hearses, crematories, cemeteries, and public conveyances on land, water, or air, public swimming pools, and other places of public accommodation and amusement.

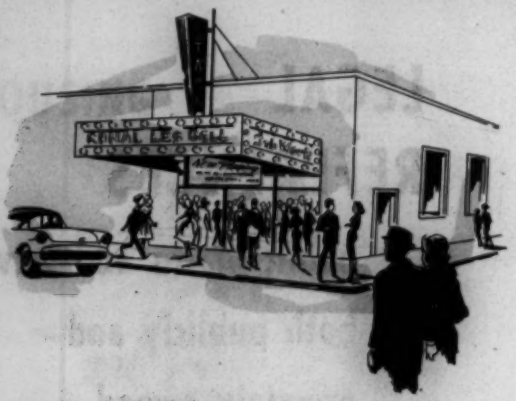
(b) **Operator of a Public Place of Accommodation or Amusement.** An operator of a public place of accommodation or amusement is any owner, lessee, proprietor, manager, superintendent, agent, or occupant of the public place of accommodation or amusement, or an employee of any such person or persons.

(c) **Official.** An official is any officer or employee of the State of Illinois or any agency thereof, including state political divisions, municipal corporations, park districts, forest preserve districts, educational institutions and schools.

**13-2. Elements of the Offense.)**
**A person commits a violation of civil rights when:**

(a) He denies to another the full and equal enjoyment of the facilities and services of any public place of accommodation or amusement because of race, religion, color or national ancestry; or

(b) He, as the operator of a public place of accommodation or amusement, directly or indirect-



ly, publishes, circulates, displays or mails any written communication, except a private communication sent in response to a specific inquiry, which he knows is to the effect that any of the facilities of the public place of accommodation or amusement will be denied to any person because of race, religion, color, or national ancestry or that the patronage of a person is unwelcome, objectionable, or unacceptable for any of those reasons; or

(c) He, as an official, refuses to employ, or discriminates in the employment of another for any work relief project because of race, religion, color, or national ancestry; or

(d) He, as an official, denies or refuses to any person the full and equal enjoyment of the accommodations, advantages, facilities or privileges of his office or services or of any property under his care because of race, religion, color, or national ancestry.

13-3. Sanctions.)

(a) **Criminal Penalty.** A person convicted of a violation of civil rights may be fined not to exceed one thousand dollars ($1000), or may be imprisoned not more than six months, or both.

(b) **Suit for Damages.** Any operator of a public place of accommodation or amusement who commits a violation of civil rights shall be liable to the person aggrieved thereby for not less than one hundred dollars ($100) nor more than one thousand dollars ($1000) to be recovered in an action at law in any court of competent jurisdiction.

(c) **Enjoining as Public Nuisance.** Any public place of accommodation or amusement in which a violation of civil rights occurs is a public nuisance which may be abated in the manner provided by law for the abatement of public nuisances. The operator of any such public place of accommodation or amusement shall be deemed guilty of maintaining a public nuisance and may be enjoined as hereinafter provided.

(d) **Discharge of Officials.** Any violation of civil rights by an official may be reported, in writing, to the head of the department or agency in which the official committing said violation is employed. It shall be his duty to investigate the complaint thoroughly. If he determines that a violation has been committed, he shall immediately discharge the guilty official if said official is not employed under civil service law. If said official is employed under civil service law, then the head of the department or agency in which such offending official is employed shall file or cause to be filed with the proper person the proper and necessary papers, charging such official with a violation of civil rights. Said papers filed shall be in conformity with the provisions of the Civil Service Act, under which such official is employed. If the head of the department or agency determines no violation has been committed, he shall so notify the complainant by registered mail.

(1) **Petition to Circuit Court.** Where no violation is found by the head of the proper department or agency, the aggrieved party may file a petition in the Circuit Court of the county wherein the official complained of is employed. Such official and the department agency head shall be named as respondents. . . . The head of the department or agency shall be bound by the court's decision and may be held in contempt for failure to obey the same.

(2) **Violation of Court's Order.** Whenever any appointed head of a department or agency violates the provisions of this section or refuses to abide by the courts' decision, he shall be removed from office by the officer who appointed him.

13.4 **Enforcement.)**

(a) **Responsibility for Enforcement.** It shall be the duty of all state, county, and municipal officials to cooperate in the enforcement of this Article. If any sheriff, deputy sheriff, chief of police, marshal, policeman, constable, or other peace officer shall have knowledge or information of any violation of any provision of this Article, he shall diligently investigate and secure evidence of the same and shall, before the proper officer, make and sign a complaint against the offending person, anything in the ordinance or by-laws of any municipality to the contrary notwithstanding.

**LIQUOR CONTROL ACT**

**Chapter 43—Illinois Revised Statutes (Excerpts)**

**133. Civil rights in licensed premises.)**

No licensee licensed under the provisions of this Act shall deny or permit his agents and employees to deny any person the full and equal enjoyment

of the accommodations, advantages, facilities and privileges of any premises in which alcoholic liquors are authorized to be sold subject only to the conditions and limitations established by law and applicable alike to all citizens.

149. Revocation of local license.)

The local liquor control commissioner may revoke or suspend any license issued by him if he determines that the licensee has violated any of the provisions of this Act or of any valid ordinance or resolution enacted by the particular city council, president, or board of trustees or county board (as the case may be) or any applicable rule or regulations established by the local liquor control commissioner or the state commission which is not inconsistent with law.

## DISCRIMINATION BY CONCESSIONS

### Chapter 105—Illinois Revised Statutes (Excerpts)

468.1. Discrimination by concessions on account of race, etc.)

It shall be the duty of the governor and the director of the department in charge of the administration of this Act to cancel immediately the lease on any concession when the person holding the concession or an employee thereof discriminates on the basis of race, color or creed against any patron thereof.

## CIVIL RIGHTS

### Chapter 199A—Municipal Code of Chicago (Excerpts)

1. All persons within the jurisdiction of the City of Chicago shall be entitled to the full and equal enjoyment of the accommodations, advantages, facilities and privileges of inns, restaurants, eating houses, soda fountains, soft drink parlors, taverns, roadhouses, barber shops, department stores, clothing stores, hat stores, shoe stores, bathrooms, restrooms, theaters, skating rinks, public golf courses, public golf driving ranges, concerts, cafes, bicycle rinks, elevators, ice cream parlors or rooms, railroads, omnibusses, busses, stages, aeroplanes, street cars, boats, funeral hearses and public conveyances on land, water, or air, and all other places of public accommodations and amusement subject only to the conditions and limitations established by laws and applicable alike to all citizens; and there shall not be any discrimination on account of race or color in the sale of lots or graves or in the price to be charged and paid for lots or graves in any cemetery or place for burying the dead nor in the use of cemeteries or crematories.

3. Any person violating any of the provisions of this ordinance shall be fined not more than two hundred dollars ($200) for each offense, and a separate and distinct offense shall be considered as having been committed for each and every day on which any person shall be guilty of any such violation.

# employment

## THE PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY

### EXECUTIVE ORDER 10925 as amended (Excerpts) Establishing the Committee

**WHEREAS discrimination because of race, creed, color, or national origin is contrary to the constitutional principles and policies of the United States; . . .**

**NOW, THEREFORE, by virtue of the authority vested in me as President of the United States by the Constitution and statutes of the United States, it is ordered as follows:**

**PART I—Establishment of the President's Committee on Equal Employment Opportunity**

101. There is hereby established the President's Committee on Equal Employment Opportunity.

**PART II—Nondiscrimination in Government Employment**

201. The President's Committee on Equal Employment Opportunity established by this order is directed immediately to scrutinize and study employment practices of the government of the United States, and to consider and recommend additional affirmative steps which should be taken by executive departments and agencies to realize more fully the national policy of nondiscrimination within the executive branch of the government.

**PART III—Obligations of Government Contractors and Subcontractors**

**SUBPART A—Contractors' Agreements**

301. (as amended) except in contracts exempted in accordance with section 303 of this order, all Government contracting agencies shall include in every Government contract hereafter entered into the following provisions:

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, creed, color, or national origin. Such action shall include, but not be

limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this non-discrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order No. 10925 of March 6, 1961, as amended, and of the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

(5) The contractor will furnish all information and reports required by Executive Order No. 10925 of March 6, 1961, as amended, and by the rules, regulations, and orders of the said Committee, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Committee for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be cancelled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 10925 of March 6, 1961, as amended, and such other sanctions may be imposed and remedies invoked as provided in the said Executive Order or by rule, regulation, or order of the President's Committee on Equal Employment Opportunity, or as otherwise provided by law.

(7) The contractor will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the President's Committee on Equal Employment Opportunity issued pursuant to section 303 of Executive Order No. 10925 of March 6, 1961, as amended, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided, however,* that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

**SUBPART C—Powers and Duties of the President's Committee on Equal Employment Opportunity and of Contracting agenices**

**309.** (a) The Committee may itself investigate the employment practices of any government contractor or subcontractor, or initiate such investigation by the appropriate contracting agency or through the secretary of labor, to determine whether or not the contractual provisions specified in Section 301 of this order have been violated. Such investigation shall be conducted in accordance with the procedures established by the Committee, and the investigating agency shall report to the Committee any action taken or recommended.

(b) The Committee may receive and cause to be investigated complaints by employees or prospective employees of a government contractor or subcontractor which allege discrimination contrary to the contractual provisions specified in Section 301 of this Order. The appropriate contracting agency or the secretary of labor, as the case may be, shall report to the Committee what action has been taken or is recommended with regard to such complaints.

**310.** (a) The Committee, or any agency or officer of the United States designated by rule, regulation, or order of the Committee, may hold such hearings, public or private, as the Committee may deem advisable for compliance, enforcement, or educational purposes.

(b) The Committee may hold, or cause to be held, hearings in accordance with subsection (a) of this section prior to imposing, ordering, or recommending the imposition of penalties and sanctions under this order, except that no order for debarment of any contractor from further government contracts shall be made without a hearing.

311. The Committee shall encourage the furtherance of an educational program by employer, labor, civic, educational, religious, and other nongovernmental groups in order to eliminate or reduce the basic causes of discrimination in employment on the ground of race, creed, color, or national origin.

**EXECUTIVE ORDER 11114 (Excerpts)**
**Extending the Authority of the Committee**

Whereas it is the policy of the United States Government to encourage by affirmative action the elimination of discrimination because of race, creed, color, or national origin in employment on work involving Federal financial assistance, to the end that employment opportunities created by Federal funds shall be equally available to all qualified persons; . . .

Now, therefore, by virtue of the authority vested in me as President of the United States by the Constitution and statutes of the United States, it is ordered as follows:

**PART I—Non-Discrimination Provisions in Federally Assisted Construction Contracts**

101. Each executive department and agency which administers a program involving Federal financial assistance shall, insofar as it may be consistent with law, require as a condition for the approval of any grant, contract, loan, insurance or guarantee thereunder which may involve a construction contract that the applicant for Federal assistance undertake and agree to incorporate, or cause to be incorporated, into all construction contracts paid for in whole or in part with funds obtained from the Federal Government or borrowed on the Credit of the Federal Government pursuant to such grant, contract, loan, insurance or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance or guarantee, the provisions prescribed for Government contracts by section 301 of Executive Order No. 10925 or such modification thereof, preserving in substance the contractor's obligations thereunder. . . . Each such applicant shall also undertake and agree (i) to assist and cooperate actively with the administering department or agency and the Committee in obtaining

the compliance of contractors and subcontractors with said contract provisions and with the rules, regulations, and relevant orders of the Committee, (ii) to obtain and to furnish to the administering department or agency and to the Committee such information as they may require for the supervision of such compliance, (iii) to enforce the obligations of contractors and subcontractors under such provisions, rules, regulations, and orders.

## FAIR EMPLOYMENT PRACTICES

### Chapter 48—Illinois Revised Statutes (Excerpts)

**851. Declaration of Policy.)**

Whereas denial of equal employment opportunity because of race, color, religion, national origin, or ancestry with consequent failure to utilize the productive capacities of individuals to the fullest extent deprives a portion of the population of the state of earnings necessary to maintain a reasonable standard of living, thereby tending to cause resort to public charity and may cause conflicts and controversies resulting in grave injury to the public safety, health and welfare:

Therefore, it is declared to be the public policy of this state that without in any way precluding any employer from selecting between persons of equal merit, ability, and capabilities, equal employment opportunity or apprenticeship opportunity without discrimination because of race, color, religion, national origin, or ancestry should be protected by state law.

It is also the public policy of this state to protect employers, labor organizations and employment agencies from unfounded charges of discrimination.

**852. Definitions.)**

When used in this Act, unless the context otherwise requires, the term:

(a) "Commission" means the Fair Employment Practices Commission created by this Act.

(b) "Complainant" means any individual charging on his own behalf to have been personally aggrieved by an unfair employment practice.

(c) "Employee" includes and means any individual performing services for remuneration within this state for an employer, or who is an apprentice, or who is an applicant for any apprenticeship; except that the term "employee" does not include domestic servants in private homes, individuals employed by persons who are not employers as defined by this Act, or persons employed in "agricultural labor" as that term is defined in The Unemployment Compensation Act, as now or hereafter amended.

(d) "Employer" includes and means the State of Illinois and any political subdivision, municipal corporation or other governmental unit or agency thereof and all persons, including any labor organization, labor union, or labor association employing more than 100 persons within the state within each of 20 or more calendar weeks, within either the current or preceding calendar year prior to January 1, 1963; or so employing 75 or more persons after December 31, 1962 and prior to January 1, 1965; or so employing 50 or more persons after December 31, 1964; except that the term "employer" does not include any not for profit corporation or association organized for fraternal or religious purposes, nor any school, educational or charitable institution owned and conducted by, or affiliated with, a church or religious institution, nor any exclusively social club, corporation or association that is not organized for profit.

(e) "Employment Agency" includes both public and private employment agencies and any person, and any labor organization or labor union having a hiring hall or hiring office regularly undertaking, with or without compensation, to procure opportunities to work, or to procure, recruit, refer or place employees.

(f) "Labor Organization" includes any organization, or labor union, craft union, or any voluntary unincorporated association designed to further the cause of the rights of union labor which is constituted for the purpose, in whole or in part, of collective bargaining or of dealing with employers concerning grievances, terms, or conditions of employment, or apprenticeships or applications for apprenticeships, or of other mutual aid or protection in connection with employment, including apprenticeships or applications for apprenticeships.

(g) "Person" includes one or more individuals, partnerships, associations or organizations, labor organizations, labor unions, or union labor associations, corporations, legal representatives, trustees in bankruptcy or receivers.

(h) "Unfair Employment Practices" includes only those practices specified in Section 3 of this Act.

**853. Unfair Employment Practices.)**
It is an unfair employment practice:

(a) For any employer, because of the race, color, religion, national origin or ancestry of an individual to refuse to hire, to segregate, or otherwise to discriminate against such individual with respect to hire, selection and training for apprenticeship in any trade or craft, tenure, terms or conditions of employment; or

(b) For any employment agency to fail to refuse to classify properly, refer for employment, refer for apprenticeship, or accept applications for any apprenticeship, or otherwise to discriminate against any individual because of his race, color, religion, national origin or ancestry; or

(c) For any labor organization because of the race, color, religion, national origin or ancestry of any person to discriminate against such person, or to limit, segregate or classify its membership with respect to such person, or to limit such person's employment opportunities, such person's selection and training for apprenticeship in any trade or craft, or otherwise to take, or fail to take, any action which affects adversely such person's status as an employee or as an applicant for employment or as an apprentice, or as applicant for apprenticeships, or such person's wages, tenure, hours or employment or apprenticeships conditions; or

(d) For any employer, employment agency or labor organization to discriminate against any person because he or she, reasonably and in good faith, has opposed any practice forbidden in this Act, or because he or she, reasonably and in good faith, has made a charge, testified or assisted in any investigation, proceeding or hearing under this Act; or

(e) For any person to compel or coerce any person to engage in any of the acts declared by this Act to be unfair employment practices.

Nothing in this Act shall preclude an employer from firing or selecting between persons for (1) any reason except for the unfair employment practices specifically prohibited by this Act, or (2) a bona fide occupational qualification.

854. Public Contracts.)

Every contract to which the state, any of its political subdivisions or any municipal corporation is a party shall be conditioned upon the requirement that the supplier of materials or services or the contractor and his subcontractors, and all labor organizations furnishing skilled, unskilled, and craft union skilled labor, or who may perform any such labor or services, as the case may be, shall not commit an unfair employment practice in this state as defined in this Act. To the full extent to which the state may have authority with respect to such contracts, this section shall be applicable.

855. Illinois Fair Employment Practices Commission.)

(a) The Fair Employment Practices Commission is created, to consist of five members, all of whom shall be bona fide residents of Illinois for five years last past, appointed by the governor with the advice and consent of the Senate, no more

than three of whom shall be of the same political party and one of whom shall be designated by the governor as chairman. If the Senate is not in session at the time this Act takes effect, the governor shall make temporary appointments as in the case of a vacancy with the advice and consent of an interim committee composed of three members of the Senate appointed by the president pro tempore thereof and three members of the House of Representatives appointed by the speaker thereof.

856. Powers and Duties of the Commission.)
In addition to other powers and duties prescribed in this Act, the Commission shall have the following powers and duties:

(a) To meet and function at any place within the state.

(b) To establish and maintain offices in Springfield and Chicago.

(c) To select and fix the compensation of an executive director, which shall not exceed $15,000 per year, of hearing examiners who shall be attorneys duly licensed to practice law in this state, technical advisors and such other employees as it may deem necessary.

(d) To adopt, promulgate, amend and rescind rules and regulations not inconsistent with the provisions of this Act.

(e) To receive, investigate and determine charges filed by complainants with it in conformity with this Act.

(f) To report to the governor and the General Assembly at the beginning of each General Assembly and upon request.

857. Educational Program.)
For the purpose of promoting equal employment opportunity, regardless of race, color, religion, national origin or ancestry, and to create and to maintain better community understanding, the Commission may issue such publications, conduct such research, and make such surveys as in the judgment of the Commission will tend to promote equality of employment opportunity, including apprenticeship, regardless of race, color, religion, national origin or ancestry.

860. Judicial Review.)
Any complainant or respondent may apply for and obtain judicial review of an order of the Commission entered under this Act in accordance with the provisions of the "Administrative Review Act," approved May 8, 1945, as heretofore or hereafter amended; and the Commission in proceedings under this section may obtain an order of court for the enforcement of its order.

863. Service of process or notice—Sufficiency.)

For the purposes of this Act, summonses, notices or writs served upon any officer of any labor organization shall be sufficient to acquire jurisdiction against such labor organization, or labor union, or voluntary unincorporated union association, and all of its officers, members and representatives.

## STATE CONTRACTS

**Chapter 29—Illinois Revised Statutes. (Excerpts)**

17. Race or color discrimination prohibited in contracts for public work.)

No person shall be refused or denied employment in any capacity on the ground of race or color, nor be discriminated against in any manner by reason thereof, in connection with the contracting for or the performance of any work or service of any kind, by, for, on behalf of, or for the benefit of this state, or of any department, bureau, commission, board, or other political subdivision or agency thereof.

18. Deemed incorporated in contract.)

The provisions of this Act shall automatically enter into and become a part of each and every contract or other agreement hereafter entered into by, with, for, on behalf of, or for the benefit of this state, or of any department, bureau, commission, board, other political subdivision or agency, officer or agent thereof, providing for or relating to the performance of any of the said work or services or of any part thereof.

19. Includes independent contractors, etc.)

The provisions of this Act also shall apply to all contracts entered into by or on behalf of all independent contractors, subcontractors, and any and all other persons, associations or corporations, providing for or relating to the doing of any of the said work or the performance of any of the said services, or any part thereof.

20. Deduction from compensation.)

No contractor, subcontractor, nor any person on his behalf shall, in any manner discriminate against or intimidate any employee hired for the performance of work for the benefit of the state or for any department, bureau, commission, board, other political subdivision or agency, officer or agent thereof, on account of race or color; and there may be deducted from the amount payable to the contractor by the State of Illinois or by any municipal corporation thereof, under this contract, a penalty of five dollars ($5) for each person for each calendar day during which such person was discriminated against or intimidated in violation of the provisions of this Act.

21. Recovery by injured person.)

Any person who or any agency, corporation or association which shall violate any of the provisions of the foregoing sections, or who or which shall aid, abet, incite or otherwise participate in the violation of any of the said provisions, whether the said violation or participation therein shall occur through action in a private, in a public, or in any official capacity, shall be liable to a penalty of not less than one hundred ($100) nor more than five hundred dollars ($500) for each and every said violation or participation therein with respect to each person aggrieved thereby, to be recovered by each such aggrieved person, or by any other person to whom such aggrieved person shall assign his cause of action, in any court of competent jurisdiction in the county in which the plaintiff or the defendant shall reside.

22. Criminal penalty.)

Any person who or any agency, corporation or association which shall violate any of the provisions of the foregoing sections, or who or which shall aid, abet, incite or otherwise participate in the violation of any of the said provisions, whether the said violation or participation therein shall occur through action in a private, in a public, or in any official capacity, shall also be deemed guilty of a misdemeanor for each and every said violation or participation and on conviction thereof, shall be punished by a fine of not less than one hundred ($100) nor more than five hundred dollars ($500), or, in the case of non-corporate violators, or participators, by imprisonment for not less than 30 nor more than 90 days, or by both such fine and imprisonment.

## CIVIL SERVICE

**Chapter 24½—Illinois Revised Statutes (Excerpts)**

84. Examinations for Applicants—Qualifications—Fees.)

All applicants for offices or places in said classified civil service shall be citizens of the United States of America and residents of the State of Illinois and shall be subjected to examination, which shall be public and competitive with limitations specified in the rules of the board as to residence, age, sex, health, habits, moral character and qualifications to perform the duties of the office or place to be filled, which qualifications shall be prescribed in advance of such examination. . . . No question in any examination shall relate to political or religious opinions or affiliations.

## EMPLOYMENT BY SCHOOLS

**Chapter 122—Illinois Revised Statutes (Excerpts)**

**24-4. Color, Race, Nationality, Religion, or Religious Affiliation.)**

The color, race, nationality, religion or religious affiliation of any applicant seeking employment either as a superintendent, principal, teacher or otherwise in the public elementary or high schools, shall not be considered either a qualification or disqualification for any such employment. Nor shall color, race, nationality, religion or religious affiliation be considered in assigning any person to an office or position or to any school in the school system. If any member of a school board, superintendent, principal or other school officer violates the foregoing provision or directly or indirectly requires, asks or seeks information concerning the color, race, nationality, religion or religious affiliation of any person in connection with his employment or assignment, or if any person, agency, bureau, corporation or association employed or maintained to obtain or aid in obtaining employment of the kind described, directly or indirectly requires, asks, seeks, indicates or transmits orally or in writing information concerning the color, race, nationality, religion or religious affiliation of an applicant for such employment, with the intent to influence such appointment, he shall be liable to a penalty of not less than one hundred ($100) nor more than five hundred dollars ($500) to be recovered by the person aggrieved thereby in any court of competent jurisdiction, and he shall also be fined not less than one hundred dollars ($100) nor more than five hundred dollars ($500) or imprisoned not less than 30 days nor more than 90 days, or be both so fined and imprisoned.

## HOUSING AND REDEVELOPMENT

**Chapter 67½—Illinois Revised Statutes (Excerpts)**

**157. Acts prohibited.)**

No housing corporation shall . . . (9) Enter into contracts for the construction of buildings or for the payment of salaries to officers or employees, or for the purchase of materials, equipment or supplies, except subject to the inspection and revision of the State Housing Board and under such regulations as the board may from time to time prescribe.

No housing corporation or contractor employed thereby shall deny employment to any person on account of race, creed or color.

## CITY EMPLOYMENT AND CONTRACTS

### Chapter 198.7A—Municipal Code of Chicago

1. Whereas, it is the policy of the United States government in furtherance of the sucessful winning of the peace to insure the maximum participation of all available workers in production, regardless of race, creed, color or national origin, in the firm belief that the democratic way of life within the nation can be defended successfully only with the help and support of all groups within its borders, the City of Chicago, to cooperate with the United States government, by eliminating possible discrimination in public and private employment, enacts this ordinance to be known as the Fair Employment Practices Ordinance.

2. It shall be unlawful for any department of the City of Chicago, or any city official, his agent, or employee, for or on behalf of the City of Chicago, involving any public works of the City of Chicago to refuse to employ or to discharge any person, otherwise qualified, on account of race, color, creed, national origin, or ancestry; to discriminate for the same reasons in regard to tenure, terms or conditions of employment; to deny promotion or increase in compensation solely for these reasons, to publish offer of employment based on such discrimination; to adopt or enforce any rule, or employment policy which discriminates between employees on account of race, color, religion, national origin, or ancestry; to seek such information as to any employee as a condition of employment; to penalize any employee or discriminate in the selection of personnel for training, solely on the basis of race, color, religion, national origin, or ancestry.

3. All contracting agencies of the City of Chicago, or any department thereof, shall include in all contracts hereafter negotiated or renegotiated by them a provision obligating the contractor not to discriminate against any employee or applicant for employment because of race, creed, color or national origin and shall require him to include a similar provision in all sub-contracts.

4. It shall be unlawful for any person to discriminate against any other person by reason of race, creed, color or national origin, with respect to the hiring, application for employment, tenure, terms or conditions of employment.

5. Any person, firm or corporation who shall violate or fail to comply with any of the provisions of this ordinance shall be guilty of a misdemeanor, and shall be punished by a fine in any sum not exceeding two hundred dollars ($200).

6. If any part of this ordinance shall be declared invalid the balance of the ordinance shall remain in full force and effect.

## TAXI DRIVERS

**Chapter 28—Municipal Code of Chicago**

28.9. There shall be no discrimination by any busman, cabman or coachman against any person employed or seeking employment as a chauffeur with respect to hire, promotion, tenure, terms, conditions and places of employment on account of race, color, creed, religion, national origin or ancestry.

# hospitals

**Chapter 137—Municipal Code of Chicago (Excerpts)**

13.1. No hospital, nor any person acting as superintendent or manager, or who is otherwise in charge or control of any hospital, nor any person connected with or rendering service in any hospital in any capacity whatsoever, nor any agent or employee thereof shall deny to any person admission for care or treatment, equality of care or treatment in a hospital, or the use of any of the hospital facilities and services relating to care or treatment of such person, on account of race, color, creed, national origin or ancestry, provided that a member of the medical staff of said hospital or an authorized physician designated to act for him may examine such person and determine the need of such person for medical care or treatment.

13.2. No hospital, and no person who is acting as superintendent or manager or who is otherwise in charge or control of any hospital or in charge or control of employment by the hospital or of appointments to the staff of the hospital shall, in the employment of any physician or the appointment of any person to the medical staff of the hospital, discriminate against any person on account of race, color, creed, national origin or ancestry.

13.3. It is unlawful, prior to admission of a patient, for any hospital or agent of a hospital directly or indirectly, overtly or covertly, by any method whatsoever, including inquiries or requests made directly or indirectly to a patient, a physician or the agent or representative of any patient or physician, to make inquiry or request information as to the race or color of any person seeking to become a patient or about to become a patient.

13.4 Each hospital shall post, in its room clerk's office and in its admission office, a copy of the penalty prescribed by law for any violation of the provisions of this ordinance.

No hospital, either public or private, where surgical operations are performed, operating in this state shall refuse to give emergency medical treatment or first aid to any applicant who applies for the same in case of injury or serious medical disability where the same is liable to cause death or is a severe injury or serious illness.

19. Any person violating any of the provisions of this chapter shall be fined not less than one hundred dollars ($100) nor more than two hundred dollars ($200) for each offense, and a separate and distinct offense shall be considered as having been committed for each and every day on which any person shall be guilty of any such violation. . . .

**EMERGENCY MEDICAL TREATMENT**

**Chapter 111½—Illinois Revised Statutes**

**86. Hospital to furnish first aid.)**

No hospital, either public or private, where surgical operations are performed, operating in this state shall refuse to give emergency medical treatment or first aid to any applicant who applies for the same in case of injury or acute medical condition where the same is liable to cause death or is a severe injury or serious illness.

**87. Penalty for violation.)**

Any such hospital violating any of the provisions of this Act shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not less than fifty dollars ($50) nor more than two hundred dollars ($200) for each offense, which fine shall be paid into the general corporate funds of the city, incorporated town, or village in which the hospital is located, or of the county, in case such hospital is outside the limits of any incorporated municipality.

**TAX EXEMPT STATUS**

**Chapter 120—Illinois Revised Statutes (Excerpts)**

**500.7 Property exempt from taxation.)**

. . . no hospital, however, which has been adjudicated by a court of competent jurisdiction to have denied admission to any person because of race, color or creed shall be exempt from taxation.

# schools

**EDUCATION**

**Chapter 122—Illinois Revised Statutes (Excerpts)**

**10-20.11 School houses.**

. . . In erecting, purchasing or otherwise acquiring buildings for school purposes, the board shall not do so in such a manner as to promote segre-

gation and separation of children in public schools because of color, race or nationality. All records of the board pertaining to the erecting, purchasing or otherwise acquiring of buildings for school purposes shall be open to the public.

**10-21.3 Attendance units.**

. . . As soon as practicable, and from time to time thereafter, the board shall change or revise existing units or create new units in a manner which will take into consideration the prevention of segregation and the elimination of separation of children in public schools because of color, race or nationality. All records pertaining to the creation, alteration or revision of attendance units shall be open to the public.

**22-11. Exclusion of children on account of color.)**
Any school officer or other person who excludes or aids in excluding from the public schools, on account of color, any child who is entitled to the benefits of such school shall be fined not less than five dollars ($5) nor more than one hundred dollars ($100).

**22-12. Preventing colored child from attending school.)**
Whoever by threat, menace or intimidation prevents any colored child entitled to attend a public school in this state from attending such school shall be fined not exceeding twenty-five dollars ($25).

**22-19. Discrimination — Complaint — Hearing — Notice — Procedure.)**
Upon the filing of a complaint with the superintendent of public instruction, executed in duplicate and subscribed with the names and addresses of at least 50 residents of a school district or 10 percent, which ever is lesser, alleging that any pupil has been excluded from or segregated in any school on account of his color, race, nationality, religion or religious affiliation, or that any employee of or applicant for employment or assignment with any such school district has been questioned concerning his color, race, nationality, religion or religious affiliation or subjected to discrimination by reason thereof, by or on behalf of the school board of such district, the superintendent of public instruction shall promptly mail a copy of such complaint to the secretary or clerk of such school board.

The superintendent of public instruction shall fix a date, not less than 20 nor more than 30 days from the date of filing such complaint, for a hearing on the allegations therein. He may also fix a date for a hearing whenever he has reason to believe that such discrimination may exist in any school district.

The hearing officer shall report a summary of the testimony to the superintendent of public instruction who shall determine whether the allegations of the complaint are substantially correct. The superintendent of public instruction shall notify both parties of his decision. If he so determines, he shall request the attorney general to apply to the appropriate Circuit court for such injunctive or other relief as may be necessary to rectify the practices complained of.

**34-18. Powers of the board.)**

The board shall exercise general supervision and management of the public education and the public school system of the city, and shall have power: . . . (7) To divide the city into sub-districts and apportion the pupils to the several schools, but no pupil shall be excluded from or segregated in any such school on account of his color, race or nationality; . . .

The board shall, as soon as practicable, and from time to time thereafter, change or revise existing sub-districts or create new sub-districts in a manner which will take into consideration the prevention of segregation and the elimination of separation of children in public schools because of color, race or nationality. All records pertaining to the creation, alteration or revision of sub-districts shall be open to the public; . . .

## DEPARTMENT OF REGISTRATION AND EDUCATION

**Chapter 127 — Illinois Revised Statutes (Excerpt)**

**60. Additional powers conferred in administration of laws regulating professions, trades and occupations.)**

The Department of Registration and Education shall . . . exercise, in its name, but subject to the provisions of this Act, the following powers: . . . (3) Prescribe rules and regulations defining, for the respective professions, trades and occupations, what shall constitute a school, college or university, or department of a university, or other institutions, reputable and in good standing and to determine the reputability and good standing of a school, college or university, or department of a university, or other institution, reputable and in good standing by reference to a compliance with such rules and regulations: provided, that no school, college or university, or department of a university or other institution that refuses admittance to applicants solely on account of race, color or creed shall be considered reputable and in good standing . . .

# housing

## CHICAGO FAIR HOUSING ORDINANCE

### Chapter 198.7-B—Municipal Code of Chicago

### DECLARATION OF POLICY

1. It is hereby declared the policy of the City of Chicago to assure full and equal opportunity to all residents of the City to obtain fair and adequate housing for themselves and their families in the City of Chicago without discrimination against them because of their race, color, religion, national origin or ancestry.

2. It is further declared to be the policy of the City of Chicago that no owner, lessee, sublessee, assignee, managing agent, or other person, firm or corporation having the right to sell, rent or lease any housing accomodation, within the City of Chicago, or any agent of any of these, should refuse to sell, rent, lease, or otherwise deny or withhold from any person or group of persons such housing accomodations because of the race, color, religion, national origin or ancestry of such person or persons or discriminate against any person because of his race, color, religion, national origin or ancestry in the terms, conditions, or privileges of the sale, rental or lease of any housing accommodation or in the furnishing of facilities or services in connection therewith.

3. In order to effectuate this policy and to eliminate as far as legislatively permissible, all forms of discrimination and segregation in the field of housing,

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF CHICAGO:

That it shall be an unfair housing practice and unlawful for any real estate broker licensed as such by the City of Chicago:

A. To make any distinction, discrimination or restriction against any person in the price, terms, conditions or privileges of any kind relating to the sale, rental, lease or occupancy of any real estate used for residential purposes in the City of Chicago or in the furnishing of any facilities or services in connection therewith, predicated upon the race, color, religion, national origin or ancestry of the prospective or actual buyer or tenant thereof.

B. To publish, circulate, issue or display, or cause to be published, circulated, issued or displayed, any communication, notice, advertisement, sign or other writing of any kind relating to the sale, rental or leasing of any residential real

property within the city of Chicago which will indicate or express any limitation or discrimination in the sale, rental or leasing of such residential real estate, predicated upon the race, color, religion or the national origin or ancestry of any prospective buyer, lessee or renter of such property.

C. To refuse to sell, lease or rent, any real estate for residential purposes within the City of Chicago because of the race, color, religion, national origin or ancestry of the proposed buyer or renter.

D. To discriminate or to participate in discrimination in connection with borrowing or lending money, guaranteeing loans, accepting mortgages or otherwise obtaining or making available funds for the purchase, acquisition, construction, rehabilitation, repair or maintenance of any residential housing unit or housing accommodation in the City of Chicago because of race, color, religion or national origin or ancestry.

E. To cheat, exploit or overcharge any person for residential housing accommodations in the City of Chicago because of race, color, religion, or national origin or ancestry.

F. To solicit for sale, lease or listing for sale or lease, residential real estate within the City of Chicago on the ground of loss of value due to the present or prospective entry into any neighborhood of any person or persons of any particular race, color, religion or national origin or ancestry.

G. To distribute or cause to be distributed, written material or statements designed to induce any owner of residential real estate in the City of Chicago to sell or lease his property because of any present or prospective change in the race, color, religion or national origin or ancestry of persons in the neighborhood.

H. To deliberately and knowingly refuse examination of any listing of residential real estate within the City of Chicago to any person because of race, color, religion or national origin or ancestry.

4. Any real estate broker not licensed by the City of Chicago who shall exercise any function of a real estate broker within the City of Chicago, shall be deemed a broker hereunder and subject to all applicable provisions hereof.

5. It shall be the duty of the Commission on Human Relations to:

A. Initiate or receive and investigate complaints charging unlawful housing practices;

B. Seek conciliation of such complaint, hold hearings, make findings of fact, issue orders and publish its findings of fact and orders in accordance with the provisions of this ordinance and with the ordinance establishing the Commission;

C. Render from time to time, but not less than once a year, a written report of its activities and recommendations with respect to fair housing practices to the Mayor and to the City Council; and

D. Adopt such rules and regulations as may be necessary to carry out the purposes and provisions of this ordinance.

6. Any person aggrieved in any manner by any violation of any provision of the above ordinance may file a written complaint setting forth his grievance with the Chicago Commission on Human Relations. Said complaint shall state the name and address of the complainant and of the persons against whom the complaint is brought and shall also state the alleged facts surrounding the alleged violation of this ordinance.

7. Said Commission is hereby fully authorized immediately to investigate every such complaint thus filed. If the Commission determines that the respondent has not engaged in any unlawful practice, it shall state its findings of fact in writing and dismiss the complaint. If the Commission determines after such investigation that probable cause exists for the allegations made in the complaint, the Commission shall set a date for a conciliation hearing. At such hearing, the Commission or any member thereof shall interview the complainant and the person or persons against whom the complaint has been directed and shall attempt to resolve the complaint by all proper methods of conciliation and persuasion. If such attempts at conciliation are not successful within sixty days after the date of filing of the complaint, the Commission shall then proceed promptly with full hearing of the complaint.

8. Such hearing shall be conducted by the Commission, or any member thereof, upon due and reasonable notice to all parties. The Commission shall have full power to subpoena witnesses and pertinent documents, which power may be enforced by the Commission by proper petition to any court of competent jurisdiction. The Commission shall have power to administer oaths and to take sworn testimony. At the conclusion of the hearings, the Commission shall render a written report and recommendations, which shall be served by mail upon the complainant and the respondent. No report shall be delayed more than sixty days after the date of the issuance of notice for commencement of the first hearing.

9. The Commission shall be empowered at the conclusion of such proceedings and as part of its report, to recommend to the Mayor of the City of Chicago the suspension or revocation of the broker's license of any broker licensed by the City of Chicago who shall have been a respondent to any proceedings thus filed and found guilty of violation of any applicable provision of the within ordinance. Any broker whose license has been suspended or revoked by the Mayor, or any complainant aggrieved by the decision of the Mayor, shall have full right to appeal from such order of suspension or revocation in accordance with procedure specified in the Administrative Review Act of Illinois. The order of the Mayor shall be final and transmitted to the Commission as part of its record and it shall serve a copy thereof upon the respondent, and any appeal may be taken thereafter.

10. In addition thereto, the Mayor may direct the Corporation Counsel to file with the Department of Registration and Education of the State of Illinois a complaint against any real estate broker found guilty of violating any provision of this ordinance, seeking suspension or revocation of the license issued to such broker by the State of Illinois.

11. If any section, subdivision, paragraph, sentence or clause of this ordinance is for any reason held to be invalid or unconstitutional, such decision shall not affect any remaining portion, section or part thereof.

12. This ordinance shall take effect upon its passage and due publication.

## PUBLIC HOUSING

Resolution adopted on April 7, 1954, by the Chicago City Council: Resolved that the members of the City Council of Chicago reaffirm that it is the policy of this city that public housing should be available to all eligible applicants without regard to race, color, creed or national origin.

## CHICAGO DWELLINGS ASSOCIATION

Resolution adopted on March 18, 1949, by the Chicago Dwellings Association: Be it and it is hereby resolved that it be the declared policy of the Chicago Dwellings Association that there shall be no discrimination because of race, creed, or color with respect to the rental of properties to be owned, improved and managed by the corporation.

**URBAN RENEWAL LAND REDEVELOPMENT**

The form of the Quitclaim Deed between the City of Chicago and a redeveloper requires the following clauses: 'The grantee, for itself and its successors and assigns, in pursuance of the objects and purposes of the Illinois Urban Community Conservation Act of 1953, as amended, and the Federal Housing Act of 1949, as amended, covenants that: . . . (f) the grantee and its successors or assigns shall not discriminate against any person on the basis of race, creed, color or national origin, in the subsequent sale or lease of the property and the improvement constructed thereon.

**RESTRICTIVE COVENANTS PROHIBITED**

**Chapter 67½—Illinois Revised Statutes (Excerpt)**
91.13 . . . No lease or deed of conveyance either by the (Conservation) Board or any subsequent owner shall contain a covenant running with the land or other provision prohibiting occupancy of the premises by any person because of race, creed or color.

**Executive Order 11063 (Excerpts)**

**ISSUED BY PRESIDENT JOHN F. KENNEDY**

**Establishing the President's COMMITTEE ON EQUAL OPPORTUNITY IN HOUSING**

WHEREAS the granting of Federal assistance for the provision, rehabilitation, or operation of housing and related facilities from which Americans are excluded because of their race, color, creed, or national origin is unfair, unjust, and inconsistent with the public policy of the United States as manifested in its Constitution and laws . . .

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States by the Constitution and laws of the United States, it is ordered as follows:

**PART I—PREVENTION OF DISCRIMINATION**

Section 101. I hereby direct all departments and agencies in the executive branch of the Federal Government, insofar as their functions relate to the provision, rehabilitation, or operation of housing and related facilities, to take all action necessary and appropriate to prevent discrimination because of race, color, creed, or national origin—

(a) in the sale, leasing, rental, or other disposition of residential property and related facilities (including land to be developed for residential use), or in the use or occupancy thereof, if such property and related facilities are—

(i) owned or operated by the Federal Government, or

(ii) provided in whole or in part with the aid of loans, advances, grants, or contributions hereafter agreed to be made by the Federal Government, or

(iii) provided in whole or in part by loans hereafter insured, guaranteed, or otherwise secured by the credit of the Federal Government, or

(iv) provided by the development or the redevelopment of real property purchased, leased, or otherwise obtained from a State or local public agency receiving Federal financial assistance for slum clearance or urban renewal with respect to such real property under a loan or grant contract hereafter entered into; and

(b) in the lending practices with respect to residential property and related facilities (including land to be developed for residential use) of lending institutions, insofar as such practices relate to loans hereafter insured or guaranteed by the Federal Government.

Sec. 102. I hereby direct the Housing and Home Finance Agency and all other executive departments and agencies to use their good offices and to take other appropriate action permitted by law, including the institution of appropriate litigation, if required, to promote the abandonment of discriminatory practices with respect to residential property and related facilities heretofore provided with Federal financial assistance of the types referred to in Section 101 (a)(ii),(iii), and (iv).

## PART II—IMPLEMENTATION BY DEPARTMENTS AND AGENCIES

Sec. 202. Each such department and agency shall be primarily responsible for obtaining compliance with the purposes of this order as the order applies to programs administered by it; and is directed to cooperate with the Committee, to furnish it, in accordance with law, such information and assistance as it may request in the performance of its functions, and to report to it at such intervals as the Committee may require.

## PART III—ENFORCEMENT

Sec. 301. The Committee, any subcommittee thereof, and any officer or employee designated by any executive department or agency subject to this order may hold such hearings, public or private, as the Committee, department, or agency may deem advisable for compliance, enforcement, or educational purposes.

Sec. 302. If any executive department or agency subject to this order concludes that any person or firm (including but not limited to any individual, partnership, association, trust, or corporation) or any State or local public agency has violated any rule, regulation, or procedure issued or adopted pursuant to this order, or any nondiscrimination provision included in any agreement or contract pursuant to any such rule, regulation, or procedure, it shall endeavor to end and remedy such violation by informal means, including conference, conciliation, and persuasion unless similar efforts made by another Federal department or agency have been unsuccessful. In conformity with rules, regulations, procedures, or policies issued or adopted by it pursuant to Section 203 hereof, a department or agency may take such action as may be appropriate under its governing laws, including, but not limited to, the following:

It may—

(a) cancel or terminate in whole or in part any agreement or contract with such person, firm, or State or local public agency providing for a loan, grant, contribution, or other Federal aid, or for the payment of a commission or fee;

(b) refrain from extending any further aid under any program administered by it and affected by this order until it is satisfied that the affected person, firm, or State or local public agency will comply with the rules, regulations, and procedures issued or adopted pursuant to this order, and any nondiscrimination provisions included in any agreement or contract;

(c) refuse to approve a lending institution or any other lender as a beneficiary under any program administered by it which is affected by this order or revoke such approval if previously given.

Sec. 304. Any executive department or agency affected by this order may also invoke the sanctions provided in Section 302 where any person or firm, including a lender, has violated the rules,

regulations, or procedures issued or adopted pursuant to this order, or the nondiscrimination provisions included in any agreement or contract, with respect to any program affected by this order administered by any other executive department or agency.

## PART IV—ESTABLISHMENT OF THE PRESIDENT'S COMMITTEE ON EQUAL OPPORTUNITY IN HOUSING

Sec. 401. There is hereby established the President's Committee on Equal Opportunity in Housing which shall be composed of the Secretary of the Treasury; the Secretary of Defense; the Attorney General; the Secretary of Agriculture; the Housing and Home Finance Administrator; the Administrator of Veterans Affairs; the Chairman of the Federal Home Loan Bank Board; a member of the staff of the Executive Office of the President to be assigned to the Committee by direction of the President, and such other members as the President shall from time to time appoint from the public. The member assigned by the President from the staff of the Executive Office shall serve as the Chairman and Executive Director of the Committee. Each department or agency head may designate an alternate to represent him in his absence.

## PART V—POWERS AND DUTIES OF THE PRESIDENT'S COMMITTEE ON EQUAL OPPORTUNITY IN HOUSING

Sec. 501 . . . A report to the President shall be made at least once annually and shall include references to the actions taken and results achieved by departments and agencies subject to this order.

Sec. 502 (a) The Committee shall take such steps as it deems necessary and appropriate to promote the coordination of the activities of departments and agencies under this order. In so doing, the Committee shall consider the overall objectives of Federal legislation relating to housing and the right of every individual to participate without discrimination because of race, color, creed, or national origin in the ultimate benefits of the Federal programs subject to this order.

(b) The Committee may confer with representatives of any department or agency, State or local public agency, civic, industry, or labor group, or any other group directly or indirectly affected by this order; examine the relevant rules, regulations, procedures, policies, and practices of any

department or agency subject to this order and make such recommendations as may be necessary or desirable to achieve the purposes of this order.

(c) The Committee shall encourage educational programs by civic, educational, religious, industry, labor, and other nongovernmental groups to eliminate the basic causes of discrimination in housing and related facilities provided with Federal assistance.

# other laws

## VOTING ON RELIGIOUS HOLIDAYS

**Chapter 46—Illinois Revised Statutes (Excerpt)**

**19-2. Application for ballots.)**

. . . any such elector who because of . . . the tenets of his religion in the observance of a religious holiday will be unable to be present at the polls on the day of such election may, not more than 30 nor less than five days prior to the date of such election make application to the county clerk or, where existing, to the Board of Election Commissioners, or other officer or officers charged with the duty of furnishing ballots for such election in his voting precinct, for an official ballot for such precinct to be voted at such election . . .

## PUBLIC AID

**Chapter 23 — Illinois Revised Statutes (Excerpt)**

**111. No discrimination on account of race, religion, etc.)**

There shall be no discrimination and no denial of assistance or general assistance provided for in this Code on account of the race, religion, color, national origin, or political affiliation of any applicant or recipient.

## STATE MILITIA

**Chapter 129—Illinois Revised Statutes (Excerpt)**

**220.07. Composition—Racial segregation.)**

The organized militia shall consist of the Illinois National Guard and the Illinois Naval Militia. There shall be no racial segregation nor shall there be any discrimination in the service of any detachment, company, regiment, division, department or any other subdivision of the Illinois National Guard or Illinois Naval Militia because of race, creed or color.

## INSURANCE

**Chapter 73—Illinois Revised Statutes (Excerpt)**

848. Discrimination Prohibited.)

No life company doing business in this state shall make or permit any distinction or discrimination in favor of individuals among insured persons of the same class and equal expectation of life in the amount of payment of premiums or rates charged for policies of insurance, in the amount of any dividends or other benefits payable thereon, or in any other of the terms and conditions of the contracts it makes.

## ANTI-DESECRATION ORDINANCE

**Chapter 193—Municipal Code of Chicago (Excerpt)**

1.3 Any person who wilfully defaces, mars, injures, destroys or removes any vault, tomb, monument, gravestone, memorial of the dead, church, synagogue, or any other place of worship of any religion, sect or group, or any part or any contents thereof, or any fence, tree, shrub or plant appurtenant thereto, shall be fined not less than twenty-five dollars ($25) nor more than two hundred dollars ($200), or imprisoned for not more than six months, or both such fine and imprisonment, for each offense. Each such act of marring, injuring, destroying or removal shall constitute a separate offense.

## ANTI-RIOT ORDINANCE

**Chapter 193—Municipal Code of Chicago**

1.1 It is unlawful to create a clear and present danger of a riot or assault, battery, or other unlawful trespass against any person or group of persons because of his or their race, religion, color, national origin, or ancestry, or to create a clear and present danger of arson, vandalism, defacement, or other unlawful trespass against property because of the race, religion, color, national origin, or ancestry of the owner, possessor, or authorized user or users of said property, or, in the case of a cemetery, of the decedent buried therein.

The term "person" as used in this section shall include one or more individuals, co-partnerships, corporations, firms, organizations, associations, leagues, or other bodies.

Any person violating the provisions of this section shall be fined not less than twenty-five dollars ($25) nor more than two hundred dollars ($200) or imprisoned for not less than 10 days or more than six months, or both, for each offense.

## MOB ACTION AND RELATED OFFENSES

### Chapter 38—Illinois Revised Statutes (Excerpts)

**25-1—Mob Action.)**

(a) Mob action consists of any of the following:
(1) The use of force or violence disturbing the public peace by two or more persons acting together and without authority of law; or
(2) The assembly of two or more persons to do an unlawful act; or
(3) The assembly of two or more persons, without authority of law, for the purpose of doing violence to the person or property of any one supposed to have been guilty of a violation of the law, or for the purpose of exercising correctional powers or regulative powers over any person by violence.

(b) Any person engaged in mob action shall be fined not to exceed five hundred dollars ($500) or imprisoned in a penal institution other than the penitentiary not to exceed 30 days, or both.

(c) Any participant in a mob action which shall by violence inflict injury to the person or property of another shall be fined not to exceed one thousand dollars ($1,000) or imprisoned in a penal institution other than the penitentiary not to exceed one year, or in the penitentiary from one to five years, or both fined and imprisoned.

(d) Any participant in a mob action who does not withdraw on being commanded to do so by any peace officer shall be fined not to exceed five hundred dollars ($500) or imprisoned in a penal institution other than the penitentiary not to exceed one year, or both.

**25-3. Recovery of Damages.)**

(a) Any person suffering material damage to property, injury to person or death as a result of any of the following unlawful activities shall have an action against the county in which such damage or injury is inflicted, or if inflicted in an incorporated city, town or village whose population is in excess of 5,000, then against such city, town or village:

(1) Mob action by six or more persons;

(2) Lynching; or

(3) Unlawful taking from the custody of any person legally exercising such custody.

In the event of death of the person injured the action authorized by this subsection shall sur-

vive to a spouse or if there is no surviving spouse then to any person dependent for support upon the victim; provided that recovery under this subsection shall be limited to an amount not exceeding $30,000.

(b) A person may recover under Subsection 25-3 (a) providing:
(1) He was not a participant in the mob action that produced the harm; and
(2) Notice of claim for damages is presented to the defendant city, town or village or county within six months after such wrong occurs; and
(3) Suit is filed within 12 months after such wrong occurs.

(c) An action under Subsection 25-3 (a) shall not bar any injured party from maintaining an action or actions against any person or persons, participating in such mob action for recovery of damages sustained thereby. Any county, city, town or village which under Subsection 25-3 (a) has paid any monies shall have a lien to the amount of such sum on any monies recovered by the Subsection 25-3 (a) plaintiff against any persons participating in such mob action. Any county, city, town or village recovered against under Subsection 25-3 (a) or voluntarily settling any claim arising under Subsection 25-3 (a) shall have an action to recover any such sums with all costs paid by it from any persons participating in such mob action.

## CHICAGO COMMISSION ON HUMAN RELATIONS

The following ordinance was passed unanimously by the City Council on December 12, 1947, establishing the Commission on Human Relations as an integral part of the Municipal Government of the City of Chicago.

**Chapter 21—Municipal Code of Chicago**

49. **(Declaration of Policy—Establishment of Commission.)** The city council finds that prejudice and the practice of discrimination against any individual or group because of race, color, creed, national origin or ancestry menace peace and public welfare; that to eliminate such prejudice and discrimination an instrumentality should be established through which the citizens of Chicago may be kept informed of developments in human relations, the officers and departments of the city may obtain expert advice and assistance in ameliorative practices to keep peace and good order and private persons and groups may be officially encouraged to promote tolerance and good will toward all people.

There is hereby established a commission to be known as the Commission on Human Relations

consisting of fifteen members, one of which members shall be designated as chairman, to be appointed by the mayor and with the advice and consent of the City Council. They shall serve without compensation but may be reimbursed for any personal expense incurred in the performance of their duties. The Commission shall appoint, according to law, an executive director and such other persons as are provided for in the annual appropriation ordinance to direct its activities.

50. **(Duties and Functions.)** The Commission shall cooperate with the mayor, City Council, city departments, agencies and officials in: securing the furnishing of equal services to all residents, and where the need is greater, in meeting that need with added services; training city employees to use methods of dealing with intergroup relations which develop respect for equal rights and which result in equal treatment without regard to race, color, creed, national origin or ancestry; assuring fair and equal treatment under the law to all citizens; protecting the rights of all persons to enjoy public accommodations and facilities and to receive equal treatment from all holders of licenses, contracts or privileges from the city; and maintaining equality of opportunity for employment and advancement in the city government.

The services of all city departments and agencies shall be made available by their respective heads to the Commission at its request, and information in the hands of any department or agency shall be furnished to the Commission when requested. Upon receipt of recommendations in writing from the Commission, each department or agency shall submit a reply in writing indicating the disposition of and action taken with regard to such recommendations.

The Commission shall advise and consult with the mayor and City Council on all matters involving racial, religious or ethnic prejudice or discrimination and recommend such legislative action as it may deem appropriate to effectuate the policy of this ordinance. The Commission shall render an annual report to the Mayor and City Council which shall be published.

51. **(Cooperation with Civic Groups and Governmental Agencies.)** The Commission shall invite and enlist the cooperation of racial, religious and ethnic groups, community organizations, labor and business organizations, fraternal and benevolent societies, veterans organizations, professional and technical organizations, and other groups in the City of Chicago in carrying on its work. The Commission may aid in the formation of local community

groups in such neighborhoods as it may deem necessary or desirable to carry out specific programs designed to lessen tensions or improve understanding in the community.

The Commission shall cooperate with state and federal agencies whenever it deems such action appropriate in effectuating the policy of this ordinance.

52. (Investigations, Research and Publications.) The Commission shall receive and investigate complaints and initiate its own investigations of tensions, practices of discrimination and acts or prejudice against any person or group because of race, religion or ethnic origin and may conduct public hearings with regard thereto; carry on research, obtain factual data and conduct public hearings to ascertain the status and treatment of racial, religious and ethnic groups in the city, and the best means of progressively improving human relations in the entire city; and issue such publications and such results of investigations and public hearings and make such recommendations to the mayor and City Council as in its judgment will effectuate the policy of this ordinance.

## ILLINOIS COMMISSION ON HUMAN RELATIONS

### Chapter 127—Illinois Revised Statutes

214.1. Commission on Human Relations.)

There is created a Commission on Human Relations composed of 20 members to be appointed by the governor. The terms of the members shall commence on July 1, of each odd numbered year and shall be of two years duration. The governor shall designate the chairman of the Commission from among the members thereof.

214.2. Compensation—Expenses.)

None of the members except the chairman may receive any compensation for his services but all members shall be reimbursed for expenses incurred in the performance of their duties.

214.3. Secretary.)

As soon as practicable, after this Act becomes effective, the members shall meet and organize and designate, by majority vote, some person to act as secretary, who shall keep a record of all proceedings. The Commission shall act officially only in a meeting duly called by the chairman, or at a regular meeting fixed by resolution of the Commission, adopted by majority vote.

214.4. Powers and duties of Commission.)

The Commission shall have the following powers and shall perform the following duties: (a) investigate the most effective means of affording

opportunity in profitable employment to all persons, with particular reference to training and placement; (b) cooperate with civic, religious and educational organizations in promoting tolerance and good will; (c) promote and encourage interfaith and interracial harmony and good will; and (d) report to the governor and to the legislature biennially, on or about the third Monday in January of each odd numbered year, the results of its investigations.

214.5. Employees—Report to Governor.)

The Commission may employ necessary secretarial, stenographic and clerical help, and may submit to the director of finance, for publication, its report made to the governor. Such report shall contain factual findings only.

## ATTORNEY GENERAL

Chapter 14—Illinois Revised Statutes

9. Division for enforcement of civil and equal rights —Duties.)

There is created in the office of the attorney general a division to be known as the Division for the Enforcement of Civil and Equal Rights. The division, under the supervision and direction of the attorney general, shall investigate all violations of the laws relating to civil rights and the prevention of discriminations against persons by reason of race, color, or creed, and shall, whenever such violations are established, undertake necessary enforcement measures.

The following is not an exhaustive list. See the Social Service Directory of Chicago, published by the Welfare Council of Metropolitan Chicago, 123 West Madison Street. Phone: FRanklin 2-6911

**American Civil Liberties Union, Chicago Division**
19 South LaSalle Street
AN 3-6883

*Promotes individual freedoms and racial justice; arranges for legal counsel and other assistance in discrimination and other civil liberties cases.*

**American Friends Service Committee**
431 South Dearborn Street
HA 7-2535

*The American Friends Service Committee is a Quaker organization which attempts to relieve suffering and seek non-violent solutions to conflicts between individual groups and nations. A Housing Opportunities Program works to expand areas of integrated living by working with members of the housing industry and concerned citizens and organizations.*

**American Indian Center, Inc.**
738 West Sheridan Road
935-9061

*Serves as a meeting place for Indians and their friends and strives to bring about understanding and cooperation between Indians of different tribes and between Indians and non-Indians.*

**American Jewish Committee**
28 E. Jackson Blvd.
WE 9-2676

*The objects of the American Jewish Committee are the achievement of personal freedom and equality of opportunity for all; and the rendering of assistance and appropriate remedial action to secure the civil, religious, economic, and social rights of Jews.*

**American Jewish Congress**
189 West Madison Street
DE 2-7355

*To combat any doctrine or principle or any practices arising therefrom which impute inferiority to the members of any religious, ethnic, or racial group; to help secure and maintain equality of opportunity; and to safeguard the civil, political, economic and religious rights of Jews and other minorities wherever they may be threatened, in order that we may help preserve, maintain, and extend the democratic way of life to all people.*

**Anti-Defamation League of B'nai B'rith**
343 South Dearborn Street
WE 9-5288

*To strengthen national unity by promoting better human relations among all Americans through education and social action. Seeks to eliminate discrimination in employment, housing, public accommodations and schools. Creates materials and program ideas, and cooperates with churches of all denominations, educational and civic groups. Nominal charges for films and other program materials.*

**Bureau on Jewish Employment Problems**
22 West Monroe Street
RA 6-9817

*To investigate and study conditions of employment, particularly in relation to minority groups; to engage in work and activities to eliminate discrimination in employment against Jews and other minority groups; to stimulate and promote educational measures and programs to accomplish the above objectives.*

**Cardinal's Committee for the Spanish Speaking in Chicago**
1300 South Wabash Avenue
HA 7-7078

*To coordinate all the facilities and services of the various parishes, institutions, and agencies of the Archdiocese toward the integration of the Spanish-speaking in-migrant into the religious and civic life of the community.*

**Catholic Interracial Council**
**21 West Superior Street**
DE 7-1025

***A tax-exempt, non-profit, educational agency founded in 1946. Has as its purpose: "to achieve a spiritual unity between people of different races so that in their dealings with each other they will be actuated by the Divine precepts of Charity and Justice." Conducts an active program on the grade, high school, college and community level to promote interracial justice and charity.***

**Chicago Conference on Religion & Race**
21 West Superior Street
664-7501

*An interreligious organization sponsored by the Catholic Archdiocese of Chicago, the Chicago Board of Rabbis, and the Church Federation of Greater Chicago; and dedicated to interreligious cooperation for racial justice and harmony.*

**Chicago Urban League**
**2410 South Michigan Avenue**
CA 5-0600

***Organized in 1916, affiliated with the National Urban League. One of the cardinal functions is to aid Negro citizens in their problems of adjustment and integration in an urban environment. Attention is given to opening doors of employment for qualified workers.***

**Chinese-American Civic Council of Chicago**
2249 Wentworth Avenue
CA 5-0234

*To foster better citizenship by encouraging its members to exercise their civil rights, to provide information and services to those wishing to know more about Chinese Americans, and to promote intergroup understanding.*

**Congress of Racial Equality, Chicago Office**
54 W. Randolph Street
372-4251

*The Congress of Racial Equality is a national organization working to erase the color line through direct, non-violent action.*

**Friendship House**
4233 South Indiana Avenue
OA 4-7700

*A lay Catholic movement working in the field of race relations through the sponsoring and participation in conferences, weekends, and other educational programs. Publishes a monthly magazine, Community; stimulates home visiting programs, and works with all agencies, public and private, in bringing about salutary social changes.*

**Immigrants' Service League**
608 South Dearborn Street
HA 7-7694

*A community fund agency established in 1908, to apply social and legal resources of the city and state to the needs of foreigners; to protect them from exploitation; to cooperate with the federal, state, and local authorities, and to protect the right of asylum. Multi-lingual staff.*

**Japanese American Service Committee of Chicago**
1110 N. LaSalle Street
DE 7-1076

*To join with all Americans regardless of race, creed or color; to promote social and economic progress and to eliminate discrimination; and to mobilize Americans of Japanese ancestry toward the strengthening of the forces of democracy.*

**Jewish Labor Committee**
127 North Dearborn Street
AN 3-1394

*A national civic, defense, education, and relief organization formed in 1933. Actively engaged in combating discrimination and bigotry, and in bettering human relations; consultant to AFL-CIO and its affiliated bodies.*

**National Association for the Advancement of Colored People, Chicago Branch**
431 South Dearborn Street
939-5365

*To secure and insure the civil rights of Negroes and to integrate them wholesomely into American life. Activities are directed toward areas in which there is discrimination against Negroes because of race.*

**National Catholic Conference for Interracial Justice**
21 West Superior Street
MO 4-8222

*The National Catholic Conference for Interracial Justice is a federation of Catholic organizations which have educational programs to obtain interracial justice. It makes literature, program aids, technical skills, organizational help and consultation available to member Councils and other interested groups.*

**National Conference of Christians and Jews**
203 North Wabash Ave.
CE 6-9272

***To promote justice, amity and understanding among Protestants, Catholics and Jews of all races and nationalities.***

**Sections of the Municipal Code of Chicago and the Illinois Revised Statutes which provide for**

# Equal Rights In Hospitals

## PATIENT CARE

No hospital, nor any person acting as superintendent or manager, or who is otherwise in charge or control of any hospital, nor any person connected with or rendering service in any hospital in any capacity whatsoever, nor any agent or employee thereof shall deny to any person admission for care or treatment, equality of care or treatment in a hospital, or the use of any of the hospital facilities and services relating to care or treatment of such person, on account of race, color, creed, national origin or ancestry, provided that a member of the medical staff of said hospital or an authorized physician designated to act for him may examine such person and determine the need of such person for medical care or treatment. (Section 137-13.1, Municipal Code of Chicago.)

## OPPORTUNITY FOR PHYSICIANS

No hospital, and no person who is acting as superintendent or manager or who is otherwise in charge or control of any hospital or in charge or control of employment by the hospital or of appointments to the staff of the hospital shall, in the employment of any physician or the appointment of any person to the medical staff of the hospital, discriminate against any person on account of race, color, creed, national origin or ancestry. (Section 137-13.2, Municipal Code of Chicago.)

## EMERGENCY CARE

No hospital, either public or private, where surgical operations are performed, operating in this state shall refuse to give emergency medical treatment or first aid to any applicant who applies for the same in case of injury or acute medical condition where the same is liable to cause death or is a severe injury or serious illness. (Section 86, Chapter 111½, Illinois Revised Statutes.)

## LEGAL PENALTIES

Any person violating any of the provisions of this chapter shall be fined not less than one hundred dollars nor more than two hundred dollars for each offense, and a separate and distinct offense shall be considered as having been committed for each and every day on which any person shall be guilty of any such violation; provided, that in the event of a conviction of any such person relating to the safety and accommodations of patients, it shall be the duty of the board of health, and it is hereby authorized and empowered to close such hospital conducted, managed, or maintained by any such person convicted as aforesaid, and to cause its vacation pending the repairs, alterations, or additions necessary to make it safe and proper for the occupancy of its inmates and to make it comply with the terms of this code. (Section 137-19, Municipal Code of Chicago.)

## TAX EXEMPTION

. . . No hospital . . . which has been adjudicated by a court of competent jurisdiction to have denied admission to any person because of race, color, or creed shall be exempt from taxation. (Section 500.7, Chapter 120, Illinois Revised Statutes—excerpts.)

## RACIAL INFORMATION

It is unlawful, prior to admission of a patient, for any hospital or agent of a hospital directly or indirectly, overtly or covertly, by any method whatsoever, including inquiries or requests made directly or indirectly to a patient, a physician or the agent or representative of any patient or physician, to make inquiry or request information as to the race or color of any person seeking to become a patient or about to become a patient in such hospital. (Section 137-13.3, Municipal Code of Chicago.)

Each hospital shall also post, in its room clerk's office and in its admission office, a copy of the penalty prescribed by law for any violation of the provisions of this ordinance. (Section 137-13.4, Municipal Code of Chicago.)

# THE CHICAGO FAIR HOUSING ORDINANCE

**WHAT DOES THE ORDINANCE DO?**

It prohibits real estate brokers from discriminating because of race, color, religion, national origin or ancestry in the sale or rental of residential real estate in the City of Chicago. It also provides that no real estate broker may solicit residential real estate on the basis that its value will be lessened because of the entry into the neighborhood of persons of a particular race, color, religion, national origin or ancestry ("Panic Peddling").

**WHAT DO I DO IF I BELIEVE I HAVE BEEN DISCRIMINATED AGAINST?**

Anyone who believes he has been discriminated against because of his race, religion or nationality in his search for housing should file a complaint with the Chicago Commission on Human Relations. This is easily done by contacting the Commission and asking for the Director of Housing.

**WHAT DO I DO IF MY NEIGHBORHOOD IS BOTHERED BY A "PANIC PEDDLER"?**

A complaint should be filed with the Chicago Commission on Human Relations.

**WHAT HAPPENS TO A COMPLAINT THAT IS FILED WITH THE COMMISSION?**

The Commission will investigate any complaint charging unlawful housing practices. The Commission will seek to adjust such complaints, hold hearings if necessary and make findings of fact. The Mayor is empowered to suspend or revoke the broker's license of any broker found by the Commission to be violating the ordinance. Steps also can be taken to revoke a broker's state license.

Empl Comm

Lycoming Division

AVCO Corporation

550 South Main Street

Stratford, Connecticut

Applicants may apply at the Employment Office, located at the North End of the Plant. The Employment Office is open from 8:15 a.m. to 8:00 p.m. Monday through Friday and on Saturdays from 8:00 a.m. to 12:00 noon.

Listed below are positions presently available:

HIGH SCHOOL GRADUATES

Clerk Typists
Stenographers
Laboratory Assistants
Trainees (Machine areas)

COLLEGE GRADUATES

Various Engineering positions:

Mechanical
Electrical
Metallurgical
Plastics
Electrical Design
Mechanical Design
Test

All above require experience in the field.

10/5/63

People's Savings Bank - Bridgeport

Employment Information

Applications for employment should be filed at the Bank's Main Office located at the corner of State and Main Streets, Bridgeport. The hostess in the banking lobby, or any of the uniformed guards will direct an applicant to the area where an application may be obtained and filled out.

Interviews - Applicants will be also interviewed at the Main Office of the Bank after completion of an application form.

Hours - The office is open on Mondays through Thursdays from 9 a.m. to 3 p.m., and on Fridays from 9 a.m. to 5:30 p.m. It is not open Saturdays or Sundays.

Job Opportunities - Tellers, Secretaries, Stenographers, Typists, General Office Workers, Tabulating Machine Operators, Key Punch Machine Operators, Switchboard Operators, Guards, Custodial Workers, Accountants, Loan Interviewers, Mortgage Appraisers, Department Supervisors and General Management.

Requirements - Good references, educationally - at least a high school graduate, and for women, typing ability. Dexterity on an adding machine helpful, but not required.

Officer in Charge: G. B. Longstreth

10/5/63

# The Southern New England Telephone Company

## General

High school diploma is generally required for all starting jobs. All job applicants are welcome to file at our employment offices. The Bridgeport office is located at 30 Courtland Street. Each applicant is interviewed by the Employment Representative regardless of current job openings. As openings occur, applicants are contacted to set up test appointments. Pre-employment tests of three basic types are required where appropriate:

a. General Ability Tests
b. Aptitude Tests
c. Skill Tests (typing, shorthand, etc.)

## Local Starting Job Opportunities - High School Graduates

| Male | Requirements |
|---|---|
| Auto Messenger | Aptitude for Craft Jobs |
| Crafts: | |
| Lineman | Minimum 5' 8" in height, 150 lbs. Tested for general ability and aptitude for work with circuits, wiring diagrams, special relationships, etc. |
| Installer | Same as above - Electrical or Electronic experience or training is helpful |
| Frameman | No height and weight requirement - otherwise same as Installer |
| Splicer's Helper | Same as Lineman. |

| Female | Requirements |
|---|---|
| Operator | Tested for general and clerical abilities. |
| Typist | Same as above plus speed and accuracy typing test. |
| Teller | Tested for general and clerical abilities. |
| Service Representative | Tested for general and clerical abilities and aptitude for public contact work involving sales. |

## Local Starting Job Opportunities - College

| Male | Requirements |
|---|---|
| Management Trainee | Four year degree - high class standing - demonstrated leadership ability. |
| Communications Consultant or Directory Representative | Two years of college or equivalent - tested aptitude for sales. |
| Technical Assistant | Two years of technical college |

| Female | Requirements |
|---|---|
| Traffic Usage Counselor | Four year degree - high class standing. Ability for public contact work involving public speaking. |

10/5/63

# Civil Service Commission
City of Bridgeport, Connecticut

The Commission is the official personnel agency for the City of Bridgeport whose employees number approximately 2300, exclusive of teachers. All applicants for City employment must clear through this office, which is located on the second floor of the Barnum Museum Building, 804 Main Street, at the southeast corner of Main and Gilbert Streets. The office is open from 9:00 a.m. to 5:00 p.m., Monday through Friday.

Applicants fall into two broad categories: (1) Those filing to compete in civil service examinations; (2) Those filing for employment where no competitive examination is required. (Most of these openings are in the laborer category).

All competitive examinations are announced in the legal notices of the Bridgeport Post, at least two weeks before the actual test. The official announcement sets forth in detail when and where the examination will be held, the closing date for application, the duties of the particular job we are attempting to fill, the minimum requirements an applicant must meet to be allowed to compete, and the general type of test to be given, whether written or oral, and the weights (or relative importance) of the various subjects.

One important point: we do not issue applications for an examination unless there has been an official announcement of that examination. We do not maintain a mailing list of prospective applicants. The responsibility rests with the applicant to keep track of our announcements and to apply at the proper time.

Applicants for all employment with the City must meet certain common requirements, such as U.S. citizenship, Bridgeport residence for at least one year, good health and physical condition and good character. Beyond this, each examination has important requirements as to education and/or experience and it is by a reference to the formal announcement that the applicant may determine what these requirements are. An official application blank must be secured from the Commission's office.

Openings are available most often for female high school graduates in the classes of typist, stenographer and library assistant; for both male and female college graduates as social workers; for female public health nurses and staff nurses at Hillside Hospital. Young men, between the ages of 22 and 35, from time to time have the opportunity to compete for patrolman or fire fighter positions. While there is no formal education requirement for these two examinations, a high school education unquestionably gives one an advantage, both from the point of performance in the written test and also the rating granted for education and training.

Typical openings available in the non-competitive area of employment are for laborers in our Park and Public Works Department. Almost all of the jobs above the laborer level are filled from within the department organization, so that a young man who begins as a laborer may find it possible to advance. Work is available for women as attendants at Hillside or as janitresses in the schools.

10/5/63

# Howland's - Genung's

## How To Go About Applying for a Job

Those seeking employment may apply at the Personnel Office on the fourth floor at Howland's. After filling out a screening application, each applicant is interviewed and gives information about the kind of work he would like and the hours he is available. In the course of the interview questions are asked about the kind of work he has done previously, the courses he took in school, and any physical limitations to be considered in placing him in a job. To be ready for an interview, each applicant should make notes in advance of the dates of entering and leaving former places of employment. Also, it is advisable to ask in advance permission to use the names given as references. Each person should be sure to have his Social Security card with him.

Each applicant should be neatly dressed and business-like in their manner and appearance. Curlers in hair and gum chewing do not make a good impression. It is better not to have a group of friends along when applying for employment.

## For High School Graduates - What are the Qualifications for Employment

The first important qualification is attitude - a sincere interest in working, willingness to learn, an alert manner, and a sense of responsibility. Many jobs require no previous experience and on the job training is given. Selling jobs and office jobs require some previous experience, an aptitude for accuracy and the use of good judgment under pressure. A short, simple test is given to determine these qualifications. The Distributive Education Department in some high schools offers courses in merchandising, selling techniques, and fabric identification, all of which are helpful in qualifying for a selling job. The business courses given in our high schools qualify high school graduates for jobs in the office. Office visitation weeks, where students spend time in the office observing, are helpful in preparing for employment. High school courses in printing and art help applicants qualify for jobs in the Sign Shop and Display Department.

## Post Secondary Education - What are the Qualifications for Employment

Again, the first important qualification is attitude. Post secondary education provides more specialized training for starting employment on a higher level. In the office such jobs are billers, key punch operators, comptometer operators, and credit interviewers. To qualify for jobs as displaymen, artists, and copywriters post secondary education is necessary, and also for those in the Executive Training Group who are all management trainees.

10/5/63

Carpenters' District Council of Bridgeport and Vicinity

Building Trades Systems of hiring is largely controlled by the agreements that are negotiated between the Contractors and the 12 separate Unions that comprise the Building Trades.

In general, the employer hires who he wants and will request from the Union office any additional help that may be needed. Those Contracts that use the hiring hall system as perscribed by law and for hiring practices, must govern themselves accordingly.

All our agreements have clauses of the following nature:

There shall be no discrimination against any employee as to any term of employment or otherwise, by reason of race, color, creed, sex, age or political or religious affiliation.

All applications for apprenticeship will be given equal opportunity under standards that are set up by the Joint Apprenticeship Training Committee as set forth by the National Labor Department, the State Labor Department and the Unions General Constitutions.

In all cases, apprenticeship applications having equal opportunity without regard to race, creed, color or national origin, must be between the ages of 17 and 24 years of age, of good health, moral character and require high school or vocational school training, or take an aptitude test to show that his ability is being put to the proper use.

Our jurisdiction which covers the Greater Bridgeport area, has been one of the hard areas pressed for jobs. Our people have been forced to find employment in other fields and have gone out of the area and out of the State to earn a living. It also proves fact that the competition in our industry has produced highly skilled workmen.

If you feel you are qualified and can fill any one of the jobs in the Building Trades, I believe that our doors are open to you.

Robert J. McLevy
Business Representative

10/5/63

# Sikorsky Aircraft, Division of United Aircraft Corporation

It is a basic policy of Sikorsky Aircraft to treat all applicants for employment and all employees on the basis of their ability and qualifications without regard to race, religion, color, or national origin. This company's business is such as to demand trained, skilled, and dedicated personnel. In both the hiring and the advancement of employees, there can be no basis for selection other than the capability and the performance of the individual. This is one of the fundamental policies of United Aircraft Corporation, and it exists in all divisions of the corporation.

Where to apply: Employment Office, Stratford Plant, North Main Street (just north of Merritt Parkway) in Stratford, Connecticut.

How to apply: Requires completed application form which can be obtained by writing to or by personal appearance at the Employment Office. In either case, a personal interview is required. Every applicant is granted such an interview whether or not there are immediate openings.

Educational qualifications and starting opportunities for high school graduates:

Training in English is important to all jobs as it enables the reading and interpretation of instructions. It makes possible communication with others.

Training in mathematics enables one to read blueprints and to use precision-measuring instruments. This can qualify one for factory jobs such as assembler, riveter, wire man, press hand, drill-press operator, and stock chaser.

Training in typing and bookkeeping can qualify one for a great variety of clerical, typing, and record-keeping positions in office departments, such as Engineering, Sales, Production Control, and Accounting.

Opportunities requiring formal education after high school graduation:

Graduates of apprenticeship courses can qualify as toolmakers.

Graduates of two-year courses in aircraft technology (leading to FAA licensing as aircraft and power plant mechanics) can qualify as aircraft mechanics, crew chiefs, and flight inspectors.

Graduates of courses in electronic technology can qualify as test lab technicians or flight systems technicians.

Training in state or privately operated technical institutes can qualify one for such jobs as engineering assistant, draftsman, junior engineer, and stress analyst.

Business courses leading to associate degrees or certificates can qualify one as junior accountant, production control specialist, tabulating or computer specialist, and other positions involving assistance to professional, administrative, and executive personnel.

With few expections, a college education is required for professional, administrative, and executive positions:

College degrees in Engineering can qualify one for starting positions as test engineer, systems engineer, flight operations analyst, time-study analyst, and manufacturing process engineer.

Other types of college degrees can qualify one for starting positions of assistant buyer, material controller, assistant scheduler, and accountant.

United Parcel Service

May 31, 1964

Mr. Edward Salem
Employment Chairman
Norwalk CORE
7 Elm Street
Norwalk, Conn

Dear Mr. Salem:

You should go ahead with your project to open up the hiring of the United Parcel Services. Because the New York City Area chapters are committed to a munber of projects now, it is very difficult to begin this project with you. We have no reccord of discrimination at this office; however the State Commission is investigating one case now. If any more information is available, it will be sent on to you.

Sincerely yours,

Norman Hill
Director
Program Dept.

NH/ja

MAY 22 1964

Go on

May 19, 1964

Mr. Norman Hill
Program Director
38 Park Row
New York, NY

Dear Mr. Hill:

Our Employment committee at Norwalk CORE is about to begin work at obtaining jobs at United Parcel Service in this area. We are currently in the process of gathering material, as well as obtaining one or two test cases with the company. As of yet, we have not notified the Company of our plans.

We have been informed that UPS is to be given a new territory soon in the Washington, Maryland, Virginia area. They are, of course, regulated by the Interstate Commerce Commission. In light of this, I would assume that the company would be prime target for my committee at this time. They undoubtedly would like to avoid any unnecessary bad publicity at this time.

UPS as only a terminal in Bridgeport, with larger offices in Hartford, and NYC. I was wondering if you have had an experience with the company, or any information you could offer. Since they are based in N.Y.C,, perhaps this is a project we should work on with National CORE.

Your feelings on this, and any information you have would be appreciated.

] have Jo Check with City Labor Dept.

WA 5-1900

Very truly yours,

Edward Salem

A REPORT

*to the*

*Center for the Study of Democratic Institutions*

# Cybernation:

## The Silent Conquest

by DONALD N. MICHAEL

This **REPORT** is one of a number to be issued by the Center for the Study of Democratic Institutions about significant issues involved in the maintenance of a free society. The Center is now the main activity of the Fund for the Republic, Inc. Its studies are devoted to clarifying questions of freedom and justice, especially those constitutional questions raised by the emerging power of non-governmental institutions.

This series of Reports deals, sometimes in a technical way, with specific aspects of the institutions being studied by the Center and its group of Consultants: the economic order, the trade union, the political process, communications, science and technology, law, war as an institution, the American character. The Reports are published as a service to groups and individuals with special interest in one or another of these areas.

This Report was made in connection with the Center's study of science and technology. Donald N. Michael is director of planning and programs of the Peace Research Institute in Washington, D.C. A graduate of the University of Chicago and of Harvard, he has been associated with several universities and government agencies, as well as the Brookings Institution. He has been a consultant to UNESCO, the Department of Defense, and the National Aeronautics and Space Administration, among others.

The Center for the Study of Democratic Institutions is a non-profit educational enterprise established by the Fund for the Republic to promote the principles of individual liberty expressed in the Declaration of Independence and the Constitution. Contributors to publications issued under the auspices of the Center are responsible for their statements of fact and expressions of opinions. The Center is responsible only for determining that the material should be presented to the public as a contribution to the discussion of the free society.

# Introduction

Both optimists and pessimists often claim that automation is simply the latest stage in the evolution of technological means for removing the burdens of work. The assertion is misleading. There is a very good possibility that automation is so different in degree as to be a profound difference in kind, and that it will pose unique problems for society, challenging our basic values and the ways in which we express and enforce them.*

In order to understand what both the differences and the problems are and, even more, will be, we have to know something of the nature and use of automation and computers. There are two important classes of devices. One class, usually referred to when one speaks of "automation," is made up of devices that automatically perform sensing and motor tasks, replacing or improving on human capacities for performing these functions. The second class, usually referred to when one speaks of "computers," is composed of devices that perform, very rapidly, routine or complex logical and decision-making tasks, replacing or improving on human capacities for performing these functions.

Using these machines does not merely involve replacing men by having machines do tasks that men did before. It is, as John Diebold says, a way of "thinking as much as it is a way of doing. . . . It is no longer necessary to think in terms of individual machines, or even in terms of groups of machines; instead, for the first time, it is practical to look at an entire production or information-handling process as an integrated system and not as a series of individual steps."[1] For example, if the building trades were to be automated, it would not mean inventing machines to do the various tasks now done by men; rather, buildings would be redesigned so that they could be built by machines. One

*This paper makes the following assumptions in looking on the next twenty years or so: *1)* international relations will derive from the same general conditions that pertain today; *2)* the weapons systems industries will continue to support a major share of our economy; *3)* major discoveries will be made and applied in other technologies, including psychology and medicine; *4)* trends in megalopolis living and in population growth will continue; *5)* no major shifts in underlying social attitudes and in public and private goals will take place.

Footnotes appear on pages 47 and 48.

might invent an automatic bricklayer, but it is more likely that housing would be designed so that bricks would not be laid. Automation of the electronics industry was not brought about through the invention of automatic means for wiring circuits but through the invention of essentially wireless—*i.e.*, printed—circuits (though today there are automatic circuit wirers as well).

The two classes of devices overlap. At one pole are the automatic producers of material objects and, at the other, the sophisticated analyzers and interpreters of complex data. In the middle zone are the mixed systems, in which computers control complicated processes, such as the operations of an oil refinery, on the basis of interpretations that they make of data automatically fed to them about the environment. Also in this middle zone are those routine, automatic, data-processing activities which provide men with the bases for controlling, or at least understanding, what is happening to a particular environment. Processing of social security data and making straightforward tabulations of census information are examples of these activities.*

Cybernated systems perform with a precision and a rapidity unmatched in humans. They also perform in ways that would be impractical or impossible for humans to duplicate. They can be built to detect and correct errors in their own performance and to indicate to men which of their components are producing the error. They can make judgments on the basis of instructions programmed into them. They can remember and search their memories for appropriate data, which either has been programmed into them along with their instructions or has been acquired in the process of manipulating new data. Thus, they can learn on the basis of past experience with their environment. They can receive information in more codes and sensory modes than men can. They are beginning to perceive and to recognize.

---

*In order to eliminate the awkwardness of repeating the words "automation" and "computers" each time we wish to refer to both at the same time, and in order to avoid the semantic difficulties involved in using one term or the other to mean both ends of the continuum, we invent the term "cybernation" to refer to *both* automation and computers. The word is legitimate at least to the extent that it derives from "cybernetics," a term invented by Norbert Wiener to mean the processes of communication and control in man and machines. He derived it from the Greek word for "steersman." The theory and practice of cybernetics underlie all systematic design and application of automation and computers.

As a result of these characteristics, automation is being used to make and roll steel, mine coal, manufacture engine blocks, weave cloth, sort and grade everything from oranges to bank checks. More versatile automatic fabricators are becoming available, too:

> *"U.S. Industries announced . . . that it had developed what was termed the first general-purpose automation machine available to manufacturers as standard 'off-the-shelf' hardware. . . . The new machine, called a TransfeRobot, sells for $2,500. . . . The Westclox Company of La Salle, Ill., has been using a TransfeRobot to oil clock assemblies as they pass on a conveyor belt. The machine oils eight precision bearings simultaneously in a second. At the Underwood Corporation typewriter plant in Hartford, the robot picks up, transfers and places a small typewriter component into a close-fitting nest for an automatic machine operation. In an automobile plant, the device feeds partly fabricated parts of a steering assembly to a trimming press and controls the press. The device consists basically of an arm and actuator that can be fitted with many types of fingers and jaws. All are controlled by a self-contained electronic brain."*[2]

At the other end of the continuum, computers are being used rather regularly to analyze market portfolios for brokers; compute the best combination of crops and livestock for given farm conditions; design and "fly" under typical and extreme conditions rockets and airplanes before they are built; design, in terms of costs and traffic-flow characteristics, the appropriate angles and grades for complex traffic interchanges; keep up-to-date inventory records and print new stock orders as automatically computed rates of sales and inventory status indicate. Computers have also been programmed to write mediocre TV dramas (by manipulating segments of the plot), write music, translate tolerably if not perfectly from one language to another, and simulate some logical brain processes (so that the machine goes about solving puzzles – and making mistakes in the process – in the ways people do). Also, computers are programmed to play elaborate "games" by themselves or in collaboration with human beings. Among other reasons, these games are played to understand and plan more efficiently for the conduct of wars and the procedures for industrial and business aggrandizement. Through such games, involving a vast number of variables, and contingencies

within which these variables act and interact, the best or most likely solutions to complex problems are obtained.

The utility and the applicability of computers are being continually enhanced. For example, after a few hours of training, non-specialists can operate the smaller computers without the aid of programmers simply by plugging in pre-recorded instruction tapes that tell the computer how to do specific tasks. Instruction-tape libraries can supply pre-programmed computer directions for everything from finding the cube root of a number to designing a bridge. When the machine is through with one task, its circuits can be easily cleared so that a new set of pre-programmed instructions can be plugged in by its businessman operator.

But the capabilities of computers already extend well beyond even these applications. Much successful work has been done on computers that can program themselves. For example, they are beginning to operate the way man appears to when he is exploring ways of solving a novel problem. That is, they apply and then modify, as appropriate, previous experiences with and methods of solution for what appear to be related problems. Some of the machines show originality and unpredictability. To take one example from a recent paper of Norbert Wiener:

> *"The present level of these learning machines is that they play a fair amateur game at chess but that in checkers they can show a marked superiority to the player who has programmed them after from 10 to 20 playing hours of working and indoctrination. They thus most definitely escape from the completely effective control of the man who has made them. Rigid as the repertory of factors may be which they are in a position to take into consideration, they do unquestionably—and so say those who have played with them—show originality, not merely in their tactics, which may be quite unforeseen, but even in the detailed weighting of their strategy."*[3]

Another example of a machine the behavior of which is not completely controllable or predictable is the Perceptron, designed by Dr. Frank Rosenblatt. This machine can learn to recognize what it has seen before and to teach itself generalizations about what it recognizes. It can also learn to discriminate, and thereby to identify shapes similar to those it has seen before. Future versions will hear as well as see. It

is not possible to predict the degree and quality of recognition that the machine will display as it is learning. It is designed to learn and discriminate in the same way that it is believed man may learn and discriminate; it has its own pace and style of learning, of refining its discriminations, and of making mistakes in the process.

It is no fantasy, then, to be concerned with the implications of the thinking machines. There is every reason to believe that within the next two decades machines will be available outside the laboratory that will do a credible job of original thinking, certainly as good thinking as that expected of most middle-level people who are supposed to "use their minds." There is no basis for knowing where this process will stop, nor, as Wiener has pointed out, is there any comfort in the assertion that, since man built the machine, he will always be smarter or more capable than it is.

> *"It may be seen that the result of a programming technique of [cybernation] is to remove from the mind of the designer and operator an effective understanding of many of the stages by which the machine comes to its conclusions and of what the real tactical intentions of many of its operations may be. This is highly relevant to the problem of our being able to foresee undesired consequences outside the frame of the strategy of the game while the machine is still in action and while intervention on our part may prevent the occurrence of these consequences. Here it is necessary to realize that human action is a feedback action. To avoid a disastrous consequence, it is not enough that some action on our part should be sufficient to change the course of the machine, because it is quite possible that we lack information on which to base consideration of such an action."*[4]

The capabilities and potentialities of these devices are unlimited. They contain extraordinary implications for the emancipation and enslavement of mankind.

The opportunities for man's enhancement through the benefits of cybernation are generally more evident and more expected, especially in view of our proclivity to equate technological advances with progress and happiness. In the words of the National Association of Manufacturers:

*"For the expanding, dynamic economy of America, the sky is indeed the limit. Now more than ever we must have confidence in America's capacity to grow. Guided by electronics, powered by atomic energy, geared to the smooth, effortless workings of automation, the magic carpet of our free economy heads for distant and undreamed horizons. Just going along for the ride will be the biggest thrill on earth!"*[3]

But the somber and complex difficulties produced by cybernation, which already are beginning to plague some aspects of our society and economy, are only beginning to be recognized. Thus, although this paper will describe, first, the advantages of cybernation, which make its ever expanding application so compelling, it will, on the whole, emphasize the less obvious, sometimes acutely uncomfortable aspects of this development with which we must successfully contend if we are to enjoy the benefits of both cybernation and democracy.

# The Advantages of Cybernation

In recent years deteriorating sales prospects, rising production costs, increased foreign competition, and lower profits have led business management to turn to our national talent for technological invention as the most plausible means of reducing costs and increasing productivity, whether the product is an engine block or tables of sales figures. And the government, faced with the need to process and understand rapidly increasing masses of numerical facts about the state of the nation and the world, is already using 524 computers and is the major customer for more of them.

What are the advantages of cybernated systems that make government and private enterprise turn to them to solve problems?

In the first place, in a competitive society a successfully cybernated organization often has economic advantages over a competitor using people instead of machines. As *U.S. News and World Report* says:

> *"In one line of business after another, the trend is the same. Companies are spending millions of dollars to mechanize their operations, boost output and cut costs. . . . Says an official of a big electrical company: 'It is no longer a question of whether or not to automate, but rather it is how far to go and how fast to proceed. If you don't, your competition will.'"*[6]

Not only must many organizations automate to compete, but the same principle probably holds for competing nations. We are by no means the only semi-cybernated society. Europe and Russia are well under way, and their machines and products compete with ours here and in the world market. The U.S.S.R. is making an all-out effort to cybernate as much of its planning-economic-industrial operation as it can.

In the second place, reducing the number of personnel in an organization reduces the magnitude of management's human relations tasks, whether these be coping with over-long coffee breaks, union negotiations, human errors, or indifference.

In the third place, cybernation permits much greater rationalization of managerial activities. The computers can produce information about what is happening now, as well as continuously up-dated information about what will be the probable consequences of specific decisions based on present and extrapolated circumstances. The results are available in a multitude of detailed or simplified displays in the form of words, tables of figures, patterns of light, growth and decay curves, dial readings, etc. In many situations, built-in feedback monitors the developing situation and deals with routine changes, errors, and needs with little or no intervention by human beings. This frees management for attention to more basic duties. There is, for example,

> *". . . an automatic lathe . . . which gauges each part as it is produced and automatically resets the cutting tools to compensate for tool wear. In addition, when the cutting tools have been worn down to a certain predetermined limit, the machine automatically replaces them with sharp tools. The parts are automatically loaded onto the machine and are automatically unloaded as they are finished. These lathes can be*

*operated for 5 to 8 hours without attention, except for an occasional check to make sure that parts are being delivered to the loading mechanism."*[7]

Another example, combining built-in feedback with a display capability, adds further illumination:

*"The Grayson-Robinson apparel chain, which has more than 100 stores throughout the country, receives print-punch tags daily from its stores and converts them to full-size punchcards. The complete merchandise and inventory control function is then handled on a computer. What styles are to be processed first are determined at the computer center. During any given week about 60 per cent of the sales data are received and summarized. On the following Monday morning the remaining 40 per cent of the sales data are received. The computer can then begin running style reports immediately after the tickets have been converted to cards. By this time the company can run up style reports by departments and price lines in order to obtain the necessary merchandising information. The entire reporting job is completed by Wednesday afternoon of each week, including reports on all inactive stockpiles."*[8]

Freeing management from petty distractions in these ways permits more precise and better substantiated decisions, whether they have to do with business strategy, government economic policy, equipment system planning, or military strategy and tactics. Thus, management in business or government can have much better control both over the system as it operates and over the introduction of changes into future operations. Indeed, the changes themselves may be planned in conformity with, and guided by, a strategy that is derived from a computer analysis of the future environment.

In the fourth place, cybernation allows government and industry much greater freedom in locating their facilities efficiently in relation to the accessibility of raw products, markets, transportation, and needed (or cheaper) human and material resources. Distance is no longer a barrier to control and coordination. The computers that control automated processes need not be near the factories nor the data-processing computers near their sources of information or users if other considerations are more pressing. Widely dispersed installations can be coordinated

and controlled from still another place, and the dispersed units can interact with each other and affect one another's performance as easily, in many cases, as if they were all in the same place.

In the fifth place, some degree of cybernation is necessary to meet the needs of our larger population and to maintain or increase the rate of growth of the Gross National Product. An estimated 80,000,000 persons will be added to our population in the next twenty years. Beyond increases in productivity per man hour to be expected from the projected 20 per cent growth in the labor force during this same period, productive growth will have to be provided by machines.

If the criteria are control, understanding, and profits, there are strong reasons why government and business should want to, and indeed would have to, expand cybernation as rapidly as they can. The versatility of computers and automation is becoming better understood all the time by those who use them, even though, as with the human brain, most present users are far from applying their full potential. Cheap and general purpose computers or modular components applicable to many types of automatic production and decision-making are now being manufactured. In good part, they are cheap because they themselves are produced by automated methods. Techniques for gathering the field data that serve as the "inputs" to the machines are being refined and themselves automated or semi-automated. For example, a large shoe distributor is planning to attach a pre-punched IBM card to each shoe box. When a sale is made, the card is returned to a central facility to guide inventory adjustment, reordering, and sales recording and analysis. Techniques for quickly implementing the "outputs" from the machines are also being invented. Methods are being developed for systematically establishing the precise kind and degree of cybernation required in specific situations as well as the changes needed in the rest of the institution or organization using cybernation.

These are the advantages for management, for government, and for those parts of the work force whose status has been enhanced because of cybernation. But as cybernation advances, new and profound problems will arise for our society and its values. Cybernation presages changes in the social system so vast and so different from those with which we have traditionally wrestled that it will challenge to their roots

our current perceptions about the viability of our way of life. If our democratic system has a chance to survive at all, we shall need far more understanding of the consequences of cybernation. Even the job of simply preserving a *going* society will take a level of planning far exceeding any of our previous experiences with centralized control.

The balance of this paper will point out some of the implications of cybernation that we must recognize in our task of developing a society and institutions in which man may be allowed to reach his full capacities.

# The Problems of Cybernation

## UNEMPLOYMENT AND EMPLOYMENT

BLUE-COLLAR ADULTS *"In the highly automated chemical industry, the number of production jobs has fallen 3% since 1956 while output has soared 27%. Though steel capacity has increased 20% since 1955, the number of men needed to operate the industry's plants—even at full capacity—has dropped 17,000. Auto employment slid from a peak of 746,000 in boom 1955 to 614,000 in November. . . . Since the meat industry's 1956 employment peak, 28,000 workers have lost their jobs despite a production increase of 3%. Bakery jobs have been in a steady decline from 174,000 in 1954 to 163,000 last year. On the farm one man can grow enough to feed 24 people; back in 1949 he could feed only 15."*[9]

Further insight into the problem of declining employment for the blue-collar worker comes from union statements to the effect that the number of these employees in manufacturing has been reduced by 1,500,000 in the last six years. As one example from the service industries, automatic elevators have already displaced 40,000 operators in New York.

Another disturbing aspect of the blue-collar displacement problem is its impact on employment opportunities for Negroes. There is already an increasingly lopsided Negro-to-white unemployment ratio as the dock, factory, and mine operations where Negroes have hitherto found their steadiest employment are cybernated. This, plus the handicaps of bias in hiring and lack of educational opportunity, leaves Negroes very few chances to gain new skills and new jobs. Continued widespread and disproportionate firings of Negroes, if accompanied by ineffectual re-employment methods, may well produce a situation that will increase disenchantment abroad and encourage discontent and violence here.

SERVICE INDUSTRIES It is commonly argued that, with the growth of population, there will always be more need for people in the service industries. The assumption is that these industries will be able to absorb the displaced, retrained blue-collar labor force; that automation will not seriously displace people who perform service functions; and that the demand for engineers and scientists will be so great as to provide employment for any number of the young people who graduate with engineering training. (Indeed, some of this demand is expected to arise from the needs of cybernetic systems themselves.)

It is all very well to speak glowingly of the coming growth in the service industries and the vast opportunities for well-paid jobs and job-upgrading that these activities will provide as blue-collar opportunities diminish. But is the future as bright and as simple as this speculation implies? In the first place, service activities will also tend to displace workers by becoming self-service, by becoming cybernated, and by being eliminated. Consider the following data: The U.S. Census Bureau was able to use fifty statisticians in 1960 to do the tabulations that required 4,100 in 1950. Even where people are not being fired, service industries can now carry on a vastly greater amount of business without hiring additional personnel; for example, a 50 per cent increase in the Bell System's volume of calls in the last ten years with only a 10 per cent increase in personnel.

Automation frequently permits the mass production of both cheap items and items of adequate to superior quality. It frequently uses methods of fabrication that make replacement of part or all of the item

more efficient or less bother than repairing it. As automation results in more leisure time, certainly some of this time will be used by more and more do-it-yourselfers to replace worn-out or faulty components in home appliances that are now repaired by paid service personnel. Nor is it clear that repairing computers will be big business. Computer design is in the direction of microminiaturized components: when there is a failure in the system, the malfunctioning part is simply unplugged or pulled out, much as a drawer from a bureau, and replaced by a new unit. Routine procedures determine which component is malfunctioning, so routine that the larger computers now indicate where their own troubles are, so routine that small computers could be built to troubleshoot others. This does not mean that clever maintenance and repair people will be completely unnecessary, but it does mean that a much more careful estimate is required of the probable need for these skills in home-repair work or in computer-repair work.

Drip-dry clothes, synthetic fabrics, plus self-service dry and wet cleaning facilities, probably will outmode this type of service activity.

Identification by fingerprints, instantly checked against an up-to-date nation-wide credit rating (performed by a central computer facility), could eliminate all service activities associated with processing based on identification (for example, bank tellers). A computer that can identify fingerprints does not yet exist, but there is no reason to believe it will not be invented in the next two decades.

If people cost more than machines – either in money or because of the managerial effort involved – there will be growing incentives to replace them in one way or another in most service activities where they perform routine, predefined tasks. It is possible, of course, that eventually people will not cost more than machines, because there may be so many of them competing for jobs, including a growing number of working women. But will service people be this cheap? As union strength is weakened or threatened through reductions in blue-collar membership, unions will try, as they have already begun to do, to organize the white-collar worker and other service personnel more completely in order to help them to protect their jobs from managements willing to hire those who, having no other work to turn to, would work for less money. Former blue-collar workers who, through retraining, will join the ranks

of the service group may help to produce an atmosphere conducive to such unionizing. But how many service organizations will accept the complications of union negotiations, strikes, personnel services, and higher wages in preference to investing in cybernation?

It is possible that as automation and computers are applied more widely an attitude of indifference to personalized service will gradually develop. People will not demand it and organizations will not provide it. The family doctor is disappearing; clerks of all sorts in stores of all sorts are disappearing as well. For example:

> *"The R. H. Macy Co. is trying out its first electronic sales girl. This machine is smart enough to dispense 36 different items in 10 separate styles and sizes. It accepts one- and five-dollar bills in addition to coins and returns the correct change plus rejecting counterfeit currency."*[10]

People either get used to this or, as in the case of the self-service supermarket, seem to prefer it.

It is already the rare sales clerk who knows the "real" differences between functionally similar items; indeed, in most stores, sales clerks as such are rare. Thus, the customer is almost forced to do much of his own selecting and to know at least as much about or to be at least as casual about the differences between competing items as the clerk. As automation increases, the utility of the sales clerk will further diminish. With some products, automation will permit extensive variation in design and utility. With others, especially if our society follows its present course, automation will encourage the endless proliferation of items only marginally different from one other. In either event there is no reason to believe that the clerk or salesman will become more knowledgeable about an even larger variety of competing items. Finally, it is obvious that the remaining tasks of the clerk, such as recording the sale and insuring that the item is paid for, can be cybernated without difficulty.

The greater the indifference to personalized service by both buyers and sellers, the greater the opportunity, of course, to remove human judgments from the system. Cybernation may well encourage acceptance of such depersonalization, and this, in turn, would encourage further reductions in opportunities for service jobs.

MIDDLE MANAGEMENT The blue-collar worker and the relatively menial service worker will not be the only employment victims of cybernation.

*". . . Broadly, our prognostications are along the following lines:*

*"1) Information technology should move the boundary between planning and performance upward. Just as planning was taken from the hourly worker and given to the industrial engineer, we now expect it to be taken from a number of middle managers and given to as yet largely nonexistent specialists: 'operation researchers,' perhaps, or 'organizational analysts.' Jobs at today's middle-management level will become highly structured. Much more of the work will be programmed,* i.e., *covered by sets of operating rules governing the day-to-day decisions that are made.*

*"2) Correlatively, we predict that large industrial organizations will recentralize, that top managers will take on an ever larger proportion of the innovating, planning, and other 'creative' functions than they have now.*

*"3) A radical reorganization of middle-management levels should occur with* certain classes *of middle-management jobs moving downward in status and compensation (because they will require less autonomy and skill), while other classes move upward into the top-management group.*

*"4) We suggest, too, that the line separating the top from the middle of the organization will be drawn more clearly and impenetrably than ever, much like the line drawn in the last few decades between hourly workers and first-line supervisors.*

*". . . Information technology promises to allow fewer people to do more work. The more it can reduce the number of middle managers, the more top managers will be willing to try it. . . . One can imagine major psychological problems arising from the depersonalization of relationships within management and the greater distance between people at different levels. . . . In particular, we may have to reappraise our traditional notions about the worth of the individual as opposed to the organization, and about the mobility rights of young men on the make. This kind of inquiry may be painfully difficult, but will be increasingly necessary."*[11]

As cybernation moves into the areas now dominated by middle management in government and in business—and this move is already begin-

ning—growing numbers of middle managers will find themselves displaced. Perhaps the bulk of displaced members of the blue-collar and service work force might be trained "up" or "over" to other jobs with, generally speaking, little or no decline in status. But the middle manager presents a special and poignant problem. Where can he go? To firms that are not as yet assigning routine liaison, analysis, and minor executive tasks to machines? This may take care of some of the best of the displaced managers and junior executives, but if these firms are to have a future, the chances are that they will have to computerize eventually in order to compete. To the government? Again, some could join it, but the style and format of governmental operations may require readjustments that many junior executives would be unable to make. And, in any case, government too, as we have seen, is turning to computers, and it is entirely possible that much of the work of *its* middle management will also be absorbed by the computers. Up into top management? A few, of course, but necessarily only a few. Into the service end of the organization, such as sales? Some here, certainly, if they have the talent for such work. If computers and automation lead to an even greater efflorescence of marginally differentiated articles and services, there will be a correspondingly greater emphasis on sales in an effort to compete successfully. But can this be an outlet for a truly significant portion of the displaced? And at what salary? Overseas appointments in nations not yet using cybernation at the management level? Again, for a few, but only for those with the special ability to fit into a different culture at the corresponding level from which they came.

Middle management is the group in the society with the most intensive emotional drive for success and status. Their family and social life is molded by these needs, as the endless literature on life in suburbia and exurbia demonstrate. They stand to be deeply disturbed by the threat and fact of their replacement by machines. One wonders what the threat will do to the ambitions of those who will still be students and who, as followers of one of the pervasive American dreams, will have aspired to the role of middle manager "on the way up."

With the demise or downgrading of this group, changes in consumption levels and patterns can also be expected. These people, although they are not the only consumers of products of the sort advertised in

*The New Yorker, Holiday,* and the like, are certainly among the largest of such consumers. They are the style-setters, the innovators, and the experimenters with new, quality products. With their loss of status and the loss of their buying power, one can imagine changes in advertising, or at least changes in the "taste" that this advertising tries to generate. It is possible that the new middle élite, the engineers, operations researchers, and systems analysts, will simply absorb the standards of the group they will have replaced. But they may be different enough in outlook and motives to have different styles in consumption.

OVERWORKED PROFESSIONALS There are service jobs, of course, that require judgments about people by people. (We are not including here the "personalized service" type of salesmanship.) The shortage of people with these talents is evidenced by the 60-hour and more work-weeks of many professionals. But these people are the products of special education, special motives, and special attitudes that are not shared to any great degree by those who turn to blue-collar or routine service tasks. Increasing the proportion of citizens with this sort of professional competence would require systematic changes in attitudes, motives, and levels of education, not to mention more teachers, a professional service already in short supply. Alterations of this magnitude cannot be carried out overnight or by casual advertising campaigns or minor government appropriations. It is doubtful indeed, in our present operating context, that they can be done fast enough to make a significant difference in the employment picture for professional services in the next decade or two. Values become imbedded early in life. They are subject to change, to be sure, but we are not, as a democratic society, adept at or inclined to change them deliberately and systematically.

Even if the teachers and the appropriate attitudes already existed, service needs at the professional level might not be great enough to absorb a large share of the potentially unemployed. Much of the work that now takes up the time of many professionals, such as doctors and lawyers, could be done by computers—just as much of the time of teachers is now taken up by teaching what could be done as well by machines.

The development of procedures for medical diagnosis by machine is proceeding well. A completely automatic analysis of data can produce

just as good a diagnosis of brain malfunction as that done by a highly trained doctor. Cybernated diagnosis will be used in conjunction with improved multi-purpose antibiotics and with microminiaturized, highly sensitive, and accurate telemetering equipment (which can be swallowed, imbedded in the body, or affixed to it) in order to detect, perhaps at a distance, significant symptoms.[12] All of these developments are likely to change the nature of a doctor's time-consuming tasks. In the field of law successful codification, so that searches and evaluations can be automatic, as well as changes in legal procedures, will probably make the lawyer's work substantially different from what it is today, at least in terms of how he allocates his time.

Computers probably will perform tasks like these because the shortage of professionals will be more acute at the time the computers acquire the necessary capabilities. By then, speeded-up data processing and interpretation will be necessary if professional services are to be rendered with any adequacy. Once the computers are in operation, the need for additional professional people may be only moderate, and those who are needed will have to be of very high calibre indeed. Probably only a small percentage of the population will have the natural endowments to meet such high requirements. A tour of the strongholds of science and engineering and conversations with productive scientists and engineers already lead to the conclusion that much of what now appears to be creative, barrier-breaking "research and development" is in fact routine work done by mediocre scientists and engineers. We lose sight of the fact that not everybody with dirty hands or a white coat is an Einstein or a Steinmetz. Many first-class scientists in universities will testify that one consequence of the increasingly large federal funds for research is that many more mediocre scientists doing mediocre work are being supported. No doubt for some time to come good use can be made by good professionals of battalions of mediocre professionals. But battalions are not armies. And sooner or later one general of science or engineering will be able to fight this war for knowledge more effectively with more push-buttons than with more intellectual foot-soldiers.

UNTRAINED ADOLESCENTS *"Altogether the United States will need 13,500,000 more jobs in the Sixties merely to keep abreast of the*

*expected growth in the labor force. This means an average of 25,000 new jobs each week, on top of those required to drain the reservoir of present unemployment and to replace jobs made superfluous by improved technology. In the last year, despite the slackness of employment opportunities, 2,500,000 more people came into the job scramble than left it through death, age, sickness or voluntary withdrawal. This was more than double the 835,000 average annual growth in the working population in the last ten years. By the end of this decade, 3,000,000 youngsters will be starting their quest for jobs each year, as against 2,000,000 now. This almost automatically guarantees trouble in getting the over-all unemployment rate down to 4 per cent because the proportion of idleness among teen-age workers is always far higher than it is among their elders."*[13]

The Labor Department estimates that 26,000,000 adolescents will seek work in the Sixties. If present performance is any indicator, in the decade ahead 30 per cent of adolescents will continue to drop out before completing high school and many who could go to college won't. The unemployment rate for such drop-outs is about 30 per cent now. Robert E. Iffert, of the Department of Health, Education, and Welfare, concluded in a 1958 study that approximately one-fourth of the students who enter college leave after their freshman year never to return. Figures compiled since then lead him to conclude that there has been no significant change, in spite of the National Defense Education Act, which was supposed to help reduce this figure.[14]

If some figures recently given by James B. Conant turn out to be typical, at least one situation is much more serious than the average would imply. He found that in one of our largest cities, in an almost exclusively Negro slum of 125,000, 70 per cent of the boys and girls between 16 and 21 were out of school and unemployed. In another city, in an almost exclusively Negro slum, in the same age group, 48 per cent of the high school graduates were unemployed and 63 per cent of the high school drop-outs were unemployed.[15] These adolescents would in the normal course join the untrained or poorly trained work force, a work force that will be more and more the repository of untrainable or untrained people displaced from their jobs by cybernation. These adolescents will have the following choices: they can stay in school, for which

they are unsuited either by motivation or by intelligence; they can seek training that will raise them out of the untrained work force; they can compete in the growing manpower pool of those seeking relatively unskilled jobs; or they can loaf.

If they loaf, almost inevitably they are going to become delinquent. Thus, without adequate occupational outlets for these youths, cybernation may contribute substantially to further social disruption.

Threatened institutions often try forcibly to repress groups demanding changes in the *status quo*. Imagine the incentives to use force that would exist in a nation beset by national and international frustrations and bedeviled by anarchic unemployed-youth movements. Imagine, too, the incentives to use force in view of the reserves of volunteer "police" made up of adults who can vent their own unemployment-based hostility in a socially approved way by punishing or disciplining these "children."

A constructive alternative, of course, is to provide appropriate training for these young people in tasks that are not about to be automated. But this implies an elaborate, costly program of research and planning to recruit teachers, to apply advanced teaching machine methods as a supplement to teachers, and to stimulate presently unmotivated youngsters to learn. The program would also require intensive cooperation among business, labor, education, local social service agencies, and the government. And all this must begin *now* in order for it to be ready when it will be needed.

None of this is easily met. Persuading drop-outs to stay in school will not be easy. Teachers will not be easy to recruit unless they are well paid. There is already a shortage of teachers. And let no one suggest that an easy source of teachers would be displaced workers. There is no reason to believe that they have the verbal and social facility to teach, and most of them would have nothing to teach but skills that have become obsolete. Some, of course, might be taught to teach, though this would add obvious complications to the whole effort.

Knowing what to teach will depend on knowing what types of jobs are likely to exist when the student finishes his training. This will require knowledge about the trends and plans of local industry, if that is where the youths are to work (and if that is where industry plans to stay!), and of industries in other localities, if the youths are willing to move. Such

knowledge often does not exist in a rapidly changing world or, if it exists, may not be forthcoming from businesses more concerned with competition than with the frustrated "delinquents" of their community. As of now, in the words of Dr. Conant, "unemployment of youth is literally nobody's affair."

SOME PROPOSED SOLUTIONS Retraining is often proposed as if it were also the cure-all for coping with adults displaced by cybernation as well as young people. In some circumstances it has worked well for some people, especially with office personnel who have been displaced by data-processing computers and have learned other office jobs, including servicing the computers. But in other cases, especially with poorly educated blue-collar workers, retraining has not always been successful, nor have new jobs based on that retraining been available. Max Horton, Michigan's Director of Employment Security, says:

*" 'I suppose that is as good as any way for getting rid of the unemployed—just keeping them in retraining. But how retrainable are the mass of these unskilled and semi-skilled unemployed? Two-thirds of them have less than a high school education. Are they interested in retraining? But most important, is there a job waiting for them when they have been retrained?' The new California Smith-Collier Act retraining program drew only 100 applicants in six months."*[16]

A. H. Raskin's survey of the situation leads him to conclude:

*"The upgrading task will be a difficult, and perhaps impossible, one for those whose education and general background do not fit them for skilled work. The outlook is especially bleak for miners, laborers and other unskilled workers over 40, who already make up such a big chunk of the hard core of joblessness."*[17]

Moreover, management has not always been willing to institute retraining programs. People are either fired outright in some cases or, more often, simply are not rehired after a layoff.

*"Labor and management have been slow to face the problem over the bargaining table. Harry Bridges' West Coast longshoremen's union recently agreed to give shippers a free hand to mechanize cargo han-*

*dling—in exchange for a guarantee of present jobs, plus early retirement and liberal death benefits. In Chicago this week, President Clark Kerr of the University of California, one of the top labor economists, will preside over a company-union committee meeting at Armour & Co. to draw up a plan for the rapidly automating meat industry. A similar committee is at work at Kaiser Steel Co. But many authorities think such efforts are far too few, that management must do more. E. C. Schulze, acting area director of Ohio's state employment service, says: 'I've yet to see an employer's group willing to take a look at this problem and seek solutions. They refuse to recognize their responsibility. They talk about long-term trends—but nobody talks about the immediate problem of jobless, needy people.' "*[18]

The problem of retraining blue-collar workers is formidable enough. But, in view of the coming role of cybernation in the service industries, the retraining problem for service personnel seems insuperable. No one has seriously proposed what service tasks this working group could be retrained *for*—to say nothing of training them for jobs that would pay high enough wages to make them good consumers of the cornucopia of products manufactured by automation.

Another proposal for coping with the unemployment-via-cybernation problem is shorter hours for the same pay. This approach is intended to maintain the ability of workers to consume the products of cybernation and, in the case of blue-collar workers, to maintain the strength of unions. This would retain the consumer purchasing capacity for x workers in those situations where the nature of the cybernation process is such that x men would do essentially the same work as x plus y men used to do. But when the task itself is eliminated or new tasks are developed that need different talents, shorter shifts clearly will not solve the problem. The latter conditions are the more likely ones as cybernation becomes more sophisticated.

Proponents of cybernation claim that it should reduce the price of products by removing much of the cost of labor and increasing consumer demand. Whether the price of beef, or milk, or rent will be reduced in phase with the displaced worker's lowered paycheck remains to be seen. So far this has not happened. Whether the price of TV sets, cars, refrigerators, etc. will be reduced substantially depends in part on how much

product cost goes into larger advertising budgets aimed at differentiating the product from the essentially same one produced last year or from the practically identical one produced on some other firm's automated production line.

An obvious solution to unemployment is a public works program. If our understanding of the direction of cybernation is correct, the government will probably be faced for the indefinite future with the need to support part of the population through public works. There is no dearth of public work to be done, and it is not impossible that so much would continue to be needed that an appropriately organized public works program could stimulate the economy to the point that a substantial portion of the work force could be re-absorbed into the private sector. That is, although the proportion of workers needed for any particular task will be reduced through the use of cybernation, the total number of tasks that need to be done could equal or exceed the absolute number of people available to do them. It is not known whether this situation would obtain for enough tasks in enough places so that the portion of the population working on public projects would be relatively small. However, if it should turn out that this felicitous state of affairs could be realized in principle, clearly it could only be realized and sustained if there were to be considerable and continuous centralized planning and control over financing, the choice of public projects, and the places where they were to be done. If, for whatever reasons, this situation could not be achieved, the public works payroll would remain very large indeed.

What would be the effects on the attitudes and aspirations of a society, and particularly of its leadership, when a significant part of it is overtly supported by governmental public works programs? ("Overtly" is used because much of the aerospace industry in particular and of the weapons systems industry in general is subsidized by the government right now: they literally live off cost plus fixed fee contracts, and there is no other comparable market for their products.) Whatever else the attitudes might be, they certainly would not be conducive to maintaining the spirit of a capitalistic economy. This shift in perspective may or may not be desirable, but those who think it would be undesirable should realize that

encouraging the extension of cybernation, in the interests of free enterprise and better profits, may be self-defeating.

The inherent flexibility of cybernated systems, which permits great latitude in their geographic location, is the inspiration for the proposal that if jobs are lost through cybernation, the unemployed could be moved to another area where jobs exist. It is said that a governmental agency similar to the Agricultural Resettlement Administration, which moved farmers from the Dust Bowl to cities, could be used. However, two important differences between that situation and this one would complicate this effort: the contemporary cause of the unemployment would not be the result of an act of God; and it is not immediately evident that these unemployed people could find jobs in other areas, which might be suffering from a similar plethora of useless workers.

Herbert Striner has suggested that a more extreme approach would be to export blue-collar and white-collar workers and their families to nations needing their talents. The problem of whether or how the salary differential might be made up is one of several difficulties with this proposal. Yet, if such emigration could be carried out, it might be a better solution than letting the workers atrophy here. The economic history of former colonial powers and their colonization techniques indicate that "dumping" of excess personnel into foreign lands would not be a radically new innovation.

Another possible long-run approach might be curtailment of the birth rate. In times of depression the rate falls off naturally—which may be the way the process would be accomplished here if enough people become unemployed or marginally employed (although the effects of the lowered birth rate would only follow after the economic and social changes had been made). Of course, the government could encourage birth control by reducing the income tax dependency deduction or by other tax means.

Finally, there is the proposal to reduce the working population by increasing the incentives for early retirement. Government could do this by reducing the retirement age for social security, and unions and management could use their collective ingenuity to provide special retirement incentives. Naturally, this would increase the already large percentage of retired elderly people. Along with the other familiar problems

associated with this group is the poignant one we shall face in more general form in the next section: how are all these people to be kept happily occupied in their leisure?

Whether any of these proposed solutions is adequate to the challenge of unemployment is not known to us or, we gather, to those who have proposed one solution or another. But even if, in principle, some combination of them would be adequate, in order to put them into effect a considerable change would be necessary in the attitudes and voting behavior of Congress and our tax-paying citizens. Preconceptions about the virtues and vices of work, inflation, the national debt, and government control run deep and shift slowly.

Not all of these dire threats would come to pass, of course, if cybernation reduced consumer buying power through unemployment and, thereby, the financial capability of industry and business to introduce or profit from cybernation. In this way we might all be saved from the adverse effects of unemployment from this source. But the economy would still be faced with those threats to its well-being which, as were pointed out earlier, make the need to cybernate so compelling.

Cybernation is by nature the sort of process that will be introduced selectively by organization, industry, and locality. The ill-effects will be felt at first only locally and, as a result, will not be recognized by those who introduce it—and perhaps not even by the government—as a *national* problem with many serious implications for the whole social system. Also, because one of the chief effects of cybernation on employment is not to hire rather than to fire, the economic-social consequences will be delayed and will at any time be exacerbated or ameliorated by other economic and social factors such as the condition of our foreign markets, which also are being changed and challenged by European and Russian cybernation. By the time the adverse effects of cybernation are sufficiently noticeable to be ascribed to cybernation, the equipment will be in and operating.

Once this happens, the costs of backtracking may be too great for private enterprise to sustain. For, in addition to the costs of removing the equipment, there will be the costs of building a pre-cybernation system of operations. But which firms will voluntarily undertake such a job if they are unsure whether their competitors are suffering the same setback—or

indeed if their competitors are going to decybernate at all? And, if not voluntarily, how would the government enforce, control, and pay for the change-over?

## ADDITIONAL LEISURE

It is generally recognized that sooner or later automation and computers will mean shorter working hours and greater leisure for most if not all of the American people. It is also generally, if vaguely, recognized that there probably are problems connected with the use of leisure that will take time to work out.

Two stages need to be distinguished: the state of leisure over the next decade or two, when our society will still be in transition to a way of life based on the widespread application of cybernation; and the relatively stable state some time in the future when supposedly everybody will have more leisure time than today and enough security to enjoy it. The transitional stage is our chief concern, for the end is far enough off to make more than some general speculations about it footless. At this later time people's behavior and attitudes will be conditioned as much by presently unforeseeable social and technological developments as by the character and impact of cybernation itself.

During the transition there will be four different "leisure" classes: 1) the unemployed, 2) the low-salaried employees working short hours, 3) the adequately paid to high-salaried group working short hours, and 4) those with no more leisure than they now have—which in the case of many professionals means very few hours of leisure indeed.

LEISURE CLASS ONE Today, most of the unemployed are from low educational backgrounds where leisure has always been simply a respite from labor. No particular aspirations to or positive attitudes about the creative use of leisure characterize this group. Since their main concern is finding work and security, what they do with their leisure is a gratuitous question; whatever they do, it will hardly contribute to someone else's profits.

It is worth speculating that one thing they might do is to participate in radical organizations through which they could vent their hostility over

being made insecure and useless. Another thing they could do, if so motivated and if the opportunity were available, would be to learn a skill not likely to be cybernated in the near future, although, as we have seen, the question arises of what this would be. Another thing would be to move to areas where there is still a demand for them. But breaking community ties is always difficult, especially during periods of threat when the familiar social group is the chief symbol of security. And who would pay for their move and who would guarantee a job when they got where they were going?[19]

As cybernation expands its domain, the unemployed "leisure" class will not consist only of blue-collar workers. The displaced service worker will also swell the ranks of the unemployed, as well as the relatively well-trained white-collar workers until they can find jobs or displace from jobs the less well-trained or less presentable, like the college graduate filling-station attendant of not so many years ago. It is doubtful that during their unemployed period these people will look upon that time as "leisure" time. For the poorly educated, watching television, gossiping, and puttering around the house will be low-cost time-fillers between unemployment checks; for the better educated, efforts at systematic self-improvement, perhaps, as well as reading, television, and gossip; for many, it will be time spent in making the agonizing shift in style of living required of the unemployed. These will be more or less individual tragedies representing at any given time a small portion of the work force of the nation, statistically speaking. They will be spread over the cities and suburbs of the nation, reflecting the consequences of actions taken by particular firms. If the spirit of the day grows more statistical than individualistic, as this paper suggests later that it well might, there is a real question of our capacity to make the necessary organized effort in order to anticipate and cope with these "individual" cases.

The free time of some men will be used to care for their children while their wives, in an effort to replace lost income, work at service jobs. But this arrangement is incompatible with our image of what properly constitutes man's role and man's work. The effects of this use of "leisure" on all family members will be corrosive rather than constructive and will contribute to disruption of the family circle. "Leisure" for this group of people may well acquire a connotation that will discourage for a long

time to come any real desire to achieve it or any effort to learn how to use it creatively.

One wonders, too, what women, with their growing tendency to work—to combat boredom as well as for money—will do as the barriers to work become higher, as menial white-collar jobs disappear under the impact of cybernation, and as the competition increases for the remaining jobs. If there are jobs, 6,000,000 more women are expected to be in the labor force in 1970 than were in it in 1960. Out of a total labor force of 87,000,000 at that time, 30,000,000 would be women. To the extent that women who want jobs to combat boredom will not be able to get them, there will be a growing leisure class that will be untrained for and does not want the added leisure. As for those women who have a source of adequate income but want jobs because they are bored, they will have less and less to do at home as automated procedures further routinize domestic chores.

LEISURE CLASS TWO A different kind of leisure problem will exist for the low-income group working shorter hours. This group will be composed of people with the attitudes and behavior traditionally associated with this class, as well as some others who will have drifted into the group as a result of having been displaced by cybernation. What evidence there is indicates that now and probably for years to come, when members of this group have leisure time as a result of fewer working hours, the tendency will be to take another job.[20] It is reasonable to believe that the general insecurity inevitably arising from changing work arrangements and the over-all threat of automation would encourage "moonlighting" rather than the use of free time for recreation. If these people cannot find second jobs, it is hard to imagine their doing anything different with their free time from what they do now, since they will not have the money, the motives, or the knowledge to search out different activities.

If the shorter hours are of the order of four eight-hours days, potentially serious social problems will arise. For example, a father will be working fewer hours than his children do in school. What he will do "around the house" and what adjustments he, his wife, and children will have to make to each other will certainly add very real difficulties to the already inadequate, ambiguous, and frustrating personal relationships that typify much of middle-class family life.

LEISURE CLASS THREE Workers with good or adequate income employed for shorter hours are the group usually thought of when one talks about the positive opportunities for using extra leisure in a cybernated world. Its members for the most part will be the professional, semi-professional, or skilled workers who will contribute enough in their social role to command a good salary but who will not be so rare as to be needed for 40 hours a week. These people already value learning and learning to learn. Given knowledge about, money for, and access to new leisure-time activities, they are likely to make use of them. They could help to do various desirable social service tasks in the community, tasks for which there is not enough money to attract paid personnel of high enough quality. They could help to teach, and, by virtue of their own intimate experiences with cybernation, they would be able to pass on the attitudes and knowledge that will be needed to live effectively in a cybernated world. It is likely, too, that this group will be the chief repository of creative, skilled manual talents. In a nation living off mass-produced, automatically produced products, there may be a real if limited demand for hand-made articles. (We may become again in part a nation of small shopkeepers and craftsmen.) In general, this group of people will probably produce and consume most of its own leisure-time activities.

LEISURE CLASS FOUR The fourth group consists of those who probably will have little or no more leisure time than they now have except to the extent permitted by additions to their ranks and by the services of cybernation. But extrapolations for the foreseeable future indicate insufficient increases in the class of presently overworked professionals and executives. Computers should be able to remove many of the more tedious aspects of their work in another few years, but for some time to come these people will continue to be overburdened. Some of this relatively small proportion of the population may manage to get down to a 40-hour week, and these lucky few should find no difficulty in using their leisure as productively and creatively as those in the third group.

Thus, during the transition period, it is the second group, the low-salaried workers who cannot or will not find another job, that presents the true leisure problem, as distinct from the unemployment problem. Here is

where the multiple problems connected with private and public make-play efforts may prove very difficult indeed. We have some knowledge about relatively low-income workers who become voluntarily interested in adult education and adult play sessions, but we have had no real experience with the problems of how to stimulate the interests and change the attitudes of a large population that is forced to work shorter hours but is used to equating work and security, that will be bombarded with an advertising *geist* praising consumption and glamorous leisure, that will be bounded closely on one side by the unemployed and on the other by a relatively well-to-do community to which it cannot hope to aspire. Boredom may drive these people to seek new leisure-time activities if they are provided and do not cost much. But boredom combined with other factors may also make for frustration and aggression and all the social and political problems these qualities imply.

## DECISIONS AND PUBLIC OPINION

PRIVILEGED INFORMATION The government must turn to computers to handle many of its major problems simply because the data involved are so massive and the factors so complex that only machines can handle the material fast enough to allow timely action based on understanding of the facts. In the nature of the situation, the decisions made by the government with the help of computers would be based in good part on computers that have been programmed with more or less confidential information—and privileged access to information, at the time it is needed, is a sufficient if not always necessary condition for attaining and maintaining power. There may not be any easy way to insure that decisions based on computers could not become a threat to democratic government.

Most of the necessary inputs for the government's computer systems are available only to the government, because it is the only institution with sufficiently extensive facilities for massive surveys (whether they be photographic, observational, paper and pencil, or electronic in nature). Also, the costs of these facilities and their computer installations are so great that buying and maintaining such a system is sensible only if one has the decision-making needs of a government and the data required to

feed the machines. Other organizations, with other purposes, would not need this kind of installation. These machines can provide more potent information than merely rapidly produced summaries and tabulations of data. They can quickly provide information on relationships among data, which may be appreciated as significant only by those already having privileged information based on a simpler level of analysis or on other non-quantified intelligence to which the user is privy.[21] Computers can also provide information in the form of extrapolations of the consequences of specific strategies and the probabilities that these consequences will arise. This information can be based on exceedingly complex contingencies. The utility and applicability of these extrapolations will be fully understandable only to those knowing the particular assumptions that went into the programming of the machines.

THE INEVITABILITY OF IGNORANCE It may be impossible to allow much of the government, to say nothing of the public, access to the kind of information we have been discussing here. But let us assume that somehow the operation of the government has been reorganized so that procedures are enforced to permit competing political parties and other private organizations to have access to the government's raw data, to have parallel systems for the processing of data as well as to have access to the government's computer programs. Even then, most people will be incapable of judging the validity of one contending computer program compared to another, or whether the policies based on them are appropriate.

This condition exists today about military postures. These are derived in good part from computer analyses and computer-based games that produce probabilities based on programmed assumptions about weapon systems and our and the enemy's behavior. Here the intellectual ineffectualness of the layman is obscured by the secrecy that keeps him from finding out what he probably would not be able to understand anyway. If this sounds condescending, it only needs to be pointed out that there are large areas of misunderstanding and misinterpretation among the military too. At any given time, some of these people do not fully appreciate the relationships between the programs used in the computers and the real world in which the consequences are supposed to follow. As it is now, the average intelligent man has little basis for judging the differing

opinions of economists about the state of the economy or even about the reasons for a past state. He also has little basis for appraising the conflicting opinions among scientists and engineers about the costs and results of complex scientific developments such as man in space. In both examples, computers play important roles in the esoteric arguments involved.

Thus, even if people may have more leisure time to attend more closely to politics, they may not have the ability to contribute to the formulation of policy. Some observers feel that the middle class does not now take a strong interest in voting and is alienated in its responsibility for the conduct of government. Leisure may not change this trend, especially when government becomes in large part the complex computer operation that it must necessarily become.

Significant public opinion may come from only a relatively small portion of the public: a) those who are able to follow the battles of the computers and to understand the implications of their programs; and b) those who are concerned with government policy but who are outside of or unfamiliar with the computer environment.

For this segment of the voting population, differences over decisions that are made or should be made might become more intense and more irreconcilable. Already there is a difference of opinion among intelligent men about the problem of the proper roles in American foreign policy of military weapons, arms control, and various levels of disarmament. One side accuses its opponents of naïveté or ignorance about the "facts" (computer-based), and the other side objects to the immorality or political insensibilities of its opponents. Many aspects of the problem involve incommensurables; most are too complex to stand simplification in order to appeal to the larger public or to an unsophisticated Congressman. Yet the arguments *are* simplified for these purposes and the result is fantastic confusion. The ensuing frustration leads to further efforts to make the case black or white and to further efforts by one contingent to provide ever more impressive computer-based analyses and by the other side to demonstrate that they are beside the point.

This is only one example of the problems that will arise from the existence of sophisticated computers. Will the problems create greater chasms between the sophisticated voter and the general public, and within the sophisticated voting group itself?

PERSONNEL AND PERSONALITIES As for the selection of the men who are to plan or make policy, a computerized government will require different training from that which executive personnel in most governmental agencies has today. Certainly, without such training (and perhaps with it) there is bound to be a deepening of the split between politics and facts. For example, it is evident that the attitudes of many Congressmen toward space activities are motivated more by politics and conventional interpretations of reality than by engineering facts or the realities of international relations.

The same schisms will be compounded as computers are used more and more to plan programs in the Department of Health, Education,and Welfare, urban development, communications, transportation, foreign aid, and the analysis of intelligence data of all sorts.

In business and industry the shift has already begun toward recruiting top management from the cadre of engineering and laboratory administration, for these are the people who understand the possibilities of and are sympathetic to computer-based thinking. In government the trend has not been as clear-cut, but it is noteworthy that the scientist, as high-level adviser, is a recent innovation and one clearly here to stay. Sometimes unhappily and sometimes enthusiastically, the scientist, scientist-administrator, and engineer acknowledge that their role of adviser is frequently confused with that of policy-maker. As people with this training come more to influence policy and those chosen to make it, changes in the character and attitudes of the men responsible for the conduct of government will inevitably occur.

For reasons of personality as well as professional perspective, many operations researchers and systems analysts have great difficulty in coping with the more ambiguous and less "logical" aspects of society.[22] Their temperaments, training, and sympathies may not incline them to indulge the slow, ponderous, illogical, and emotional tendencies of democratic processes. Or they may ignore the extra-logical nature of man. Emphasis on "logic," in association with the other factors we have mentioned, may encourage a trend toward the recruitment of authoritarian personalities. There is no necessary correlation between the desire to apply scientific logic to problems and the desire to apply democratic principles to daily, or even to professional scientific, life.

MASS VS. THE INDIVIDUAL The psychological influence of computers is overwhelming: they symbolize and reenforce the potency of America's belief in the utility of science and technology. There is a sense of security in nicely worked-up curves and complex displays of information which are the products of almost unimaginably intricate and elegant machinery. In general, the influence of computers will continue to be enhanced if those who use them attend chiefly to those components of reality which can be put into a computer and processed by it, and the important values will become those which are compatible with this approach to analyzing and manipulating the world. For example, the influence of computers has already been sufficiently strong to seduce military planners and civil defense planners *away* from those aspects of their problems which are not now subject to data processing. Most of the planning for survival following nuclear attack has to do with those parts of the situation which can be studied by computers. Crucial aspects of psychological and social reorganization have been pushed into the background simply because they cannot be handled statistically with convenience or with the demonstrated "expertness" of the specialist in computers. Thus, the nature of the post-attack situation is argued learnedly but spuriously by those who have the attention of leadership, an attention stimulated by the glamor of computers, the prestige of their scientist-keepers, and the comfort of their "hard facts."

Computers are especially useful for dealing with social situations that pertain to people in the mass, such as traffic control, financial transactions, mass-demand consumer goods, allocation of resources, etc. They are so useful in these areas that they undoubtedly will help to seduce planners into inventing a society with goals that can be dealt with in the mass rather than in terms of the individual. In fact, the whole trend toward cybernation can be seen as an effort to remove the variabilities in man's on-the-job behavior and off-the-job needs which, because of their non-statistical nature, complicate production and consumption. Thus, somewhere along the line, the idea of the individual may be completely swallowed up in statistics. The planner and those he plans for may become divorced from one another, and the alienation of the individual from his government and individual from individual within government may grow ever greater.

Computers will inevitably be used to plan employment for those dis-

placed by cybernation. This may lead to a more rationalized society than could otherwise be invented, with a more adequate allocation of jobs. But one wonders whether it will not also lead, on a national scale, to an attitude in the planner of relative indifference to the individual, an indifference similar to that shown by many managers of large self-service institutions who find an occasional complaint too much trouble to cope with individually because the influence of the individual on the operation of the system is too negligible to warrant attention.

What will be the consequences for our relations with underdeveloped nations of a government that sees the world through computers? With our general public alienated from its own productive and governmental processes and our leadership seemingly successful through its use of computer-based planning and control, our government may well become more and more incapable of recognizing the differences between the needs, aspirations, and customs of these nations and those of our own country. In these nations, productive and governmental processes will still be very human activities, with all the non-statistical variabilities that implies. Our decision to race the U.S.S.R. to the moon is an initial indication of our incapacity as an advanced technological nation to appreciate what our acts look like to other nations with different attitudes.

On the other hand, the emphasis on human behavior as a statistical reality may encourage revisions in the temporal scale of government planning and programs. Time is a statistical property in cybernated systems: it takes time for variables to average out, to rise or fall in their effects, and the time period usually is not a fiscal year or some small multiple thereof. Thus, perhaps we can hope for more sensible long-range planning in government as a result of the computer's need for long time periods in which to make its statistical models work out. If this should come about, of course, it will require vast changes in the conduct of government and in the devices that government, and especially the Congress, uses for controlling its activities. It may also result in extending the present trend of turning over governmental policy-planning and, in effect, policy-making responsibilities to private organizations and their human and machine computers such as RAND. For unless the rules for Congressional elections are also changed, some of the responsibility that Congressmen now take for programs, when they vote relatively short-term appropria-

tions, will no doubt be transferred to the machines that invented the plans if Congressmen should be faced with passing on appropriations and programs that would extend far beyond the time of their incumbencies.

DECISIONS FOR BUSINESS The implications of the concentration of decision-making within business firms as a result of cybernation are not as clear-cut as the effects for government. In principle, both big and small business will be able to know much more about the nature of their markets and of their organizational operations through cybernation. Whether or not this will help both big and small proportionately is far from clear. Big business will undoubtedly have better facilities for information and decisions, but small business may be able to get what it needs by buying it from service organizations that will come into existence for this purpose. Big organizations will be able to afford high-priced personnel for doing the thinking beyond that done by the machines. If quality of thinking is always related to price, the big organizations will be able to put their small competitors out of business. But the big organizations, precisely because of their size, may have relatively little maneuverability, and some of the best minds may find the little organizations a more exciting game. Whether the little organizations could stay afloat is moot, but one can anticipate some exciting entrepreneurial maneuvers among the small firms while they last.

One thing is clear: among the small organizations, and probably among the big ones too, we can expect disastrous mistakes as a result of poor machine programming or inaccurate interpretations of the directives of the machines. These will be greatest during the early period when it will be faddish to plan via machine and when few organizations will have the brainpower and organization to do so intelligently. Thus, added to the unemployment ranks in the decade or so ahead will be those who have been put out of jobs because their firms have misused computers.

# The Control of Cybernation

## TIME AND PLANNING

Time is crucial in any plan to cope with cybernation. Ways of ameliorating its adverse effects require thinking farther ahead than we ever do. In a society in the process of becoming cybernated, education and training for work as well as education and training for leisure must begin early in life. Shifts in behavior, attitudes, and aspirations take a long time to mature. It will be extraordinarily difficult to produce appropriate "culture-bearers," both parents and teachers, in sufficient numbers, distribution, and quality in the relatively brief time available. It is hard to see, for example, how Congress, composed in good part of older men acting from traditional perspectives and operating by seniority, could recognize soon enough and then legislate well enough to produce the fundamental shifts needed to meet the complexities of cybernation. It is hard to see how our style of pragmatic making-do and frantic crash programs can radically change in the next few years. This is especially hard to visualize when the whole cybernation situation is such that we find it impossible to determine the consequences of cybernation even in the medium long run. The differences expressed in the public statements of business and labor demonstrate that any reconciliation of interests will be a very long-range effort indeed. "Drastic" actions to forestall or eliminate the ill-effects of cybernation will not be taken in time unless we change our operating style drastically.

## EDUCATION: OCCUPATIONS AND ATTITUDES

Among the many factors contributing to the stability of a social system are two intimately intertwined ones: the types of tasks that are performed; and the nature of the relationship between the attitudes of the members

of the society toward these tasks and their opinions about the proper goals of the individual members of the society and the right ways of reaching them.

The long-range stability of the social system depends on a population of young people properly educated to enter the adult world of tasks and attitudes. Once, the pace of change was slow enough to permit a comfortable margin of compatibility between the adult world and the one children were trained to expect. This compatibility no longer exists. Now we have to ask: What should be the education of a population more and more enveloped in cybernation? What are the appropriate attitudes toward and training for participation in government, the use of leisure, standards of consumption, particular occupations?

Education must cope with the transitional period when the disruption among different socio-economic and occupational groups will be the greatest; and the later, relatively stable period, if it ever comes to exist, when most people would have adequate income and shorter working hours. The problem involves looking ahead five, ten, twenty years to see what are likely to be the occupational and social needs and attitudes of those future periods; planning the intellectual and social education of each age group in the numbers needed; motivating young people to seek certain types of jobs and to adopt the desirable and necessary attitudes; providing enough suitable teachers; being able to alter all of these as the actualities in society and technology indicate; and directing the pattern of cybernation so that it fits with the expected kinds and distribution of abilities and attitudes produced by home and school.

To what extent education and technology can be coordinated is not at all clear, if only because we do not know, even for today's world, the criteria for judging the consonance or dissonance in our educational, attitudinal, and occupational systems. We think that parts of the social system are badly out of phase with other parts and that, as a whole, the system is progressively less capable of coping with the problems it produces. But there is little consensus on the "causes" and even less on what can be done about them. All we have at present is the hope that most people can be educated for significant participation in such a world as we have foreseen here – we have no evidence that it can be done.

If we do not find the answers to these questions soon, we will have a population in the next ten to twenty years more and more out of touch with national and international realities, ever more the victims of insecurity on the one hand and ennui on the other, and more and more mismatched to the occupational needs of the day. If we fail to find the answers, we can bumble along, very probably heading into disaster, or we can restrict the extension of cybernation, permitting it only where necessary for the national interest. But judging the national interest and distinguishing it from private interests would confront us with most of the problems that have been outlined in this paper.

Perhaps time has already run out. Even if our style somehow should shift to long-range planning, it would not eliminate the inadequate training and inadequate values of much of our present adolescent and pre-adolescent population, as well as of those adults who will be displaced or remain unhired as a result of cybernation in the next decade. Only a partial solution exists in this case: Begin now a program of economic and social first aid for these people.

## A MORATORIUM ON CYBERNATION?

Can we control the effects of cybernation by making it illegal or unprofitable to develop cybernation technology? No, not without virtually stopping the development of almost all of new technology and a good part of the general development of scientific knowledge. The accumulation of knowledge in many areas of science depends on computers. To refine computers and make them more versatile requires research in almost every scientific area. It also requires the development of a technology, usually automated, to produce the articles needed to build new computers. As long as we choose to compete with other parts of the world, we shall have to develop new products and new means for producing them better. Cybernation is the only way to do it on a significant scale. As long as we choose to live in a world guided by science and its technology we have no choice but to encourage the development of cybernation. If we insist on this framework, the answers to coping with its effects must be found elsewhere than in a moratorium on its development.

## CONTROL: PUBLIC OR PRIVATE?

There has always been tension between big industry, with its concern for profit and market control, and government, with its concern for the national interest. The tension has increased as big business has become so large as to be quasi-governmental in its influence and as government has had to turn to and even subsidize parts of business in order to meet parts of the national interest within a free-enterprise framework. Under these circumstances we can expect strong differences between government and business as to when and where it is socially legitimate to introduce automation.

Sufficient governmental control over who can cybernate, when, and where would not come easily. In the first place, decisions about control would have to be based on the intentions of local business and industry as well as on the national picture. For example, the effects on Congressional seating of shifts in populations as a result of cybernation-based industrial relocation would presumably enter the calculations. Longer-run consequences would have to be balanced against short-run profits or social dislocations. Implications for our military posture and for international trade would be significant. Moreover, it would be difficult for the government to make a case for control of private organizations on the basis of ambiguous estimates of the effects of automation on hiring policy. In any particular case, it becomes clear only well after the fact of cybernation whether increases or changes in production resulted in a corresponding increase in man-hours of work sufficient to compensate the economy for the jobs lost or the people unhired.

Finally, it must be kept in mind that the power of some of the largest unions is seriously threatened by automation. In a relatively short time they may not have the leverage they now have. Thus, a crucial counterbalance to the pressures from business may be absent when it is most needed. It is possible that the crisis that will arouse the government to exert control will not be evident until the blue-collar work force has been so eroded as to have weakened the unions irreparably.

Yet some sort of control is going to be necessary. There are, of course, the federal regulatory agencies. However, they have never been distinguished for applying their powers with the vigor sometimes allowed

by their mandates, and there is no reason to suppose that their traditional weaknesses would suddenly disappear and that an agency created to cope with cybernation would be effective. Nor is there any reason to believe that an agency with the very wide-ranging powers that it would need would be approved before the crisis that it was supposed to avert was upon us.

In theory, control could be exercised by private enterprise. But in the unlikely case that competitors could see their mutual interests clearly enough to join forces, the very act of cooperative control would be incompatible with our anti-trust laws. Whether the government or some alter-government comprised of business, labor, and industry were to do the controlling, either group would have to undertake a degree of national planning and control thoroughly incompatible with the way in which we look upon the management of our economic and social system today.

## After the Take-Over

In twenty years, other things being equal, most of the routine blue-collar and white-collar tasks that can be done by cybernation will be. Our schools will probably be turning out a larger proportion of the population better educated than they are today, but most of our citizens will be unable to understand the cybernated world in which they live. Perhaps they will understand the rudiments of calculus, biology, nuclear physics, and the humanities. But the research realm of scientists, the problems of government, and the interplay between them will be beyond the ken even of our college graduates. Besides, most people will have had to recognize that, when it comes to logic, the machines by and large can think better than they, for in that time reasonably good thinking computers should be operating on a large scale.

There will be a small, almost separate, society of people in rapport with the advanced computers. These cyberneticians will have established

a relationship with their machines that cannot be shared with the average man any more than the average man today can understand the problems of molecular biology, nuclear physics, or neuropsychiatry. Indeed, many scholars will not have the capacity to share their knowledge or feeling about this new man-machine relationship. Those with the talent for the work probably will have to develop it from childhood and will be trained as intensively as the classical ballerina.

Some of the remaining population will be productively engaged in human-to-human or human-to-machine activities requiring judgment and a high level of intelligence and training. But the rest, whose innate intelligence or training is not of the highest, what will they do? We can foresee a nation with a large portion of its people doing, directly or indirectly, the endless public tasks that the welfare state needs and that the government will not allow to be cybernated because of the serious unemployment that would result. These people will work short hours, with much time for the pursuit of leisure activities.

Even with a college education, what will they do all their long lives, day after day, four-day week-end after week-end, vacation after vacation, in a more and more crowded world? (There is a population explosion to face in another ten to thirty years.) What will they believe in and aspire to as they work their shorter hours and, on the outside, pursue their "self-fulfilling" activities, whatever they may be? No one has ever seriously envisioned what characteristics these activities might have in order to be able to engross most men and women most of their adult lives. What will be the relationship of these people to government, to the "upper intellectuals," to the rest of the world, to themselves?

Obviously, attitudes toward work, play, and social responsibility will have changed greatly. Somehow we shall have had to cope emotionally with the vast gap in living standards that will then typify the difference between us and the have-not nations. We shall presumably have found some way to give meaning to the consumption of mass leisure. It would seem that a life oriented to private recreation might carry with it an attitude of relative indifference to public responsibility. This indifference, plus the centralization of authority, would seem to imply a governing élite and a popular acceptance of such an élite.

If this world is to exist as a coherent society, it will have to have its

own "logic," so that it will make sense to its inhabitants. Today, for most of our population, our society makes sense, even though some other eyes hardly see us as logical in the formal sense of the word and the eyes of some of our own people look on us as a more or less pointless society. We make and solve our problems chiefly by other than mathematical-logical standards, and so must the cybernated generations. What these standards might be, we do not know. But if they are inadequate, the frustration and pointlessness that they produce may well evoke, in turn, a war of desperation—ostensibly against some external enemy but, in fact, a war to make the world safe for human beings by destroying most of society's sophisticated technological base. One thing is clear: if the new "logic" is to resolve the problems raised here, it will have to generate beliefs, behavior, and goals far different from those which we have held until now and which are driving us more and more inexorably into a contradictory world run by (and for?) ever more intelligent, ever more versatile slaves.

time proposals would not be good economics for the auto industry or the nation.

Auto executives publicly have been silent so far on the President's proposal.

The United Auto Workers Union, which enters contract talks with the auto makers this summer, has supported the double-time proposal.

## *GM Hourly Pay in '63 at High*

*By a* WALL STREET JOURNAL *Staff Reporter*

DETROIT—General Motors Corp. said its U.S. hourly-paid workers earned an average $144.34 a week in 1963, up 6% from $136.19 in 1962. The average hourly pay, including overtime but excluding fringe benefits, was $3.41 an hour last year, GM said.

GM said its U.S. hourly workers earned more than ever before in 1963, and its worldwide employment and payrolls were the highest in its history.

The average GM hourly-rate employment in the U.S. was 354,000, up from 338,000 a year ago. Total hourly-rate U.S. payrolls were $2,685,000,000 up 11% from $2,396,000,000 in 1962.

A NEW STUDY TO PUT ON YOUR "MUST READ" LIST AND TO ORDER TODAY

KEY POLICIES FOR FULL EMPLOYMENT

Released September 30, 1962

This new report focuses on the causes of our low rate of economic growth and high unemployment levels. It finds that purchasing power has been seriously deficient relative to our productive powers, due primarily to inadequate consumer incomes, and inadequate public programs in such fields as education, health, housing and social security.

The study therefore proposes both private and public economic policies to restore a better balance in the economy by more vigorous efforts to expand consumption and thus benefit all groups in the economy. It sees in a forthright attack on poverty in the United States a clear road to maximum employment and production and economic growth.

Few pamphlets issued by the Conference on Economic Progress have evoked such immediate interest. A few of the comments already received appear on the reverse side of this letterhead.

KEY POLICIES FOR FULL EMPLOYMENT is a 73 page study with 35 charts.

IT IS A REPORT YOU WILL NOT WANT TO MISS

Order one or more copies by using the blank appended below.

A FEW COMMENTS ON "KEY POLICIES FOR FULL EMPLOYMENT"

Received in the first two weeks after the release of this new Conference study:

FROM A CABINET MEMBER:

"I have gone through Key Policies, have borrowed from it in speeches during the past week, and am carrying it around with me in order to improve on the first opportunity to get it fully in mind."

FROM OTHER TOP EXECUTIVES IN GOVERNMENT:

"Your new pamphlet is splendid. You are performing a very needed function."
"It will be useful in our search for effective solutions to better balance our economy."
"I agree with its main thrust, which is that we must really 'get going' with more vigorous policies to get the economy back on the road to full employment."
"You are to be commended for your continuing good work." "The country needs your emphasis."

FROM U. S. SENATORS:

"As usual it maintains your reputation for competent scholarship on these difficult economic questions."
"Your usual perceptive and stimulating work."

FROM U. S. CONGRESSMEN:

"Very informative and well done."
"I am always interested in these Conference studies."

FROM NATIONALLY KNOWN ECONOMISTS:

"As usual, you have done an excellent job of posing many of the current issues and in suggesting solutions."
"Again you have 'hit the jackpot' and you should be proud."
"I never cease admiring your 'staying on the beam.'"

FROM LEADING LAWYERS:

"I am enthusiastic about Key Policies."
"If at all possible, I believe it exceeds your usual standard of excellence."
"I agree with all your conclusions which are effectively supported by the Report."
"An outstanding job."

FROM NATIONALLY KNOWN BUSINESS MEN:

"It is always good to receive your provocative and interesting studies. I read all of them and find your analysis generally sound and intriguing."
"I am so grateful for someone who has the courage to come out and say the things that you do. They need saying. More power to you."

FROM LABOR LEADERS:

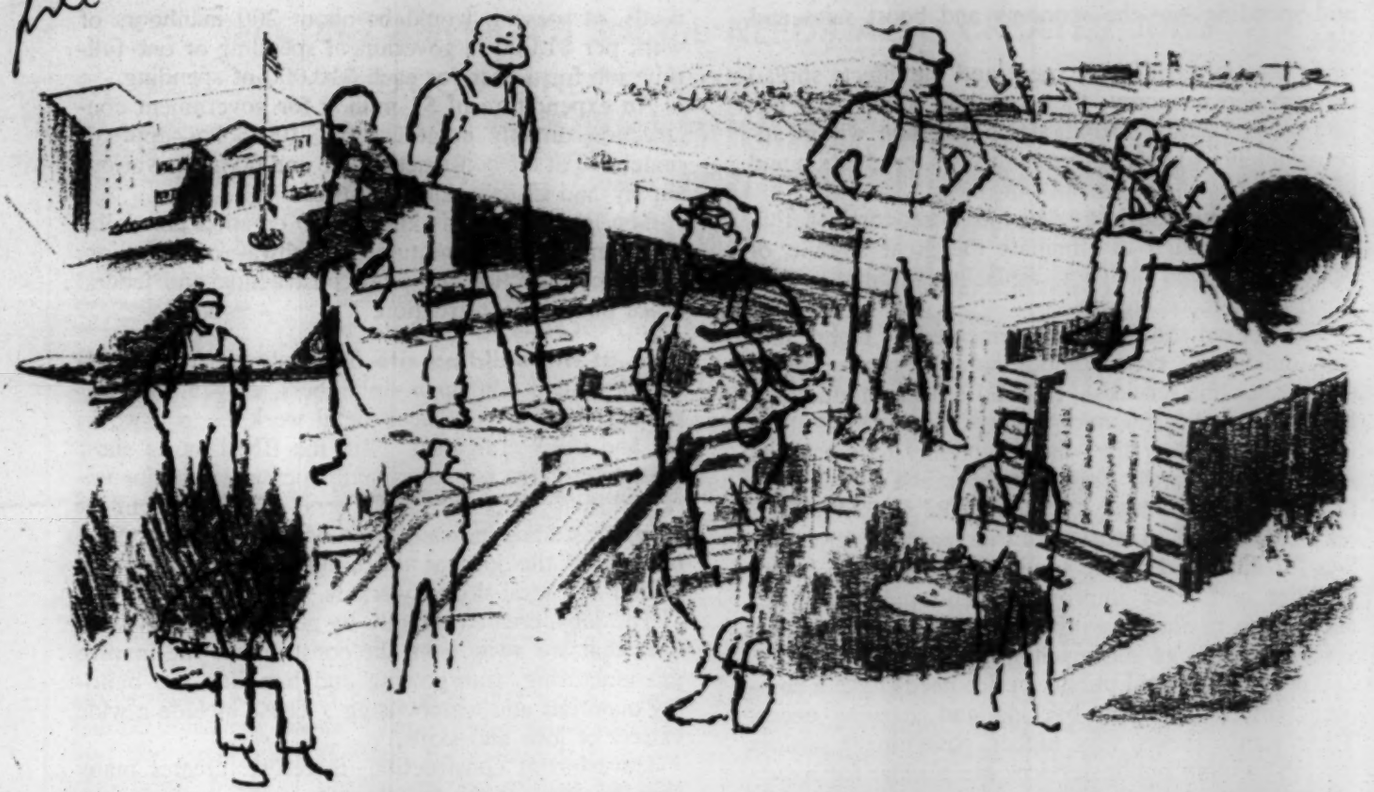
"Congratulations on your new study."
"Equal to or better than previous pamphlets. I am making it available to our field staff."

FROM A COLUMNIST READ FROM COAST TO COAST:

"Steadily and doggedly they get out a series of documented pamphlets showing what a chronically stagnant economy costs Americans."

FROM THE HEAD OF ONE OF THE LARGEST NATIONAL PUBLIC INTEREST ORGANIZATIONS:

"A most interesting and challenging presentation."



# America's Need: Social Services and Jobs

**A strange paradox afflicts** an America striving to create the good society, the democratic society in which no one shall live in want or fear. For the national economy which has demonstrated such remarkable ability to meet the challenge of war has failed to rise to the challenge of peaceful needs.

The paradox is posed by two conditions. On the one hand, well over 4 million people are jobless and about 15 percent of industry's plants and machines lie idle. On the other hand, a fastgrowing population suffers a continuing shortage of vital social services: children need schools; people generally and the elderly in particular are in want of housing, health care, hospitals and nursing homes; city people and suburbanites require mass transport; communities need libraries; the great cities rotting at the core must be replanned and rebuilt; pollution of water and air must be controlled; the natural beauties of the nation must be preserved and developed for human enjoyment.

Commonsense would seem to say that one problem can be used to solve the other. Federal leadership, action at the national level to start things moving, obviously is required if people are going to be put to work to meet public needs.

The job-creating impact of such government outlays does not stop at the building site. Public works outlays also spur activities in the factory, on the railroads and highways and in warehouses—in producing and distributing building materials and equipment. Jobs, incomes, sales and production rise—providing the basis for increased business investment and a better business climate. More government investment outlays create more consumer spending and business investment.

By taking up the slack in the economy—through the building of essential public services—America can put unemployed manpower and idle plants and machines to work. The result would be a high employment economy which means increased incomes for both business and working people and higher tax revenues for the government. Balancing the nation's job and public service deficits can make it possible for America to achieve balanced economic growth.

In the past ten years, America has lost billions of dollars of potential wealth through rising unemployment, short-time work, idle plants and machines. America's growing potential to produce at maximum use of manpower, plants and machines is about $60 billion greater than actual levels of production and employment.

At present, a $10 billion tax cut is necessary to start America back to work. The right kind of tax cut in 1963—tax reduction for low and middle-income taxpayers—can quickly inject consumer buying power

*Labor's* **ECONOMIC REVIEW**

Prepared by Department of Research
Reprinted from August 1963
AFL-CIO AMERICAN FEDERATIONIST

and spending into the economy and boost sales and jobs.

As the tax savings are spent and the effects spread through the economy, they can add about $20 billion to $30 billion to national production within approximately two years—boosting sales, production and employment.

But such needed improvement in economic activities is not enough to eliminate the great amount of slack in a period of labor-displacing automation and rapid labor force growth.

The tax cut should be supplemented by higher federal outlays to create additional jobs and provide essential public services—to build a firmer foundation for the nation's economic progress.

Only by putting the whole economy to work can America remove the drag that too much idleness has produced for too long. And one of the ways the economy can be put to work is by increased federal outlays for improved public services. The schools, health facilities and other improvements in public services add to the nation's wealth no less than business investment in plants and machines.

America's job and public service needs have a common pattern: A great backlog and growing needs. Their scope shows why higher government outlays for job-creating public services are a must for a successful economy in the 1960s.

### Balancing Both Deficits

Even a brief review of America's job and public service needs shows clearly that action is required. A practical program of increased public works expenditures can help close both gaps simultaneously.

The nation's progress obviously demands government investment in job-creating programs of lasting worth that increase the nation's wealth. Such public investment creates jobs directly for unskilled and semi-skilled workers, as well as for skilled workers. An effective program of increased federal investment in public works can help employ many workers whose job needs are greatest and whose job chances are dimmest in this period of spreading automation.

Public construction uses large numbers of workers at many different kinds of jobs and skills. Public works programs also use large amounts of building materials and equipment. Intelligent economic and social action, therefore, would put to work the idle men, plants and machines in building and improving needed public services.

The Bureau of Labor Statistics of the U.S. Department of Labor has issued several studies which clearly indicate the substantial job impact of government construction programs.

The BLS studied labor requirements for several kinds of public construction in the past few years. The direct job-creation amounted to about 220 manhours of work per $1,000 of government spending. Changes in prices and increases in productivity have reduced needed labor per dollar of expenditure since the studies were made. An estimate of direct labor needs, at present, would be about 200 manhours of work per $1,000 in government spending or one full-time job for a year for each $10,000 of spending.

An expenditure of $1 million for government construction directly creates about 100 jobs—approximately 40 at the construction site and 60 in the various supply and distribution industries.

The BLS found this kind of job creation per dollar of government expenditure in highway construction, school construction, hospital construction and federal office building construction.

**Jobs at the building site** obviously call for experienced, skilled craftsmen—plumbers, carpenters, electricians, bricklayers, sheet metal workers, iron workers and other craftsmen. But the BLS studies show that government construction also creates jobs for unskilled and semi-skilled workers. The government agency's studies indicate that about 25 percent to 30 percent of the jobs at the building site are for unskilled and semi-skilled workers.

The jobs, created directly by government construction, that are away from the construction site involve manufacturing, transporting and handling the building materials and warehousing. These include a wide variety of jobs and skills.

Government construction, therefore, creates many jobs directly—at the building site and in manufacturing, transportation and warehousing as well. Government expenditures of $1 billion for public building programs create approximately 40,000 on-site construction jobs and about 60,000 jobs in producing and distributing building materials and equipment.

This direct creation of jobs is emphasized by economists who have studied urban renewal programs. Peter Wagner of the National Planning Association explains the job impact in a report on "The Scope and Financing of Urban Renewal and Development."

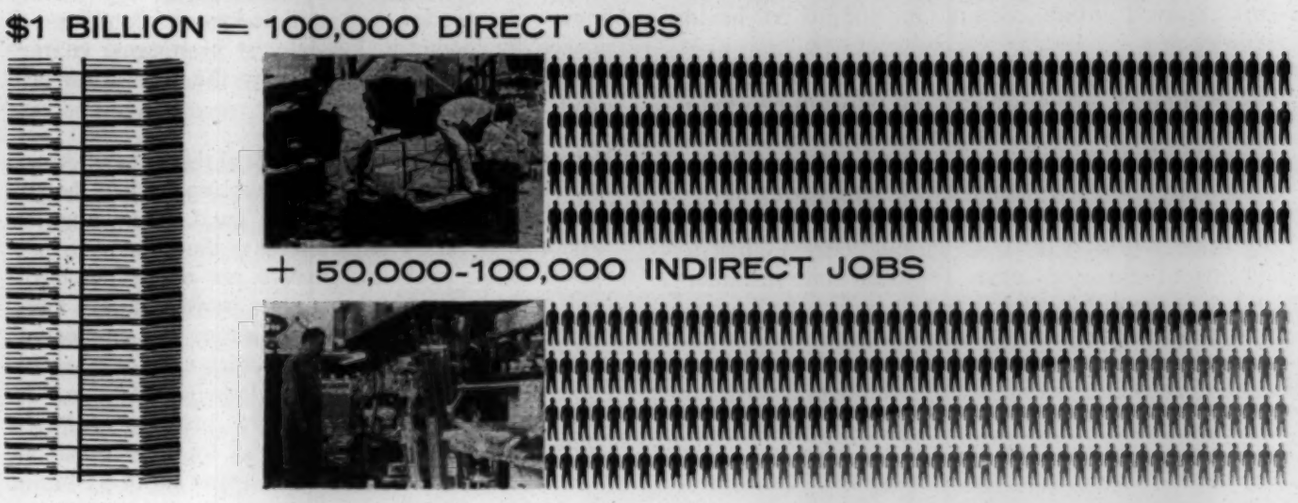
"Urban renewal will require more labor input than almost any other expenditure of equivalent size. To be sure, a considerable increase in labor productivity in this sector must be envisaged during the next two decades, but expenditures for urban development will remain highly labor-intensive. Moreover, the type of labor needed will always include a high proportion of male workers of relatively low skills. This is the very type of labor for which employment opportunities, already a serious problem, will be increasingly scarce in the future."

Other government efforts to meet public service needs also have similar direct job-creating effects. For example, the development of mass transportation, sewage systems and recreation areas would help to meet America's needs. Meeting them would directly create many jobs.

**These direct job-effects** are easy to recognize. Indirect job creation from public works, however, may be less visible but it is just as important.

The jobs created directly by public investment provide incomes to those who are employed on and off the building site. These workers spend all or most

## MEETING AMERICA'S SOCIAL NEEDS ALSO CREATES JOBS



of their take-home pay. As they spend their money—and retailers who deal with them re-spend the money—sales increase and more jobs are created in retail stores, warehouses and companies that produce and handle consumer goods. This improvement in sales and the government's orders for building materials also boost business profits and investment in new plants and machines. This process of spending and investing lifts economic activities and creates jobs.

Such additional spending and investment probably create almost as many new jobs indirectly as government construction creates directly. Since $1 billion of federal outlays directly creates about 100,000 jobs on and off the building site, the economic chain reaction probably creates indirectly an additional 50,000-100,000 job opportunities.

Within about two years, as the combined effects spread through the economy, $1 billion of federal investment in public service construction leads directly and indirectly to about 150,000-200,000 jobs.

The improvement in economic activities from increased public works programs also reduces government expenditures for unemployment insurance and public assistance for destitute families.

Increased government spending for public service construction can boost sales, production and jobs, both directly and indirectly. The expansion of jobs, incomes and profits, in turn, mean increased tax revenues for the government. The entire economy gets a lift from federal public works expenditures.

### Mounting Job Deficits

Over 3 million job openings are needed for full employment now. Moreover, in the seven years between 1963 and 1970, more than 26 million job opportunities must become available to assure full employment in the 1960s—almost 30 million job opportunities in all. That amounts to approximately 4.2 million job opportunities a year or about 80,000 jobs a week.

In the early months of 1963, there were over 4 million unemployed and more than 2 million additional workers who could find only part-time work. Moreover, the President's Council of Economic Advisers conservatively estimates there were 800,000 who had given up looking for work because jobs were not available. To reduce this level of joblessness and under-employment to a minimum would require over 3 million job opportunities immediately.

**America's job needs,** however, do not stand still. They keep growing.

Two factors cause the increasing need for jobs—a growing labor force and rising productivity. (1) The population is growing. About 1.3 million new jobs must be available each year, between 1963 and 1970, just to take care of the increasing labor force—mainly the result of the growing number of young people reaching working age and deciding to look for jobs. (2) Productivity is rising. About 2.5 million additional job opportunities are needed each year to offset displacement by technological changes which result in increased output per hour of work.

Sales and production must be increased substantially to create the great number of needed job opportunities in the 1960s. The need for jobs is greatest for unskilled and semi-skilled workers.

Among the millions of unemployed and those who will be displaced by automation are many unskilled and semi-skilled workers. In addition, many of the young people who are entering the labor force lack sufficient skills and training for modern, automated industry. Training and retraining programs will help many of these people to upgrade their skills, but others will be by-passed unless new jobs are created for unskilled and semi-skilled Americans in the 1960s.

To keep the economy moving and to reach full employment, jobs must become available for all Americans who are able to work and want employment.

### Public Services Deficits

Like the job deficit, the public service balance sheet shows both a current backlog and growing needs:

there are more and more Americans each year and they need adequate schools, water and sewage systems, revived urban centers and improved health facilities.

During the Depression and World War II, America neglected many public services and piled up enormous shortages. Since the 1930s people have moved from one part of the country to another and from farms to the cities. The population has been growing all the time. Despite continuing work on essential public services since World War II, an all-out federal effort to help meet these needs never has been started. America began the 1960s with a public service backlog of great proportions.

Stepped-up programs to eliminate present shortages are needed now, even if the population were not growing. But the present backlog will continue to mount if government efforts are not increased. The population is expected to grow from 180.7 million in 1960 to 235 million by 1975 and millions of people will move from one part of the country to another as the postwar population shifts continue.

**The size and scope** of the backlog in various areas, as well as the increasing needs to match the growing population, can be illustrated by a look at authoritative estimates.

School enrollments are expected to mushroom from about 23 million in 1945 to an estimated 44 million by 1968-69, according to the U.S. Office of Education. Public elementary and high school enrollment was 5 percent greater than the normal capacity of available classrooms in 1959-60—causing crowded classrooms and double shifts in many schools.

About 750,000 new public elementary and high school classrooms are needed for the decade ahead or 75,000 new classrooms each year—to eliminate the present shortage and meet the growing need for classrooms. Instead, only about 70,000 have been built annually in recent years—not enough to meet the growing need. The tremendous efforts to meet the challenge, largely resting on local governments, have failed to eliminate continuing shortages. Unless a comprehensive program of federal aid to education is adopted, America can expect these shortages to grow.

Housing also has fallen short of the needed improvements despite a tremendous upsurge in homebuilding since World War II. In 1960, 15.7 million dwelling units—one out of every four—showed either rundown or substandard conditions, requiring replacement of about 10.5 million units. Meanwhile, the number of families has been increasing and will rise very sharply in the latter part of the 1960s as the young people born after World War II marry and raise families of their own. Thus America needs at least 2.3 million dwelling units per year between 1960 and 1974—almost half again the number built in 1962—to replace dilapidated housing and to meet the needs of a growing population.

Government-financed public housing construction for low-income families should be stepped up sharply from the 29,000 public housing units started in 1962. An improved national program of privately-built and cooperative housing, both apartments and single-family homes, is needed for middle-income families—financed by longterm, low-interest mortgages, guaranteed or, if necessary, loaned by the federal government.

**Urban renewal programs** to heal the sores of America's blighted city centers have not approached the size and scope of the problems at hand. They must be expanded to renew and redevelop the cities.

The cities' problems involve not only slum clearance and housing, but also mass transportation. Here, the problems of traffic congestion and inadequate transit services of the nation's cities call for a capital outlay of an estimated $9.8 billion in ten years, according to a 1961 report of the Institute of Public Administration to the Secretary of Commerce and the Housing Administrator. This involves about $1 billion a year for extending, replacing and rehabilitating existing systems and starting new ones where necessary.

Hospital and health needs show a recent shortage of approximately 1 million hospital and nursing home beds, with additional requirements for nearly 2,000 public health centers, 2,500 diagnostic or treatment centers and over 200 comprehensive rehabilitation centers.

An estimate of state and federal needs for public recreational programs, including land acquisition, probably would be close to about $9 billion in the next dozen years. Local community needs, if met on a similarly expanding scale, would involve perhaps another $10 billion over the next decade. Thus, in all, costs of adequate public outdoor recreational programs between 1963 and 1975 would be about $18-$20 billion.

Airports and roads have received much attention in recent years. Plans are on the drawing boards for needed extensions of existing facilities. The Federal Airport Act and the Federal Aid Highway Act have charted the course and the programs have begun. But the needs grow and require continued action throughout the 1960s.

**This brief review** of growing public service needs omits details about community facilities of various kinds—such as sewage systems, water systems, libraries, cultural centers and other important public services—that spell the difference between a nation with enough facilities for its people and a nation that falls short of its citizens' wellbeing.

This account of public needs also does not include the vocational and technical training requirements and the higher education needs that America must meet in the 1960s. The nation must improve the health, education, housing, community facilities and skills of a growing population in an urban society and increasingly technical economy.

These public service requirements will grow as the population continues to increase, as the cities and suburbs change, as people move to different parts of America and as older facilities become obsolete. These

needs must be met by federal leadership and financial aid through direct federal programs, grants-in-aid to the states and local governments, federal loans and financial guarantees. Long-range, comprehensive federal programs are needed to meet America's public service requirements.

### The Boost to Business

Increased government investment in public works boosts business activities. The government's role is that of a leader and coordinator. Federal funds are the seed. They put other funds into action—state and local funds and private business outlays.

Government construction obviously means business for building companies, since the construction is performed by private firms, not the government. It also means business for producers and distributors of building materials and equipment and for firms that service and repair the equipment.

The federal government's task in improving public services is to start the ball rolling. Many public service programs involve federal grants-in-aid to the states and local governments, requiring matching state and local government funds. Some other federal programs involve government-guaranteed loans to business.

The vast majority of federal programs for improved public services open up opportunities for business investments—a new, modern highway may open up an entire area for homebuilding or industrial sites. In some programs, such as urban renewal, the expenditure of federal funds merely starts the ball rolling for substantial investments by business in homebuilding, commercial and industrial construction.

Private business increases its investments in housing and urban renewal after the federal government takes the lead in clearing the way for profitable business investments. Federal leadership in the development of a recreation area means business opportunities for motels, restaurants, entertainment activities and the production and sale of sports equipment.

**Gerhard Colm** of the National Planning Association told the Joint Economic Committee of Congress in March 1963 that $1 of increased government investment for urban renewal can stimulate $2.50 to $3 of private investment. As Dr. Colm explained: "The investment, therefore, applies not only to the direct creation of needed jobs on worthwhile projects, but also to the expansion of private spending so necessary for the economy as a whole."

In the NPA report on urban renewal, Peter Wagner predicted the same kind of results: "By far the greatest part of all funds that will be absorbed in urban renewal and development will be used to finance the private portion of the program. Much of the necessary money will continue to be raised without the benefit of government assistance or guarantee."

The Senate report on the Urban Mass Transportation Act of 1963 describes the relationship this way: "A three-year investment of $500 million by the federal government will be matched by at least $250 million of local public investment. It has been conservatively estimated that another $500 million will be provided to finance that portion of construction or equipment purchases reasonably payable from revenues of the system to be assisted. Thus for a $500 million federal investment a total expenditure of $1.25 billion for capital facilities can be expected."

Increased government outlays to help meet America's job and public service needs, therefore, provide the basis for boosting business investments. The whole economy is invigorated.

Increased incomes from the added jobs and sales of government public works programs create added family buying power, rising business profits, increased business investment and higher tax revenues for the government. Federal government action can spur business and industry to help bolster America's growth in the 1960s.

### Accelerated Public Works

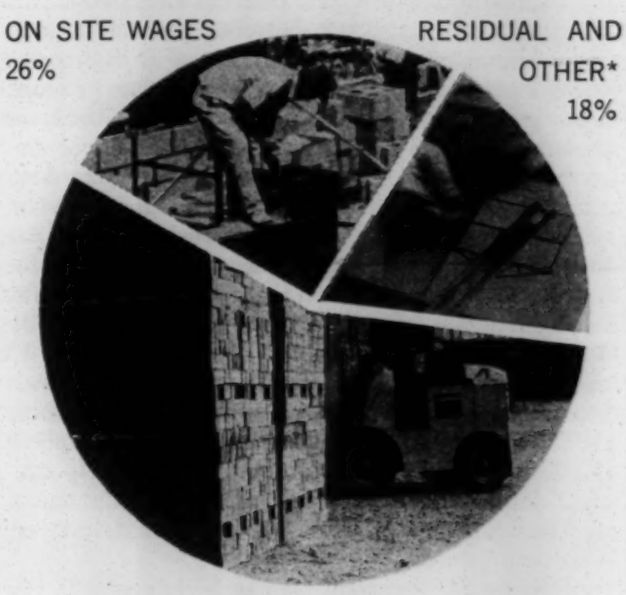
The Public Works Acceleration Act, adopted in 1962, is an example of government leadership in putting meaningful programs into action and creating employment.

The aim of this law is to create jobs by stepping up federal, state and local government public works programs in a period of high unemployment—through federal funds plus matching funds from the states and local governments.

This small program has proved the importance of federal leadership in the major task of getting America back to work. After the President signed the law in September 1962, a great response absorbed all of the

## SCHOOL CONSTRUCTION

How Each $1,000 Is Shared (1959)



* Residual and other include such items as overhead and administrative costs, taxes and supplementary wage benefits.

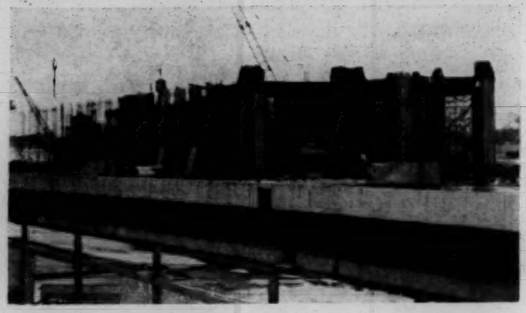
Housing and school in Detroit (right) and hospital in North Carolina (below) take shape, meeting social needs and creating jobs.



$400 million of federal funds originally appropriated by January 1963. This meant that 3,756 projects had been approved and thousands of workers in areas of substantial unemployment were employed to build and repair essential public facilities in various parts of America.

**By April 1963,** another 6,200 projects requiring a federal outlay of about $1.2 billion had been received and awaited approval. The backlog increased in the following months, although only $450 million in additional federal money was appropriated in the spring of 1963. Unless the Congress appropriates enough money and extends the program through 1964, as much as $1.25 billion of needed public service improvements will be kept on the shelf gathering dust, adding to America's waste of resources and manpower.

The AFL-CIO has urged an extension of this Act through 1964 and an appropriation of $2 billion for that purpose. Such a federal program—matched by about $1 billion of state and local funds—would directly create about 300,000 needed jobs. As the $3 billion of increased public works expenditures spreads through the economy, it would indirectly create about 150,000-300,000 additional jobs—a total of about 450,000-600,000 jobs. Moreover it would help construct thousands of projects American communities need badly, now, and will need even more desperately in the near future.

As AFL-CIO President George Meany stated: "At a time like the present, when the private sector of the economy is failing to fully utilize the manpower and productive resources of the country, no better program to put people to work and to permanently enrich the nation could possibly be conceived."

Federal programs to meet America's job and public service deficits could start to meet both needs, at the same time, for the sake of the nation's wellbeing.

A tax cut for low and middle-income taxpayers is needed to quickly lift sales, production and jobs. Increased government expenditure programs for adequate public services are required to supplement a tax cut—to create additional jobs and carry the economy forward towards full employment.

**America's immediate need** is to balance the national economy—through maximum use of the economy's vast and growing ability to produce more goods and services more efficiently.

Some people, however, fear that government efforts to boost sales and employment will cause inflation, with shortages of goods pushing up prices. This fear is not well founded.

The major problem in the national economy at present is not inflationary shortages, but substantial and rising unemployment in a period of spreading automation and a rapidly growing labor force. Demand is not outpacing supply. The problem is, rather, the other way around. The supply of manpower, plants and machines is greater than the demand for goods and services that can be produced.

Sales, production and employment must be lifted quickly to eliminate the considerable slack in the economy. Moreover, demand for goods, services and manpower must continue to increase, each year, to match the economy's growing labor force and increasing productive efficiency.

The aim of a tax cut, supplemented by increased public works expenditures, is to take up the great amount of slack. When sales increase rapidly enough and joblessness drops towards a minimum, further increases in job-creating public works programs can be eased or temporarily halted—to prevent inflationary shortages. But until unemployment is reduced to a minimum, government policies should continue to encourage substantial increases in the demand for goods, services and manpower.

**All of this may be fine,** some people say, but what about the federal budget? The state of the federal budget tends to reflect the state of affairs in the national economy. When the country as a whole is prosperous and unemployment is low, the federal budget is usually balanced or in a surplus—from the high tax revenues paid by wage and salary earners and by businesses. However, when unemployment increases and economic conditions worsen, the federal budget usually shows a deficit—mainly due to the drop in tax revenues that results from the lower incomes of the unemployed and those on short-time as well as from reduced business profits.

The record shows that shortsighted emphasis on trying to balance the federal budget, under almost all kinds of conditions, is self-defeating. President Eisenhower, for example, sincerely tried to achieve a balanced budget and a surplus under almost all conditions. His attempt to achieve a budget surplus in

1957, when the advance of economic activities was slowing down, was a major cause of the 1958 recession. The sharp rise in unemployment and the drop in business profits in 1958 produced a record peacetime deficit of $13.1 billion in the government's cash operations in the fiscal year ending June 30, 1959. It would have been wiser to emphasize government efforts to achieve and maintain prosperity in 1957 than to try to produce a budget surplus.

The federal government's economic responsibility is to maintain prosperity—maximum use of manpower, plants and machines. The Employment Act of 1946 declares that "it is the continuing policy and responsibility of the federal government to use all practicable means . . . to promote maximum employment, production and purchasing power."

The most important way by which the government can "promote maximum employment, production and purchasing power" is through its tax and expenditure policies. The federal government adds to sales, production and employment when it puts more money into the economy's spending stream, through expenditures, than it takes out of the spending stream in the form of taxes. This process adds to economic activities—it lifts the demand for goods, services and manpower.

When the federal government takes more money out of the spending stream through taxes than it puts in through expenditures, it dampens down further increases in sales, production and employment. Such a policy has a braking effect on additional increases in economic activities.

The federal government should put more money into the economy's spending stream—to add to sales, production and employment—until the economy approaches full employment and maximum use of plants and machines. When the economy is operating in high gear and unemployment is at a minimum, the federal government should seek a balanced budget or budget surplus to prevent the creation of inflationary shortages.

**The concentration of federal policy** should be on the state of affairs in the national economy. With high levels of joblessness, the government should continue to place more money into the spending stream than it takes out until the economy approaches full employment and general prosperity.

How would such a policy affect the federal debt? Obviously, if the federal government cuts taxes by $10 billion in 1963 and increases its investment outlays in public works, the federal debt will rise in the next year or two. But sales, production and employment will also increase—family incomes and business profits will rise and the country, as a whole, will be more prosperous. The entire economy will be lifted and the federal government's tax revenues will also increase.

**The main issue** concerning the federal debt is: how big is the debt in relation to the nation's total production of goods and services. A very large debt—in relation to total national production—means that heavy interest payments will be needed. But America does not face this problem. The total amount of interest payments on the federal debt is less than 2 percent of the total production of goods and services and these interest payments on government bonds and securities are made to American families and businesses.

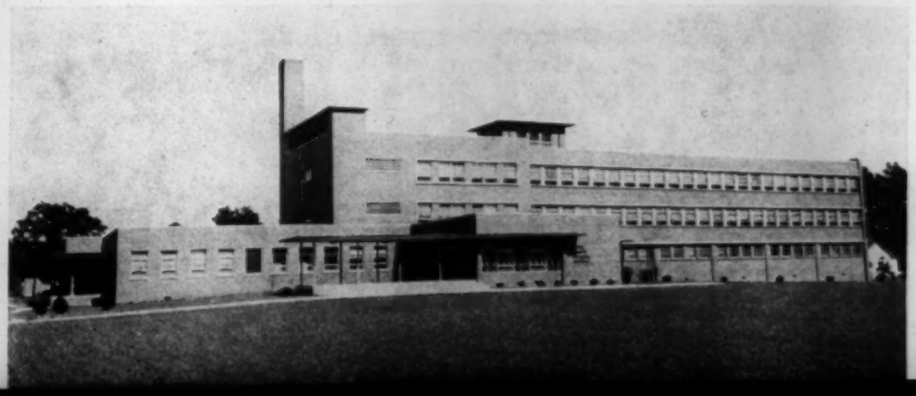
Most of the federal debt was built up during World War II—part of the price that was paid for the war effort. In 1946, after the end of World War II, the federal debt was 27 percent greater than total national production. Between 1946 and 1962 there was some increase in the debt, but there was a much greater rise in the gross national product. In 1962, the federal debt was down to little more than half of total national output. America was in a much stronger position to carry the federal debt in 1962 than it was in 1946.

Rising national production, with increasing sales and employment, lightened the burden of the federal debt in the postwar years. A growing, full employment economy can continue to maintain a light burden in the future. In 1963, America needs major emphasis on programs and policies to put idle men, plants and machines to work—which will also increase government tax revenues.

When full utilization of manpower and productive capacity is reached, there may be a reason for government investment outlays in public works to level off. But actions to hold down government investments or to reduce government outlays before full employment is attained will cut the chances of ever getting there.

America can afford increased government investment outlays to create jobs, boost sales and improve public services. The nation cannot afford the waste and increasing social danger of rising unemployment and inadequate public services for a growing population.

Rising government investments for improved public services are needed to boost the economy toward full employment and maximum use of the nation's increasing capacity to produce more goods and services more efficiently.



County hospital in Windsor, N. C., enriches the community; similar needs remain unmet across the nation.

NOTES TOWARD A MASTER PLAN a proposal on unemployment by Arlon R. Tussing

Department of Economics
SAN FRANCISCO STATE COLLEGE
SEPTEMBER, 1963

One out of fifteen does not seem so many. Only about 6½% of American workers are without jobs, and half of them will find some work within six weeks. But who are the 6½%? Because they are concentrated among the untrained and uneducated, hundreds of thousands have no hope ever to find work. Because they are concentrated in certain industries and trades, whole communities are in crisis or decay. Since the jobs destroyed by new machines every day are mostly in organized mass production industries, labor organizations are shrinking and their power is on the decline. As long as the jobless include one out of every six Negro workers, the Civil Rights movement can not hope to win equality. Because the number of workers is growing faster than the number of jobs, one out of three young people leaving school can find no work, and we can expect unemployment and juvenile crime to grow side by side.

The effects and the atmosphere of mass unemployment pervade the minority ghettoes of our cities, and the fear of automation makes the possibility of unemployment a real one for millions more so far untouched. The question of jobs then has a special political significance. It is the one issue on which the unions and the Negro people can unite into the only political coalition which could break the power of the Southern oligarchy in Congress . . .

NOT "FULL EMPLOYMENT" BUT JOBS!

At one time, "the right to work" was a central labor demand. But even before that phrase was captured by the open-shoppers, the concept of the right of a job had been eclipsed by the Keynesian notion of "full employment". According to economists, the number of jobs depended directly on the amount of private and public spending, so that the cure for unemployment was more government spending or less taxation, or both. In the Employment Act of 1946, the Congress declared its intention to use the government budget to create and maintain". . . conditions under which there will be afforded useful employment opportunities . . . for those able, willing, and seeking work . . ." But "full employment" never meant a job for everyone. Various authorities have suggested that we define full employment as a situation where 2, 3 or 4 per cent of those willing to work are unemployed, and the "tolerable" level of unemployment seems to be rising year by year. (A newer definition would make full employment a state in which the number out of work does not exceed the number of unfilled job vacancies.) So the abstract goal of full employment unites Republicans and Democrats, business and labor, conservatives and socialists, but no one seems to demand a job for every worker.

If the goal of full employment itself is vague and inadequate, the budget or fiscal approach to the problem has both political and economic shortcomings. Public spending is a very blunt weapon, and its operation is wrapped in technical subtleties. Under the American political system, the Federal budget is not considered or voted on as a whole, but each spending program must be justified on its own merits, and by who benefits by it. Each tax program raises first the question of who pays how much taxes. So it is unlikely Congress will ever write a budget primarily designed to promote full employment, and labor and civil rights organizations will have a hard time generating pressure from their members in favor of a tax cut as a solution to their employment problems. Today, every pressure group in the nation, including big business, is for the President's tax cut program, but public opinion polls show that the people are very skeptical, and the foot-dragging of the Congress reflects this fact.

Even the professional economists admit that more government spending will put to work only part of the unemployed. More spending will swell job vacancies for scarce, highly skilled workers in growing industries - - - much more than it will in unskilled and semi-skilled work in declining or automating industries. For this reason, inflation will become serious long before all the jobless can be put back to work; cost of living increases will surely raise opposition to continued budget deficits, and large sections of the working people will join this opposition as they have in the past.

THE RIGHT TO WORK

I propose that we abandon the confusing and misleading demand for a full employment policy, and raise instead the much more radical demand, the right of every American, 18 to 65, to a job! We demand a Federal Law to this effect, and propose a program to implement it. The demand itself is concrete and unambiguous, and all arguments against it are either cynically unsympathetic to the plight of the "other America", or are stuffy and technical, or both. Our emphasis should be on the basic demand, and on our insistence that wealthy America can provide a job for everyone who wants one. While every detail need not be spelled out, we can propose a concise and non-technical program to abolish unemployment. I feel that the program below meets these needs; the demands are stated in logical order rather than in their order of political importance:

I. An effective job-finding service. The USES is far less effective than it might be. The number of "frictionally" unemployed, that is, those who are "between jobs", is scandalously high. It is generally assumed to be about 3% of the labor force in the U.S., in contrast to less than 1% in Western Europe and in Japan. Among industrialized nations only the USSR's job-finding system is worse (it has none). A serious attempt to provide jobs for everyone requires someone to know what vacancies exist and where they are. Only a tiny fraction of job openings are listed with the Employment Service, and they are almost always the worst. The first step then is to require that all job vacancies, their qualifications and rate of pay, be listed with the Employment Service. With modern information handling systems, there is no reason why a worker could not walk into an employment office anywhere and within a few minutes have a report on any and all jobs for which he is qualified anywhere in the country. This plan would be bitterly resisted by employers, of course, because it would also give employed workers information about opportunities and wage rates elsewhere, and would reduce the opportunities for racial discrimination, nepotism and other forms of favoritism which are beloved as "management prerogatives."

II. Retraining, retirement, relocation. After (say) six weeks of unemployment, compensated in much the same fashion as present unemployment benefits, a worker would be able to choose between:

A. retirement on full Social Security benefits for workers over 50 who are unable to find suitable work in their local labor markets;

B. relocation at government expense (cash grants and/or long term loans) for workers who can find jobs which require moving. The Employment service might also assist the worker in selling his old house and in finding suitable housing at his destination;

C. retraining at government expense, plus subsistence and family allowances during training, for any occupation in which there is a labor shortage, and for which an aptitude test shows the worker trainable. This privilege must include remedial education for those in need of it, and ought to extend to college work

for those able to profit from it, as well as more narrowly "vocational" training. All openings in apprenticeship programs and other private training opportunities would be listed with the Service in the same manner as job openings. Special emphasis on inclusion of minority groups by location of programs and emphasis in recruiting participants.

III. Public employment. The remainder of the unemployed, those who can not find any job for which they are qualified, and who can not for any reason be retrained or relocated, would be guaranteed public employment on projects to be established locally for the purpose. Such projects would supplement, but not replace, such programs as the proposed Youth Conservation Corps or Domestic Peace Corps. These workers would be paid the legal minimum wage, making it the absolute income floor for every person willing to work. I suggest a program conditional upon local participation (cities and counties could participate if a State rejected the program or failed to act), with 90% of the funds coming from Federal sources and 10% from the State (or community). The projects on which the workers are to be employed would be chosen and administered locally by committees including labor and minority representatives (to guarantee that the projects would not be used as a source of cheap labor in competition with employed and organized workers and significant numbers of minority employees would be included). The provision for local administration, and the high proportion of Federal funds, would undoubtedly make the program more attractive to the people of socially backward communities which need it most, but from whose ruling cliques most of the opposition will come. The fight over joining the program to get the 90% Federal share (carrying with it of course, minimum standards and anti-discrimination provisions) would "realign" the politics of a Southern town overnight.

EFFECTS

A program like this could eliminate unemployment as we know it; it would also have many virtuous side effects. By providing jobs or training rather than unemployment benefits or relief payments to the unemployed, we can minimize the demoralizing effect of long unemployment which now makes a man on relief for a year or two "unemployable" for the rest of his life. It reassures the "puritans" among the middle class and among workers that their taxes are not being used to support "chiselers". (The number of unemployment and relief chiselers is very small, but they are a big element in the psychology of opposition to social insurance.) It makes for a better allocation of labor, and for that reason should increase productivity. It provides a strong incentive for workers to improve their competitive position via education, and is a beginning of the principle that everyone is entitled to as much education as he is capable of using.

Above all, each of the items in the program is clearly and directly addressed to the problems of unemployment. Control over spending is still used to influence the number of jobs in the private economy, but because spending on training programs, pensions and public employment will vary directly with the level of unemployment there. If inflation becomes a problem, it can still be fought with monetary methods without the fear that tight money will cause mass unemployment. To the extent that anti-inflation policy did cause layoffs in industry, it would provide an additional impetus for redistribution and retraining of the labor force in the direction of greater efficiency.

# SOME PROPOSALS FOR GOVERNMENT POLICY IN AN AUTOMATING SOCIETY*

by Herbert H. Gans

Senior Fellow, URBAN STUDIES CENTER,
Rutgers-The State University of
New Jersey, New Brunswick, New Jersey,
on leave as Associate Professor of
Urban Studies, University of Pennsylvania.

At a recent conference on the problems of the low income population, one of the participants proposed this assignment: What measures for coping with poverty and unemployment could the Administration develop if it wanted to - or had to - formulate a crash program like that of the First Hundred Days of the Franklin D. Roosevelt administration.

The seventeen proposals that follow stem from this assignment. They are a set of individual - and often unrelated - schemes, rather than parts of an integrated program. As a result, they take little cognizance of what is already being done or proposed, for example, in federal depressed area programs, occupational retraining, job formation, education of the unskilled, and the struggle against racial discrimination. Even so, few of the proposals are original.[1] Some are suitable for a crash program; others are longer-range schemes.

Most of the proposals are probably not politically feasible at present. My assumption is, however, that in a crisis - and I think such a crisis may be on the way - new political alignments develop which quickly redefine political feasibility. The important criterion is whether the proposals are workable, and rational; that is, whether they achieve the intended ends, and without unanticipated consequences deleterious to these ends.

I would be the first to admit that most of the proposals are not fully thought out. Indeed, I have written this paper in the hope that they will be subjected to critical comments, and that these will produce schemes that can be undertaken.

## II - The Proposals

The proposals are based on the assumption that in the coming decades, automation and other technological-economic trends will lead to continuing increases in productivity and concurrent decreases in unemployment. The shrinkage of jobs is thus becoming a major problem of American society, and increasingly for more than just unskilled workers.

There are three major types of problems with which the society - and its economy - must deal: the upgrading and shifting of workers and potential workers into the skilled jobs (blue collar, white collar and professional) that will be available; the creation of more jobs, especially for unskilled and semiskilled workers; and the elimination of poverty, a problem left over from the past. Proposals 1 to 4 deal with the first; 5 to 15, with the second; and 16 to 17, with the third.

---

*I am indebted to a number of people for critical comments on an earlier draft, especially Stanley Aronowitz, Robert Dentler, Christopher Jencks, Ralph Showalter and Melvin Webber.

[1] I owe an obvious debt to Donald N. Michael, "Cybernation: The Silent Conquest," Santa Barbara: Center for the Study of Democratic Institutions, 1962. Moreover, many of the proposals were appropriated - even if unintentionally - from friends and colleagues with whom I have discussed this topic over the past year.

## The Shift to Skilled Jobs

The movement of workers from unskilled to skilled occupations essential to the economy is necessary to find employment for those left jobless, and to fill the unfilled jobs that even now exist in considerable number. These aims might be aided by the following:

1. Incentives to Encourage Entry into Unfilled Jobs.

Recruitment for presently unfilled jobs might be increased by certifying entire occupations as Unfilled, and developing programs that eliminate the causes of the undersupply of workers. Higher salaries, better working conditions and training programs for new recruits (see also 3 and 4 below) should be used to encourage entry. An additional possibility is tax reductions, especially during the training period, and while the individual holds the beginning, low paid jobs in the Unfilled occupation.

Among the Unfilled occupations which need workers most urgently are the helping or caretaking professions: teaching, social work, public health, social psychiatry, etc., which require long years of training and hard work, but lack the financial and social rewards of independent professions like medicine and law.

2. The Creation of Helping Sub-Professions.

Perhaps even more important than additional recruitment into the helping professions would be the creation of an entirely new occupational stratum: people who work in the helping professions but on a "subprofessional" level. The needed skills could probably be taught in one or two years programs, or slightly longer ones combining apprenticeship with formal instruction. Recruitment into this stratum should be encouraged among high school or college students who do not - or do not yet - feel themselves ready for professional training, and among adults who want to change occupations.[2] By calling them subprofessions, opposition from the established professions will be reduced, and new curricula can be developed which would avoid some of the lengthy but unnecessary instruction which has become entrenched in these professions.

The greatest need is for subprofessionals, of working and lower class origin especially, who could help the low-income population attain the social and cognitive skills needed to become part of the larger society.[3] Others are needed in almost all welfare and municipal service programs which suffer from a shortage of staff.

These two proposals are needed not only to raise the level of social services and add new jobs to the economy, but also to reduce the current workloads of the existing professions, which is rapidly becoming an overload for some of its members. Expansion of the professions and subprofessions would also halt the stratification of American society into an overworked professional minority and an underemployed majority, a trend that has many undesirable social and political consequences.

---

[2] There may be adults who, whatever their jobs, want to be teachers or social workers, but who are too old to start professional training. They might be attracted to the subprofessions - assuming of course that the work would be financially and socially rewarding.

[3] For more detail, see Herbert J. Gans, The Urban Villagers, New York: Free Press of Glencoe, Chap. 12, especially pp. 273-278, and Frank Riessman, "The Revolution in Social Work: The New Subprofessional", forthcoming.

3. Incentives to Encourage Occupational Shifts.

Many economic and social obstacles now prevent people from making career or even job-type changes once they are adults, although this applies more to white collar workers than blue collar ones. Some of these obstacles can perhaps be overcome by a grant program which would allow adults to leave the labor force temporarily without loss of income so as to retrain themselves for new jobs. A grant, modelled on the G. I. Bill and equivalent to a going salary or wage, should be made available to anyone wanting to undertake training for an Unfilled job. This scheme might be more successful than current retraining efforts, because it would recruit people who want to be retrained for an occupation of their own choice. It would not, however, be likely to attract the unskilled, who need to make occupational shifts more urgently than anyone else.

Eligibility to participate in this grant program should also be available to adults who dropped out of school in adolescence, and now want to complete their high school and college education. This would attract dropouts who have seen the error of their ways in adulthood, as well as people who are dissatisfied with their initial career choice, and would like to get more education for an as yet unspecified job change.

4. Incentives for Earlier Entry into the Skilled Occupations

Another way of encouraging people to train themselves for skilled work - especially those not planning to go to college - would be combined apprentice-education program which starts in high school and allows students to enter an occupation of their choice while still in school. This proposal, suggested by Arthur Perl, might appeal to youngsters who are unhappy in high school, as well as those who cannot afford to go to college at present. If the grantees are satisfied with their job choice, the apprentice-education program could be continued through college, thus allowing them to obtain a free college education while earning some wage. Income grants, such as those suggested in 3 above, might have to be added as students marry.

A more general variant of this proposal, originally suggested by William Wheaton, would be to give needy students grants to help them complete high school, even if they have not yet made a job choice. This would not only help children who must drop out of school because the family needs their wages, but those who are pulled out of school by the lure of an income and the cars, clothes and entertainment it can buy. A grant program is not the solution to the drop-out problem, of course, for as S. M. Miller and others have pointed out, the fault lies with the lack of meaning of the school curriculum for the lower class youngster, his inability to study, and the desire of the school to push him out.

## The Creation of New Jobs

The second, and in some ways the most important problem is to create new jobs, especially for the unskilled and semiskilled. This is extremely difficult, given the trends of the economy, and the fact that such jobs cannot be of the make-work variety. Before suggesting some proposals along this line, it is worthwhile to discuss another approach, the reduction of work-hours to spread existing jobs among larger numbers of people. Although this idea has been questioned by the Kennedy Administration, it is likely to become more necessary in the years to come.

5. Industry Incentives to Develop a Secondary Work Force

One way of reducing work hours would be for the government to subsidize industry to adopt a standard work week of 25-30 hours - at present pay - and to eliminate overtime. This would encourage the creation of a secondary work force, which would hold the same job the other 15-20 hours a week. This force might hire young people - especially in connection with 3 and 4 above - or older people who want to work fewer hours.

Tax reductions and income incentives, such as suggested in 16 and 17 below, might be necessary to encourage people to shift to the secondary work force.

6. Incentives to Workers to Reduce Work Hours

Another approach, suggested by Christopher Jencks, would be to encourage people who want to work fewer hours to do so. This could be done by taxing overtime work, or by reducing taxes for those who want to work fewer hours - thus tying taxation to the number of work hours - or to give people income grants to reduce the differences in pay between full-time and less than full-time work.

This scheme, like the previous one, would of course encourage moonlighting. It should be noted, however, that moonlighting is possible only when extra jobs are easily available, and then primarily because wages are too low to permit workers a decent standard of living from one job. This can be resolved only by raising wages. Moreover, moonlighting could be discouraged by taxing second jobs at a higher rate than first ones. Finally, a study should be made to see whether moonlighting is clearly undesirable, or whether it does not also create jobs that would otherwise not exist. Since moonlighting jobs generally require fewer than forty hours of work per week, they might be the kinds of jobs suitable for the secondary work force proposed above.

7. Elimination of Involuntary Workers from the Labor Force

Another way of spreading the work would be to make it profitable for people who do not really want to work to leave the labor force. This would include especially older people, and mothers who work for income rather than job satisfaction. In addition to permanent departures, it might be desirable to encourage temporary departures from the labor force for those who want to take some time off for travel or just loafing, although this is not likely to create permanent new jobs.

Some day it may even be necessary to discourage anyone other than the breadwinner in each household from working, either by raising taxes for second and third workers, or by giving allowances to wives and mothers to stay home. Women who want to work and pursue careers should not be discouraged, but those who do not really want to work should be kept out of the labor market as much as possible.

8. Grants for Currently Unpaid Volunteer Work

One way of discouraging women from taking jobs would be to pay them for volunteer work. Many women - and men - work hard in voluntary organizations and derive the same satisfactions as others do from a job. Indeed, being an officer in an important local voluntary association can be a full time job. Paying such officers from government funds would not only encourage them to stay out of the labor market, but it might also attract more people into community service.

9. The Professionalization of Work

Another way of reducing work hours and spreading work would be to encourage the already ongoing professionalization of many jobs, and the extension to them of the temporal fringe benefits - or job interruptions - available especially in the academic profession. All workers should eventually be able to obtain long vacations, sabbaticals, travel grants, periodic return to school, "visiting" appointments in other places, and the like.

10. Export of American Consumer Goods Overproduction and of Skilled Workers

Private enterprise and the government could cooperate in the export - at low cost or

absolutely free - of some of our consumer goods overproduction to the developing areas, not only to raise their standard of living, but also to build up the demand for such goods, and thus to create new jobs in this country.

This is a variant of Seymour Melman's scheme to export machine tools, and David Reisman's "Nylon War" idea of sending consumer goods to Russia to reduce cold war tensions. It would cover yet other items that would be of mutual benefit. Emphasis in such a giveaway should be on those goods not already produced - not likely to be produced in the near future - in the developing areas.

11. "Export" of American Skilled Workers

Another way of opening up jobs here would be to encourage workers whose skills are in oversupply here to work overseas in the developing areas where such skills are in demand, either on the job, or for training the domestic labor force. This scheme may falter because of the reluctance of settled blue collar workers to leave America or even the locality in which they were raised, but it might be possible to encourage young blue collar workers to spend some time overseas as part of their apprenticeship, perhaps in a kind of Peace Corps stressing blue collar skills.

## Jobs for the Unskilled

The most difficult task is to expand job opportunities for the unskilled. The best solution is to make certain that as many young people as possible are trained for marketable job skills, and the number of unskilled is reduced to a bare minimum by the next generation. Thus, providing jobs for the unskilled should be a temporary need, and if so, some policies may be justified as a short range solution that would not be desirable on a permanent basis.

12. Employer Incentives for the Hiring of the Unskilled

One solution would be to discourage private enterprise from resorting to those types of automation which sharply reduce jobs, either by incentives or taxes which would reduce the cost advantages of automating. Another approach would be to offer tax reductions and more direct financial incentives to employers to hire the unskilled, especially those who suffer most from unemployment: the very young and those in late middle age. Such incentives would have to be awarded in such a way that no one of adult working age would be released in order to hire them, and that new jobs would be created as a result. It is, however, doubtful that this proposal could create a significant number of jobs.

13. Temporary Adjustment of the Minimum Wage Law

Another method for creating new jobs might be to cut back the legal minimum wage to, say, 75 cents an hour, and have the difference between it and an adequate wage made up by federal payments to the affected wage-earners. This cutback might lead to the development of new businesses, and with it an expansion of job opportunities for the unskilled. Since such a proposal would in effect mean a government subsidy for marginal firms - where working conditions are often the poorest - and since it would also imply a regression from the wage levels for which unions have fought over a century, such a proposal might have dangerous consequences. Therefore it would need careful study, perhaps through some pilot experiments, in order to see whether the benefits in terms of the number of new jobs would outweigh the social and political costs. If the experiments were successful, the scheme could be tried on a wider scale. The dangers in this proposal might be ameliorated by making it a temporary device; that is, to continue only until the new business is on its feet, after which it would be required to pay the going wages.

14. Encouragement of New Businesses Using Unskilled Labor

A more positive approach to the same problem would be to encourage the formation of new businesses, especially in the area of services, by a low cost loan and loan-insurance scheme - the latter somewhat like FHA - which would facilitate the starting of the business and eliminate a large part of the risk. Early mortality would not necessarily be prevented, but the costs of failure would be born in part by the government.

Market studies and imaginative social invention might indicate a number of feasible new businesses and services. For example, farmers near urban areas might transform their farms into resorts providing low cost vacations for city dwellers. Car rental agencies which would rent out used cars, and commercial baby sitting or lawn care enterprises might be profitable.

15. A Blue Collar National Service Corps

One of the best ways of employing the unskilled is a public works program. In addition, it might be desirable to set up a National Service Corps - somewhat like the new C.C.C. suggested by Paul Goodman and others - which would carry out those additional public works and municipal service functions that are too expensive, or of too low priority to be financed from local revenues or a federal public works program. This Corps would also train youngsters in marketable skills.

Among the most important projects to be carried out by such a Corps would be the rehabilitation of preservable substandard urban housing to bring it up to a livable level. This is suggested by the failure of slum clearance to improve the housing conditions of the poor, and by the possibility that the now proposed rehabilitation programs, to be carried out by subsidizing private enterprise, would raise rents beyond the occupants' ability to pay. If rehabilitation were carried out by a service corps, guided by skilled workers, many people might be employed, and housing conditions could be improved immeasurably, although only if the scheme were part of a government public works program to build additional new housing for the low income population.

In addition, the Corps might also help in the provision of municipal services that can stand some improvement, for example mail delivery, garbage removal, street cleaning, the care of recreational open space, and of public buildings and the like.

## The Elimination of Poverty

Poverty is of course intimately related to unemployment, and would be reduced if the previous proposals were carried out. In addition, the raising of substandard incomes can be accomplished by the following:

16. The Elimination of Income Taxes among the Low Income Population

This measure, which has been proposed many times in recent years, should be tried out to determine whether it would significantly reduce proverty and also increase purchasing power to increase the vitality of the economy. But it is probably not enough.

17. Direct Income Grants to the Low Income Population.

If tax abatement is insufficient, it will be necessary to resort to direct grants, based on the conception that everyone is entitled to a standard minimum income, whether obtained from work or other sources.[4] People who are earning less than this

4 This proposal has recently been presented in greater detail by Robert Theobald, "Abundance: Threat or Promise," The Nation, May 11, 1963., entire issue.

minimum - perhaps $4000 for an urban family, somewhat less for a rural one, and for people without children, etc. - should therefore be eligible for federal grants - not welfare payments - awarded on the same equalization principles now used in allocating grants to the states. Costly as such a scheme would be, the great spur to purchasing power that would result is likely to reduce the net cost to the government. There is of course a danger that such grants would discourage some from working, but experience with welfare payments has made it clear that most people would prefer to earn their income from work. When the day comes that work is no longer available to everyone, an income grant - financed in part from the "profit" of automation - is likely to be considered a less visionary or irresponsible scheme than today, and I can visualize a future era in which all members of society will be eligible for such a grant.

III - The Problem of Implementing the Proposals

All of the aforementioned proposals stem from the assumption that normal methods of job formation, either in private enterprise or in government, will not be enough in the future, and that new approaches have to be found. Moreover, these approaches require that job formation be planned with other than present criteria, that efficiency, profit, and cost-price ratios must sometimes be superseded by social benefit considerations like those which nominally justify the governmental subsidy of family farms. This means not only a more extensive government involvement in the economy and in the planning of that economy than ever before, but also a search for public funds which would pay the initial and sometimes permanent costs of creating the new jobs.

One obvious source of these funds is a diversion of much of the money now spent for missiles and lunar exploration. Another would be the taxation of industry for increasing automation, so that a proportion of its savings would be turned over to the government to pay for the social and economic consequences of automating. But neither of these sources are likely to be enough, and the rest of the funds would have to come from an increase in taxation of the general public. Whether or not the economy can stand a sharp rise in taxes without downturns in productivity is one important question. How to persuade people that taxes must rise is another.

Middle class people could probably pay more taxes than they now do without having to make serious cutbacks in their private expenditures, but this would not be sufficient to gain their assent. One drawback is that Americans believe government spending is almost always wasteful and infringes on their freedom to make their own spending decisions. This belief can only be altered by demonstrating to people that they need the government services for which they pay, and one method of demonstration is to raise a part of the cost of government by user charges, rather than by taxation. This would enable people to see what they are paying for, although it would also allow them not to use services for which they do not want to pay. It might, however, help to create a new climate of opinion about taxation.

Another way to lighten the psychological burden of taxation is to reduce the multiplicity of taxes, and find a way to collect all of them, federal, state and local, in a lump sum income tax. Another would be to find a way of levying taxes in relation to expenditures, so that they would be low during those periods of the lifecycle when home purchases, raising children, etc. create the greatest pressure on the family budget, and high when these pressures abate.

But whatever the method of increasing taxes, it will require a redistribution of income from the haves to the have-nots, which is likely to be met by intense resistance from the former, and by the inability of the latter to exert political pressure on our political institutions.

The federal government has so far been quite unresponsive to the needs of the low in-

come population, and has not felt any real urgency about the state of the economy. Congress is especially insensitive to the problem. One reason is that unemployment affects only a portion of the country and of the society. Not only are the depressed areas highly concentrated geographically, but as Eric Larrabee and David Riesman have pointed out, the economy is a dual one, consisting of affluent and poor sectors, in which the latter is powerless. Congress is elected primarily by the affluent sector - it does not really campaign in the poor one - and the funds which finance election campaigns come almost entirely from a very small portion of the affluent sector. This imbalance might be ameliorated if political campaigns were financed from taxes, rather than by contributions, for this might increase the dependence of Senators and Representatives on a larger number of voters. Even so, it is not likely to produce a legislature that will be favorable to any scheme involving income redistribution or large scale change in the economy.

The real difficulty is that the people in the poor sector of the economy are neither numerous enough, nor unified in area - or even self-interest - nor effective in making their needs felt. They vote less often than others, but even when they vote, their ballots carry little weight because they live in Northern cities or Southern states with one-party political machines, or in districts which have been effectively gerrymandered to reduce their influence within the political structure.

Until this population can demonstrate the power of number at the ballot box, and make its needs felt vocally in other ways, neither Congress nor the Administration will have much incentive to act in their behalf. In all probability, no major changes in the economy, or in government's role in the economy will come about until there is political action by the poor and the unemployed, be this in the form of picketing, protest marches, political organizations, or unions of the unemployed, or all of these.

## IV - Work and Social Worth

Even if the government can initiate changes in the economy to increase job opportunities, a high degree of unemployment is probably here to stay. If present trends continue, most of it will be found among an evergrowing minority of permanently unemployed people, who will endure a life of misery and despair, and will be sacrificed to maintain the present economy.

Many of the proposals presented above seek to prevent the creation of such a group, and to share the work equitably. Yet even if this can be done, it is still possible that in the future, there will not be enough full time employment for everyone who wants it. In addition to the economic consequences, this possibility has some significant social and emotional ones that need to be dealt with.

These consequences result from the traditional American - and Western - culture pattern by which man acquires his social worth, and thus much of his self-respect and ego-strength from his job. If that job is not available, widespread anomie resulting from uselessness is likely to develop, and ways must therefore be found to enable people to be - and feel - socially useful in other, non-work activities.

Now it is true that for many people, especially blue collar workers, the job has never provided much satisfaction, being primarily a source of income to finance the search for satisfaction elsewhere. But even people who do not identify with their work feel useless if they do not have a job, a feeling which permeates their role in the family-visible especially in the marital difficulties of Negro men who have suffered so long from instability of employment - and their entire life. Eventually, joblessness leads to total apathy, despair and personality disintegration.

Criteria of social worth will of course change somewhat as employment opportunity

decreases, but they will probably do so much more slowly than the latter. Even the Great Depression did not do away with the attitude that unemployment is a personal failing.

Consequently, it becomes necessary to discover which institutions, old or new, can enable people to be and feel socially worthy when they are jobless or only employed part-time. The ideal target is a society in which nonwork institutions are more important than work, and in which the departure from the labor market is anticipated rather than feared. This ideal has been proposed in many utopias, past and present, but so far it has been mainly a dream of overworked intellectuals which has not been shared by the rest of society. Now the dream may have to become a reality.

At present, the problem is conceived largely as the availability of extra spare time which must somehow be filled with leisure activity - the socalled threat of leisure. As a result, education for leisure is being advocated again, as it was during the Depression. I am skeptical that this is a solution. For one thing, most people, especially in the middle class, do not lack leisure ideas, but only clusters of time and money with which to carry them out, and of course, the inability to depart from the labor force. Moreover, a considerable amount of leisure training is already being offered as part of the college education - why else are so many schools described as country clubs or playgrounds. Leisure training for the noncollege population may help some people, especially among the most poorly educated, although they would probably not apply for it, since their primary need now is for work.

But the main failing of education for leisure is that it fails to come to grips with the real problem. As depression era studies show, people become less interested in leisure activity when unemployed, because jobloss deprives them of social and personal worth - and leisure cannot easily provide for this loss because it is by definition largely socially useless.

I have not so far seen any feasible solutions to the problem. The professionalization of jobs, and the interruption of work by sabbaticals, as well as the upgrading of rewards for community service (see 8 and 9 above) will help a little. So would a concerted attack on the Puritan ethic, and a recognition of the virtues of spontaneous socializing and loafing that still exist in the cultures of the lower, working and lower middle classes.[5] But these proposals are not enough.

Social planning and social research must begin to find ways of revising the institutional arrangements and beliefs that provide social and personal worth. This task offers an opportunity for meaningful social invention that must combine the best features of utopian thinking, social planning, and political pragmatism, backed up by policy-oriented social science research.

Such planning might begin with the study of societies and groups in which worth is not measured by work, including the leisure classes of past Western society, the adolescents, bohemians, hoboes and Skid Rowers of our own, and especially the preindustrial and preliterate societies which have gotten along without a concept of work and job. Not that such findings can be easily transferred to the modern situation. The three institutions which in the past have been most effective in instilling belongingness: the small community, the tribe and the extended family, play a minor role in a large urban-industrial society, while hoboes and bohemians have been despised for their deviant ways. The only hopeful feature of this problem is that there is still some time - perhaps a generation or two - to find a solution.

---

5 It is ironic that these cultures are under attack by upper middle class critics, reformers and caretakers who seek to instill their own work priorities and Puritan-like leisure attitudes at a time when they are in danger of becoming anachronistic.

Program Structure — 1963

## I. URBAN DEMOCRACY PROJECT

To help communities achieve self-determination in solving the problems which confront them in ways which conduce to the increased well-being of the city and the society.

L.I.D.'s pilot project in this area will be undertaken in conjunction with the Harlem Neighborhoods Association, and will seek to strengthen the efforts of a Harlem community to cope with an inadequate urban renewal program which the city is determined to foist upon it.

All of the factors here — HANA as the neighborhood organization, the community, the problem which it confronts — are ideal for LID's effort to find ways of offering intellectual and organizational resources to communities which need them, without impinging on their autonomy or impairing the trial-and-error process essential to learning.

## II. PUBLIC EDUCATION PROJECTS

Now, as at any particular moment in time, the radical community has insights and knowledge about a wide range of social problems which confound the public. To alert, to inform, to propose meaningful social policy alternatives to this public is an essential task of the L.I.D.

Pamphlets, TV programs, lecture tours, and conferences are all potential tools in this educational process which can begin at once. Our 1963 Annual Conference, devoted to the problems of the technological revolution, is a valuable aspect of this program. We are presently developing proposals for publications and other educational tools.

## III. WORKSHOPS IN NEW PROBLEM AREAS

The technological revolution introduces an entirely new framework for social problem solving — a framework which posits new questions and demands fresh answers. For all of this, new knowledge is required. Thus, beyond its traditional role of popularizing the knowledge and ideas developed by socially concerned people, the L.I.D. must provide a vehicle for those capable of discerning these new problems and investigating paths to their solution.

To this end, we propose to organize a series of L.I.D. Workshops on problems like those described in our outline, Abundance and Freedom, and in the appended Draft Perspective, to be located in centers where union, university, and other researchers and writers are concentrated.

*Officially Accredited to the United States Mission to the United Nations*

Workshop members will prepare papers, evaluate and criticize the work of other members, with the goal of achieving some degree of new understanding in their problem area. From these Workshops we expect first working papers, to be circulated among other Workshops for comment, and eventually publication. These may be of a technical nature initially, but if they have genuine importance, they will be popularized and circulated to the public.

A News Bulletin and occasional local and regional conferences will enable the various Workshop groups to maintain contact and to keep abreast of intellectual developments in the various areas of specialization and parts of the country.

Needless to say, co-ordinating groups will be established to keep these three major program sub-divisions in harmony with each other and with over-all L.I.D. objectives. Such co-operation is especially desirable between Sections II and III, in order that the style and level of the popular work of the organization relate naturally and without strain to the new work emanating from the Workshops.

# A Draft Perspective for the L.I.D. Workshop Program

To illustrate the kind of work we propose to do we can take as a starting point the argument advanced by Ralph Helstein in the IUD Digest about the problems created by automation. He pointed out that these problems cannot be solved solely by individual unions through collective bargaining. He argues that the spread of automation changes the entire context in which collective bargaining takes place and poses a new set of basic issues which can be met only by comprehensive, co-ordinated national economic and social policies; in short, national planning. Mr. Helstein concludes that the full use of scientific developments for human purposes without intolerable human costs -- not simply in terms of material destitution in the midst of the capacity for abundance, but also in terms of the denial of useful work to vast numbers of people and of domination by an irresponsible technocratic elite -- requires the reorganization of the social and economic functions of work. This can only be achieved by democratically controlled national planning.

We agree entirely. Our job is to get the case spelled out thoroughly -- not only why planning is essential to democracy in industrial society but what functions planning has to carry out and how. This requires both factual analysis and hard argument. The job cannot be done by a random accumulation of studies on specific subjects taken in isolation from the whole pattern of change and therefore trapped either by the assumption that everything else stays the same or by a failure to show how change is possible precisely because everything else does not stay the same. L.I.D. hopes to find people with expertise and concern who will bring their knowledge to bear on the questions raised by our over-all objectives so as to clarify the connections between the different ways in which the basic problems of our society are faced by different people and how their various solutions relate to a coherent and comprehensive planning proposal.

For example, statisticians can make projections of the future requirements for labor -- in terms of total employment and quantities of different kinds of labor -- on the basis of present trends in technological development and the distribution of economic and political power. But what can we expect the composition of the labor force to be under circumstances of economic planning? To estimate that we need, in turn, to make clear the possible combinations of goods and services we can expect to be made available by a planned economy equipped with the new technology.

How then would the skills necessary to operate and democratically control the economy have to be distributed, or shared, throughout the population? How does this define the tasks of the educational system? How would the educational process have to be altered to fulfill these tasks? What resources would have to be allocated to it? How would the composition of the labor force have to vary if opportunities for satisfying work are to be equitably shared? What kind of mobility among places of work and occupations would this be likely to require? What flexibility in terms of the work week and work day?

What kinds of organization at the workplace and at other levels of decision-making would be necessary to prevent the recurrence of arbitrary authority? How would union functions be likely to be altered? How would managerial decision-making be affected?

How would the channels by which purchasing power flows through the economy have to be altered to make access to goods and services equitable? How would the policies aimed at providing equitable opportunity for satisfying and useful work affect the distribution of goods and services? Would mechanisms have to be

developed to offset or largely replace the flow of purchasing power through the labor market? Could the development of social security institutions serve such functions? Would other kinds of mechanisms have to be developed? Would information have to merely supplement or largely replace monetary incentives as the major influence in matching skills with jobs?

Most obviously, we must have answers to a wide range of questions about what planning involves at the governmental level. What techniques must planning institutions employ? What kinds of information must they have and by what procedures is it analyzed to define the range of possible policies? How are the choices of policies to be made at different levels of specificity? What instruments are necessary to influence activity in the direction of chosen objectives? What techniques are already available? For what kinds of problems are technical solutions not yet available?

What kinds of institutional changes are likely to be needed in the American governmental system to make planning possible? What obstacles are presented by the existing pattern of institutions? Are there ways in which the Council of Economic Advisers and the Budgetary process can be developed for purposes of planning? Can Congress provide the essential function of holding planning authorities in the Executive responsible to the electorate without paralyzing the planning process? How much public ownership might it be necessary to have to facilitate planning? Is public enterprise necessary in order to perform yardstick functions? Is it necessary as a substitute for anti-trust policies where they are inadequate to prevent conglomerations of private power from holding the economic planning process to ransom? What are the interests which have a stake in preventing the establishment of national planning? What are the interests which have varying stakes in different kinds of planning? What are the present and potential sources of political support for planning?

There are such people -- more than contemporary publications would suggest. Many are working in contexts where their knowledge cannot be applied to the problems for which it is needed; others are already working on specific but isolated aspects of these crucial problems. Both would welcome an organization through which they can turn their skills to developing the policies and programs of democracy. We seek to provide it.

## A B U N D A N C E  A N D  F R E E D O M

### An L.I.D. Program to Find Ways and Means of Relating the Technological Revolution to the Aims of a Democratic Society

An economic analysis of the United States can begin with the fact that science has removrd the ceiling on physical production. New ways to harness limitless energy to produce inconceivable quantities of resources and goods are constantly being revealed.

While the technological revolution careens headlong in the wake of science, our peacetime progress in expanding production and eliminating poverty from our nation has been at the pace of a bewildered snail. Unlike most human societies, past and present, we cannot blame our sluggishness on too many mouths to feed, too few hands to feed them, and no surplus to invest in new productive facilities. Leaving aside questions of desirability, we can take note that we spend a staggering amount of time and energy on military, space, and foreign aid programs; on regulating, litigating, and picketing; on collecting and avoiding taxes; on advertising, image building, and entertaining; on disposing of sewage, garbage and junked automobiles that we have built to go half again as fast as we allow. After all that and more, we still have enough involuntary unemployed to populate a medium-sized nation. Without our military manpower and equipment programs, our chronic distress would become a cataclysmic economic collapse.

What is our problem? Why can we not operate our mines, mills and factories at their existing capacities, let alone apply known techniques to improve them? Why can we not devote our currently unused time and energy to the elimination of poverty, to reversing the spread of pollution and squalor through our physical environment, to giving our young an education and a social environment worthy of our ideals? Why is it so difficult to distribute what we now produce that every raise in output, every threatened easing of international military tension convulses our system?

The great challenge we have not yet learned to meet — and turn to our benefit — is how to distribute the gains in production and savings in manhours due to technological advance. But we must do more than meet this challenge in its own terms. We must also find ways to

*Officially Accredited to the United States Mission to the United Nations*

relate the new physical plenty to the kind of society we desire, and to the classical ideals of freedom and justice. This relationship is, in fact, the essence of the League for Industrial Democracy's concern with the questions raised below.

## DISTRIBUTING THE FRUITS OF ABUNDANCE

I. How to Provide Enough Purchasing Power to Make our Actual Needs and Desires Operate as Stimuli to Production

A. Adding to the "Costs" of Production (without inflation?)

1. Higher wages and greater "fringe benefit" provisions. (Does current emphasis on the latter unnecessarily limit individual choice?)
2. On-the-job benefits; better working conditions and more service and facilities; combining leisure and work.
3. Adding, and omitting to reduce employees; "featherbedding" and standing by; what about keeping quiet, staying away?
4. Increased profit distribution (to whom? in what form?)
5. Charges and taxes on external and social costs, such as prevention of pollution, retraining of people and renewal of places devastated by changed productive patterns, education of future employees and consumers. there are unemployed, can there be waste?)
6. New distributive institutions, new functions for unions, etc. (When/
7. New government and other public and quasi-public controls.

B. Expanding Purchasing Power by Reducing Prices

1. Putting improved techniques and processes to work.
2. Stimulating competition, both domestic and international.
3. Cutting payments to or for employees. (Fewer funded benefits?)
4. Lower profits. (Should consumers provide the capital for modernization and expansion in advance?)
5. Lower charges and taxes on external costs. (In which areas would there be net social benefits?)
6. Elimination of waste, duplication, unnecessary complexity.
7. Reducing the costs of capital by driving down interest rates or lowering taxes.

C. Other Sources of, and Ways of Creating, Purchasing Power

1. Expanded use of government debt. (Money and interest-bearing paper, in what proportions?)
2. Expansion of "private" credit. (Is thrift permissible? What should be paid for now, what later -- in advance -- never?)
3. New techniques to increase the velocity of purchasing power.
4. Increasing production of "non-economic goods" such as military, space and foreign aid; non-market goods, such as improvements in physical and social environment. (What about the "threat" of disarmament? What else can we produce to throw away?)

D. Existing Social Mores as Blocks to Solution to Problems of Distribution

1. Present day attitudes toward work and leisure.
2. Folk lores of capitalism.
3. New Concepts of work and leisure.
4. New definitions of needs and desires.

II. How to Allocate Purchasing Power to Secure What we Actually Need and Want

A. Eliminating poverty and unemployment (What is unemployment: too much leisure? too little work to do? or simply no way of earning? Can poverty be eliminated and involuntary unemployment remain? Amidst technological abundance, who will have the right to "work?")

1. Increased "investment" in education, training, retraining, and "mental health."
2. Additional employment. (Who will create it, control it?)
3. Division of available work into smaller portions (see III).
4. Distribution of more goods and services to the unemployed, or to all regardless of ability to pay; direct provision in kind, subsidy, or cash distribution to individuals, with or without restrictions on how it is spent. (Which techniques are suitable for which goods and services? Is cash equivalent to freedom?)
5. Expansion and innovation in social insurance (paid for by whom? when?)

B. Eliminating Unjust, Inequitable, and Socially Dangerous Concentrations of Wealth and Power

1. Redistribution, through progressive taxation, compulsory insurance, stimulation of voluntary and quasi-voluntary giving and spending.
2. Institutional reform to distribute wealth more evenly as it is created — higher wages and quasi-wages; wider dispersal of the right to receive the earnings of capital (through cooperatives, profit-sharing, stock ownership, stock options and warrants); new techniques.
3. Expanded social control over concentrations of wealth (in corporations, public and non-profit institutions, foundations, unions, pension and other funds, private fortunes); partial separation of power from ownership.

C. Provision of greater Public Benefits

1. Improved physical environment, urban, rural, recreational.
2. More and better public services (such as health, education, welfare, protection, sanitation, transportation).
3. Making additional benefits and services public. (Which?)

III. How to Distribute Manhours "Saved" by Technological Advance

A. Transferral to areas, particularly services, less subject to technological gains (including II. C. and D., above).

1. Market saturation by cheap, mass-produced goods.

2. Reducing the relative cost (by direct subsidy, or by re-allocating and relatively under-assessing external and social costs, or by other means) of goods and services which the direct impact of technology tends to render in relatively short supply (such as housing; products of craftsmanship, care and skill; varieties of goods other than the most efficient to produce and the easiest to distribute; interested, imaginative, flexible exchange of personal services).
3. Expanded opportunities to work at what one is not relatively efficient in doing; at what has no "market" (such as scholarship, poetry, growing corn), and other non-"productive," non-"work," and voluntary pursuits. (Who will authorize? Who will pay? What is the price of freedom from the market, the "public," the powerful?)

B. Fewer Hours Devoted to Production by Each Person in his Lifetime

1. Fewer hours per day, fewer days per week, fewer weeks per year; longer vacations; sabbaticals. (Can individuals be offered greater personal choice among them?)
2. Postponement of the entry of youth into the work force and encouragement (or enforcement?) of early retirement.
3. Raising wages and increasing individual choice of when and how long to work.
4. Discouraging extra work by progressive taxation or other inducements (Lower instead of higher overtime rates?)
5. Lower prices in increasingly efficient industries, to increase purchasing power and enable those in more static industries to buy more for less work and thus share in the overall reduction of the productive workload.

C. Preserving and Creating Inefficiency to Counteract the Trend

1. Delayed introduction or under-utilization of better methods.
2. Decreasing the intensity of work.
3. Building non-productive activity, including idleness, leisure, education, into the job.

L.I.D. National Program Proposal

# A NEW ECONOMICS OF TECHNOLOGICAL ABUNDANCE

The amount of human labor needed to produce more and more physical goods keeps declining as technology advances. Technology already known but not yet fully applied promises a continued and steeper decline; technology still to be discovered may make the decline precipitous. We are far enough into the age of technology to knowthat it can bear two kinds of fruits: abundance and disruption. We have seen enough to know that the first cannot be obtained, nor the second prevented, without greater wisdom on our part.

Already in this country, production is limited only be decision -- or lack of it. We are unlocking the hiding places where physical energy is conserved. We are developing the interchangeability of energy and matter from a laboratory phenomenon to an industrial commonplace. The physical restraints on production are recedinginto the dim distance. Not only can we produce almost anything we decide to, but the very "work" of production tends to become more and more simply a matter of decision rather than exertion.

The decision to produce, then, is controlled not by inflexible physical restraints but by the ability to distribute. But we must still try to distribute in accordance with economic laws derived from a society in which almost everybody had to work as efficiently as possible to produce less than enough. Capital could be created only at the expense of current income. New economic laws are surely needed for an economy such as ours has already become. We produce undreamed abundance while manpower, resources, and energy rot, erode, and dissipate from disuse. Even money has lost its reality as a limit: if certain key decision-makers (in government, in finance, in industry) believe that a market will exist, the mere pieces of paper recording their belief become money.

But where are the markets to come from? The wages of useful (omitting military) production -- even includingthe wages of producing capital equipment for future production -- have been insufficient for thirty years to secure prosperity and sustain an adequate rate of growth in demand. The result is unemployment, poverty, and squalor in the midst of waste and plenty.

In short, our system of allocating purchasing power is not only comparatively inequitable but totally inadequate. A system designed to keep purchasing power down to a low level of producing power is becoming disastrous. The problem is getting worse fast. The decline of physical labor has been partly offset in the recent past by a sharp rise in paperwork, but the mere beginnings of cybernation and automated data processing are reversing this trend. Obsolescence threatens almost all forms of work connected with supplying each other. The only forms that seem relatively immune are those that concern pleasing each other -- such as designing and hand-making, educating and healing, inspiring and entertaining, counseling and arguing and playing. It may be within our power to make these the main employments of the future -- if we want to.

# ABUNDANCE AND FREEDOM

The 58th Annual (1963) L.I.D. Conference could concern itself with some of the following questions:

I. HOW CAN WE SHARE THE FRUITS OF ABUNDANCE? We cannot have it until we learn how to share it.

A. New ways of "earning" — in being and envisionable
   1. New ways of contributing to production and new ways of placing values on contributions (morale building and public relations values; standing by — featherbedding and "consulting"; what about staying away, keeping quiet?)
   2. New forms of distributing "earnings" (fringe benefits; on-the-job benefits; "non-profits" — the right to do desired kinds of work, to use certain equipment)

B. New ways of distributing income not directly and quantitatively attributable to contributions to production ("unearned")
   1. Taxation: redistribution of money, distribution and subsidization of goods and services, public goods and benefits
   2. "Private" equivalents: profit-sharing, fringe benefits, corporate and other philanthropy, etc.
   3. New forms and new combinations

C. What policies will promote which developments? Which developments will promote freedom and personal responsibility?

II. HOW CAN WE SHARE THE WORK OF PRODUCTION? Who has to work how much? Who has a right to work how much? When? How does the right to consume relate to the right to work?

A. Deliberate inefficiency: as a transitional device? As a permanent technique? Can we be free to be efficient — or inefficient?
B. Fewer working hours per year: shorter days? shorter weeks? longer vacations? Can each choose for himself?
C. Fewer working years in a lifetime: longer "youth?" earlier retirement? sabbatical years? Are increasing educational requirements and involuntary retirement trends limiting freedom? Could higher pay and more inventive use of quasi-insurance techniques promote greater flexibility and freedom?

III. CAN EVERYONE HOPE TO BE USEFUL? The problem of "non-workers"

A. How much of the fruits of technology belongs in the first instance to those connected with producing it? What are the limits of taxation?
B. As the proportion of producers declines, will there be enough other kinds of employment for everybody? Will the rest perform at the command of the producers, or vice versa?
C. What new ways of structuring temporary and permanent unemployment will we need? How will they affect the way we live?

IV. CAN EVERYONE BE INCLUDED IN ABUNDANCE?

A. How can we include the presently excluded in this country? By postponing long-range economic reform? By hastening it? By short-range policies unrelated to it?
B. Is it possible to attain greater abundance in one country, or group of countries, while the rest of the world stays poor? How independent is our economy? How free are we politically in the present world? Will aiding other nations aid our own economic advance, hinder it, or not affect it?

COMPLIMENTS OF
MANFRED OHRENSTEIN

# STATE OF NEW YORK

Print. 2521 Intro. 2407

# IN SENATE

February 4, 1964

Introduced by Mr. OHRENSTEIN—read twice and ordered printed, and when printed to be committed to the Committee on Finance

# AN ACT

**To amend the executive law, in relation to creating a state economic commission to provide against the hazards of unemployment, to marshal the economic resources of the state for full employment and prosperity, to provide necessary public services and facilities; and to authorize and to submit to a referendum vote of the people a proposition for the issuance of a bond issue in the sum of two hundred million dollars to effect such purposes**

***The People of the State of New York, represented in Senate and Assembly, do enact as follows:***

Section 1. The executive law is hereby amended by inserting therein a new article, to be known as article nineteen-h, to read as follows:

*ARTICLE 19-H*

*STATE ECONOMIC COMMISSION*

*Section 525. Legislative finding.*

*526. Short title.*

EXPLANATION — Matter in *italics* is new; matter in brackets [ ] is old law to be omitted.

*527. Definitions.*

*528. Creation and composition of state economic commission.*

*529. Authority of the commission.*

*530. Compensation of members of the commission.*

*531. Executive director.*

*532. Power to adopt rules and regulations.*

*533. Term of office.*

*534. Availability of records to members of the commission.*

*535. Participation by the industrial commissioner.*

*536. Reports to the commission.*

*537. Surveys to be made by the commission.*

*538. Certificates of necessity and convenience.*

*539. Organization of public corporations.*

*540. Supervisory function of the commission.*

*541. Research bureau and other employees.*

*542. Right of condemnation.*

*543. Enterprise finance corporation.*

*544. Manner of organization of public corporations; ownership of stock; methods of procuring additional financing.*

*545. Method of public financing.*

*546. Applicability of laws governing collective bargaining.*

*547. Surrender and revocation of certificates of necessity and convenience.*

*548. Bond issue.*

*549. Separability of provisions.*

***§ 525. Legislative finding. It is hereby declared as a matter of legislative finding that:***

*(a) The accelerated pace of automation, technological changes, the population explosion, the civil rights revolution, the conversion of military to civilian facilities, and the shift in public needs, combine to further sharpen the stark imbalances of our economy and society—increases in productivity alongside increased unemployment; overabundance of material products alongside dearth of public necessities; increased costs of local government alongside record profits of private enterprise. Added to New York state's lagging behind the nation in such economic indices as rate of employment, rate of growth, and average hourly wages, these new factors threaten the very basis of our economic health. Deprived minorities and in-migrants dramatize the poverty amidst our plenty.*

*(b) Now is the time to build the schools and colleges, the hospitals and health facilities, for which the needs grow more acute every year. Now is the time to remove the slums and add to the supply of decent housing. Now is the time to modernize and add to modern mass transit systems. Now is the time for a vast program of public works, in all fields, to benefit all the people with the fruits of human resourcefulness and technological advance. We can no longer afford to be privately wealthy and publicly poor. Nor can New York state, any more than the nation, afford the human blight of one-fifth of the population in sub-standard living conditions. We must lower the economic as well as racial barriers to allow the participation of all people in our abundance.*

*(c) While the products of private industry can now be made by less and less people, it would take vast human resources to carry out the building and public works program here envisoned. Countless more would be employed—teachers, nurses, building workers—to maintain and operate these facilities. Yet such a program must not be regarded as a temporary palliative to create artificial employment. This program must be a creative approach by government to provide a better life in such areas of public need that private enterprise alone cannot, will not, or cannot be expected to, assume.*

*(d) Unemployment insurance and other forms of social security legislation now in force in the state and federal fields, necessary and desirable to cushion, to some extent, against the hazards of unemployment and other individual disabilities; the extension of public works; the distribution of monies through organized systems of public relief; and the organization of works projects on a relief basis are, individually and collectively, inadequate to solve the problem of unemployment or to achieve maximum productive prosperity so that the tax burden existing by reason of social security programs may, thereafter, gradually be reduced. Experience has shown that such programs are even more inadequate in periods of crisis which, as indicated above, are reasonably to be expected in the near future;*

*(e) The state of New York is possessed of great natural resources, industrious and ingenious citizens, and substantial technological development and great general wealth; and the general welfare, full employment and wide prosperity require encouragement of*

*maximum production and maximum purchasing power through real employment at real work for real wages;*

*(f) The example federal agencies assisting private business, and public and semi-public corporations where desirable, and the desirability of maintaining vital economic and political functioning decentralized among the states, co-existent with the spheres of activity of the nation, all point to the need and suitability of state cooperation with capital and labor in the manner provided herein;*

*(g) Use of public funds and credit as provided in this article, is, as a matter of known and sound economics and fact, as direct and specific a use to protect against the perils of unemployment as a direct grant of unemployment insurance, the extension of public works programs, the creation of work relief or the direct use of funds for home relief. It is desirable that the monies so expended should be used in the production of real wealth for the use and benefit of the entire people of the state of New York; and*

*(i) The blocking of numerous fruitful avenues of production which will result in increased employment and wealth by the withholding by their owners of patented inventions from exploitation and the complete utilization, at a fair compensation, of inventions enjoying the privilege of American patent rights and owned by persons and corporations subject to the jurisdiction of the courts of this state is a matter directly affected with a public interest.*

*§ 526. Short title. This article shall be known and referred to as the "State Economic Commission Law".*

*§ 527. Definitions. As used in this article:*

*1. The term "commission" shall mean the New York state economic commission;*

*2. The term "commissioner" shall mean the industrial commissioner or any deputy commissioner acting for and on his behalf;*

*3. The term "person" shall mean and include any natural person, partnership, joint-stock association, private corporation and unincorporated association;*

*4. The term "certificate" shall mean certificate of necessity and convenience;*

*5. The term "enterprise finance corporation" shall mean any public corporation hereafter organized, to which shall be turned over the sum of two hundred million dollars, or any part thereof, realized upon the sale of bonds authorized by referendum to be submitted to the people, and any sum or sums which may thereafter be authorized. It shall not include any person, private or public corporation to whom or to which loans may be made, as hereinafter set forth.*

*6. The term "public corporation" shall mean any corporation organized by the commission, as hereinafter provided, to effect the purposes of this act. It shall not include the enterprise finance corporation.*

*§ 528. Creation and composition of the state economic commission. There is hereby created in the executive department a commission, to be known as the New York state economic commission, which shall be composed of fifteen members, one of whom shall be the industrial commissioner. The other fourteen members shall be appointed by the governor with the advice and consent of*

*the senate. The persons appointed as members of the commission by the governor shall be as follows: two members of the commission shall be persons known to represent the interests of organized labor; two members shall be persons known to represent the interests of employers; two members shall be persons known to represent the interests of agriculture; two members shall be persons known to represent the interests of consumers or of the general public; two members shall be persons known to represent welfare agencies, other than governmental welfare agencies; two members shall be persons known to represent educational institutions or groups, public or private, one of whom shall be an econo mist by training and profession and the other of whom shall be identified with vocational training; and two members shall be persons of repute in the fields of technology or applied science or engineering.*

*§ 529. Authority of the commission. The state economic commission shall have authority to act, within the sphere of its rights, powers and duties, by a majority of its members.*

*§ 530. Compensation of members of the commission. The members of the commission, insofar as shall not be prohibited by specific constitutional provisions, may be municipal, state or federal employees, or public officials in other capacities. Such members shall have the right to elect between the compensation provided for by this section and any other compensation to which they may be entitled as municipal, state or federal employees or officials. Subject to such limitation, each member of the commission shall receive, as compensation, the sum of fifteen thousand dollars per*

*annum. In addition, each such member shall be paid his reasonable and necessary traveling and other expenses while engaged in the performance of their duties.*

*§ 531. Executive director. The commission shall select a person, who shall not be a member thereof, as its executive director. Such executive director shall receive, as compensation, the sum of twenty thousand dollars per annum, in addition to reasonable and necessary traveling and other expenses while engaged in the performance of his duties.*

*§ 532. Power to adopt rules and regulations. The commission shall have the power and the authority to adopt such regulations as may be necessary to effectuate the purposes of this article, and such rules and regulations, when adopted, shall have the force and effect of law. It shall adopt rules to govern its proceedings. The executive director shall keep a complete record of all proceedings of the commission, which shall show the names of the members present at each meeting and every matter acted upon by the council. The records shall be kept on file in the office of the commission.*

*§ 533. Term of office. The term of office of a member of the commission shall be six years, except that, at the time of the initial appointment, the classes shall be divided in half so that one member in each class shall be appointed for three years and the other shall be appointed for six years. Thereafter, at the termination of each term of office, all appointments shall be for a period of six years. Any vacancy in the membership of the commission shall be filled only for the unexpired term thereof.*

*§ 534. Availability of records to members of the commission. All records of all departments and agencies of the state shall be available to the commission and to the members thereof at all times.*

*§ 535. Participation by the industrial commissioner. The industrial commissioner may participate in the commission through a deputy commissioner.*

*§ 536. Reports to the commission. The commission, in its reasonable discretion, may require that all persons and corporations, public or private, employing ten or more persons and doing business for profit in whole or in part within the state of New York shall supply to the commission, not later than the thirtieth days of April, July, October and January of each year, a summary report of number of employees, volume of production and/or purchases, volume of sales and distribution, volume of services rendered, balance of inventory, and backlog of unfilled orders for the preceding three months ending with the last day of the preceding month, together with such other information which may be required by the commission. Such reports shall be privileged communications, not subject to subpoena in any legal proceeding in any court and not subject to examination by any federal or other state or governmental agency. They shall be treated as confidential and shall be used by the commission as data for the purpose of compiling statistics and to enable the commission to issue the reports required to be issued by this article and they shall not be used for purposes other than those specified in this act.*

*§ 537. Surveys to be made by the commission. The commission shall make continuous surveys of industrial activities and employ-*

*ment trends, as well as of the status of vocational training. It shall treat the information derived from other departments and agencies of the state and the United States as well as information which may be supplied to it in the quarterly reports provided for by the preceding section with reasonable statistical and research analysis, according to the usual and customary methods of current business, labor, vocational and technological practice. It shall publish quarterly reports of a character indicating, so far as is reasonably possible, those fields in which increased activity is necessary or desirable and in the public interest, with the addition of practical information, suggestions and advice, so as to guide and encourage private enterprise. Such research and reports shall be devoted primarily to industry and employment within the state of New York, but shall include reasonable reference to related national and international business and employment information. Upon the application of any person or on its own motion, the commission, in its reasonable discretion, shall hold public hearings to guide the commission in amending or supplementing its reports.*

*§ 538. Certificates of necessity and convenience. The commission shall entertain applications from persons or corporations for new or enlarged enterprise in fields indicated in the commission's reports for the purpose of providing appropriate employment and increased production; lists of such applications shall be published and hearings held thereon within a reasonable time thereafter; and within a reasonable time after such hearings or opportunities for hearings the commission shall issue certificates of necessity and convenience in response to such applications as are approved by*

*the commission, in its reasonable discretion. Holders of such certificates shall be eligible to financing, in whole or in part, as further provided herein.*

*§ 539. Organization of public corporations. Upon a finding by the commission that more than ninety days have expired after publication of its report and there has been a failure of private business applicants to engage or expand in such recommended enterprises, the commission may, in its reasonable discretion, organize a public corporation to engage in such industry. The organization of such public corporation by the commission shall include, automatically, the issuance of a certificate of the same character as provided in the case of private applicants, as set forth in the preceding section. Such public corporation shall, similarly, be entitled to public financing, in whole or in part, as further provided herein.*

*§ 540. Supervisory function of the commission. It shall be the duty of the commission to keep itself fully informed of the activities of all persons and all private and public corporations to whom or to which certificates shall have been issued by it. To effect the purposes of this article, it may recommend restriction, expansion or cessation of the activities of such persons or such private or public corporations after due notice and hearing, if such hearing is demanded. Such orders of restriction, expansion or cessation shall be enforcible by and reviewable in the courts.*

*§ 541. Research bureau and other employees. The executive director of the commission shall be the director of the research and publication bureau of the commission. The commission may employ such additional employees and counsel as, in its discretion,*

*may be needed from time to time, and in accordance with a budget to be prepared and voted according to law.*

*§ 542. Right of condemnation. The commission is hereby given the right to acquire, in the name of the people of the state of New York, by condemnation proceedings in any state or federal court within the state of New York having jurisdiction, for the benefit of any holder of an unrevoked certificate, absolute title, licenses, easements, or other total or partial property rights, upon the payment of fair compensation, which shall be fixed by the court, in land, machinery or other property, the use of which is found by the court, sitting as a court of equity, necessary or desirable in the public interest for the carrying out of the purposes of this act, through a holder or through holders of a certificate or of certificates issued by the commission. In such proceedings the relevant certified recommendations of the council shall be received in evidence and members or employees of the commission shall be competent to testify as expert witnesses; but neither such papers nor such testimony shall be conclusive upon the court. In all such proceedings it shall be a sufficient answer and defense that the owner of the property or patents in question files, in duplicate, in court and with the council, a bona fide offer or application to proceed with the use or exploitation or expansion of the patent or enterprise in question, as recommended by the commission, within ninety days thereafter.*

*§ 543. Enterprise finance corporation. Upon authorization of the bond issue hereafter provided for, the commission shall organize an enterprise finance corporation, with a capital of two hundred million dollars. The proceeds of such bond issue shall be turned*

*over to such enterprise finance corporation for use as a revolving fund to effectuate the purposes of this article.*

*§ 544. Manner of organization of public corporations; ownership of stock; methods of procuring additional financing. (a) The manner of organizing public corporations by the commission as provided herein, including the organization of the enterprise finance corporation, shall be in accordance with the corporation and other laws of the state of New York. The members of the commission, or any committee thereof, may act as incorporators and a majority of the board of directors shall be members of the commission or persons designated by the commission. One place on the board of directors shall be held by the comptroller of the state of New York, or by a person designated by him; another place on the board of directors shall be held by the superintendent of banks of the state of New York, or by a person designated by him; a third place on the board of directors shall be held by the superintendent of insurance of the state of New York, or by a person designated by him; while still a fourth place shall be held by the commissioner of the department of commerce of the state of New York, or by a person designated by him, but in no event shall the four persons last named constitute a majority of the board of directors. All public corporations so created shall have the power to pay reasonable expenses, including salaries. Rates of interest on public financing herein referred to shall be not more than six per centum per annum. Such rate, from time to time, shall be such as reasonably will help to effectuate the purposes set forth in this act, taking into consideration the necessities of competitive conditions.*

*(b) Ownership of all shares of stock of all classes in any public corporation organized under the provisions of this article shall remain vested in the enterprise finance corporation at all times.*

*(c) Nothing contained in this article shall limit the right or the power of any public corporation to issue bonds for public sale or to apply for loans to any corporation or administration organized or created under the laws of the United States, but any liability thereby accruing shall be the liability of such public corporation exclusively and the state of New York shall bear no responsibility therefor. Any evidence of indebtedness issued by such public corporation shall bear, on the face thereof, appropriate notation of such exemption of the state of New York from liability therefor.*

*§ 545. Method of public financing. Any person or corporation, public or private, to whom or to which there shall have been issued a certificate by the commission may thereupon make application to the enterprise finance corporation created pursuant to the provisions of section five hundred forty-three of this article for such loan or loans as may be necessary to enable such person or corporation to engage in new or enlarged enterprise in the field for which such certificate shall have been issued. Such loan or loans shall be in such amount and for such duration and under such terms and conditions as the commission, in the exercise of its reasonable discretion may determine.*

*§ 546. Applicability of laws governing collective bargaining. (a) All persons and corporations receiving certificates and/or public financing, in whole or in part, including public corporations, shall pay, at least, the prevailing rate of wages and shall comply*

*with all state and federal labor laws, including all laws governing collective bargaining.*

*(b) Nothing contained in this article shall be deemed, in any way, to abridge the right of any employee, or committee, group, association or union of employees of any person or private or public corporation to whom or to which a certificate shall have been issued to use any lawful means for the purpose of resolving a labor dispute and all laws governing labor disputes shall be applicable to any labor dispute involving such employees or committees, groups, associations or unions of employees.*

*§ 547. Surrender and revocation of certificates of necessity and convenience. (a) Any person to whom the commission shall issue a certificate, may, at any time thereafter, voluntarily surrender such certificate; but any such surrender shall immediately work a forfeiture of any rights which may have accrued thereunder. Any monies owing to the enterprise finance corporation at the time of such surrender shall forthwith become due and payable and the enterprise finance corporation shall take such steps as may be necessary to effect the collection thereof.*

*(b) In the event that any person to whom a certificate shall have been issued under the provisions of this article shall fail to avail himself of any of the rights thereby created for a period exceeding ninety days from the date of the issuance, the commission shall have the right, in its reasonable discretion, after a hearing in the event that a hearing is requested, to revoke such certificate and to declare forfeited the rights and benefits thereby created.*

*(c) In the event that any person or corporation to whom or to which a certificate is issued shall fail satisfactorily to discharge the obligations thereby imposed upon it, or shall violate any of the provisions of this article, the commission, in its reasonable discretion, after a hearing, if such hearing is requested, may revoke such certificate and declare forfeited the rights and benefits thereby created. Any monies owing to the enterprise finance corporation shall forthwith become due and payable and the enterprise finance corporation shall thereupon take such steps as may be necessary to effect the collection thereof.*

*§ 548. Bond issue. Subject to the provisions of the constitution of the state of New York, and to take effect upon approval at a referendum of the people, the state of New York, as soon thereafter as is practical, shall incur a debt in the sum of two hundred million dollars by borrowing, through a serial bond issue, according to law, to be offered and sold or marketed by the comptroller of the state of New York, at such rate of interest or discount as prudently may be necessary. The proceeds thereof shall be turned over to the enterprise finance corporation, organized as hereinbefore provided, for the purposes specified and with the primary intent of protecting the people of the state of New York against the hazards of unemployment, while incidentally serving the other advantages referred to herein and found to be cumulative and without detraction from such primary purpose.*

*§ 549. Separability of provisions. If any provision of this article or the application thereof to any person, public or private corporation, including the enterprise finance corporation, or to any*

***public officer is held invalid, the remainder of this article and its application shall not thereby be affected.***

**§ 2. Section five hundred forty-eight of the executive law, as added by this act, shall not take effect unless and until it shall have been submitted to the people at a general election, and have received a majority of all the votes cast for and against it at such election and such section shall be submitted to the people of this state at the** general election to be held in November, nineteen hundred sixty-four. Upon the approval by the people such section shall go into effect January first, nineteen hundred sixty-five. The ballots to be **furnished for the use of the voters upon the submission of such section shall be in the form prescribed by the election law and the proposition or question to be submitted shall be printed thereon in substantially the following form, namely, "Shall section five hundred forty-eight of the executive law, as added by chapter (here insert the number of the chapter) of the laws of nineteen hundred** sixty-four, entitled 'An act to amend the executive law, in relation to creating a state economic commission to provide against the hazards of unemployment, to marshal the economic resources of the state for full employment and prosperity, and to provide necessary public services and facilities; and to authorize and to submit to a referendum vote of the people a proposition for the issuance of a bond issue in the sum of two hundred million dollars to effect such purposes' be approved".

**§ 3. The remainder of this act shall take effect immediately.**

Norm,

I am enclosing this clipping for you to read and to place in your files. Perhaps it may come in handy one of these fighting days.

JUN 9 1964

Regards.

Harvey Gibson

# Thruway Broadens Its Job Policies

ALBANY — J. Burdell Bixby, chairman of the New York State Thruway Authority, has pledged to make greater efforts to inform non-white persons of job openings with the Authority following a meeting with officials of CORE and a labor union.

The meeting was held in Bixby's offices here last Thursday climaxing four days of picketing by CORE and members of Council 50 of the State, County and Municipal Employees Union, AFL-CIO, who had charged the authority with discriminating against Negroes and Puerto Ricans.

They had picketed the Thruway's maintenance barns in Nyack, N. Y., protesting racial discrimination and the failure of the officials to give recognition to union grievances.

A survey by the two groups showed that of 1,900 permanent employees and 300 temporary employees only about 80 were Negroes, and a lesser number were employed by the 31 concessionaires who are licensed by the Authority.

The Authority agreed to notify the two groups of permanent job vacancies and to advertise them in minority communities and to inform their concessionaires who will hire some 1,200 employees for the summer rush, of the state's non-bias employment laws.

# DRAFT ORGANIZATIONAL OUTLINE FOR NATIONAL COMMITTEE FOR FULL EMPLOYMENT

## STRUCTURE OF THE COMMITTEE

The national committee is formed as a leadership organization contemplating no direct membership base. However it should have three constituent bodies:

A. A National Council consisting of:

1. leaders of local committees.
2. persons connected with major organizations who are interested in the problems eg. trade unions, civil rights groups, churches and peace organizations.
3. university people and prominent individuals.

This council should meet as often as is necessary to perform the following functions:

Policy making on such questions as local target areas, new program (demands), budget, personnel, and program content (activities).

B. A National Advisory Board, consisting mainly of sponsors and individuals who cannot devote the time to regular meetings. This advisory board should also include some givers.

C. A Research Advisory Council, consisting of academics, whose knowledge and interest in this and related problems make their contributions to various phases of the program important. These people should be consulted on research papers, co-opted for local activity in research projects, and for occasional consultation on other matters.

## STAFF

1. National Director
2. Research Director
3. Field Secretary

### Functions of National Director

Major responsibility would be policy implementation.

a. target areas for organization (field work).
b. continue raising of funds.
c. direct work of research.
d. public spokesman for the committee.
e. liason with other organizations interested in unemployment action.

### Functions of Research Director

a. collect relevant data on national level.
b. organize research in local areas through contact with university people and students.
c. develop programmatic alternatives on both levels.

Functions of Field Secretary

Initiate local projects - work with other groups in local areas, evaluate projects.

Budget for one year

| | |
|---|---|
| National Director - salary | $8,000.00 |
| Research Director | $6,500.00 - $7,500.00 |
| Field Secretary | $6,000.00 - $7,000.00 |
| Office - salaries | $4,000.00 |
| expenses | $1,000.00 |
| Travelling and Misc. | $2,500.00 |
| | $30,000.00 |

The central operation of the committee should revolve around local areas. Its primary constituency in local areas is the unemployed themselves ("jobless" is a more accurate term, since many unemployed are youth who have never worked.). Organizing the jobless may involve several steps:

1. A broadbased citizens committee for full employment on local level should be formed. This should be a responsible group, as well as a working group, and consisting of individuals who would be trade unionists, civil rights leaders, university people, church, peace and other organizational leaders, and prominent persons.

   This committee would serve the following functions:
   a. advise and guide the efforts of the field staff to organize among the unemployed, in terms of policy, program and techniques.
   b. gather financial and other resources, such as personnel, to support efforts.
   c. act as an auxiliary political and social lever in representations to government agencies, including legislative, judicial and administrative bodies which may be considering actions around the problem of full employment.

2. The field organizer should establish contact, both through the committee, but not confined to it, and with the community in which organizing efforts are to take place. This would include unions, churches, youth clubs, fraternal groups etc. The purpose of this contact is to enlist the cooperation of some of them, as well as neutralize political sources of opposition within the organized community. Where possible, the organizer should attempt to co-opt existing facilities for a base of operations, if they can be made available either by a friendly community organization or an individual.

3. A visible base of operation should be established in the community. This could be a store front or a loft, or part of some other facility. This is particularly important so that jobless people know where to go, and also so that the organizer becomes a stable part of the community.

4. An important point of contact might be the initiation of a service operation for the jobless. This would be an individual counseling and representative function. Problems such as unemployment comp., repossession, welfare, discrimination in hiring (both for Negroes and the aged) could be taken up as an avenue for further action. This phase would be an ongoing program which would act for recruitment of the jobless, community acceptance, and public relations. It should be well publicized through organizations, and on the street, through mass media, etc. Volunteer legal aid, social workers and other people could staff this operation. However, it should be open during the day as well as the evening.

5. Simultaneously with 4. a complete research job should be undertaken to determine the dimensions of the problem in the community: viz manpower resources in terms of skills, community needs, both in the social service as well as public facilities and industrial utilization. The objectives of the research job are three fold:

   a. to make the total community conscious of the realities of the situation.
   b. to provide a basis for determining the kinds of groups with whom the Committee will have to deal.
   c. to find a basis for local action to relate to full employment around a program of demands of a national and local scope.

   In some cases, studies are available which can be used as a guide to save time in comprehensive research. These should be collected and evaluated.

6. Through organizations, such as unions, churches, a program of agitation should be undertaken, articualting several demands of a fairly simple character around which direct action could take place. This agitation should be aimed primarily among the jobless, but also among those (unions, civil rights groups) who are concerned about the problem. Mass meetings (both outdoor and indoor) leaflets, canvassing etc. should be undertaken after steps 1-5 (or similar preparation indicated the basis for a constituency) have been gone through.

   One of the preparatory forms which may be appropriate is a mass conference on unemployment which can serve to legitimize, as well as articulate, demands around this problem. The conference could be preparatory to the formation of the citizens committee, or, the result of its ability to reach into the community with an effective service program. This technique should be used carefully, lest it become a substitute for direct action.

7. Direct action of a political nature i.e. demonstrations, picket lines, marches, should be a prime means of making demands known. These might involve wide sponsorship of groups associated with the local committee, but should not be confined to it. Others like veterans groups, youth and fraternal organizations, as well as churches, outside the pale of traditional liberalism, might join in this kind of action.

8. The presentation of demands through delegations of jobless to governmental bodies should be developed including testimony and conference with legislative and public officials. These delegations should not be confined to larger public questions such as the shorter work week, or more public works, but should also take up problems relating to the administration of government agencies, grievances of a more general character, against welfare policies etc.

9. An attempt could be made, although this should not be a mechanical objective, to organize a more stable body of the unemployed themselves, which could have its own leadership and policy. This would necessarily be more of a "movement" than an institution, because of the transiency of a sector of the unemployed who move in and out of work.

Miscellaneous Problems (See working papers)

1. Choice of area.
2. Relations with other organizations.
3. "Service" functions.
4. National and local demands.
5. Relationship with larger social questions e.g. defense, dole, etc.

COMMENTS ON ORGANIZATION

Reaching the unemployed is the most difficult problem facing us. Neither the civil rights movement, which has relied on students and organized middle class elements for its constituency, nor the labor movement, which, on the whole, has cut its jobless members off from participation in the affairs of the union local, have paid much attention to the unemployed. It must be remembered that the civil rights movement has been concerned mostly with the elimination of social and political discrimination and only peripherally with the problem of employment. Those groups such as CORE and NAACP which have conducted actions for equal job opportunities have used students or employed workers to do the actual picketing.

In some UAW locals during the 1960 recession, unemployed committees were organized. These committees were closely linked with the local union and did actually help dramatize the plight of the jobless. Unfortunately, their program and techniques were circumscribed by conservative union policy which did not utilize direct action techniques.

Currently, the unemployed in Northern cities are Negroes, Puerto Ricans, Mexicans, and young people. In certain area such as New England and Pennsylvania, particularly in textile towns and coal regions, and in places where communities have suffered because of shifting patterns of defense procurement, white workers have been chronically jobless. There is not doubt, however, that recovery in the auto and steel industries in recent months coupled with the out-migration of white southerners from large miswestern cities, has reduced the number of white jobless.

Therefore, in the immediate future, our concentration should be in three main areas:

1) Jobless Negroes and young people in large cities.

2) Areas where defense has resulted in layoffs.

3) Areas where automation has hit a dominant industry.

The long term joblessness of textile and mine workers presents an entirely different set of problems relating to the question of total community demobilization. I believe that these groups, as in Eastern Kentucky, might eventually respond to a job fight. At the present, however, the length of time which they have faced this problem has enabled them to make psychological and material adjustments which act as a brake on their militancy. An additional factor retarding the chance for mass action in these areas is the heavy migration to other places. Finally, activity among these groups is likely to center upon the failure of the unions to maintain pensions or other benefits for the jobless, rather than on the issue of jobs.

What with the incredible militancy of the civil rights movement in the past few months, it is possible that the Negro jobless could become a force on this problem. Organizing among working class Negroes does not present the same kind of difficulties as organizing among jobless whites.

This is based on the following:

1) The Negro community is usually concentrated in a small geographic area.

2) The level of community organization among the Negro population is growing on housing and school issues. These groups are usually not related to civil rights organizations but are inclusive of them.

3) Negro workers belong to churches and are active in them.

4) In some cities, the NALC or other Negro worker organizations (TULC) are well organized and relatively mature. These groups might provide an immediate base for activity. Also, these groups have acted, in part, as trade union caucuses and have considerable influence on white trade unionists who might be prone to participation in job movements if initiated within the Negro community.

A project should be set up in a Negro community where a combination of the civil rights groups, active trade unions, and Negro workers organizations could form an effective committee for jobs. It is very important that the main thrust of this committee be directed to the problem of increasing the number of jobs. This does not exclude the issue of discrimination where jobs exist. As indicated in the strategy paper, the demand for jobs within the existing employment structure has considerable limitations, except insofar as it opens up new industries for Negro employment. Without an economic program winning job fights on construction sites, breweries, and in other industries which have been lily white, will not solve the job crisis for masses of Negroes.

At this time, a service operation as indicated in the outlined organizational scheme can probably to circumvented in the Negro community. Large sections of Negroes are in motion and would be receptive to acting on the job issue beyond discrimination. However, catalytic attempts by politically sophisticated civil rights and radical groups who demonstrate for jobs should not replace the task of reaching the jobless themselves.

Contact with Negro unemployed can be established through churches, unemployment offices, and other community centers where people congregate. A lot of plain agitation has to be done before jobless Negroes will respond. Sympathetic union locals with large Negro memberships can be a lever for contact. The street is an additional forum.

## FIRST STEPS

The first step is to form a community committee of civil rights, union and other leading people to set out a program of demands and to agree on forms of action. This committee should include people who actually have contact with the jobless.

Step two is to popularize these demands in the community and to call a mass rally or conference to give the problem further visibility. Another technique of creating visibility is to actually demonstrate at construction sites, City Hall, or at major employers who discriminate.

The key demand should probably revolve around the enlargement of the public works program of a community. These programs should be run by the community if an end to discrimination is sought as well as job opportunities on a broad scale. Negotiations with local officials on this question should be conducted for specific programs prior to and concurrent with these activities.

Another basic battle is around apprenticeships for minority youth. If new opportunities are created, the number of skilled workers to fill these jobs must be increased from the Negro community. However, the precondition for major breakthroughs in this area depends on the growth of the number of jobs; otherwise we will be in the old trap of tokenism.

The civil rights movement in local communities cannot be counted on to give leadership on the whole economic issue at this time. In its initial stages it can lend support and give some leadership, but our committee in the local community will have to provide the impetus and prevent diffusion of energies to other areas. However, it is important to persuade trade unions, civil rights groups and others that fighting for jobs is really the next step in the effort to gain full civil rights. As indicated in the strategy paper, this is no simple matter. In the initial organizing steps, complete agreement around this question cannot be expected, nor should lack of it become a deterrent for action.

It is clear that nationalist groups within the Negro community have rested their case on the impossibility of Negroes gaining full equality in white society, particularly in employment. Their case has been reinforced by the general indifference of most local civil rights groups to the whole economic plight of the Negro worker. On the other hand, the base which Nationalists have established among Negro workers in some communities is an important argument for a broader program by others to work on these unmet needs.

In all areas, full time people to work on this specific project need to be recruited - from civil rights, trade unions, and organizations such as the APSC. These people should be able to perform the dual job of gathering top support and working among the jobless. To set our techniques in advance would be premature since real efforts to mobilize the jobless are nonexistent and haven't been attempted, except within narrow contexts, since the thirties.

## NOTES ON DRAFT OUTLINE FOR ORGANIZATION

1. On service operation: This would require a larger financial and personnel committment than we currently can afford. It may become more viable for a long term community organizational effort, later on.

2. The role of research: This is likely to be underestimated in importance. Actually, it will be extremely useful (absolutely necessary) if the objectives of the job movement are to be linked to real alternatives which are workable at the local level. How do you create jobs? What kind of programs can be fought for? Which are the areas where jobs can be created by the utilization of existing federal or state funds? What kind of legislation should be fought for?

3. The need to create an enduring movement: In order to go beyond the discrimination focus, and to have an impact politically, it is necessary to have an organizational form which has a long term outlook. Ginger group activity will not really be capable of struggling through on long term economic needs. Therefore, while direct action is the chief technique for spurring action, the real focus must be seen in terms of political and legislative activity. Deamnds such as the shorter work week and more public works can only be gained by political action. Moreover, to release vast funds for social need, similar political pressure is needed.

   Finally, the economic questions in the next years may well form the basis for polarization of traditional liberal politicans from their base, Negroes and workers. Cold war committments, which prevent these politicians, even in Northern cities, from supporting dramatic increases in other forms of public expenditures, may have to be replaced if programs leading to full employment are to become policy.

4. Money: There is none, chiefly because:

   a) The civil rights movement is now getting most of it from private individuals and unions;

   b) Nothing has been started in local communities to provide a showcase for fund raising. We have many contacts however. The national structure is completely contigent on the question of funds.

5. Choice of pilot targets: Chicago and Detroit and Newark - chiefly because of the depth of Negro unemployment and socially aware unions, such as UPWA, UAW, and IUE (in Newark). Another area is Boston where a community committee has already been begun. Long Island is a possibility. There the defense economy is going to reek havoc on the area's economic life.

LID UNIVERSITY WORKSHOPS PROGRAM

## A Project for Drawing Up a Program of Social Reform for the United States

### The Objective:

To develop a broad, comprehensive and consistent set of policies designed to realize more fully America's potentialities for meeting the many human needs it now chronically fails to meet.

### The Approach:

A network of committees to gather information and make proposals for policy in specific problem areas and to relate the various proposals to each other on the basis of thorough, reasoned analyses of the various problems and their causes.

### The Procedure and Personnel:

Some of the committees will be concerned with particular problems, such as: the bearing of technological change on opportunities for employment as source of income and of satisfying work; the relation of social stress to the incidence of mental suffering; the impact on urban development of the segregation of poverty; etc. In each case, the committee involved will document the dimensions of the problem, analyze its persistent causes, identify the obstacles to constructive solutions, and spell out the policies, both immediate and long range, which such solutions require. Other committees will be concerned with the institutional and political conditions for implementing the proposed policies such as: the effectiveness of public economic policy and the additional kins of economic planning which may be needed; the potential sources of political support and opposition to social reform; the areas in which institutional innovations may be necessary to achieve constructive solutions, etc.

Each committee will send copies of its working papers, drafts, and other materials on its current and prospective activities to a

co-ordinating committee which will circulate them among all the other committees. It should thus be possible to identify the need for any further work which may be needed to make the links between related issues clear and the various proposals consistent. The combined efforts of the various committees will thereby be focussed on building up a reasonably systematic critique of contemporary institutions and policies leading to a broad, thoroughly substantiated program for reform which could serve as an agenda for American democracy in this decade and the next.

Since the purpose of the committees is to do serious and sustained work yielding definite criticisms and recommendations, it is anticipated that each committee will be composed primarily of people with specific training or experience relevant to the problem area in question. Meetings will ordinarily be held only when necessary to consider a working paper or draft statement circulated in advance, to coordinate work in progress, or to schedule further work. It is expected that the committees will publish their results in various forms including concise but carefully argued pamphlets stating their proposals, summarizing the evidence underlying them, and placing them in the context of the general program as it emerges. In addition, the materials prepared will be available in full to organizations and groups interested in seeking public support for the proposals advanced.

## Origins, Orientation and Present Status

This project has been launched by a small group of university professors, including the undersigned, who believe that it is now possible, for perhaps the first time since the 'thirties, to gain attention for serious consideration of the need for social reform. The inability of American society to apply its vast resources to

meeting the wide range of needs generated by a changing industrial society, and its glaring failure even to overcome sheer material poverty, have now become so manifest as to shake the complacency and discredit the "conventional wisdom" which dominated the mood of the recent past. There appaars to be a growing awareness of the need not only to complete the unfinished business of the New Deal--the creation of a full-employment welfare state--but to develop a society capable of satisfying more subtle human needs and of realizing broader human possibilities. While the fund of ideas and general outlook of the New Deal have long outlived their usefulness for this purpose, a more adequate alternative has not yet been produced. In part, this reflects the tendency in social science to concentrate on developing research techniquex without much concern for the social relevance or triviality of the research problems which the techniques are designed to solve, with the result that it has largely failed to confront, in any systematic way, the changing configuration of social power and social problems. In part, also, the absence of an alternative reflects the tendency of politically oriented social criticism to take up issues in isolation, or to indulge in generalization divorced from serious research, or, too often, to reiterate doctrinaire preconceptions.

Nevertheless, post-war research and experience have resulted in a growing fund of knowledge on which a new and solid intellectual basis for a movement of social reform can be built. This knowledge is scattered among many people on the staffs of universities, unions, government and other organizations. If those among them with genuine competence and concern join in a sustained and coordinated effort of the kind this project is intended to be, it may at last be possible to overcome the intellectual sterility of the democratic left.

Any attempt to lay down a particular ideological orientation

for this project would be inappropriate since the very purpose is to work out new approaches. It is, accordingly, perhaps enough to say that only those who reject both the pseudo-solutions to social problems imposed by totalitarian power, on the one hand, and the sacrifice of human needs and possibilities to the alleged imperatives of a business civilization, on the other hand, are likely to be interested in this project, or to make a useful contribution.

The League for Industrial Democracy has agreed to sponsor the project and is providing it with administrative and clerical assistance. The project committees, however, have complete autonomy with respect to their agendas, personnel and publication policy. The project is getting under way on the basis of favorable responses from a substantial number of people in the Northeast who have agreed to participate. As this is written, three committees are being set up, others are in the planning stage and inquiries are being sent out to prospective participants over a wider area. As the project takes shape, efforts will be extended to recruit participants and set up committees throughout the nation.

# THE POLITICAL NECESSITIES OF ABUNDANCE

Extracts from paper prepared for the Georgetown Conference on Poverty-in-Plenty.

Robert Theobald

Cross index

We are entering a new socio-economic system. Its requirements are as different from those of the industrial age as those of the industrial age were different from the agricultural. In the agricultural age, human skill combined with human and animal power in a system which provided a minimal standard of living for the vast majority of the people and a leisured existence for a small elite. In the industrial age, which we are now leaving, human skills were combined with machine power to provide great wealth for a few, a reasonable standard of living for most and abject poverty for those unable to find a place within the productive system. Today the cybernation productive system is emerging - a new innovation in productive techniques and organization based on machine power and machine skill -- i.e. automated machinery and the computer.

It is generally agreed that the labels "conservatism" and "liberalism" denote opposites and that these two political philosophies have very little in common. But from the new perspective of the era of cybernation and abundance the differences between these philosophies are seen as opposing opinions as to means and not goals. For the fundamental goal of both conservatives and liberals is the preservation of the outmoded industrial scarcity socio-economic system in an era of abundance. When the myth of scarce resources is accepted as reality, and the vast surpluses, both actual and potential, continue to be regarded as accidental bonuses or a temporary pile-up of production, the only possible disagreement is over the problem of what is to be done with these surpluses and the surplus people they create through unemployment.

Conservative businessmen say that the surpluses are a form of national insurance against scarcity and that they will be used in the economy when needed. In the same way, the more than four million people seeking work are a reassuring evidence of reserve potential in the economy in the form of a plentiful labor supply. Liberal thinkers, while agreeing that scarcity continues to be the fundamental threat to society and the economy, argue that the threat is a daily reality for too many people and that ways must be found to achieve a fairer distribution of resources so that the inevitable deprivations do not fall upon the unfortunate few. The principal liberal solution to the problem of the worker elbowed aside by automatic machinery is to push him back in through legislation. In addition, it is proposed that through the use of retraining schemes the worker should be pushed back in just as many times as he gets elbowed out. Similar ad hoc schemes are devised to cope with each mismatch between abundant production and a scarcity distribution system as it arises. All of these proposals would require legislation in order to become effective.

As a theoretical exercise it is possible to defend the contention that either of the two responses - conservative or liberal would be effective for the maintenance of a functioning economy for a period of years. The functioning of a scarcity economy is not too seriously impaired by the presence of material abundance. But neither response is adequate to solve the social and political problems posed by abundance.

Because both Conservatives and Liberals are still committed to operating within the existing industrial system, they have failed to grasp that the coming of cybernation outmodes it. Before the end of this decade, it will be cheaper and more effective to carry out the vast majority of repetitive physical and mental tasks with the aid of machines rather than men. At this point the industrial system will no longer function because the fundamental social and political requirements required for its continuance will no longer exist. Above all, the mechanism now used for distributing the right to resources will be totally inadequate.

Our present socio-economic system depends upon a very simple resource-distributing mechanism: in effect it is assumed that it is possible for the overwhelming proportion of those seeking jobs to find them and that the incomes received from these jobs will provide adequate funds to allow the job-holder to live with dignity. As a corollary, it is assumed that those having no value to the productive system are totally valueless: they are therefore only provided with a minimum income on a charity basis.

This distribution mechanism can only work satisfactorily if enough effective demand exists to use all the goods and services thus using the time and effort of all those who want to work. Measures to raise demand therefore receive ever-increasing priority. But the drive to provide enough demand to balance supply and so provide full employment must inevitably fail. It will fail because our present industrial system was not designed to distribute additional goods but to produce additional goods. Administration efforts to distribute additional resources outside the conventional consumption channels are regarded by many conservative Congressmen and interest groups as derogations from the proper guiding principles of an industrial age - the allocation of scarce resources and the encouragement of production. All proposed measures of this type are therefore subjected to intensive time-consuming criticism: if this process continues accumulation of pending legislation will inevitably cripple Congress - any Congress.

What evidence can be advanced to justify these statements? First, there is the evidence of the past. Despite all the efforts of the Administration, it has proved impossible to get the unemployment rate down below 5.5%. Even more serious, the teenage unemployment rate has continued to climb and now reaches 15% with the Negro unemployment rate double that for the total population. The improvement in educational levels continues to lag behind requirements. W. Willard Wirtz, Secretary of Labor, has stated that the machines being produced today have, on the average, skills equivalent to a high school diploma. However, 30% of the students who must compete with these machines will not complete high school.

Second, there is the evidence of the present. The Administration will almost certainly obtain passage of the tax bill but the economic and social costs will be high, not only because the bill inbalances the tax structure by providing too much money to those already saving and not enough to those who would spend to meet their urgent needs but also because the justified and necessary rise in the federal budget has been given up as a political quid pro quo to ensure passage of the tax bill. The Administration will secure a short-lived filip for the economy at the cost of severe, and unnecessary, structural imbalances. The "unconditional war on poverty" cannot be held to compensate for these disadvantages - its funding is so limited that it cannot begin to deal with the historic disadvantages of the poor. This remains true even when the administrative and political necessity for a modest beginning is conceded.

Finally, there is the evidence of the future. We continue to deal with the problems of unemployment and poverty as though we could solve them once and for all: we ignore the fact that if the mechanisms of the industrial age are to be retained we will have to keep supply equal to demand not only this year and next but for ever. Today we have to absorb a $30 billion annual increase in production, this will rise to $40 billion by the end of the sixties, to $50 billion in the first half of the seventies and to $60 billion well before the end of the seventies. We would have to absorb a $150 billion annual increase in production by the end of the century. Even these figures are minimal for they make no allowance for a further rise in production which will result from the productivity increase due to cybernation.

Are we determined to absorb all the available material production whatever level this may reach? Or do we admit that there should be limits? Surely the sober contemplation of these figures must cause us to reject this quasi-reenactment of Huxley's Brave New World. If we are going to implement the concept of limits on production and consumption at some time in the future, we must examine the implications of this fact now, for it means that our children will grow up in a totally new era. We must make urgent efforts to understand the values and institutions which will be necessary in a world where incomes and jobs are not linked and where man can choose his interests freely.

The new society must be based on totally different mechanisms which will be effective in distributing rights to abundant resources. It is impossible to suggest their exact form but it is clear that one mechanism is essential. Every individual must be provided with an absolute constitutional right to an income adequate to allow him to live with dignity. No governmental agency, judicial body, or other organization whatsoever should have the power to suspend or limit any payments assured by this right.

A right to an income would be insufficient to guarantee human rights: society must also take an unlimited commitment to produce the conditions in which every individual can develop his full potential and, as a corollary, the individual must recognize that he bears the full responsibility for developing this potential. Acceptance of these commitments would make me highly optimistic for the long-run. I believe that we have so far only developed a small proportion of the potential of most human beings.

Absolute rights to enough resources to enable the individual to live with dignity and to allow the full development of the individual's capacities would allow him to develop his own pattern of meaningful activity. However, recognition of the validity of new patterns of meaningful activity would require a cybernation-age reinterpretation of the values of work and leisure. The nineteenth century concept of a man's life as a mere division between toil and respite from toil should be allowed to disappear along with the production-oriented factory organization which gave rise to such a curiously twisted version of the relationship between the individual and his society.

In the future, work will no longer be essentially a labor-payment to society but rather the full use of an individual's potential for the material benefit of his fellows and his own self-fulfillment. In the same way, leisure will no longer be time not spent in toiling but rather the full use of the individual's potential for the physical benefit of his fellows and his own recreation. The toiling machines which will produce the bulk of all goods and services need no income rights. Non-toiling men cannot now, and will not in the future, continue their creative process without a guaranteed income for their physical support and for their life-long process of education and training.

The long-run potential is immensely challenging. But we will never reach this desirable future state if we do not recognize that the upbringing and education of so much of the present population has limited their horizons so severely that they cannot benefit from the potential abundance which their own work has created. Society crippled these people in order to get them to produce efficiently. As their productive efforts are no longer required, society must not provide them with rights to adequate incomes but must also provide new types of activity which will give them a sense of satisfaction from their lives.

This can only be done through new types of organization. The provision of a guaranteed income sufficient to allow everybody to live with dignity will greatly simplify this necessary task, for workers will not have to be paid wages. We can anticipate the organization of what I have called "consentives," productive groups made up of individuals who come together on a voluntary basis. The goods produced by these consentives will not normally compete with the mass produced products available from cybernated firms: the consentive will produce the custom-designed goods which have been vanishing within the present economy.

**********

I spelled out the above thesis in my recent book Free Men and Free Markets. Since this time I have been assailed by liberals as, among other things, unrealistic. A couple of the milder comments by reviewers were: "Seldom have I encountered

a volume which is less closely affiliated to political and social reality" and "Suspended above the gravitational pull of the political world, it defies the ways of the workaday world like the Indian Rope trick."

The economists who made these remarks still accept the conventional view of political reality; it would appear that they are totally unaware of the underlying movements in the country. They do not understand that we cannot control rampant science and technology on the basis of an agricultural political system and an industrial economy. They have failed to see that the confused struggle by both conservatives and liberals to preserve a vanished world must inevitably result in a stalemate. Today, conservatives fear that the market is being hamstrung and the potential for complete government control is being installed. Liberals fear that the continuance of the laissez-faire tradition is allowing the activities of the large corporation to dominate the socio-economic system.

The conflict between the liberals and the conservatives means that Congress is incapable of dealing with the problems raised by science and technology at a time when effective decision-making is not only required by events but also demanded by social pressures. The civil rights groups which began their demands with a claim that they should be allowed to enter the existing socio-economic order are beginning to change their direction as they come to understand that economic policies designed for conditions of scarcity are no longer applicable when abundance exists, as it does in the United States. They are therefore beginning to understand that the sudden emergence of the era of abundance has made it impossible for today's underprivileged Negroes to become tomorrow's fully privileged and contributing citizens while any group of citizens remain mere spectators of the functioning economy and society.

The leaders of the civil rights groups have been demanding jobs as the way to improve the status of the Negro. They are now accepting that cybernation makes it impossible to provide enough jobs and it can therefore be expected that the groups they lead will turn to other avenues which may allow them to obtain a fair share of the nation's resources. Bayard Rustin, the Deputy Director of the March on Washington for Freedom and Jobs, has already stated that he anticipates that when it becomes clear that jobs cannot be provided, the Negroes will demand that totally new means be developed to provide them with incomes. He suggested that this evolution would take place in 1964.

The White power structure still fundamentally believes that the Negro demands can be contained without major change in the present system and without violence. This is politically, socially and psychologically naive; the Negroes will either receive their rights or they will fight for them. This latter alternative is unthinkable: the White power structure must therefore take steps to understand the deeply moral nature of the Negro demands and find ways to make rapid and meaningful progress. The members of the Civil Rights movement are actively seeking means to their own self-fulfillment and have expressed a willingness gladly to accept the full responsibilities of first-class citizenship not within the the present system but within the hoped-for America of the future where expressed ideals have become realities.

There is a crisis in the United States: its manifestations are unemployment, poverty and social unrest but its moving force is the thrust of technology as a total system which is remaking our socioeconomic system to fit its own needs and not our needs as human beings. It is conceivable that mankind will be destroyed as human beings by the dehumanizing impetus of oncoming technology. The thought that the United States is threatened by the final attainment of one of its most desired goals is repugnant to American thinking. However, many forces threaten to break loose during the sixties and have the potential to sweep us irresistably toward a type of society completely alien to our basic beliefs The outlines of the foreseeable future already cast their shadow on the present: we will need all the time we now have if we are to research and analyze the implications of abundance and make the necessary changes in our socio-economic system so that we can benefit from abundance rather than be destroyed by it.

The coming of abundance should liberate our ideas, hitherto painfully constricted by the necessity to economize scarce resources. In these circumstances, it is the practical man, pragmatically using recent historial evidence to argue for small adjustments to our present policies who is "unrealistic." The realistic observer has understood that there are, in effect, no limits to our present actions except those imposed by a failure of our imaginations and energy. Once we recognize the changed nature of the world in which we live, the required changes in our philosophy appear not only essential but also socially and morally desirable. I hope that our concern with the twin problems of unemployment and poverty at the start of 1964 mark the true beginnings of a drive toward the better and freer society which can be achieved within the Century not only in America but throughout the world.

FOR IMMEDIATE RELEASE

## WIN JOB DRIVE AT BANK

Boston, Mass., April 9--A fair employment campaign against the First National Bank of Boston, during which national CORE wrote all its Massachusetts contributors urging them to withdraw their accounts, ended with an agreement with Boston CORE.

The bank hired 17 Negroes within a three-week period, accepted a broad program for recruitment of minority group employees and agreed to increase the range of positions to be held by Negroes.

The bank is the third with which Boston CORE has negotiated an agreement. More than 200 Negroes have secured bank jobs in the past year as a result of the project.

###

## PHONE COMPANY AGREES ON FAIR EMPLOYMENT

Newark, N.J.--On the eve of a direct action campaign, the New Jersey Bell Telephone Co. and Newark-Essex CORE negotiated procedures for employment of non-whites in several job categories in the company's Essex Division.

Richard Proctor, Jr., chairman of the group's industrial relations committee, pointed out that while a substantial number of Negroes are hired as operators, there has been substantial discrimination in other job categories involving both men and women.

###

## HIRE FIRST NEGRO METER MAID

Des Moines, Ia.--This city will hire its first Negro meter maid on May 1 as a consequence of a campaign by Des Moines CORE which included letter-writing, appearances at City Council meetings and conferences with city officials. The new meter maid is Mrs. George Broadus. She had first applied for the job about a year ago.

KANSAS ANTI-DISCRIMINATION COMMISSION

State Office Bldg. Topeka, Kansas
Phone CE 5-0011, Ext. 8011

SURVEY: Employment Practices in Topeka, 1956

One of the responsibilities given the Commission by the Kansas Legislature is, "To study the existence, character, cause and extent of discrimination in the state..." Although severely limited by its budget in carying out this charge the Commission has completed extensive studies of employment practices in two cities in our state. The results of these studies indicate that much needs to be done to provide the same employment and training opportunities for Negro and Mexican-American citizens as exist for white citizens.

The information which follows concerns the Commission's study of Topeka and came from interviews with family heads of 364 families: 142 majority group (white) 112 Negro and 110 Mexican-American. In addition interviews were held with 69 employers, selected to provide a cross-section of the basic types of business in Topeka.

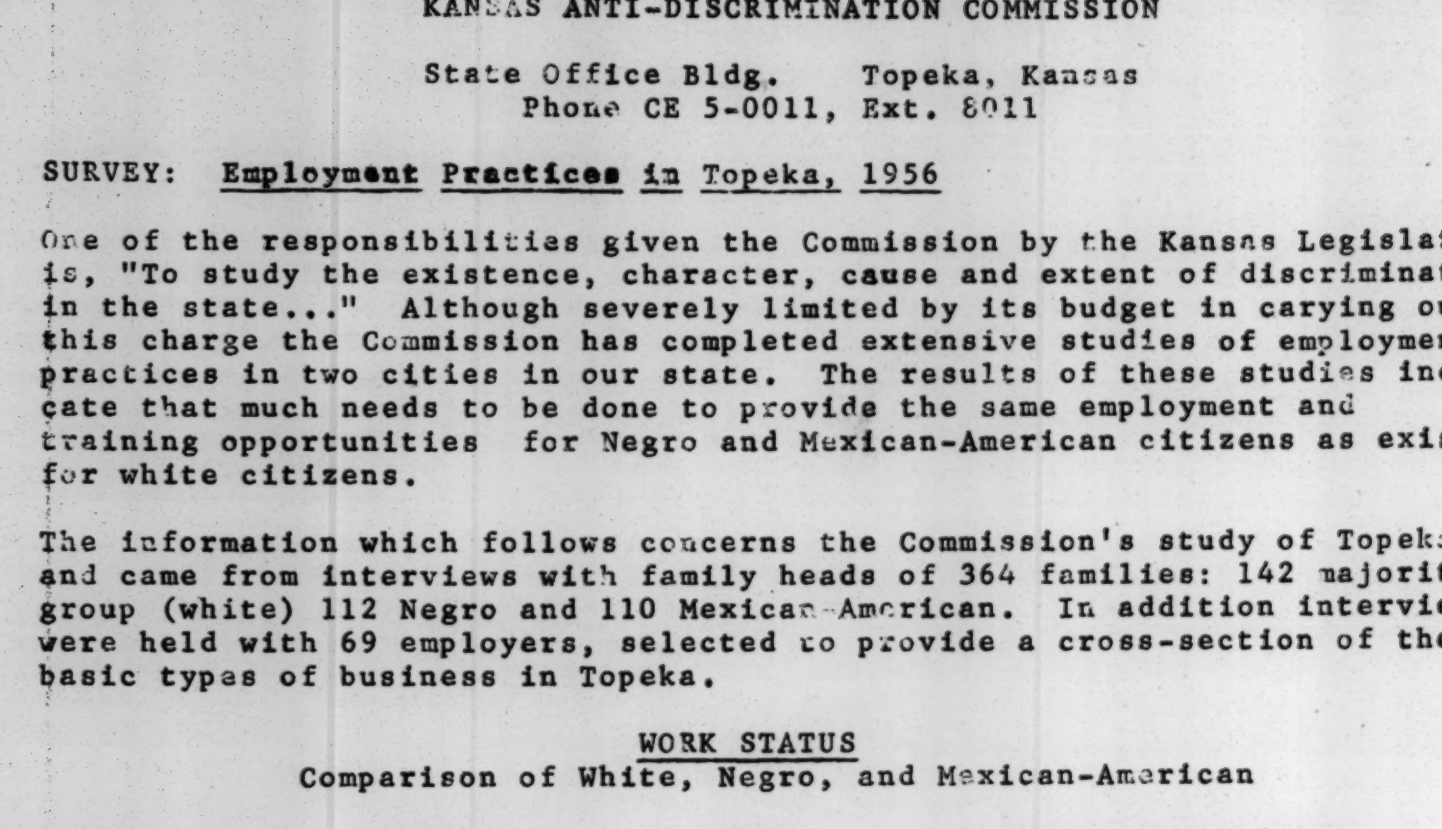
WORK STATUS I

Comparison of White, Negro, and Mexican-American

| Status | White No. | White % | Negro No. | Negro % | Mexican-American No. | Mexican-American % |
|---|---|---|---|---|---|---|
| Self-Employed | 18 | 13 | 7 | 6 | 1 | 1 |
| Wage-Earners | 106 | 75 | 84 | 75 | 103 | 93 |
| Unemployed | 5 | 3 | 10 | 9 | 4 | 4 |
| Retired | 11 | 8 | 10 | 9 | 2 | 2 |
| No Answer | 2 | 1 | 1 | 1 | - | - |
| Total | 142 | 100 | 112 | 100 | 110 | 100 |

WHAT KINDS OF JOBS DO NEGROES AND MEXICAN-AMERICANS IN TOPEKA HAVE? HOW DO THEY COMPARE WITH WHITES?

II



* Negroes employed in predominately Negro Institutions (church, school, YMCA)

There were no Negroes or Mexican-Americans in sales positions. Four times as many whites as Negroes and Mexican-Americans are in skilled positions.

HOW MUCH DO NEGROES AND MEXICAN-AMERICANS EARN? HOW DO THEIR EARNINGS COMPARE WITH THOSE OF WHITE WORKERS?

Over half of the white workers make over $80 a week while less than 1/5 of the Negroes and Mexican-Americans make over $80. The following table compares hourly earnings of the three groups. Hourly earnings are used because they represent basic rates of pay, uncomplicated by differences in number of hours worked.

| HOURLY PAY | White Percent | Negro Percent | III Mexican-American Percent |
|---|---|---|---|
| over $2.00 | 44 | 13 | 14 |
| 1.50 - 1.99 | 27 | 28 | *53 |
| 1.00 - 1.49 | 10 | 43 | 26 |
| Less than 1.00 | 6 | 14 | 7 |
| No Answer | **13 | 2 | 0 |

* Almost all Mexican-Americans interviewed worked for one employer and were employed under a union wage contract.

** The white workers who refused to give information about their wages were employed in professional and managerial occupations. It is reasonable to assume their hourly pay would be over $2.00 an hour.

As the table reveals, 44% of the white workers earn over $2.00 an hour as compared to only 13% of the Negro workers and 14% of the Mexican-American workers. Almost half of the Negroes earn less than $1.50 an hour, while only 1/10 of the white workers have similar earnings.

HOW MUCH EDUCATION HAVE NEGOES IN TOPEKA HAD? HOW DOES THIS COMPARE WITH THE EDUCATION OF WHITE WORKERS?

| EDUCATION | White Percent | Negro Percent | IV Mexican-American Percent |
|---|---|---|---|
| Some College | 20 | 20 | 3 |
| H.S. Completed | 31 | 25 | 10 |
| H.S. Incomplete | 20 | 22 | 18 |
| Elementary Only | 28 | 33 | 56 |
| No Schooling | 1 | 0 | 13 |

It is significant to note that in Topeka there is not much difference in the amount of formal education of Negro and white worker. 31% of the white workers and 25% of the Negro workers have completed high school. The same percentage (20%) have had some education beyond high school. The Mexican-Americans have less formal education than Negroes or whites.

Since education is considered an important factor in determining an individual's earning ability it is interesting to compare the amout of education of the Negro and white workers with the jobs they hold, as shown in Chart II. Of the jobs shown in Chart II, it is reasonable to assume that semi-skilled and unskilled labor and service occupations are the ones which require least education, and which would likely be filled by persons who have had only grammar school education.

81% of the Negroes are in these jobs, although only 33% of the Negroes have less than some high school education. On the other hand only 24% of the white workers are in such jobs, yet 29% have not gone beyond grammar school. From this it would appear that the types of jobs Negroes have is not entirely a result of their education, More Negroes, than would be expected on the basis of education, and fewer whites, than would be expected on the basis of education, are in relatively low skilled jobs. In other words, the Negro in Topeka, disregarding his education, finds most of his employment opportunity in the less skilled, lower paying and menial occupations.

We also found out what the minority group members think about their chances of employment in Topeka firms. This is important since these impressions, whether accurate or not, influence the types of jobs for which Negroes and Mexican-Americans prepare themselves and apply.

"DO YOU THINK THERE ARE SOME TYPES OF JOBS IN TOPEKA THAT NEGROES (MEXICAN-AMERICANS) CAN'T GET, EVEN THOUGH THEY ARE QUALIFIED?"

V

| | Negro | | Mexican-American | |
|---|---|---|---|---|
| | No. | % | No. | % |
| Believe some jobs closed to their group | 106 | 95 | 84 | 76 |
| Believe jobs filled on basis of merit | 6 | 5 | 16 | 15 |
| Don't know | 0 | 0 | 10 | 9 |
| No Answer | 0 | 0 | 0 | 0 |
| Total | 112 | 100 | 110 | 100 |

A very large percentage of both minority group members said they believed there were firms in Topeka which did not hire Negroes and Mexican-Americans for jobs for which they are qualified. Two firms in particular were mentioned with greater frequency than all other firms combined! This widespread belief on the part of minority group members that they will not be hired for certain jobs is perhaps one important reason why, as employers reported, few Negroes and Mexican-Americans have applied for clerical and white collar jobs.

More information is available on the Topeka survey, but enough has been given to indicate that Negroes and Mexican-Americans do not have equality of employment opportunity in our Capital city. This presents a real challenge to the Anti-Discrimination Commission, Employers, and labor unions to see that the State's non-discrimination policy is complied with and that every qualified worker is given an equal chance for a job, regardless of the color of his skin.

# OF THE

# KANSAS COMMISSION ON CIVIL RIGHTS

COPIES OF THESE RULES AND REGULATIONS GOVERNING THE PROCEDURES OF THE KANSAS COMMISSION ON CIVIL RIGHTS ARE AVAILABLE UPON REQUEST TO THE COMMISSION'S OFFICE. BECAUSE OF COST, THE COMMISSION ASKES THAT EMPLOYERS AND ORGANIZATIONS HAVING A BONAFIDE NEED FOR ADDITIONAL COPIES OF THESE RULES AND REGULATIONS MAKE A VERY CAREFUL ESTIMATE OF THEIR NEED TO ASSIST THE COMMISSION TO AVOID WASTE IN THE DISTRIBUTION OF THIS ITEM.

STATE OF KANSAS

COMMISSION ON CIVIL RIGHTS

Pursuant to Section 4, subsection 3, of Chapter 248 of 1961 Sessions Laws, entitled Kansas Act Against Discrimination, effective July 1, 1961, the Commission on Civil Rights hereby rescinds the previous Rules and Procedures of the Kansas Anti-Discrimination Commission (Rules 21-1 through 21-4 inclusive) heretofore established, adopted and promulgated and establishes, adopts and promulgates the annexed Rules and Regulations to carry out the provisions of this Act, and the policies and practices of the Commission in connection therewith.

THIS ORDER shall become effective on December 8, 1961

Date December 5, 1961 Signed Howard A. Brown

Chairman, Commission on Civil Rights

Filed in the office of the Kansas Revisor of Statutes

on this 8th day of December, 1961.

Signed Franklin Corrick

Kansas Revisor of Statutes

STATE OF KANSAS

COMMISSION ON CIVIL RIGHTS

ARTICLE I DEFINITIONS

21-1-1 to 21-1-10 (Authorized by Chapter 44, Article 10, 1953 Supplement to the General Statutes. Compiled August 15, 1955.) Revoked December 8, 1961.

ARTICLE II COMPLAINTS

21-2-1 to 21-2-4 (Authorized by Chapter 44, Article 10, 1953 Supplement to the General Statutes. Compiled August 15, 1955.) Revoked December 8, 1961.

ARTICLE III PROCEDURE

21-3-1 to 21-3-4 (Authorized by Chapter 44, Article 10, 1953 Supplement to the General Statutes. Compiled August 15, 1955.) Revoked December 8, 1961.

ARTICLE IV AMENDMENTS

21-4-1 (Authorized by Chapter 44, Article 10, 1953 Supplement to the General Statutes. Compiled August 15, 1955.) Revoked December 8, 1961.

KANSAS COMMISSION ON CIVIL RIGHTS

Rules and Regulations

The following rules and regulations shall constitute the practice and procedure and shall govern all parties in cases before the Commission on Civil Rights.

## ARTICLE V

## DEFINITIONS

When used in these Rules and Regulations:

21-5-1 The term "person" includes one or more individuals, partnerships, associations, organizations, corporations, legal representatives, trustees, trustees in bankruptcy, or receivers. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-2 The term "employer" includes any person in this state employing eight (8) or more persons, and any person acting directly or indirectly for an employer as herein defined, and labor organizations, nonsectarian corporations, and organizations engaged in social service work, and the state of Kansas and all political and municipal subdivisions thereof including school districts and educational institutions, but shall not include a nonprofit religious, charitable, fraternal, social, educational, or sectarian association or corporation. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-3 The term "employee" does not include any individual employed by his parents, spouse, or child, or in the domestic service of any person. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-4 The term "labor organization" includes any organization which exists for the purpose, in whole or in part, of collective bargaining or of dealing with employers concerning grievances, terms or conditions of employment, or of other mutual aid or protection in relation to employment. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-5 The term "employment agency" includes any person or governmental agency undertaking with or without compensation to procure opportunities to work, or to procure, recruit, refer, or place employees. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-6 The term "commission" shall mean the Commission on Civil Rights created and amended by this act. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-7 The term "unlawful employment practices" includes only those unlawful practices and acts specified in section 5 of this act, and includes segregate or separate. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-8 The term "Commissioner" shall mean one of the duly appointed members of the Commission on Civil Rights. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-9 The term "Chairman" shall mean the chairman of the Commission on Civil Rights duly designated by the Governor pursuant to Section 3 of this Act, or, in the event of his absence, the Acting Chairman designated by the remaining members of the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-10 The term "Investigating Commissioner" shall mean the Commissioner duly designated by the Commission to make investigation of a verified complaint filed with this Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-11 The term "Hearing Commissioners" shall mean the Commissioners designated by the Chairman to conduct a hearing. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-12 The term "Commission's Attorney" shall mean the attorney appointed by the Commission to assist it to carry out the provisions of this Act, subject to approval by the Attorney General. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-13 The term "Executive Director" shall mean the Executive Director employed by the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-14 The term "complaint" shall mean a written statement made under oath and filed with the Commission alleging an unlawful employment practice within the meaning of this Act. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-15 The term "complainant" shall mean any person filing a complaint with the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-16 The term "respondent" shall mean any person against whom a complaint has been filed alleging an unlawful employment practice within the meaning of this Act. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-17 The term "party" or "parties" shall mean the complainant and/or the respondent. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-5-18 The term "Act" shall mean the Kansas Act Against Discrimination. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE VI

## COMPLAINTS

21-6-1 WHO MAY FILE:

a. Any person claiming to be aggrieved by an alleged unlawful employment practice may, by himself or by his attorney-at-law, make, sign, and file with the Commission a verified complaint in writing. Assistance in drafting and filing complaints shall be available to complainants at the Commission offices or through the Commission and its professional staff.

b. The Attorney General may, in like manner, make, sign, and file such complaint.

c. Any employer whose employees, or some of whom, refuse or threaten to refuse to cooperate with the provisions of this Act, may file with the commission a verified complaint asking for assistance by conciliation or other remedial action.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-6-2 FORM:
The complaint shall be in writing, the original and four copies being signed by the complainant and verified before a notary public or other person duly authorized by law to administer oaths and take acknowledgements. The complaint, where feasible, shall be on forms prepared by the Commission, blanks of which shall be supplied by the Commission upon request. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-6-3 CONTENTS:
A complaint shall contain the following:

a. The full name and address of the complainant.
b. The full name and address of the respondent.
c. The alleged unlawful employment practice and a statement of the particulars thereof.
d. The date or dates of the alleged unlawful employment practice, and if the alleged unlawful employment practice is of a continuing nature, the dates between which said continuing acts of discrimination are alleged to have occurred.
e. A statement as to any other action instituted in any other forum based on the same grievance as is alleged in the complaint, together with a statement as to the status or disposition of such other action.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-6-4 PLACE OF FILING:
A complaint shall be filed with the Commission at its office in Topeka. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-6-5 TIME OF FILING:
The complaint must be filed within six (6) months after the date of the occurrence of the alleged

unlawful employment practice. If the alleged unlawful employment practice is of a continuing nature, the date of the occurrence of said unlawful employment practice shall be deemed to be any date subsequent to the commencement of the unlawful employment practice up to and including the date upon which the unlawful employment practice shall have ceased. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-6-6 MANNER OF FILING:
The complaint may be filed by personal delivery, ordinary mail, or registered mail, addressed to the Commission's office. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-6-7 COMPLAINT FORMS:
Complaint forms may be obtained at the office of the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-6-8 AMENDMENT:
The Commission or the complainant shall have the power reasonably and fairly to amend the complaint as a matter of right at any time before hearing thereon, and thereafter at the discretion of the Hearing Commissioners. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec.4; effective December 8, 1961.)

21-6-9 WITHDRAWAL:
A complaint may be withdrawn at any time by the complainant. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE VII

## INVESTIGATION AND CONCILIATION

21-7-1 INVESTIGATION:
After the filing of a complaint the Chairman shall designate one of the Commissioners as Investigating Commissioner to make, with the assistance of the Executive Director and the Commission's staff, a prompt investigation of the allegations of the complaint. (Authorized by G.S. 1959 Supp., 44-1044, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-7-2 DISMISSAL:

a. If after investigation of the complaint the Investigating Commissioner as assisted by the Executive Director and the Commission's staff, determines no probable cause exists to credit the allegations of the complaint, he shall, within ten (10) days from such determination, cause to be served upon the complainant written notice of such determination and dismissal of the complaint.

b. The respondent, likewise, shall be served a written notice of such determination and dismissal of the complaint.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-7-3 CONFERENCE AND CONCILIATION:

a. If the Investigating Commissioner finds that probable cause exists for crediting the allegations of the complaint, he shall, assisted by the Executive Director and the Commission's staff, immediately endeavor to eliminate the unlawful employment practice by conference and conciliation.

b. Before commencing such conference and conciliation, the Investigating Commissioner shall instruct the Executive Director to enter into the record of the case progress a statement that formal conference and conciliation procedures are to be commenced based on the finding of probable cause.

c. The members of the Commission and its staff shall not disclose what has transpired in the course of such endeavors at conference and conciliation.

d. If the Investigating Commissioner, assisted by the Executive Director and the Commission's staff, shall succeed in endeavors under conference and conciliation, the case shall be closed as a satisfactory adjustment and the parties shall be notified by registered mail, return receipt requested of the terms of the adjustment.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE VIII

## NOTICE OF HEARING

21-8-1 WHEN HEARING ORDERED:
In case of failure to eliminate the unlawful employment practice by conference and conciliation, or in advance thereof, if in the judgement of the Investigating Commissioner or the Commission circumstances so warrant, the Investigating Commissioner or the Commission shall cause to be issued and served in the name of the Commission a written notice of hearing, together with a copy of the verified complaint, as the same may have amended. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-8-2 NOTICE OF HEARING:

a. The written notice of hearing shall state the time and place of hearing which shall be not less than ten (10) days after the service of such notice, and shall require the respondent to answer the charges of such complaint at this hearing. The notice shall inform the respondent that he may file written answer to the complaint and that a failure to answer shall be deemed an admission of the allegations of the complaint. The notice of hearing and verified copy of the complaint, as the same may have been amended, shall be served by registered mail, return receipt requested, or by personal service on all parties. If an attorney has previously appeared on behalf of a party, a copy of the notice of hearing and complaint, as the same may have been amended, shall be furnished to said attorney.

b. The place of such hearing shall be in the county where respondent is doing business and the acts complained of occurred.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE IX

## ANSWER

21-9-1 TIME OF FILING:
The respondent against whom a verified complaint, as the same may have been amended, is filed and on

whom a notice of hearing and a copy of such complaint has been served, may file a written verified answer in person or through an attorney-at-law within ten (10) days from the service of such complaint and notice of hearing. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-2 PLACE AND MANNER OF FILING:
The answer must be filed in triplicate at the office of the Commission. The filing shall be by personal delivery or by registered mail, return receipt requested. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-3 EXTENSION OF TIME FOR FILING:
Upon application the Chairman may for good cause shown extend the time within which the answer may be filed. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-4 FORM OF ANSWER:
The answer shall contain a general or specific denial of each and every allegation of the complaint controverted by the respondent or a denial of any knowledge or information thereof sufficient to form a belief and a statement of any matter constituting a defense. The answer shall contain the post office address of the respondent, and if he is represented by an attorney, the name and post office address of said attorney. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-5 FAILURE TO DENY OR ADMIT:
Any allegation in the complaint which is not denied or admitted in the answer, unless the respondent shall state in the answer that he is without knowledge or information sufficient to form a belief, shall be deemed admitted. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-6 AMENDMENT OF ANSWER:
The answer or any part thereof may be amended as a matter of right at any time before the first hearing and thereafter in the discretion of the Hearing Commissioners on application duly made therefor. An original with two copies of the amended answer shall be filed with the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-7 AMENDMENT OF ANSWER UPON AMENDMENT OF COMPLAINT: In any case where a complaint has been amended, the respondent shall have an opportunity to amend his answer within such period as may be fixed by the Hearing Commissioners, and the hearing shall be postponed to a date at least 15 days after the filing of such amended complaint. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-8 SERVICE OF ANSWER: The Commission shall, within 10 days after the date of the filing of an answer or amended answer, but in any case not less than 3 days before the date set for hearing, serve a copy of such answer or amended answer on the complainant at his last known address. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-9 FAILURE TO FILE ANSWER: The Hearing Commissioners may proceed, notwithstanding any failure of the respondent to file an answer within the time provided herein, to hold a hearing at the time and place specified in the notice of hearing and may make its findings of fact and enter its order upon the testimony taken at the hearing. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-9-10 OPENING OF DEFAULT: Upon application the Chairman may for good cause shown open a default in answering. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE X

## HEARINGS

21-10-1 APPEARANCES:

a. The complainant shall appear at the hearing in person, with or without counsel, and submit testimony.

b. The respondent may appear at the hearing in person or by counsel and may submit oral testimony and other evidence.

c. In the discretion of the Hearing Commissioner, any other person may be allowed to intervene, in person or by counsel, for such purposes and to such extent as the Hearing Commissioners shall determine. Provided such person makes application to intervene at least ten (10) days before the hearing.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-2 WHO SHALL CONDUCT:

a. Hearings shall be conducted by three Commissioners designated by the Chairman, one of whom shall be designated as presiding member by the Chairman.

b. The Investigating Commissioner shall not be designated as Hearing Commissioner, and shall not participate in the hearing except as a witness, nor shall he participate in the deliberations of the Commission in such case.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8. 1961.)

21-10-3 PLACE OF HEARING:

Hearings shall be held in the county where respondent is doing business and where the acts complained of occurred at a place designated by the Chairman of the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-4 PROCEDURE OF HEARING:

a. The case in support of the complaint shall be presented before the Commission by one of its attorneys or agents, or by private counsel, if any, of the complainant.

b. The Commission shall be bound by the rules of evidence prevailing in courts of law or equity, and only relevant evidence of reasonable probative value shall be received. Reasonable examination and cross-examination shall be permitted.

c. The Hearing Commissioners shall have full authority to control the procedure of the hearing, to admit or exclude testimony or other evidence, and to rule upon all motions and objections.

d. All rulings and determinations of the Hearing Commissioners shall be by majority rule.

e. The Hearing Commissioners may call and examine witnesses, direct the production of papers or other matter present in the hearing room, and introduce documentary or other evidence.

f. All testimony taken at the hearing shall be under oath and be transcribed and filed with the Commission.

g. No testimony or evidence shall be given or received at any hearing concerning endeavors at conciliation.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-5 STIPULATIONS:
Written stipulations may be introduced in evidence, if signed by the persons sought to be bound thereby, or by their attorneys. Oral stipulations may be made on the record at open hearings. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-6 CONTINUATION AND ADJOURNMENTS:
The Hearing Commissioners may continue a hearing from day to day or adjourn it to a later date or to a different place by announcement thereof at the hearing or by appropriate notice to all parties. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-7 MOTIONS AND OBJECTIONS:
Motions made during a hearing and objections with respect to the conduct of a hearing, including objections to the introduction of evidence, shall be stated orally and shall be included in the stenographic report of the hearings. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-8 ORAL ARGUMENTS AND BRIEFS:
The Hearing Commissioners shall permit the parties to submit oral arguments before them and to file briefs within such time limits as the Hearing Commissioners may determine. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-9 IMPROPER CONDUCT:
The Hearing Commissioners may exclude from the hearing room or from further participation in the proceedings any person who engages in improper conduct before them. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-10 RIGHTS OF PARTIES AT HEARINGS:
All parties to a hearing may call, examine and cross examine witnesses and introduce papers, documents or other evidence into the record of the proceedings, subject to the ruling of the Hearing Commissioners. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-10-11 PUBLIC HEARINGS:
Hearings shall be public. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XI

## WRITTEN TRANSCRIPT OF THE RECORD

21-11-1 The written transcript of the record of the proceedings before the Commission shall consist of the complaint and the amended complaint, if any, notices of hearing, written applications, stipulations, motions, orders, stenographic transcript of the record on the hearing, exhibits, depositions, motion for re-hearing, the final order, and along with the final order any modifications thereof. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XII

## DEPOSITIONS

21-12-1 The Commission or any member thereof on its or his own motion or on the application of one of the parties, shall, whenever necessary, and on such terms and conditions as it or he may determine, take or cause to be taken depositions of witnesses residing within or without the state. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XIII

## ORDERS

21-13-1 CONTENTS OF ORDER:
An order of the Commission issued after a hearing

shall set forth the findings of fact of the Hearing Commissioners, their decision, and, in their discretion, an opinion containing the reasons for said decision. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-13-2 ISSUANCE OF ORDERS:
If, upon all the evidence in the hearing, the Commission shall find a respondent has engaged in or is engaging in any unlawful employment practice as defined in this Act, the Commission shall state its findings of fact and shall issue and cause to be served on such respondent an order requiring such respondent to cease and desist from such unlawful employment practice and to take such affirmative or other action, including the hiring, reinstatement with or without back pay, or upgrading of employees, admission or restoration to membership in any respondent labor organization, as, in the judgement of the Commission, will effectuate the purposes of this Act, and including a requirement for report of the manner of compliance. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-13-3 ISSUANCE OF DISMISSAL:
If, upon all the evidence, the Commission shall find that a respondent has not engaged in any such unlawful employment practice, the Commission shall state its findings of fact and shall issue and cause to be served on the complainant an order dismissing the said complaint as to such respondent. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-13-4 DECISIONS BY HEARING COMMISSIONERS:
The decisions of the Hearing Commissioners shall be by majority vote. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-13-5 SERVICE OF ORDERS:
a. Copies of orders shall be delivered in all cases by the Commission to the complainant, respondent, Attorney General, and to such other public officers as the Commission may deem proper.
b. Copies of orders shall be sent registered mail, return receipt requested, accompanied by a notice of the statutory right to judicial review.
(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-13-6 FILING OF ORDERS:
All orders rendered after a hearing shall be filed at the office of the Commission and shall be open to public inspection during regular office hours of the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec.4; effective December 8, 1961.)

## ARTICLE XIV

## REHEARING

21-14-1 Any party being dissatisfied with any order or decision of the Commission may, within ten (10) days from the date of the service of such order or decision, apply for a rehearing in respect to any matter determined therein; the application shall be granted or denied by the Commission within ten (10) days from the date same shall be filed, and if the rehearing be not granted within ten (10) days it shall be taken as denied. If a rehearing be granted the matter shall be determined by the Commission within thirty (30) days after the same shall be submitted. No cause of action arising out of any order or decision of the Commission shall accrue in any court to any party unless such party shall make application for a rehearing as herein provided. Such application shall set forth specifically the ground or grounds on which the applicant considers such order or decision to be unlawful or unreasonable. No party shall, in any court, urge or rely upon any ground not set forth in said application. An order made after a rehearing abrogating, changing or modifying the original order or decision shall have the same force and effect as an original order or decision. Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XV

## CERTIFICATION

21-15-1 The Chairman or such other person as may be designated by the Commission is authorized to certify all documents or records which are a part of the files and records of the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XVI

## ENFORCEMENT AND JUDICIAL REVIEW

21-16-1 WHO MAY APPLY:

a. The Attorney General or County Attorney, at the request of the Commission, may secure enforcement of the order of the Commission by the district court of the county where the unlawful employment practice shall have occurred or where any person required in the order to cease and desist from an unlawful employment practice or to take any affirmative action resides or transacts business, through mandamus or injunction in appropriate cases, or by action to compel the specific performance of the order.

b. The Attorney General, County Attorney or any person aggrieved by an order made by the Commission may obtain judicial review thereof in the said court by filing with the clerk of said court within thirty (30) days from the date of service of the order, a written appeal praying that such order be modified or set aside.

(Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-16-2 COPY OF TESTIMONY AVAILABLE TO PARTIES:
The Commission's copy of the testimony shall be available at all reasonable times to all parties for examination without cost, and for the purpose of enforcement or judicial review of the order. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-16-3 PROCEDURE:
The procedure on appeal from an order of the Commission shall be in accordance with that spelled out in Section 8 of this Act. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-16-4 FINAL APPEAL:
The jurisdiction of the district court of the proper county as aforesaid shall be exclusive and its final order or decree shall be subject to review by the supreme court as in other cases upon appeal within thirty (30) days of the filing of such decision. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XVII

## AMENDMENT OF REGULATIONS

21-17-1 New rules and regulations may be adopted and any rule or regulation may be amended or rescinded by the Commission at a regular or special meeting, provided that at least a quorum of 3 Commissioners are present and notice of the proposed adoption, amendment or rescission has been given to all members of the Commission at least 72 hours before the meeting at which action is to be taken. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XVIII

## AVAILABILITY OF REGULATIONS

21-18-1 The rules and regulations of the Commission shall be available to the public at the office of the Commission and upon request. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

21-18-2 The rules and regulations of the Commission are filed pursuant to law with the Kansas Revisor of Statutes. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

## ARTICLE XIX

## CONSTRUCTION

21-19-1 These rules and regulations shall be liberally construed to accomplish the purposes of the Act and the policies of the Commission. (Authorized by G.S. 1959 Supp., 44-1004, as amended by L 1961, Ch. 248, Sec. 4; effective December 8, 1961.)

ANTI-DISCRIMINATION COMMISSION

STATE OFFICE BUILDING TOPEKA, KANSAS
PHONE CE 5-0011, Ext. 5011

June 30, 1961

The Honorable John Anderson, Jr., Governor,
and Honorable Members of the Kansas Legislature,
State of Kansas.

Sirs:

In accordance with Article 10, Chapter 44 of the 1953 Supplement to the General Statutes, we have the distinct honor to submit the following report of the activities, accomplishments and recommendations of the Kansas Anti-Discrimination Commission from July 1, 1960 to June 30, 1961.

Respectfully,

Chairman

Commissioner

Commissioner

Commissioner

Commissioner

## COMMISSION MEMBERS

| | Term expires |
|---|---|
| Mr. Leonard H. Strauss, *Chairman*<br>Kansas City | July 10, 1961 |

## STAFF

| | |
|---|---|
| Mr. Carl W. Glatt | Executive Director * |
| Mr. Ernest Russell | Educational Director |
| Mr. Homer C. Floyd<br>(Appointment July 1, 1961) | Field Representative |
| Mrs. Norma Jean Hodison | Secretary |
| Miss Donice I. Fajen<br>(Appointment July 1, 1961) | Stenographer |

* Title change July 1, 1961.

## PURPOSE OF THE COMMISSION

Section 1 of the Kansas Act Against Discrimination (Chapter 44, Article 10, 1953 Supplement to the General Statutes) declared it to be the public policy of the state of Kansas to eliminate discrimination in all employment relations. It further declared that the opportunity to secure and to hold employment without discrimination because of race, religion, color, national origin or ancestry is a civil right. To protect this right the law provided for the establishment of the Kansas Anti-Discrimination Commission.

Basically the Commission's job is to help the state effectuate its policy against employment discrimination. To accomplish this objective the Commission undertakes two major duties:

*a.* To develop a broad range educational program designed to prevent and eliminate discrimination in employment against persons because of race, color, religion or national origin.

*b.* To receive, investigate and resolve complaints alleging discrimination in employment against persons because of race, color, religion or national origin.

## COMMISSION AND STAFF

The Commission is composed of five members, appointed by the Governor, representing employers, labor, and the general public. It is inter-racial and nonpartisan. The Commissioners serve without pay.

The staff in fiscal year 1961 consisted of Mr. Carl W. Glatt, Executive Secretary, Mr. Ernest Russell, Educational Director, and Mrs. Norma J. Hodison, Secretary. The 1961 legislature expanded the staff to include Mr. Homer C. Floyd, Field Representative, and Miss Donice I. Fajen, Stenographer. The title of Executive Secretary was changed to Executive Director, with Mr. Glatt continuing in that position.

## COMMISSION'S BUDGET

Budget appropriations for fiscal year 1961 provided $33,093 for Commission operations of which $30,134 was spent for actual operations. The largest item accounting for the unexpended funds was the failure of the Commission to obtain an outside resource to conduct a survey of employment practices for which $2,000 had been appropriated to the 1961 budget. None of the colleges or universities in industrial areas which the Commission contacted were available to undertake such a research project, so the funds

allocated for this purpose were returned to the state as unexpended balances. The additional unexpended funds resulted when actual travel on Commission business for the Executive Secretary did not reach original estimates because more of that official's time had to be spent on administrative office duties. Some of the educational program had to be curtailed for similar reasons and the Commission returned monies not spent for these purposes as unexpended balances.

For fiscal year 1962, the legislature appropriated $47,033 to provide for the additional staff and the increased operating responsibilities under the 1961 Kansas Act Against Discrimination.

## LEGISLATION

Concurrent Resolution No. 25 in the 1959 Kansas Legislature called upon the Research Department of the Kansas Legislative Council to conduct a study of discrimination in employment, public accommodations, and housing, and to study also the effectiveness and needs of the Kansas Anti-Discrimination Commission. On November 7, 1960, as part of this study concerned with Proposal No. 7—Civil Rights, Chairman Charles S. Arthur and Senator Laurin W. Jones of the Committee on Federal, State, and Local Government reported the results of their study trip to the Twelfth Annual Conference of Commissions Against Discrimination at North Falmouth, Massachusetts, on June 12, 1960. Chairman Arthur and Senator Jones reported also of their visits with industrialists and the state anti-discrimination commissions in Connecticut, Massachusetts, New Jersey, New York and Rhode Island. The "Arthur Report" recommended enforceable fair employment legislation for Kansas as being necessary if the state government hoped to eliminate discrimination in all employment relationships based on race, religion, color, national origin and ancestry.

House bill No. 243 was the outcome of Proposal No. 7—Civil Rights. It had the backing of Governor John Anderson, Jr., and was supported in hearings before the House Committee on State Affairs by representatives from twelve civic and religious organizations. The bill had supporters among the thirty organizations affiliated with the Kansas Conference on Civil Rights which has sponsored and supported progress in civil rights at the three annual Kansas Conferences on Civil Rights. House bill No. 243 passed the House with a vote of 104 to 1, and after amendments by the Senate Committee on Federal and State Affairs it passed in the Senate 34 to 0.

The 1961 Kansas Act Against Discrimination, effective July 1, 1961, is an enforceable fair employment practices law applying to employers of eight or more persons, employment agencies, labor unions, and the state of Kansas and all political and municipal subdivisions thereof. It fulfills the recommendations of the Commission as presented in the 1960 Annual Report by providing:

*a.* A clause protecting a complainant, or any witness relative to a complaint, from reprisal,

*b.* The power to hold public hearings when conciliation efforts have failed and to issue cease and desist orders with court enforcement and judicial review provided by the Act,

*c.* For additional professional and office staff to administer the Commission's increased responsibilities under the new Act.

The Commission's name was changed, as it had recommended, to the Kansas Commission on Civil Rights, and school districts and educational institutions were no longer excepted from the jurisdiction of the Act. The legislature did not grant subpoena powers to the Commission but this may not necessarily be a handicap because in any court enforcement proceedings the court itself would very likely subpoena records necessary to its determination of the facts of the matter.

## EDUCATIONAL PROGRAM

The Commission's educational program is the most important part of its work. From July 1, 1960, to June 30, 1961, the Executive Secretary and the Educational Director served as principal speakers or panelists at ninety-nine engagements attended by 5,761 persons throughout the state of Kansas. The Executive Secretary demonstrated the "Rotating Trapezoid" on an additional twenty-nine engagements before 1,855 persons. These two professional staff members served a total of seventy-five times as consultants or as participants on human relations programs or to organizations and individuals interested in promoting good human relations in Kansas. During the 1961 Legislative session, the Executive Secretary was on call and did confer with legislators on many occasions to answer questions concerning the proposed fair employment legislation.

Commission educational films were supplied at no charge for the programs of eighty-nine groups and were seen by 4,210 persons. Two films, "The New Girl" and "The Burden of Truth" were utilized most often (30 and 19 times, respectively), but a new film, "A Morning for Jimmy," purchased in the spring of 1961 was

utilized 22 times and seen by 1,229 persons and seems likely to prove the most popular and valuable of the human relations films available from the Commission. Through the courtesy of and as a service to the public by KAKE-TV, Wichita, KTVC-TV, Ensign, and KAYS-TV, Hays, "The New Girl" was seen by a large television audience at prime viewing time in western and mid-western Kansas.

The above speaking, consultant, and film services were rendered to organizations grouped as follows:

| | Speaker-consultant services and "Rotating Trapezoid" | Films |
|---|---|---|
| Human relations groups | 85 | 25 |
| Church groups | 39 | 36 |
| Schools and colleges | 23 | 15 |
| Business, labor and civic groups | 56 | 13 |
| | 203 | 89 |

The Outdoor Advertising Association of Kansas displayed the Commission's human relations billboard poster at 150 locations throughout the state, making the space available as a public service at no charge to the Commission. The Commission had hoped to repeat this poster campaign in fiscal year 1962 but its entire budget request was not granted and this educational-public relations item will have to be curtailed.

Educational Director Ernest Russell arranged for a sequence of four human relations car cards bearing the Commission's message and address to be displayed in 350 busses in Junction City, Kansas City, Lawrence, Leavenworth, Salina, Topeka, Wichita, and Winfield. It was planned to continue this valuable car card educational campaign but the organization which supplied these cards at cost, the Institute for American Democracy, no longer will produce the car cards and the Commission may have to forego this program because of the high cost of obtaining cards from other sources.

Commission spot announcements with human relations messages were supplied to and were utilized by 67 Kansas radio and television stations as a service to the public. The Commission plans to continue these spot announcements on radio and on television during the coming year. The Executive Secretary appeared on a formal program with Dr. Harry Levinson of the Menninger Foun-

dation on WIBW, Topeka, and on several occasions during the legislative sessions he commented briefly for radio and television on the merits of the proposed fair employment legislation.

Commission distribution of human relations material continued to be another major factor of its educational program. Five thousand copies of its annual report "1960 Report of Progress" were distributed. One pamphlet prepared by the Commission, the speech of Martha Douglas at the Second Annual Kansas Conference on Civil Rights entitled "A Positive Program for Merit Employment," had a distribution of 5,000 with requests continuing to be received for this very worthwhile educational item. In addition, the Commission purchased and distributed materials originating from other human relations resources, most significant of which were "The Gentle People of Prejudice," "Who Chooses the People You Know?," "Prejudice: Effects on Children," and "Prejudice and Society." All materials are free and available to organizations and individuals upon request. The bi-monthly newsletter, *The Reflector*, has been so well received that its mailing list has expanded from 2,500 to 4,000 in the past year. Requests for additional copies and to be put on the mailing list for *The Reflector* continue at a regular rate to indicate this little paper and the work of the Commission is appreciated.

Educational Director Ernest Russell attended the Annual Conference of the National Association of Intergroup Relations Officials at Cincinnati in November, 1960, and the Executive Secretary represented the Commission at the Thirteenth Annual Conference of Commissions Against Discrimination at St. Clair, Michigan, in June, 1961. The purpose of these attendances was to keep the Kansas Commission and its staff informed of the latest developments in the field of civil rights. New knowledge and techniques obtained from these conferences will prove helpful to the Commission's educational and compliance program.

The Commission's Executive Secretary served as Conference Chairman in again organizing the Third Annual Kansas Conference on Civil Rights which 150 persons attended on May 13, 1961, at Kansas State University, Manhattan, Kansas. The Conference theme, "Co-operation: Key to Fair Employment," was topical in the light of the passage of the 1961 Kansas Act Against Discrimination, and the Executive Secretary, pinch-hitting for Mrs. Mildred H. Mahoney, Chairman of the Massachusetts Commission Against Discrimination who was unable to attend due to illness in the family, did a creditable job in describing the new law and how it would

work through co-operation from employers, labor unions and the general public. Mr. Samuel S. White, Personnel Manager, Coronet Manufacturing Company, Kansas City, was principal speaker to describe that firm's successful implementation of its merit employment policies through the co-operation of the management, the labor union and the employees. A panel moderated by Dr. Howard Baumgartel, Chairman of the Human Relations Program, University of Kansas, and composed of Mr. H. J. Yount, Vice-president, Kansas State Federation of Labor, AFL-CIO, Mr. Charles Henson, Assistant Attorney General, Dr. C. R. Roquemore, President, Kansas State N. A. A. C. P., and Mr. Robert T. Castrey, Chief of Industrial Relations, Topeka Air Force Station, Convair Astronautics, a division of General Dynamics, reviewed the 1961 Kansas Act Against Discrimination from the viewpoint of the respective panelists in concluding that co-operation was necessary and to be expected and that the new legislation would be effective. Rev. W. Cecil Findley, Chairman, Manhattan Council on Human Relations, moderated an open discussion on the "Future for Civil Rights in Kansas" to close the Conference.

Most outstanding aspect of the Conference is implied by the genuine support for civil rights progress from the following thirty organizations sponsoring the Conference. These organizations represent the people of Kansas, the grass roots people of goodwill who want Kansas to be outstanding in its advocacy of equality of opportunity and full citizenship for all persons regardless of race, religion, color, national origin or ancestry. Other organizations have since contacted the Commission reminding that they too want to be numbered among the sponsors of next year's Conference.

## COMPLAINT PROCESSING

The 1953 Kansas Act Against Discrimination obligated and empowered the Commission and the Executive Secretary to receive and investigate complaints of discrimination in employment and to study the existence, character, causes and extent of such discrimination, and if it found such discrimination to exist, the Commission was required to immediately endeavor to eliminate the unfair employment practices complained of by informal methods of conference and conciliation. Employers, labor organizations and employment agencies were designated within the jurisdiction of the Act.

Table I, "Complaints Processed July 1, 1960, through June 30, 1961," has two parts. Table I-A shows the "Disposition of Formal Complaints Received Prior to July 1, 1960, and Processed Through June 30, 1961," and that the Commission was able to conclude processing this backlog of previous cases. The three cases involving government agencies comprised one Federal agency and one state agency (actually 2 individual complaints) both of which cited Federal rules which prevented co-operation with a state anti-discrimination commission. Lacking further powers to bring these matters to public hearing (as will be possible under the 1961 Kansas Act Against Discrimination), the Commission had no recourse but to discontinue processing these cases under the category "Open —Respondent Unco-operative." One of the complainants continued

to press his grievance against the state agency in a suit for an injunction in a Federal District Court to compel the agency to cease and desist from the discriminatory practices. That lawsuit is still pending.

Table I-B, "Disposition of Formal Complaints Received, July 1, 1960, through June 30, 1961," shows that in no cases were respondents unco-operative with the Commission's investigatory and conciliatory efforts. However, of the 26 cases "In Process" on June 30, 1961, there were indications that in at least 2 cases there were respondents tending to resist the Commission's efforts. The fact that of 32 cases received, 26 had not been processed to a conclusion by the end of the fiscal year may have several reasons, not necessarily inferential of respondent lack of co-operation. With the passage of the 1961 Kansas Act Against Discrimination in March of 1961, the Commission became temporarily overburdened with preparations for administering the new law effective July 1, 1961, along with increased calls for its educational services interpretive of the new law. Some of the respondents, and quite frankly the Commission, were uncertain of the status of these cases filed under the old law but perhaps about to be moot under the new law. (Note: the Kansas Attorney General did reply to the Commission's formal request that the Commission was obliged to process these cases to a conclusion under the procedures of the 1953 Act and that the cases were not to be docketed and then subject to the more legal procedures of the 1961 Act. Processing of these cases did continue during the summer of 1961 but are not properly to be included in this Annual Report of the year ending June 30, 1961.)

Table II depicts the entire complaint processing experience of the Commission from its inception in 1953 to the end of its responsibilities under the 1953 Kansas Act Against Discrimination on June 30, 1961. As stated in the previous Annual Reports this eight year record of infrequent use of the law's compliance function by minority group persons attests more to their lack of confidence in the effectiveness of this function than it does to the prevalence or non-prevalence of discriminatory practices in the state. In November, 1960, then Attorney General, now Governor John Anderson, Jr., rendered a formal opinion to the Commission that the 1953 Kansas Act Against Discrimination "while stating a legislative policy with regard to discrimination, does not constitute a statutory prohibition against such practices." Governor Anderson then supported efforts to secure enforceable fair employment practices legislation which

resulted in the 1961 Kansas Act Against Discrimination which he signed into law on April 14, 1961.

Table III is self-explanatory and does conform to the pattern of complaints received by other state antidiscrimination agencies showing that race is more prevalent a factor in employment discrimination.

TABLE III. BASIS OF COMPLAINTS RECEIVED
JULY 1, 1953, THROUGH JUNE 30, 1961

| | Formal |
|---|---|
| Total complaints | 89 |
| Race | 87 |
| Religion | 1* |
| National origin | 1† |

* Religious complaint involved Seventh Day Adventist.
† National origin complaint involved person of Mexican descent.

The Commission feels its eight years of effort to secure compliance with the non-enforceable antidiscrimination law were not without value. Quite apparently, it indicated the need for some measure of enforcement powers if the law was to be effective in eliminating employment discrimination. There were indications also that respondent employers and labor unions learned not to fear that the Commission's processing of complaints constituted harassment or lacked objectivity in determining probable cause or the absence of probable cause to credit the allegations of discrimination. In many cases, even where the Commission found no probable cause to credit the allegations, respondents expressed appreciation for the Commission's objective handling of the matter and made efforts to further implement a merit employment program based on some of the positive information offered by the Commission in its positive approach to the problem of employment discrimination.

The complaint processing experience complemented the Commission's formal educational program from which may be attributed the establishment, in Kansas, of an atmosphere receptive to ideas and techniques to promote genuine progress in human relations and the declared policy and purpose of the state of Kansas and the people of Kansas to eliminate discrimination based on race, religion, color, national origin and ancestry in all employment relationships.

## KANSAS STATE ADVISORY COMMITTEE TO THE U. S. CIVIL RIGHTS COMMISSION

During fiscal year 1961, the Kansas State Advisory Committee to the U. S. Civil Rights Commission held a series of four public inquiry meetings in order to gain an insight into local civil rights conditions in various parts of the state. The meetings were held in Wichita, Kansas City, Topeka, and Chanute. They were well attended, and much useful and informative testimony was received. The following prominent Kansans served on this Committee without compensation and as a public service to their fellow citizens: Mrs. Victor W. Haflich, Garden City, Chairman; Hon. A. B. Howard, Kansas City, Vice-chairman and Secretary; Dr. Harry Finch Corbin, Wichita; Mr. Pete Esquivel, Winfield; Mr. Arch E. Gibson, Arkansas City; and Dr. Harry Levinson, Topeka.

The report prepared by this Committee will be available after it has been submitted to the U. S. Commission on Civil Rights. Preliminary perusal of this report indicates the Committee has performed an outstanding fact-finding service documenting the nature and the degree of discrimination based on race, religion, color, national origin and ancestry in the areas of employment, education, housing, and public accommodations in the state of Kansas. Not all their findings were negative and the committee after each inquiry meeting stated there is room for both pride and optimism that efforts by Kansas and Kansans exemplified by the new enforceable fair employment law will go a long way to alleviate some of the most serious problems with which our minority citizens are faced.

## RECOMMENDATIONS

The Commission does not feel impelled to make any recommendations concerning which, as the Kansas Commission on Civil Rights, it will carry out its responsibilities to eliminate employment discrimination under the 1961 Kansas Act Against Discrimination. The enforceable fair employment law constitutes a working tool with which the Commission in co-operation with employers, employment agencies, labor unions and the general public is confident of achieving major progress in this important field of civil rights.

The Commission does feel impelled to recommend that the individuals and organizations typified by the example of the thirty organizations listed previously in this report as supporters of civil

rights progress in Kansas should organize a formal Kansas Civil Rights Advisory Council. Such a Council comprised of representatives from a wide cross-section of civic life and civic organizations would keep abreast of the needs and developments relative to civil rights throughout the state of Kansas in the areas of public accommodations and housing as well as those pertaining to employment discrimination. The Council might convene four times each year at which its subcommittees might report to the Kansas Commission on Civil Rights, or to the legislature, or to the Governor on the areas of progress and the need for further measures in those areas where progress was not manifest and yet was requisite if all citizens were to enjoy that equality of opportunity and advantages paramount to the fulfillment of democratic ideals. Such a Council, more so than the Commission on Civil Rights, would not be limited by the ramifications of economics, geography, political or legislative expediencies or priorities, and from a wider perspective would be able to present objectively based recommendations which would warrant serious consideration. The involvement of these individuals and organizations in this responsibility would in itself serve an educative function valuable within their own activities and in the communities which they serve.

## COMMISSION ON CIVIL RIGHTS

STATE OFFICE BUILDING TOPEKA, KANSAS
PHONE CE 5-0011, EXT. 5011

June 30, 1962

The Honorable John Anderson, Jr., Governor
and Honorable Members of the Kansas Legislature,
State of Kansas.

Sirs:

In accordance with Article 10, Chapter 44 of the 1961 Supplement to the General Statutes, we have the distinct honor to submit the following report of the activities, accomplishments and recommendations of the Kansas Commission on Civil Rights from July 1, 1961 to June 30, 1962.

Respectfully,

Howard W. Brewer
Chairman

Wade R. Coffey
Commissioner

I. H. Henderson
Commissioner

Chris Palacioz
Commissioner

## STAFF

| | |
|---|---|
| Mr. Carl W. Glatt | Executive Director |
| Mr. Ernest Russell | Educational Director |
| Mr. Homer C. Floyd | Field Representative |
| Mrs. Norma Jean Hodison | Secretary |
| Miss Donice I. Fajen | Stenographer |

## PURPOSE OF THE COMMISSION

Section 1 of the 1961 Kansas Act Against Discrimination (Chapter 44, Article 10, 1961 Supplement to the General Statutes) declared it to be the public policy of the state of Kansas to eliminate discrimination in all employment relations. It further declared that the opportunity to secure and to hold employment without discrimination because of race, religion, color, national origin or ancestry is a civil right. To protect this right the law provided for administration by the Kansas Commission on Civil Rights. The 1961 Act made it an unlawful employment practice for an employer, labor organization, or employment agency to discriminate on the basis of race, religion, color, national origin or ancestry.

Basically the Commission's responsibilities are to help the state of Kansas effectuate its policy against employment discrimination. To accomplish this objective the Commission undertakes two major duties:

*a.* To develop a broad range educational program designed to prevent and eliminate discrimination in employment against persons because of race, religion, color, national origin or ancestry.

*b.* To receive, investigate and resolve complaints alleging discrimination in employment against persons because of race, religion, color, national origin or ancestry.

## COMMISSION AND STAFF

The Commission is composed of five members, appointed by the Governor, representing employers, labor, and the general public. It is interracial, interreligious, and nonpartisan. The Commissioners serve without pay. With the resignation of Commissioner Leonard H. Strauss upon the expiration of his term on July 10, 1961, the Commission has lacked one representative of employers during the period of this report.

The staff in fiscal year 1962 consisted of Mr. Carl W. Glatt, Executive Director; Mr. Ernest Russell, Educational Director; Mr. Homer C. Floyd, Field Representative; Mrs. Norman J. Hodison, Secretary, and Miss Donice I. Fajen, Stenographer.

## COMMISSION'S BUDGET

Budget appropriations for fiscal year 1962 were $47,033, of which $28,018 were for salaries and wages, and $19,015 for other operating expenditures. The Commission utilized these appropriations to the full except for a balance of $644.30 in the salary account representing per diem estimates for Commissioners not expended during the fiscal year.

The Commission's budget for fiscal year 1963 is $48,289, of which $31,679 will be for salaries and wages, and $16,610 for other operating expenditures. The increased salaries and wages comprise routine annual increments for Civil Service employees, the increase in salaries for all state employees authorized by the State Finance Council on September 1, 1961, and state contributions to the new Kansas Public Employees Retirement System.

## LEGISLATION

There was no new legislation pertaining to the Kansas Commission on Civil Rights during the period of this report. This period represents the first full year of operation under the 1961 Kansas Act Against Discrimination, effective July 1, 1961, as an enforceable fair employment practices law applying to employers of eight or more persons, employment agencies, labor organizations, and the state of Kansas and all political and municipal subdivisions thereof. The Act fulfilled the recommendations of this Commission as presented in its 1960 Annual Report by providing:

*a.* A clause protecting a complainant, or any witness relative to a complaint, from reprisal,

*b.* The power to hold public hearings when conciliation efforts have failed and to issue cease and desist orders with court enforcement and judicial review procedures,

*c.* That school districts and educational institutions are no longer excepted from the Act.

In its first year under the new Act the Commission has not been handicapped by the lack of subpoena powers in the investigatory stage. Most all respondents have co-operated in furnishing information requested by the Commission, though one large national corporation has taken under advisement whether to supply complete information on its entire workforce at its Kansas plant and office. The Commission understands that if required to resort to court enforcement proceedings the court itself would very likely subpoena records necessary to determination of the facts of the matter.

## ATTORNEY GENERAL'S OPINIONS

The Commission prepared rules and regulations, a guide to pre-employment inquiries, and a poster abstract of the Act required to be posted on the premises of all those covered by the Act. These were submitted to, and approved by, the Attorney General after certain recommended changes were made. Then, with copies of the Act, these items were mailed to some 23,000 employers, employment agencies, labor organizations, and government agencies. This mailing brought requests for about 2,000 additional copies of these items, along with questions concerning the Commission's interpretation of some aspects of the new law. In addition, several hundred firms asked questions about or submitted their employment application forms for the Commission's review to assure compliance with the Act. The Commission can report that this response and interest was typical of the wholesome co-operation it has been receiving throughout the year from employers, employment agencies, labor organizations, government agencies, and the general public.

Attorney General William M. Ferguson offered the following formal opinions related to the administration of the 1961 Act Against Discrimination:*

*No. 61-195:*

That a "nonsectarian" corporation, as used in the Act, means a corporation engaged in religious activities but not connected with any one particular sect, group, order or denomination, and is covered by the Act whether or not it employs eight or more persons. In Section 44-1002 (*b*), the term "employer" includes "any person in this state employing eight (8) or more persons, *and any person acting directly or indirectly for an employer as herein defined, and labor organizations, nonsectarian corporations, and organizations engaged in social service work, and the state of Kansas and all political and municipal subdivisions thereof,* but shall not include a non-profit religious, charitable, fraternal, social educational or sectarian association or corporation . . ." The underscored groups are not required to employ eight or more persons.

The Attorney General was of the further opinion that a school district, being a municipal subdivision or at least a quasi municipality, would meet the definition of the term "employer," regardless of the number of persons employed by said school district.

*It should be noted that these opinions were not sought by the Commission to extend its jurisdiction but were in answer to outside inquiries or the Commission's own need for clarification before proceeding further in certain matters.

*No. 61-268:*

That an application for employment cannot contain the requirement that the applicant furnish a photograph of himself. To require an applicant for employment to submit his photograph along with his application is in effect an inquiry in connection with prospective employment which expresses directly a specification as to race, color, national origin or ancestry. Section 44-1009 of the Act states: "It shall be an unlawful employment practice: (*c*) For any employer, employment agency or labor organization to print or circulate or cause to be printed or circulated any statement, advertisement or publication, or to use any form of application for employment or membership or to make any inquiry in connection with prospective employment or membership, which expresses, directly or indirectly, any limitation, specification or discrimination as to race, religion, color, national origin or ancestry, or any intent to make such limitation, specification or discrimination, unless based on a bonafide occupational qualification."

*No. 61-274:*

That cases docketed under the 1953 Kansas Act Against Discrimination prior to the effective date of the 1961 Kansas Act Against Discrimination be processed through to completion by the Commission under procedures established by the former Act.

*Letter Opinion dated November 30, 1961:*

That enrollment of a person in a private school such as a school of cosmetology is not an employment relationship, and thus denial of such enrollment because of race is not a violation of the Kansas Act Against Discrimination. Furthermore, the licensing authority of the Kansas Board of Cosmetology (in licensing schools of cosmetology) being based upon the exercise of a police power in protecting public health does not concern or depend upon the admission policy of the prospective licensee.

*No. 62-7:*

That forms of the Kansas Department of Labor in connection with work permits for children under the age of sixteen and the use of these forms and permits does not fall within the scope and jurisdiction of the Kansas Commission on Civil Rights.

*Letter Opinion dated April 6, 1962:*

That the powers and duties of the Commission are limited to discrimination in employment because of race, religion, color, national origin or ancestry, so that discrimination because of *age* cannot be considered an "employment relationship" also covered by the Act.

## EDUCATIONAL PROGRAM

The Commission's educational program is the most important part of its work and requires about seventy-five percent of its total staff time and effort. The Commission feels it is holding its own in those educational and public relations functions reaching the general public. However, lack of manpower has prevented the Commission from embarking upon the preparation of "a comprehensive educational program designed for the students of the public schools of this state and for all other residents thereof, calculated, to emphasize the origin of prejudice against the various ethnic groups in the state, its harmful effects, and its incompatibility with American principles of equality and fair play" as required by Section 44-1004 of the Act. Though it is doing some of this on a pilot or catch-as-catch-can basis, the Commission does not have a most necessary program of education of minority youth involving motivation, guidance, and preparation for employment opportunities. It is recognized that as new employment opportunities are being opened up for minority group persons there must be such persons motivated and prepared to qualify for acceptance of these opportunities. Without this reservoir of qualified minority group persons, the efforts to eliminate employment discrimination will have been in vain. Much of the Commission's co-operative efforts with school and college guidance and placement officers lacks that continuity and persistency to make such efforts meaningful in terms of on-going state-wide programs.

From July 1, 1961, to June 30, 1962, the Executive Director, Educational Director, and Field Representative served as principal speakers or panelists at 135 engagements attended by 9,020 persons throughout the state of Kansas. The professional staff served a total of 115 times as consultants or participants on human relations programs or to organizations and individuals interested in promoting good human relations in Kansas.

Commission educational films were supplied at no charge for the programs of seventy-one groups and were seen by 14,693 persons. "A Morning for Jimmy" and "The New Girl" were films utilized most often in this period (22 and 15 times, respectively), but a new film on housing, "All the Way Home," purchased late in the spring of 1962 was utilized 16 times and will continue to be in demand as more and more Kansas citizens question what might be done to eliminate

problems resulting from discrimination in housing. The Commission purchased two additional housing films, "Property Values and Race" and "Crisis in Levittown," in its efforts to help interested groups to study and understand the problem of discrimination in all or specific instances of discrimination because of race, religion, color, national origin or ancestry as directed by Section 44-1004 (7) of the Act. In January, the Executive Director presented the work of the Commission on Civil Rights in the half-hour program, "Ideas in Action," sponsored by the University of Wichita Department of Educational Television and produced as a public service by KARD-TV in Wichita. It is estimated 35,000 persons may have seen this program. The Commission purchased a 16 mm. sound film of this TV program available for use in the schools and colleges of the state and to other interested organizations.

The above speaking, consultant, and film service were rendered to organizations grouped as follows:

| | Speakers—panelists | Consultants | Films |
|---|---|---|---|
| Human relations groups | 51 | 31 | 12 |
| Church groups | 36 | 11 | 25 |
| Schools and colleges | 17 | 23 | 19 |
| Business, labor, civic groups | 31 | 50 | 15 |
| | 135 | 115 | 71 |

Lack of funds curtailed the Commission's human relations car card program in the buses of the state, but the Commission's spot announcements with human relations messages were utilized by 59 Kansas radio stations as a free public service. Production commenced on a series of six television spot announcements supporting fair employment practices and the Commission on Civil Rights starring Governor John Anderson, Jr., Commissioner of Labor Harold L. Smith, Chancellor W. Clarke Wescoe of the University of Kansas, President Ellis Cave of the Kansas State Chamber of Commerce, Vice-President Merle Worman of the Kansas State Federation of Labor, and University of Kansas' head football coach Jack Mitchell. This series will be presented during the Fall of 1962.

Commission distribution of human relations material continued to be another major factor of its educational program. Just as state and local boards of health prepare and distribute educational materials for the prevention and control of physical diseases, so does the Commission view its materials distribution for the prevention and

control of the twin social diseases of prejudice and discrimination. Five thousand copies of the "1961 Report of Progress" were distributed along with an equal number of a "Brochure of the 1961 Kansas Act Against Discrimination." As mentioned previously, copies of the Act were distributed to 23,000 employers, employment agencies, labor organizations, and government agencies, with an additional 5,000 printed to meet the additional demand. "The Gentle People of Prejudice" and "Prejudice: Effects on Children" continued to be the most sought-after of the human relations educational materials distributed by the Commission. Late in the fiscal year, to meet requests for factual information related to discrimination in housing, the Commission reprinted at a fraction of the original cost the excellent pamphlet, "The Myths of Racial Integration," prepared by the American Jewish Congress. The bimonthly newsletter of the Commission on Civil Rights, *The Reflector*, continues to be well received and praised as a very effective source of human relations news and information.

The Executive Director represented the Kansas Commission at the Fourteenth Annual Conference of Commissions Against Discrimination in Seattle, Washington. The Commission is now a member of this conference of agencies administering enforceable civil rights laws. The Executive Director also represented the Kansas Commission upon invitation of Vice-president Lyndon B. Johnson for a meeting with the President's Committee on Equal Employment Opportunity in Washington, D. C. The Executive Director was appointed one of a committee of five state agency officials to develop plans for mutual co-operation in compliance and educational programs between the President's Committee and state fair employment practices agencies.

Educational Director Ernest Russell was assigned by the Commission to attend the Nineteenth Annual Race Relations Institute at Fisk University in Nashville, Tennessee, in June, 1962, to advance his professional growth and increase his effectiveness in directing the Commission's educational program. Expenses for this worthwhile assignment were met in full by contributions from several organizations affiliated with the Kansas Advisory Council on Civil Rights. Field Representative Homer C. Floyd served as speaker and consultant at the Governor's Conference on Civil Rights in Jefferson City, Missouri, in May, 1962. The exchange of information and the new techniques acquired from attendance at these human relations conferences will prove helpful to the Commission's educational and compliance program.

## KANSAS ADVISORY COUNCIL ON CIVIL RIGHTS

Pursuant to Section 44-1004 (7) of the Act, the Commission's staff assisted in the formation of the Kansas Advisory Council on Civil Rights at a planning meeting on March 24, 1962. At subsequent meetings an Executive Board was formed with the following officers: Chairman, Mrs. Nathan Shechter, Anti-Defamation League of B'nai B'rith; Treasurer, Rev. Harold Statler, Kansas Council of Churches, Division of Social Relations; Secretary, Richard Whitaker, Salina Human Relations Council; Vice-chairmen, George Vega, American G. I. Forum; Samuel Jackson, Kansas State N. A. A. C. P.; Mrs. June Horwitz, Social Action Committee, Temple Beth Sholom, Topeka; and Executive Members at Large, Rev. Raymond P. Jennings, Sidney Alexander, Wichita Urban League, and Father Robl, Wichita Catholic Interracial Council.

The Kansas Advisory Council on Civil Rights seeks to "foster good will and co-operation among all the elements of the population of the state." The Council shall inform, promote and co-ordinate: (*a*) information on civil rights problems and programs; (*b*) efforts by organizations that are educational, and in support of the Kansas Commission on Civil Rights; (*c*) legislative programs on civil rights; (*d*) state level strategy for programs on civil rights. Its first project will be sponsorship of the Fourth Annual Kansas Conference on Civil Rights on October 13, 1962, at the University of Kansas, Lawrence, Kansas. Following are the organizations which indicated affiliation with the Council at the original planning meeting:

1. American G. I. Forum Auxiliary of Kansas
2. American G. I. Forum of Kansas
3. Beta Eta Lambda Chapter of Alpha Phi Alpha Fraternity
4. Catholic Interracial Council of Wichita
5. Commission on Christian Social Concerns, Countryside Methodist Church, Topeka
6. Commission on Christian Social Concerns, First Methodist Church, Anthony
7. Community Committee on Social Action of Wichita
8. Dodge City American G. I. Forum
9. Douglas County Association for the United Nations
10. Enlightener Newspaper, Wichita
11. Episcopal Diocese of Kansas, Department of Christian Social Relations
12. Family Service and Guidance Center of Topeka
13. Jack and Jill of America, Inc., Topeka Chapter
14. Junction City Improvement Association
15. Kansas Association of Colored Women and Colored Girls Clubs
16. Kansas Bar Association
17. Kansas City Call, Newspaper
18. Kansas City Chapter, Lutheran Human Relations Association of America
19. Kansas City, Kansas, Bar Association
20. Kansas City, Kansas, Beth Horon Lodge of B'nai B'rith
21. Kansas City, Kansas, N.A.A.C.P. Branch
22. Kansas Commission on Civil Rights
23. Kansas Co-op Council
24. Kansas Conference of the Methodist Church, Commission on Christian Social Concerns

25. Kansas Council of Churches, Division of Social Relations
26. Kansas League of Women Voters
27. Kansas N. A. A. C. P.
28. Kansas State Association of B'nai B'rith
29. Kansas State Federation of Labor, AFL-CIO
30. Kansas State Nurses' Association
31. Kansas State Teachers' Association
32. Kansas UNESCO
33. Lawrence Human Relations Commission
34. Lawrence League for the Practice of Democracy
35. Manhattan Council on Human Relations
36. Newton American G. I. Forum
37. Plains States Region of Anti-Defamation League
38. Plymouth Congregational Church (Lawrence) Social Action and Education Committee
39. Presbytery of the High Plains of the Presbyterian Church
40. Prince Hall Grand Lodge of Kansas
41. Region IV N. A. A. C. P.
42. Salina Human Relations Council
43. St. Benedict's College, Atchison
44. St. John A. M. E. Church, Topeka
45. State Social Action Committee of the Congregational Conference
46. Temple Beth Sholom, Topeka
47. Topeka American G. I. Forum
48. Topeka American G. I. Forum Auxiliary
49. Topeka Chapter, National Association of Social Workers
50. Topeka Council of Churches
51. Topeka Federation of Labor, AFL-CIO
52. Topeka Fellowship
53. Topeka Highlands Presbyterial

61. Wichita Human Relations Commission
62. Wichita N. A. A. C. P. Branch
63. Wichita Urban League
64. Wichita Urban League Guild
65. Winfield N. A. A. C. P. Chapter

## COMPLAINT PROCESSING

At the close of the period of the 1961 Annual Report on June 30, 1961, the Commission's docket contained 29 formal complaints which had not been processed to completion. It was these cases which the Attorney General ruled should be completed but under the procedures of the 1953 Kansas Act Against Discrimination. Table I-A shows the "Disposition of Formal Complaints Pending From July 1, 1961, Through June 30, 1962," and that the Commission was able to conclude processing this backlog of prior cases with but two exceptions. Actually, these exceptions involved two separate complaints filed against one labor organization. This labor union refused to meet with Commission representatives and never acknowledged registered letters requesting such conciliation meetings as might have resolved the matter amicably. Under the 1953 Act the Commission had no recourse to proceed further, and unless complaints should be filed under the 1961 Kansas Act Against Discrimination the alleged discriminatory practices may be continuing.

One of the 29 cases had been pending for two and a half years against a federal agency which had not co-operated with the state Commission. The Commission, on behalf of the complainant, kept

contact with the President's Committee on Equal Employment Opportunity which saw that the complainant's appeals were finally processed to remedy his grievance. The complainant, a Negro, had passed the Federal Civil Service examination for a supervisory position. Because he was the only person to pass this exam and qualify for the eligible list, that federal agency exercised its right not to appoint him to the position because there was not a certified list of eligibles containing at least three qualified candidates for selection. However, the agency then appointed to this position a white candidate who had taken and had failed the examination the Negro candidate had passed. It was this action which brought the charge of racial discrimination which was eventually not disproved and which led finally to the complainant's appointment to the supervisory position.

One other case which the Commission could not process to completion because the 1953 Act did not contain a provision for public hearing or court enforcement of the Commission's findings was resolved by an action instituted by the complainant in a federal court. On November 27, 1961, in the U. S. District Court in Wichita, Judge Delmas C. Hill signed a consent decree issuing a permanent injunction that the Kansas State Employment Service be restrained from accepting, filling and making referrals on the basis of racially discriminatory job requisitions. The decree stated "That any policy, custom, usage, and practice of the defendants in refusing to refer and/or place qualified Negroes pursuant to job requisitions and denying to Negroes the right to use and enjoy all of the facilities of the Kansas State Employment Service, and in accepting and/or filling racial discriminatory job requisitions, contravenes the Fourteenth Amendment to the Constitution of the United States and the Kansas Act Against Discrimination, under Chapter 44, of the General Statutes of Kansas, as amended."

The Kansas Commission on Civil Rights has maintained a most co-operative working relationship with the Kansas Department of Labor and the Kansas State Employment Service, with both these state agencies providing assistance to the Commission and themselves making daily contributions towards the extension of equal employment opportunities for all qualified persons throughout the state of Kansas without regard to race, religion, color, national origin or ancestry.

Table I-B depicts the entire history of complaint processing under the 1953 Kansas Act Against Discrimination with a total of 23 cases unresolved due to respondents' refusal to co-operate with the Commission's efforts to conciliate.

Table II shows the "Complaints Processed Under the 1961 Kansas Act Against Discrimination" from July 1, 1961, through June 30, 1962. Here the record has been one of excellent co-operation with the Commission and its representatives during the course of investigation and conciliation. Eight of the 13 Satisfactory Adjustment closings have led to hiring of either the complainant or other minority group persons; 2 of the 13 cases so closed have involved newspaper help-wanted advertisements which contained racial identifications; the remaining 3 cases involve a declaration of a fair employment policy that must await a seasonal or expected hiring situation when the policy can be implemented. In the cases closed No Probable Cause, the Commission achieved a friendly relationship and spirit of co-operation and mutual understanding, which has led to verified reports in five of the cases of increased hiring of minority group persons.

Of the cases closed for No Jurisdiction, 2 involved employers of less than 8 persons, 2 involved schools of cosmetology which refused to enroll Negroes as students, and 1 involved a charitable organization. In all of these 5 cases there had been admissions by respondents of the policy and practice not to employ (or enroll) members of the Negro race. In each instance the Commission made one informal attempt suggesting compliance with the spirit of the fair employment law that there be no discrimination based on race, religion, color, national origin or ancestry in all employment relations in the state of Kansas. None of the respondents indicated any desire or interest in relaxing the discriminatory policies or practices, whereupon the Commission closed the cases forthwith in keeping with the confidential procedures of the Act.

The 4 school complaints have afforded the Commission most wholesome co-operation from school officials which could well be the expected pattern whereby the schools of the state will take the lead in promoting, by example, the democratic principles which fair employment represents. One respondent school system hired the Negro complainant and two other qualified Negro teacher candidates at the next available opportunity, and for the follow-up 1962

Fall term has hired several more Negro teachers, according to reports to the Commission which emphasize there has been community acceptance and appreciation of the advantages gained from hiring qualified teachers from all racial, religious, and ethnic groups.

Of the workload of 70 formal complaints processed in the period of this report, the Commission reiterates it has met with excellent co-operation in carrying out its responsibilities. This may be attributed in part to respect for the enforceable 1961 Act Against Discrimination and in part to the Commission's increased staff and resulting increase in its education activities.

Table III is self-explanatory and conforms to the pattern of complaints received by other state antidiscrimination agencies showing that race is more prevalent a factor in employment discrimination.

TABLE III. BASIS OF COMPLAINTS

## RECOMMENDATIONS

As in the 1961 Annual Report, the Commission on Civil Rights does not feel impelled to recommend any changes in the 1961 Kansas Act Against Discrimination as it pertains to the elimination of employment discrimination. There have not been occurrences in the administration of this Act to date which justify recommendations for change, though the prospect that lack of subpoena powers may prove to be a handicap to the disadvantage of either/or both the complainant and the respondent may one day warrant further consideration.

The Commission is concerned that its present staff is short that one additional professional intergroup relations worker to enable it to carry out a well-rounded educational and compliance program. Members of the 1961 Kansas Legislature did ask the Commission for an estimate of the manpower needs contingent upon passage of the 1961 Kansas Act Against Discrimination, and the Commission's estimate for four professional and two clerical staffers was conservatively based on the industrial composition of the state. For proper and consistent concentration of its educational programming in the area of motivation of minority youth and placement and guidance counselling so necessary for the preparation of these youths to fulfill the job opportunities that are opening up, the Commission again recommends legislative approval and budgetary appropriation for one additional professional worker.

Because the Commission continues to receive reports of discrimination in places of public accommodations, and because these reports indicate inadequacies in the coverage and administration of the present Kansas public accommodations law, the Commission recommends consideration of legislative changes to overcome these inadequacies similar to the administrative agency type of public accommodations laws successful in other jurisdictions.

Housing discrimination based on race, religion, color, national origin and ancestry creates problems and disadvantages for the entire community. In some Kansas cities, school districts desegregated in compliance with the 1954 U. S. Supreme Court decision have witnessed the re-creation of *de facto* segregated schools due to neighborhood patterns evolving from discriminatory housing practices. Urban renewal relocations of minority group persons

have led to further concentration, congestion, and high density neighborhoods with attendant educational, health, welfare, law enforcement and fire protection problems because of discriminatory restrictive housing practices elsewhere in the community. There are, in Kansas, growing instances of white homeowners victimized by the unreasoning urge to "move away" at the advent of a Negro home buyer, again concentrating the relatively limited Negro effective demand on the "break through" neighborhood because that demand is restricted by discriminatory real estate practices from shopping for housing from the larger pool of available housing that the total community has to offer.

The Commission on Civil Rights recommends that serious consideration be given to remedial housing legislation to accord with language in the present Kansas Act Against Discrimination that "such discrimination threatens not only the rights and privileges of the inhabitants of the state of Kansas but menaces the institutions and foundations of a free democratic state."

## " ... OF THE INNOCENTS,"

DENISE McNAIR

CAROLE ROBERTSON

AP

ADDIE MAE COLLINS

CYNTHIA WESLEY

The bomb blew them into little pieces...in an American city...these four little girls in Sunday School to study the lesson "THE LOVE THAT FORGIVES"...and the year was 1963.

"Suffer the little children to come unto Me"...but it was never meant to be that way...in little pieces...horrible little pieces of what once had been smiles and giggles and "sugar and spice and everything nice..."

## "...BY THE INNOCENTS,"

That same day...in 1963...in that same American city...a brother on the handle-bars of his brother's bike...grinning, joking, happily shouting at their chasing pup...was shot to death...the Negro, age 13, a happy child, now dead at the hands of a white boy, an Eagle Scout.

And there is nothing in the Scout oath or the Scout law that says "hate and kill."

## "...BY THE NOT-SO-INNOCENT:"

Lest there be those that take comfort that this happened in another state, in a distant city, it must be said none of us are without guilt for the slaughter of these innocents. We can read, we can hear...we have read, we have heard... we've known all along what was going on down there. That citizens have been denied the rights of all American citizens...rights guaranteed by the Constitution...because they were Negroes.

We did nothing...we did very little...we let it go on that way. And even now too many of us continue in the conspiracy of silence that will let prejudice and discrimination eat away at the very foundations of our democratic nation...so that the little pieces may never be put together again...little pieces of little girls...little pieces of a great nation.

# THE ISSUE IS SILENCE

I speak to you as an American Jew.

As Americans we share the profound concern of millions of people about the shame and disgrace of inequality and injustice which make a mockery of the great American idea.

As Jews we bring to this great demonstration, in which thousands of us proudly participate, a two-fold experience — one of the spirit and one of our history.

In the realm of the spirit, our fathers taught us thousands of years ago that when God created man, he created him as everybody's neighbor. Neighbor is not a geographic term. It is a moral concept. It means our collective responsibility for the preservation of man's dignity and integrity.

From our Jewish historic experience of three and a half thousand years we say:

Our ancient history began with slavery and the yearning for freedom. During the Middle Ages my people lived for a thousand years in the ghettos of Europe. Our modern history begins with a proclamation of emancipation.

It is for these reasons that it is not merely sympathy and compassion for the black people of America that motivates us. It is above all and beyond all such sympathies and emotions a sense of complete identification and solidarity born of our own painful historic experience.

When I was the rabbi of the Jewish community in Berlin under the Hitler regime, I learned many things. The most important thing that I learned under those tragic circumstances was that bigotry and hatred are not the most urgent problem. The most urgent, the most disgraceful, the most shameful and the most tragic problem is silence.

A great people which had created a great civilization had become a nation of silent onlookers. They remained silent in the face of hate, in the face of brutality and in the face of mass murder.

America must not become a nation of onlookers. America must not remain silent. Not merely black America, but all of America. It must speak up and act, from the President down to the humblest of us, and not for the sake of the Negro, not for the sake of the black community but for the sake of the image, the idea and the aspiration of America itself.

Our children, yours and mine in every school across the land, each morning pledge allegiance to the flag of the United States and to the republic for which it stands. They, the children, speak fervently and innocently of this land as the land of "liberty and justice for all."

The time, I believe, has come to work together — for it is not enough to hope together, and it is not enough to pray together — to work together that this children's oath, pronounced every morning from Maine to California, from North to South, may become a glorious, unshakeable reality in a morally renewed and united America.

**Address by Rabbi JOACHIM PRINZ, President of the AMERICAN JEWISH CONGRESS, at the March on Washington for Jobs and Freedom, Lincoln Memorial, Aug. 28, 1963**

THE SILENCE IS BREAKING:

The excerpts from a front-page article in the WALL STREET JOURNAL, September 17, 1963, tell of the silence being broken.

# Church Pressure Aids Chances for a Strong Civil Rights Measure

By Jerry Landauer
*Staff Reporter of* The Wall Street Journal

WASHINGTON — Powerful religious pressure for a strong Federal civil rights bill is offsetting, at least in part, the so-called backlash of white resentment against Negro demands for equality.

In great sections of the Midwest, it's clear, the church-organized civil rights campaign has firm roots. Kansas Republican Sen. Pearson's mail runs heavily for civil rights and many letterheads indicate a church inspired campaign. Letters and petitions come in from Kansas church-goers in such places as Pretty Prairie, Alma, Pittsburg, Manhattan, Fredonia and Parsons.

Even when the mail isn't clearly church-inspired, much of it conveys a distinctly religious flavor. Many letters begin with something like "As a Christian and as an American, I urge you to support. . . ." A Methodist minister in Blue Mound, Kan., writes: "There is an increasing feeling in our community that justice can be achieved only with the help of bold Federal legislation concerning civil rights."

With some exceptions, religious leaders hesitate to lobby personally in Congressional offices. But last month the National Council of the Episcopal Church gathered 50 of its leading clergy in the capital; a number of them spent considerable time on Capitol Hill. "After a week in Washington," one Midwest clergyman wrote later, "I feel that our quiet, unpublicized effort has done a lot in reaching many Congressmen and Senators."

Nearly all lawmakers from the Bible Belt have received visits from home-district clergymen. Mennonite ministers from Kansas and Pennsylvania have made the round of House delegations from those states; Church of God leaders from Northern Indiana are active in Congress; Midwest rabbis and priests also have called on legislators.

"Pretty Prairie,..." just north of Kingman, where the red and white of a Mennonite church gleamed in the moonlight as we passed on our way to a program in the Methodist Church. Pop. 565.

"Alma,..." due west of Topeka. Pop. 792.

"Fredonia, Parsons and Pittsburg..." down in the Balkans of Kansas. Bigger little towns with more and bigger churches, all with a united concern for the dignity of man.

"Blue Mound, Kansas." Pop. 331.

We recall a trip last Spring to Ashland, Kansas, pop. 1,366, for a program on civil rights where our host was a farmer whose losses in winter wheat from too much cold and too little snow cover had been devastating. As we sat down to his supper table, he said Grace, and offered a prayer, not for rain and prosperity for his crops and his family, but for this great country that it might be free from prejudice and discrimination..."let these twin evils pass from our land that all men may be truly equal as in Thy sight."

On another trip, this time for a program at the First Baptist Church in Dodge City, we stopped to climb Pawnee Rock, thirteen miles southwest of Great Bend. Here is where Kit Carson, brave as he was, shot his pack mule in the dark...for this was jittery country for the pioneers crossing the prairie...this long and wide expanse of open country with no shelter from Indian attack. We climbed Pawnee Rock for a breathless view of the land...land, land, and more land...and we meditated on its golden greatness and the courage of the men who pioneered its greatness...and of the blue sky, the "Kansas blue," which is as wide, wide, wide as the land it shelters.

And from all this length and breadth, this expanse of beauty and greatness, this proof of a God above, we wondered how there ever could be a narrowness in man, hate among men.

In Dodge City, haunt of Wyatt Earp, Doc and Kitty, and Boot Hill, the Chamber of Commerce told how all the hotels, motels, cafes and restaurants were open to ALL the public in this great American tourist attraction of a town. For these reasons, and because Kansans are taking the lead in "breaking the silence" we are proud to be a mid-American, a Kansan!

PUTTING THE PIECES TOGETHER:

The minutes of the meeting of the Kansas City, Kansas, Human Relations Commission on August 27, 1963 reported the Fire Department is now 100% integrated. The Police Department reported it will be fully integrated as of September 1, 1963. The following month's meeting reported "Everything is going nicely in the Fire and Police Departments."

The same minutes reported a Negro has been assigned as a member of the field staff of the Huron District, Kaw Valley Council of Boy Scouts.

The clipping from the Kansas City CALL, September 20, 1963, tells of another piece falling quietly into place in the jigsaw puzzle that is America's civil rights dilemma.

This represented years of dedicated concern and effort among the lawyers to bring about this positive change. We wonder why they still haven't amended the rules to permit women lawyers as members of this county bar association?

BARTON COHEN, one of the most active members of the Kansas City Human Relations Commission, was one of the lawyers leading the efforts to admit Negroes to the bar association.

## Kansas Bar Group Votes To Admit Negro Lawyers

KANSAS CITY, Kas.—(UPI) — The Wyandotte County Bar Association voted Wednesday to admit Negro lawyers to its membership, deleting the word "white" from its constitution.

Previous votes had been to continue the wording which said membership was limited to white persons.

Don Martin, association president, said Negroes will be admitted to the group immediately. About 14 local Negro attorneys are eligible, including City Court Judge John Royston and former City Court Judge A. B. Howard.

Martin would not disclose the vote total, but said the move to admit Negroes was approved "by a sizeable majority." An unofficial total was 72 in favor of admitting Negroes and 11 against.

On Sunday, October 27, 1963, about 4,500 persons, white and Negro, joined in a "March For Fair Housing" in Wichita. The day was cold and blustery, but depending on what newspaper you read or what TV or radio commentator you heard the total crowd gathered at the Wichita City Hall numbered from 3,000 to 10,000.

The occasion was to dramatize the presentation to the City Commission of a proposal for a fair housing ordinance. This was the culmination of a many months campaign by church and civic groups to create interest in open occupancy in housing for the City of Wichita which included full page advertisements in the local newspapers listing thousands of citizens who chose this way of making public their declaration of belief that discrimination in housing based on race, religion, color, national origin or ancestry should be ended.

Thus, the pieces fall in place. The silence breaks.

MORE PIECES INTO PLACE; MORE SILENCE BROKEN:

The editorial is from the Kansas City TIMES of August 13, 1963. The news article from the same newspaper on September 7, 1963 tells that the Kansas City Chamber of Commerce really means business with its equal employment opportunity committee.

This is one silence broken that can really do a great deal of good. These are the "hiring and firing" guys -- with the know-how for getting things done. The mid-West IS on its way!

## THE CHAMBER CONSIDERS JOB EQUALITY

THE Kansas City Chamber of Commerce, in moving to establish a committee on equality in employment opportunity, is performing a real service for the community and, in particular, its commercial interests.

This would have been an easy one for the Chamber board to have ducked. The proposal could have been tabled, continued and forgotten. Instead, the board chose to show the kind of leadership that a Chamber concerned with the facts of life is expected to show.

In the face of pressures to hire without regard to race, it ought not to be assumed that most—or even a majority—of businesses in this area are resisting the trend. Unquestionably there are business executives of conscience and good will who are quite ready to drop a tradition against hiring Negroes.

In many cases such a tradition probably isn't so much a formal, deliberate policy, but something that "always has been that way." The report noted that "businessmen, understandably, are hesitant to move alone into this uncertain area, but would not be as reluctant to do so if it were done on a broad community basis." The Chamber committee, through studies of employment policies, vocational and on-the-job training and scholarship needs, can provide the basic information necessary for a smooth transition.

**Last fall the Kansas City Chamber of Commerce removed from its by-laws restrictions limiting membership to "white male citizens." Now it is taking positive action to deal with a problem that affects the commercial structure, prosperity and employment picture of the community. Furthermore, it provides a standout example of moderate leaders tackling a situation that otherwise would have left a natural vacuum in which extremists on both sides would be expected to clash. If the Chamber had ignored the problem it would have done both the city and its membership an injustice.**

# EQUAL WORK IS AIM OF GROUP

**Chamber of Commerce Job Opportunity Committee to Meet Tuesday**

## ON HIRING PRACTICES

**Employment and Training Goals Outlined by Chairman**

The Kansas City Chamber of Commerce committee on equal employment opportunity will hold its first meeting, an organizational session, at 10 o'clock Tuesday, it was announced yesterday.

The committee was formed, by a 19 to 0 vote of the chamber's board of directors, to develop a program for encouraging the city's employers to hire and promote personnel impartially, without regard to race, creed or color.

D. Peter Newquist, 5609 West Seventy-eighth street, Prairie Village, has been named chairman of the 11-member committee. Newquist is assistant director of industrial relations and security, The Bendix corporation. Other members:

Lewis W. Clymer, municipal court judge; Ernest A. Dick, Jack Henry, Inc.; Meyer L. Goldman, Beacon Printing & Publishing Co.; Virgil S. Hanson, Spencer Chemical company; Walter Hiersteiner, Tension Envelope company.

Chester P. Hoevel, Ford Motor company; L. E. Kinser, Building and Construction Trades council; Floyd Lubert, Western Electric company; Robert J. Metzler, Metzler Brothers and company; Dale M. Thompson, City Bond and Mortgage company.

D. Peter Newquist

"We intend to come up with a constructive, objective program to assist Greater Kansas City business men to implement equal employment programs in their own companies," Newquist said.

Part of the effort, he indicated, may include solicitation of major business concerns for employees to serve as instructors in vocational training education.

"After the program is established," he said, "we want to share it with anyone who'll listen to us. We'll be working with members of the Negro community and the mayor's human relations commission."

Newquist said he hopes the committee will be able within a month to present an outline of its program for consideration by the board of the 2,000-plus-member chamber.

Techniques of carrying the equal employment message to Kansas City employers likely will include direct letters, brochures and public speakers.

ANNUAL REPORT PREVIEW:

The two previous pages are the box score for the Annual Report of the Kansas Commission on Civil Rights of cases processed from July 1, 1962 through June 30, 1963. We might add that since the end of that period and commencing July 1, 1963 to the present date of November 2, 1963, the KCCR has docketed 29 new complaints of employment discrimination and 5 complaints of discrimination in public accommodations, or almost as many complaints in these four months as in the entire previous year. And in the two years under the 1961 Kansas Act Against Discrimination a total of 80 formal complaints were docketed and processed as against 89 complaints processed under the 1953 Kansas Act Against Discrimination in eight years.

Outstanding feature of this report will be that no complaints required a public hearing to resolve the problems presented, whereas under the nonenforceable 1953 Act, 23 complaints remained unresolved because the Commission lacked enforcement powers through recourse to a public hearing and court enforced cease and desist orders. The Commission sincerely gives credit for this record not so much to the Act's enforceability as to the genuine spirit of cooperation Commission representatives received from public and private employers and labor unions.

Cases ranged from small employers of 15 or 20 persons to companies with several thousand employees. One small company went out of its way to seek out qualified Negro clerical workers after the complainant had taken a job elsewhere and was not available for work with that company. Total case processing time for this complaint was less than a month, but the complainant was that well qualified she had already gotten employment before the respondent could offer her a job.

Another small company was found not to have discriminated against a Negro employee upon the KCCR's investigation. The employer corresponded later with the Commission to describe the 4 or 5 additional Negroes he had employed as his business expanded.

A Negro employee of a large Federal agency became the first of his race to be promoted above a janitorial level through the combined efforts of the KCCR and the President's Committee on Equal Employment Opportunity. The first investigation of this complaint within the Federal agency itself resulted in a decision of "no discrimination." The KCCR appealed on behalf of the complainant and a day and one-half of new hearings with representatives from the Kansas Commission present brought about proof of discrimination and upgrading for the complainant.

A case involving a heavy construction company could have been closed the day after the complaint was filed because the company did hire the complainant and four other Negro workers at that time. However, the Commission held discussions with this employer and several labor unions involved over a period of several months to fully understand and assure how equal employment opportunity could be achieved in that type of work.

It is still too early to analyze the situation relative to complaints filed against places of public accommodations since the law became effective on July 1, 1963. One complaint against one establishment drew additional complaints through repeat of the violation. This proprietor persists in closing the place temporarily when Negroes approach as customers, but it is expected full compliance will be achieved once the proprietor fully understands that his is the only place in that area not complying with the public accommodations law and the other businesses are prospering.

Commission representatives are not assigned to check places of public accommodations to see if the "Notice To The Public" is displayed as required by the Act. However, in those places they patronize on their travels over the state the KCCR representatives do call attention to the poster and furnish a new one if the old one has been lost or destroyed. About fifty per cent of the covered establishments are posting this notice in a conspicuous place.

One proprietor commented when the KCCR representative thanked him for having the notice properly and prominently displayed: "Are you the guys who sent this poster?" "Let me thank you!" For years I've been secretly ashamed at myself for refusing to serve Negro and Mexican-Americans in my restaurant. I thought my customers didn't want me to serve them." "Then along came your poster with a copy of the new public accommodations law. I tacked up the sign and gave it a try. I served one or two Negroes -- nothing happened. Now I serve anyone who comes in the place and my customers never say a word to me about it, one way or the other. Maybe they never cared before; maybe your sign did the trick. At any rate, I feel better about the whole thing."

So, the silence is broken by a silent sign. The pieces are falling into place.

## Negroes Able to Enter Any General Facility in Area

## AS SILENT, EFFECTIVE

### Miss Sue Jenkins Describes Change to Relations Commission

A quiet revolution, one without fanfare but one which has opened up the doors of all Kansas City general hospitals to Negroes in the last 10 years, was described to the city human relations commission yesterday.

Miss Sue Jenkins, executive director of the Kansas City Area hospital association, said the work toward integration of the general hospital — hospitals performing surgical, obstetric, in- and out-patient care and other services — has been silent and effective.

**As No Discrimination**

"Today there is not a general hospital in the Kansas City metropolitan area which does not admit Negro patients, staff Negro doctors, or hire Negro technicians," she said.

In fact, Miss Jenkins said, integration has been so complete that a recent study of the racial policies and performance of Kansas City hospitals may be impossible to do again. Hospitals are no longer keeping records of Negro patients.

"They are just patients," said Miss Jenkins. "The only way to determine the number would be to count them when they come in."

There are problems remaining, Miss Jenkins said. They are found most in the area of staffing Negro doctors in predominantly white hospitals. And the problem is not one so much of exclusion, she said, but of the lack of Negro doctors. Of the 1,500 medical and osteopathic physicians in Kansas City, she said, only three per cent—about 50—are Negroes.

Dean Frederick D. Lewis, chairman of the commission, said the report of the association's study was encouraging.

**Was Difficult Before**

"Ten years ago," he said, "as a matter of policy, it was extremely difficult, if not impossible, for Negro citizens needing hospital care to be admitted to any but a very few area hospitals. This documents a marked advancement in the stated policies of hospitals in the Greater Kansas City area.

Dean Lewis then moved the commission commend the hospitals and the association for their work. The commission did.

Miss Jenkins said the survey of area hospitals included 44 facilities which are members of the association. Thirty-five answered the questionaire sent out. The remaining nine were small outlying hospitals, the largest being the Olathe Community hospital.

Of the 35 which answered, only the Ralph clinic, a 15-bed hospital which is devoted to the treatment of alcoholism and drug addiction, stated that it would not accept races other than white.

"But of all the major hospitals," said Miss Jenkins, "not one has a policy of excluding Negroes. Only one has a segregated nursing school. That one is St. Luke's. They state that applicants must be female caucasians, a statement I resent not only for its discrimination against races, but for its discrimination against men. A whole new field of nursing opportunities for men is now open."

**Performance Also Studied**

Miss Jenkins said the survey included not only the policies of the hospitals but their performance in carrying out their stated policies.

Miss Jenkins said the study was prompted by a similar study made in 1953 by Community Studies, Inc.

"That report came as a sense of shock to all of us," she said. "It showed that Kansas City had an extremely limited number of places where Negro patients, physicians and doctors could go."

Miss Jenkins said that one predominantly white hospital now has seven Negro physicians on its staff, Negro instructors, nurses, nursing supervisors, dietitians, and pharmacists, and admits Negroes to its professional schools. Ten years ago that hospital had two rooms set aside for Negroes, and Negro doctors could practice there if their patients' bills were paid by workmen's compensation.

"What has happened has taken hard work," said Miss Jenkins. "And we have come a long way."

Lewis announced to the commission that the President's Cabinet of the Association of Community council has endorsed the public accommodations ordinance which will be voted on in the April special election.

# Human Relations Classes For Some City Employees

An in-service training program in the field of human relations will start February 4 at the City hall for personnel of the community service division and the public recreation division of the city welfare department.

The classes, meeting each Tuesday for six weeks, will be arranged by Richard Anderson, executive secretary of the Kansas City commission on human relations.

### View of Problems

The program will deal with intergroup problems that generally involve Negroes. James D. H. Reefer, welfare director, said community service and public recreation division members constantly are out in the community and need to understand human relations problems and how to deal with them.

The in-service program will be the third launched in the welfare department since Reefer was appointed department head by Carleton F. Sharpe, city manager.

Reefer said he plans to make such training programs a regular part of department operations.

Parole section case workers and employees completed a training program in the fall on alcoholism and its treatment. The course is being offered again for municipal farm and women's reformatory personnel.

### May Consider Neighborhoods

Also under consideration is a program for the community service division on fundamentals of community organization and neighborhood problems.

A frequent criticism of the personnel program of the city has been the omission in recent years of on-the-job training program.

# BEGIN LINE-UP FOR RACE REFERENDUM

### Steering Committee Is Organized to Support Public Accommodations Bill

## TRADITION AT STAKE

### Ordinance Expresses Right of All to Be Treated as Humans, Rev. Judd Jones Says

Formation of a steering committee to organize support of Kansas City's public-accommodations ordinance in the expected referendum on the issue was announced yesterday.

Launched under the auspices of the Kansas City Council on Religion and Race, the committee also includes delegates of the Co-ordinating Council on Human Relations, representing 45 civic groups concerned with human rights.

The Rev. Judd H. Jones, chairman of the Council on Religion and Race, said the steering committee was organized to stress the moral aspect of the choice that will be put to voters in the referendum.

**Repeal Against Tradition**

"In passing the ordinance, the Kansas City city council simply recognized the right of all our citizens to be treated as human persons," Mr. Jones said. "This law is an expression of our best religious and political traditions. To repeal it now would be a denial of those traditions. It would hurt race relations here, and it would hurt the reputation of Kansas City everywhere."

Mr. Jones said he was confident the ordinance would be approved by the people if submitted to referendum by the city council, "provided only that we do a vigorous and effective job of alerting the voters on the kind of choice they will be making."

Eight persons were nominated to be the nucleus of the steering committee in a meeting of the Religion and Race council's executive committee held Thursday in the student union of the University of Missouri at Kansas City. All accepted their appointments yesterday, Mr. Jones said.

**To Select 7 Others**

The committee itself will recruit seven additional members, three citizens to serve as representatives of the community at large, and four specialists to direct subcommittees on campaign strategy, finance, endorsements and publicity.

Representing the Religion and Race council:

The Rev. Lawrence W. Bash, Country Club Christian church; Msgr. Richard J. Schumacher, vicar general of the Catholic Diocese of Kansas City-St. Joseph and pastor of St. Elizabeth's church; Rabbi William B. Silverman, Temple B'nai Jehudah, and the Rev. Lemoyne Whitlock, Bethel A. M. E. church, president of the Interdenominational Ministerial Alliance.

Committee members representing human-rights agencies:

Mrs. A. Harold Schmidt, 456 East Fifty-fifth, United Church Women; Miss Lena Rivers Smith, 4247 Bellefontaine, Community Council for Social Action; Howard Sachs, 816 West Sixty-eighth terrace, American Jewish committee, and William F. Bartholome, 15 East Fifty-sixth, Catholic Interracial council.

Initial steps toward formation of the steering committee were taken at a meeting of the Co-ordinating Council on Human Relations held October 16 at the First Congregational church, 3619 Admiral boulevard. Among groups represented on the council:

Fellowship House association, American Jewish Congress, Anti-Defamation League of Greater Kansas City, Congress of Racial Equality, human-relations committees of the Council of Churches, League of Women Voters and Missouri Association for Social Welfare; Episcopal Society for Racial and Cultural Unity, Greater Kansas City Civil Liberties Union, Jewish Community Relations bureau, Lutheran Human Relations association, Kansas City chapter, National Association for the Advancement of Colored People; Presbyterian Neighborhood center, Panel of Americans, Urban League, American GI Forum, Diocesan Council of Catholic Women, National Conference of Christians and Jews, and Jackson County Civil Rights Advisory committee.

# *Panel Is Set Up For Study of Human Relations*

A panel of consultants requested by the Chamber of Commerce committee on equal employment opportunity has been appointed by Dr. Frederick D. Lewis, chairman of the city's Commission on Human Relations.

The nine persons named will serve as advisers to the committee on matters of concern to Negroes and organizations active in efforts to expand preparation for, and utilization of equal employment opportunities.

The appointees:

Dr. Girard T. Bryant, educator; Fletcher Daniels, labor leader; Isadore H. Gross, sr., businessman; Lee McKaney, labor leader; Dr. Carl M. Peterson, surgeon; Clifford M. Spottsville, lawyer; Lee V. Swinton, lawyer; Mrs. Gwendolyn Wells, lawyer, and the Rev. F. LeMoyne Whitlock, minister.

Serving as special resource persons to the committee:

The Rev. Isaiah Henderson, jr., and Herman Johnson, members of the commission; Lounneer Pemberton, executive director of the Urban League of Kansas City, and Dr. Earl Thomas, former principal of Lincoln high school.

"These people are widely known and respected for their abilities, experiences, and sound judgment," Lewis said. "Their thinking will be extremely valuable to the chamber's committee as it seeks constructive solutions to very complex problems. Although these persons were not selected as representatives of organizations, the panel includes persons active in the N. A. A. C. P., the Urban League, C. O. R. E. and C. C. S. A. By their acceptance of these appointments, they will again be serving the entire Kansas City community in a highly significant way."

PLANS FOR A SURVEY of job potential in Kansas City are discussed at a meeting of the Chamber of Commerce committee on equal employment opportunity. At the meeting table (clockwise from bottom left) are: H. L. Rogers, manager of industrial relations for the chamber; Lewis W. Clymer, municipal court judge; Floyd Lubert, personnel director; Chester P. Hoevel, industrial relations manager; Dr. Frederick Lewis, human relations commission chairman; V. S. Hanson, chemical company official; Meyer L. Goldman, printer and publisher; L. E. Kinser, Building and Construction Trades council; Robert J. Metzler, insurance executive, and D. Peter Newquist, industrial relations and security officer, chairman.

# A CHAMBER GROUP PLANS JOB SURVEY

### Committee on Equal Employment Opportunity Begins Work

## AS GUIDE TO BUSINESS

### Recommendations Will Be Made After Survey Is Completed

Preparation for a city-wide job potential survey, directed by the new Chamber of Commerce committee on equal employment opportunity, was begun at the group's first meeting today in the chamber's offices.

The survey was described as the first step in evaluating the placement and training needs of manpower resources in the community.

**Basis for Action**

It will also serve as the basis for recommendations to employers, aimed at erasing discrimination against minority wage-earners in the areas of hiring, training, promotion, layoffs and pay scale.

"We have a tremendously interesting voyage and challenge ahead of us," D. Peter Newquist, chairman, told the committee.

"The Kansas City business community wants equal employment opportunity, and it wants guidance," he said. "I think we can supply that direction.

"We will not have any authority—no club, really — over these businessmen," Newquist added. "But I believe we can make some recommendations and provide suggested programs."

At today's meeting, the committee requested that Dr. Frederick Lewis prepare a list of consultants from the Negro community to whom it could turn for information.

Dr. Lewis, dean of the University of Missouri at Kansas City law school, is chairman of the mayor's commission on human relations.

# EQUAL WORK IS AIM OF GROUP

**Chamber of Commerce Job Opportunity Committee to Meet Tuesday**

## ON HIRING PRACTICES

**Employment and Training Goals Outlined by Chairman**

The Kansas City Chamber of Commerce committee on equal employment opportunity will hold its first meeting, an organizational session, at 10 o'clock Tuesday, it was announced today.

The committee was formed, by a 19 to 0 vote of the chamber's board of directors, to develop a program for encouraging the city's employers to hire and promote personnel impartially, without regard to race, creed or color.

D. Peter Newquist, 5609 West Seventy-eighth street, Prairie Village, has been named chairman of the 11-member committee. Newquist is assistant director of industrial relations and security, The Bendix corporation. Other members:

Lewis W. Clymer, municipal court judge; Ernest A. Dick, Jack Henry, Inc.; Meyer L. Goldman, Beacon Printing & Publishing Co.; Virgil S. Hanson, Spencer Chemical company; Walter Hiersteiner, Tension Envelope company.

Chester P. Hoevel, Ford Motor company; L. E. Kinser, Building and Construction Trades council; Floyd Lubert, Western Electric company; Robert J. Metzler, Metzler Brothers and company; Dale M. Thompson, City Bond and Mortgage company.

D. Peter Newquist

"We intend to come up with a constructive, objective program to assist Greater Kansas City business men to implement equal employment programs in their own companies," Newquist said.

Part of the effort, he indicated, may include solicitation of major business concerns for employees to serve as instructors in vocational training education.

"After the program is established," he said, "we want to share it with anyone who'll listen to us. We'll be working with members of the Negro community and the mayor's human relations commission."

Newquist said he hopes the committee will be able within a month to present an outline of its program for consideration by the board of the 2,000-plus-member chamber.

Techniques of carrying the equal employment message to Kansas City employers likely will include direct letters, brochures and public speakers.

# THE CHAMBER CONSIDERS JOB EQUALITY

THE Kansas City Chamber of Commerce, in moving to establish a committee on equality in employment opportunity, is performing a real service for the community and, in particular, its commercial interests.

This would have been an easy one for the Chamber board to have ducked. The proposal could have been tabled, continued and forgotten. Instead, the board chose to show the kind of leadership that a Chamber concerned with the facts of life is expected to show.

In the face of pressures to hire without regard to race, it ought not to be assumed that most—or even a majority—of businesses in this area are resisting the trend. Unquestionably there are business executives of conscience and good will who are quite ready to drop a tradition against hiring Negroes.

In many cases such a tradition probably isn't so much a formal, deliberate policy, but something that "always has been that way." The report noted that "businessmen, understandably, are hesitant to move alone into this uncertain area, but would not be as reluctant to do so if it were done on a broad community basis." The Chamber committee, through studies of employment policies, vocational and on-the-job training and scholarship needs, can provide the basic information necessary for a smooth transition.

Last fall the Kansas City Chamber of Commerce removed from its by-laws restrictions limiting membership to "white male citizens." Now it is taking positive action to deal with a problem that affects the commercial structure, prosperity and employment picture of the community. Furthermore, it provides a standout example of moderate leaders tackling a situation that otherwise would have left a natural vacuum in which extremists on both sides would be expected to clash. If the Chamber had ignored the problem it would have done both the city and its membership an injustice.

# C. OF C. HITS JOB BIAS

## Kansas City Chamber Board Endorses Principle of Equal Employment Opportunity—Forms Committee to Lead the Way

## VOTE IS 19 TO 0

### Advancement Policies, Training Programs, Scholarship Needs to Be Studied

## AHEAD ON CONFERENCE

### Talks With Air Force Procurement Officials Set for Sept. 24

The Kansas City Chamber of Commerce board of directors endorsed the principle of equal employment opportunity yesterday and agreed to set up a committee to study ways of implementing it.

Nineteen board members voted to endorse equal employment opportunity regardless of race, creed, color or national origin and to set up the study committee. One member abstained from voting, but none dissented.

Meeting at the Hotel Phillips, members of the board discussed a report by a preliminary study group that considered the problem of discrimination in employment.

**To Suggest Methods**

The new committee will be authorized to investigate and recommend ways the principle of equal employment opportunity may be implemented in:

- Employment and advancement policies.
- Vocational and on-the-job training programs.
- Scholarship needs.

The study group report stated the group was "strongly of the opinion that local industry very much wants leadership and is expecting it from the Chamber of Commerce."

"Businessmen, understandably, are hesitant to move alone into this uncertain area," the report said, "but would not be as reluctant to do so if it were done on a broad community basis."

**Senator to Speak**

The board also agreed to continue with plans for an Air Force procurement conference September 24 at which the principal speaker will be Sen. Stuart Symington (D-Mo.).

The conference will be from 9 until 4 o'clock at the Hotel Muehlebach. Symington will speak at a luncheon. On the program with him is Lt. Gen. Thomas P. Gerrity, Air Force deputy chief of staff for systems and logistics.

The purpose of the conference, chamber officials said, is to bring Kansas City manufacturers into contact with government officials charged with procurement and representatives of government prime contractors.

**Available for Talks**

About 10 federal officials and six prime contractors will be represented. Each will be set up at a table in the hotel, and Kansas City manufacturers will have a chance to talk to each.

Chamber officials said it was hoped that Kansas City manufacturers might discover opportunities to produce subassemblies for the prime contractors, and that they might pick up ideas for direct bidding on government contracts from the government procurement representatives.

Members of the study group who prepared yesterday's recommendations:

Robert Patterson, C. J. Patterson company; Forrest McCluney, Schlitz brewing company; Ernest Dick, Jack Henry, Inc.; Richard Jeffries, General Motors; Virgil Hansen, Spencer Chemical; Ken Krakauer, Adler's; Chester Hoevel, Ford Motor company; D. P. Newquist, Bendix corporation, and Dean Frederick D. Lewis of the University of Missouri at Kansas City law school, who is also chairman of the Kansas City Commission on Human Relations.

# EQUAL ACCOMMODATIONS

## PURPOSE:

Equal opportunity and access to public facilities is a right of every citizen. To guarantee these rights Kansas needs a Public Accommodations law with broad coverage and administrative enforcement.

## NEED

Present Kansas Public Accommodations law is relatively ineffective because of:

— limited coverage

— inconsistent enforcement

— difficulty in obtaining conviction for violation of this criminal statute

Places of public accommodations, amusement, resort, or recreation means any establishment which caters or offers its services or facilities or goods to the general public.

*UNDER PROPOSED BILL* it would be unlawful for the owner, manager or employee of any place of public accommodation to:

Refuse, withhold or deny to any person, because of his race, religion, color, national origin or ancestry, either directly or indirectly, any of the accommodations, advantages, facilities or privileges of such place of public accommodation, resort or amusement.

This Act shall not repeal any other Kansas statute on civil rights.

## ENFORCEMENT

Administration by the Kansas Commission on Civil Rights.

## PROCEDURE

*Verified complaint* in writing by:

— any person claiming to be aggrieved by an alleged unlawful discriminatory practice
— the Attorney General
— a proprietor

*Investigation* by the Kansas Commission on Civil Rights.

*Conciliation* — Commissioners and staff seek to eliminate unlawful practice by conference and conciliation.

## PUBLIC HEARING

— when conciliatory efforts fail to eliminate unlawful practices.

## COURT ENFORCEMENT

— to secure enforcement of the Commission's order.

## PENALTIES

— for willful resistance or violation of the Commission's order shall be imprisonment for not more than one year or by a fine of not more than $500 or both.

Additional information may be obtained by contacting:

Kansas Advisory Council on Civil Rights
Mrs. Nathan Shechter, *Chairman*
5723 Windsor Drive
Mission, Kansas

Atty. Samuel Jackson, *Vice-Chairman*
514 Kansas Avenue
Topeka, Kansas

## PUBLIC PLACES INCLUDE:

Restaurants, eating places

Ice cream parlors, soda fountains

Bars, taverns, saloons

Hotels, motels, rooming houses

Hospitals, clinics, drug stores

Kindergartens, schools, colleges, libraries

Retail stores

Barber shops

Beauty parlors

Theaters, motion picture theaters

Skating rinks

Bowling alleys, billard parlors

Amusement, recreation parks

Swimming pools, gymnasiums

Airport facilities

Fairs

Garages

Public transportation facilities

Other establishments open to the public

# PRE-EMPLOYMENT INQUIRY GUIDE

| SUBJECT | LAWFUL PRE-EMPLOYMENT INQUIRIES | UNLAWFUL PRE-EMPLOYMENT INQUIRIES |
|---|---|---|
| **1. NAME** | Maiden name.<br>Name used if previously employed under different name. | Inquiry into previous name where it has been changed by court order, or otherwise. |
| **2. ADDRESS** | Inquiry into place and length of current and previous addresses. | Specific inquiry into foreign addresses which would indicate national origin. |
| **3. BIRTHPLACE** | To ask that applicant AFTER being hired be able to submit a birth certificate or other proof of United States citizenship. | Birthplace of applicant.<br>Birthplace of applicant's parents, spouse or other close relatives.<br>Requirement that applicant submit birth certificate, naturalization or baptismal record. |
| **4. RACE OR COLOR** | Color of applicant's eyes or hair. | Any inquiry which would indicate race or color. |
| **5. PHOTOGRAPHS** | May be required AFTER hiring for identification purposes. | Requirement that applicant affix a photograph to his application form.<br>Request applicant, at his option, to submit photograph.<br>Requirement of photograph after interview but before hiring. |
| **6. RELIGION - CREED** | | Inquiry into an applicant's religious denomination, religious affiliations, church, parish, pastor, or religious holidays observed.<br>An applicant may not be told "This is a Protestant (Catholic or Jewish, etc.) organization." |
| **7. CITIZENSHIP** | Are you a citizen of the United States?<br>If not a citizen of the United States, does applicant intend to become a citizen of the United States?<br>If you are not a United States citizen, have you the legal right to remain permanently in the United States?<br>Requirement that applicant state whether he has ever been interned or arrested as an enemy alien.<br>Whether applicant's parents or spouse are citizens of the United States. | Whether an applicant is naturalized or a native-born citizen; the date when the applicant acquired citizenship.<br>Requirement that an applicant produce his naturalization papers or first papers. |
| **8. NATIONAL ORIGIN** | Inquiry into languages applicant speaks and writes fluently.<br>What foreign languages do you read fluently? Write fluently? Speak fluently? | Inquiry into an applicant's lineage, ancestry, national origin, descent, parentage, and nationality.<br>Nationality of applicant's parents or spouse.<br>What is your mother tongue?<br>Inquiry into how applicant acquired ability to read, write or speak a foreign language. |
| **9. EDUCATION** | Inquiry into what academic, professional, or vocational schools attended. | Any inquiry asking specifically the nationality, racial, or religious affiliation of a school. |

| | | |
|---|---|---|
| **10. CHARACTER** | Have you ever been arrested or convicted of any crime? If so, when, where and disposition of case? | |
| **11. RELATIVES** | Names of applicant's parents, spouse and minor dependent children.<br>Names of applicant's relatives already employed by this company.<br>Do you live with your parents? If not, with whom do you live? What family have you? | Name and address of any relative of adult applicant other than applicant's spouse or children. |
| **12. NOTICE IN CASE OF EMERGENCY** | Name and address of person to be notified in case of accident or emergency. | |
| **13. ORGANIZATIONS** | Inquiry into organization memberships, excluding any organization, the name or character of which indicates the race, religion, color, national origin or ancestry of its members. | List all organizations, clubs, societies, and lodges to which you belong. |
| **14. MILITARY SERVICE** | Inquiry into an applicant's military experience in the Armed Forces of the United States. | Inquiry into military service in armed service of any other country. |

ANY INQUIRY IS FORBIDDEN WHICH, ALTHOUGH NOT SPECIFICALLY LISTED AMONG THE ABOVE, IS DESIGNED TO ELICIT INFORMATION AS TO RACE, RELIGION, COLOR, NATIONAL ORIGIN OR ANCESTRY IN VIOLATION OF THE LAW.

## PURPOSE OF THE GUIDE

On July 1, 1961, the Kansas Act Against Discrimination as amended by the 1961 Kansas Legislature became effective. Under this law it is illegal for employers, labor unions, or employment agencies to discriminate against persons because of their race, religion, color, national origin or ancestry.

The law contains a number of specific provisions designed to assist in preventing such discrimination in employment or union membership. One of these forbids eliciting information from applicants, prior to employment, which would indicate the applicant's race, religion, color, national origin or ancestry.*

Because this prohibition makes necessary some changes in the content of application forms as well as questions sometimes asked of applicants, this guide is provided to assist all concerned in understanding and applying the law.

It should be understood clearly that this pamphlet is not a complete definition of what can be asked of applicants. It attempts to answer the questions most frequently asked concerning the law. This Act is not intended to prohibit employers or unions from obtaining all the information about applicants they deem pertinent, so long as the questions do not elicit information which could be used for discriminatory purposes.

---

* The provisions of the Act relating to inquiries of applicants before their employment or admittance to union membership are as follows:

> "SEC. 5. It shall be an unlawful employment practice: (*c*) For any employer, employment agency or labor organization to print or circulate or cause to be printed or circulated any statement, advertisement or publication, or to use any form of application for employment or membership or to make any inquiry in connection with prospective employment or membership, which expresses, directly or indirectly, any limitation, specification or discrimination as to race, religion, color, national origin or ancestry, or any intent to make any such limitation, specification or discrimination, unless based on a bona fide occupational qualification."

Applicants should not be encouraged to volunteer information forbidden by law.

This Act does not restrict the rights of employers or unions to define qualifications necessary for satisfactory job performance, but does require that these same standards of qualifications for hiring or membership be applied equally to all persons.

The provisions of the law make necessary the regulation of employment practices. The Commission recognizes that mere routine adherence will not accomplish the results intended by the Legislature. Employment discrimination can be eliminated only if regulations are followed in the spirit as well as the letter in which the law was conceived.

Any employer or labor union desiring an exemption under Sec. 5 (*c*) on the basis of applicable security regulations established by the United States or the state of Kansas or on the basis of bona fide occupational qualifications which are considered essential to a particular position or occupation may make written inquiry to the Commission on Civil Rights for a ruling that such inquiry be permitted.

Further information concerning the Kansas Act Against Discrimination, or additional interpretation thereof, may be obtained by contacting the office of the Kansas Commission on Civil Rights.

### Note One

The Kansas Act Against Discrimination, as amended in 1961, prohibits discriminatory *employment* practices based on race, religion, color, national origin or ancestry. Effective July 1, 1961, the Act is administered by the Kansas Commission on Civil Rights.

---

### Note Two

The Kansas Act Against Discrimination, as amended in 1963, prohibits discrimination in hotels, motels, cabin camps and restaurants because of race, religion, color, national origin or ancestry. Effective July 1, 1963, the Act is administered by the Kansas Commission on Civil Rights.

An aggrieved person has the option of filing a complaint under this Act with the Kansas Commission on Civil Rights or with a county attorney under Chapter 21, Art. 2424, 1959 Supp., General Statutes of Kansas (see p. 12, this pamphlet).

# The Kansas Act Against Discrimination

**(Chapter 44, Art. 10, 1953 Supp., General Statutes of Kansas; amended, L. 1961, ch. 248; amended, L. 1963, ch. 279.)**

**44-1001. Title of act; declaration of state policy and purpose of act.** This article shall be known as the Kansas act against discrimination. It shall be deemed an exercise of the police power of the state for the protection of the public welfare, safety, health and peace of the people of this state. The practice or policy of discrimination against individuals in relation to employment or in relation to full and equal accommodations in hotels, motels, cabin camps and restaurants by reason of their race, religion, color, national origin or ancestry is a matter of concern to the state, that such discrimination threatens not only the rights and privileges of the inhabitants of the state of Kansas but menaces the institutions and foundations of a free democratic state. It is hereby declared to be the policy of the state of Kansas to eliminate discrimination in all employment relations and to eliminate and prevent discrimination, segregation, or separation in hotels, motels, cabin camps and restaurants. It is also declared to be the policy of this state to assure equal opportunities and encouragement to every citizen regardless of race, religion, color, national origin or ancestry, in securing and holding, without discrimination, employment in any field of work or labor for which he is properly qualified, and to assure equal opportunities to all persons within this state to full and equal accommodations regardless of such distinctions in every hotel, motel, cabin camp or restaurant. It is further declared that the opportunity to secure and to hold employment, and the opportunity for full and equal accommodations in hotels, motels, cabin camps or restaurants are civil rights of every citizen. To protect those rights, it is hereby declared to be the purpose of this act to establish and to provide a state commission having power to eliminate discrimination in employment or in hotels, motels, cabin camps or restaurants because of race, religion, color, national origin or ancestry, either by employers, labor organizations, employment agencies or other persons as hereinafter provided. [L. 1953, ch. 249, § 1; L. 1961, ch. 248, § 1; L. 1963, ch. 279, § 1; July 1.]

**44-1002. Definitions.** When used in this act: (*a*) The term "person" includes one or more individuals, partnerships, associations, organizations, corporations, legal representatives, trustees, trustees in bankruptcy, or receivers. (*b*) The term "employer" includes any person in this state employing eight (8) or more persons, and any person acting directly or indirectly for an employer as herein defined, and labor organizations, nonsectarian corporations, and organizations engaged in social service work, and the state of Kansas and all political and municipal subdivisions thereof, but shall not include a nonprofit religious, charitable, fraternal,

social, educational, or sectarian association or corporation. (*c*) The term "employee" does not include any individual employed by his parents, spouse, or child, or in the domestic service of any person. (*d*) The term "labor organization" includes any organization which exists for the purpose, in whole or in part, of collective bargaining or of dealing with employers concerning grievances, terms or conditions of employment, or of other mutual aid or protection in relation to employment. (*e*) The term "employment agency" includes any person or governmental agency undertaking with or without compensation to procure opportunities to work, or to procure, recruit, refer, or place employees. (*f*) The term "commission" means the commission on civil rights created and amended by this act. (*g*) The term "unlawful employment practices" includes only those unlawful practices and acts specified in section 44-1009 of the General Statutes Supplement of 1961, and includes segregate or separate. (*h*) The words "hotel," "motel" and "restaurant" shall each have the meanings ascribed to them respectively by sections 36-101 and 36-301 of the General Statutes Supplement of 1961, but shall not include a nonprofit religious, fraternal, or sectarian association or corporation. (*i*) The term "unlawful discriminatory practice" means any discrimination against persons or segregation or separation of persons in a hotel, motel, cabin camp or restaurant by reason of their race, religion, color, national origin, or ancestry. [L. 1953, ch. 249, § 2; L. 1961, ch. 248, § 2; L. 1963, ch. 279, § 2; July 1.]

**44-1003. Commission on civil rights; membership; appointment; qualifications; chairman; terms; vacancies; quorum; compensation; director, salary; staff.** There is hereby created a commission to be known as the antidiscrimination commission: *Provided,* After the effective date of this act, said commission shall be known as the commission on civil rights: *Provided further,* Persons appointed as members of the antidiscrimination commission shall continue to serve for the remainder of their terms as members of the commission on civil rights and until their successors are appointed and qualified. Said commission shall consist of five (5) members, two (2) of whom shall be representative of industry, two (2) of whom shall be representative of labor, and one (1) of whom shall be from the public at large, to be known as commissioners, who shall be appointed by the governor, and one (1) of whom shall be designated by the governor as chairman, who shall preside at all meetings of the commission and perform all the duties and functions of the chairman thereof. The commission may designate one (1) of its members to act as chairman during the absence or incapacity of the chairman, and, when so acting, the member so designated shall have and perform all the duties and functions of the chairman of the commission. The term of office of each member of the commission shall be for four (4) years and until his successor is qualified: *Provided,* That of the commissioners first appointed, one (1) shall be appointed for a term of one (1) year, one (1) for a term of two (2) years, one (1) for a term of three (3) years, and two (2) for a term of four (4) years. Any member chosen to fill a vacancy oc-

curring otherwise than by expiration of term, shall be appointed for the unexpired term of the member whom he is to succeed. A majority of the then members of the commission shall constitute a quorum for the purpose of conducting the business thereof. Vacancies in the commission shall not impair the right of the remaining members to exercise all the powers of the commission. Each member of the commission shall receive as compensation for his services, the sum of fifteen dollars ($15) per day for each day actually spent in the discharge of his official duties: *Provided,* This limitation shall not apply to any expenses actually incurred by any member in traveling to and from the sessions of the commission or during the actual attendance of the same; nor to the necessary and actual expense incurred by any such member in the performance of his official duties as provided and set forth in this act. The commission shall employ a full-time executive director who shall receive a salary not less than seven thousand eight hundred dollars ($7,800) and not to exceed nine thousand five hundred dollars ($9,500) per year, as fixed by the commission. The commission shall employ such professional staff and full or part-time legal, stenographic and clerical assistance as shall be necessary to carry out the provisions of this act and fix the amount of their compensation: *Provided, however,* That the appointment and compensation of legal counsel shall be approved by the attorney general. [L. 1953, ch. 249, § 3; L. 1961, ch. 248, § 3; June 30.]

**44-1004. Powers and duties of commission.** The commission shall have the following functions, powers and duties:

(1) To establish and maintain its principal office in the city of Topeka, and such other offices elsewhere within the state as it may deem necessary.

(2) To meet and function at any place within the state.

(3) To adopt, promulgate, amend and rescind suitable rules and regulations to carry out the provisions of this act, and the policies and practices of the commission in connection therewith.

(4) To receive and investigate complaints alleging discrimination in employment because of race, religion, color, national origin or ancestry, or alleging unlawful discriminatory practices because of race, religion, color, national origin or ancestry.

(5) To hold hearings, administer oaths, take the testimony of any person under oath, and, in connection therewith, to examine any books or papers relating to any matter under investigation or in question before the commission. No person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter or thing concerning which he testifies or produces evidence, except that such person so testifying shall not be exempt from prosecution and punishment for perjury committed in so testifying. The immunity herein provided shall extend only to natural persons.

(6) To endeavor to eliminate prejudice among the various ethnic groups in this state and to further good will among such groups. The commission in co-operation with the state department of edu-

cation shall prepare a comprehensive educational program designed for the students of the public schools of this state and for all other residents thereof, calculated, to emphasize the origin of prejudice against such groups, its harmful effects, and its incompatibility with American principles of equality and fair play.

(7) To create such advisory agencies and conciliation councils, local, regional, or state-wide, as in its judgment will aid in effectuating the purposes of this act, to study the problem of discrimination in all or specific fields or instances of discrimination because of race, religion, color, national origin or ancestry; to foster, through community effort or otherwise, good will, co-operation and conciliation among the groups and elements of the population of this state, and to make recommendations to the commission for the development of policies and procedures, and for programs of formal and informal education, which the commission may recommend to the appropriate state agency. Such advisory agencies and conciliation councils shall be composed of representative cititzens serving without pay. The commission may itself make the studies and perform the acts authorized by this paragraph. It may, by voluntary conferences with parties in interest, endeavor by conciliation and persuasion to eliminate discrimination in all the stated fields and to foster good will and co-operation among all elements of the population of the state.

(8) To accept contributions from any person to assist in the effectuation of this section and to seek and enlist the co-operation of private, charitable, religious, labor, civic and benevolent organizations for the purposes of this section.

(9) To issue such publications and such results of investigation and research as in its judgment will tend to promote good will and minimize or eliminate discrimination because of race, religion, color, national origin or ancestry.

(10) To render each year to the governor and to the state legislature a full written report of all its activities and of its recommendations.

(11) To adopt an official seal. [L. 1953, ch. 249, § 4; L. 1961, ch. 248, § 4; L. 1963, ch. 279, § 3; July 1.]

**44-1005. Verified complaints by or for aggrieved persons; filing; investigation; determination; conference and conciliation; notice and answer, when; hearing; procedure; orders; rules of practice; limitation on time for filing complaints.** Any person claiming to be aggrieved by an alleged unlawful employment practice or by an alleged unlawful discriminatory practice may, by himself or by his attorney-at-law, make, sign, and file with the commission a verified complaint in writing which shall state the name and address of the person, employer, labor organization or employment agency alleged to have committed the unlawful employment practice complained of or the name and address of the person alleged to have committed the unlawful discriminatory practice complained of, and which shall set forth the particulars thereof and contain such other information as may be required by the commission. The attorney general may,

in like manner, make, sign and file such complaint. Any employer whose employees, or some of whom, refuse or threaten to refuse to co-operate with the provisions of this act, may file with the commission a verified complaint asking for assistance by conciliation or other remedial action.

After the filing of any complaint by an aggrieved individual, or by the attorney general, the commission shall designate one of the commissioners to make, with the assistance of the commissioner's staff, prompt investigation of the alleged act of discrimination. If such commissioner shall determine after such investigation that no probable cause exists for crediting the allegations of the complaint, he shall, within ten (10) days from such determination, cause to be issued and served upon the complainant written notice of such determination.

If such commissioner after such investigation, shall determine that probable cause exists for crediting the allegations for the complaint, the said commissioner or such other commissioner as the commission may designate, shall immediately endeavor to eliminate the unlawful employment practice or the unlawful discriminatory practice complained of by conference and conciliation. The members of the commission and its staff shall not disclose what has transpired in the course of such endeavors.

In case of failure so to eliminate such practice, or in advance thereof, if in the judgment of the commissioner or the commission circumstances so warrant, the said commissioner or the commission shall cause to be issued and served in the name of the commission, a written notice, together with a copy of such complaint, as the same may have been amended, requiring the person, employer, labor organization or employment agency named in such complaint, hereinafter referred to as respondent, to answer the charges of such complaint at a hearing before the commission at a time not less than ten (10) days after the service of said notice. The place of such hearing shall be in the county where respondent is doing business and the acts complained of occurred.

The case in support of the complaint shall be presented before the commission by one of its attorneys or agents, or by private counsel, if any, of the complainant, and the commissioner who shall have previously made the investigation shall not participate in the hearing except as a witness, nor shall he participate in deliberations of the commission in such case; and the aforesaid endeavors at conciliation shall not be received in evidence.

The respondent may file a written verified answer to the complaint and appear at such hearing in person or otherwise, with or without counsel, and submit testimony. The complainant shall appear at such hearing in person, with or without counsel, and submit testimony. Any individual or individuals filing such a complaint must appear in person at such hearing. The commission or the complainant shall have the power reasonably and fairly to amend any complaint, and the respondent shall have like power to amend his answer. The commission shall be bound by the rules of evidence prevailing in courts of law or equity, and only relevant

evidence of reasonable probative value shall be received. Reasonable examination and cross-examination shall be permitted. All parties shall be afforded opportunity to submit briefs prior to adjudication. The testimony taken at the hearing shall be under oath and be transcribed.

If, upon all the evidence in the hearing, the commission shall find a respondent has engaged in or is engaging in any unlawful employment practice or unlawful discriminatory practice as defined in this act, the commission shall state its findings of fact and shall issue and cause to be served on such respondent an order requiring such respondent to cease and desist from such unlawful employment practice or such unlawful discriminatory practice and to take such affirmative or other action, including the hiring, reinstatement with or without back pay, or upgrading of employees admission or restoration to membership in any respondent labor organizations, as, in the judgment of the commission, will effectuate the purposes of this act, and including a requirement for report of the manner of compliance.

If, upon all the evidence, the commission shall find that a respondent has not engaged in any such unlawful employment practice, or any such unlawful discriminatory practice, the commission shall state its findings of fact and shall issue and cause to be served on the complainant an order dismissing the said complaint as to such respondent.

A copy of its order shall be delivered in all cases by the commission to the complainant, to the respondent, to the attorney general, and to such other public officers as the commission may deem proper.

The commission shall, except as otherwise herein provided, establish rules of practice to govern, expedite and effectuate the foregoing procedure and its own actions thereunder. Said rules shall be available, upon written request, within thirty (30) days after the date of adoption.

Any complaint filed pursuant to this act must be so filed within six (6) months after the alleged act of discrimination. [L. 1953, ch. 249, § 5; L. 1961, ch. 248, § 6; L. 1963, ch. 279, § 4; July 1.]

**44-1006. Construction of act.** The provisions of this act shall be construed liberally for the accomplishment of the purposes thereof. Nothing contained in this act shall be deemed to repeal any of the provisions of any other law of this state relating to discrimination because of race, color, religion, national origin or ancestry, unless the same is specifically repealed by this act. Nothing in this act shall be construed to mean that an employer shall be forced to hire unqualified or incompetent personnel, or discharge qualified or competent personnel. [L. 1953, ch. 249, § 6; L. 1963, ch. 279, § 5; July 1.]

**44-1007. Invalidity of part.** If any clause, sentence, paragraph or part of this act or the application thereof to any person or circumstances shall for any reason be adjudged by a court of competent jurisdiction to be invalid such judgment shall not affect, im-

pair or invalidate the remainder of this act and the application thereof to other persons or circumstances but shall be confined in its operation to the clause, sentence, paragraph or part thereof directly involved in the controversy in which such judgment shall have been rendered and the persons or circumstances involved. It is hereby declared to be the legislative intent that this act would have been adopted had such provisions not been included. [L. 1953, ch. 249, § 7; June 30.]

**44-1008.** [L. 1953, ch. 249, § 8; Repealed, L. 1961, ch. 248, § 12; June 30.]

**44-1009. Unlawful employment practices.** It shall be an unlawful employment practice: (*a*) For an employer, because of the race, religion, color, national origin or ancestry of any individual to refuse to hire or employ, or to bar or to discharge from employment such individual or to otherwise discriminate against such individual in compensation or in terms, conditions, or privileges of employment.

(*b*) For a labor organization, because of the race, religion, color, national origin or ancestry of any individual, to exclude or to expel from its membership such individual or to discriminate in any way against any of its members or against any employer or any individual employed by an employer.

(*c*) For any employer, employment agency or labor organization to print or circulate or cause to be printed or circulated any statement, advertisement or publication, or to use any form of application for employment or membership or to make any inquiry in connection with prospective employment or membership, which expresses, directly or indirectly, any limitation, specification or discrimination as to race, religion, color, national origin or ancestry, or any intent to make any such limitation, specification or discrimination, unless based on a bona fide occupational qualification.

(*d*) For any employer, employment agency or labor organization to discharge, expel or otherwise discriminate against any person because he has opposed any practices or acts forbidden under this act or because he has filed a complaint, testified or assisted in any proceeding under this act.

(*e*) For any person, whether an employer or an employee or not, to aid, abet, incite, compel or coerce the doing of any of the acts forbidden under this act, or to attempt to do so. [L. 1961, ch. 248, § 5; June 30.]

**44-1010. Rehearing, when; effect of order changing original decision.** Any party being dissatisfied with any order or decision of the commission may, within ten (10) days from the date of the service of such order or decision, apply for a rehearing in respect to any matter determined therein; the application shall be granted or denied by the commission within ten (10) days from the date same shall be filed, and if the rehearing be not granted within ten (10) days it shall be taken as denied. If a rehearing be granted the matter shall be determined by the commission within thirty (30) days

after the same shall be submitted. No cause of action arising out of any order or decision of the commission shall accrue in any court to any party unless such party shall make application for a rehearing as herein provided. Such application shall set forth specifically the ground or grounds on which the applicant considers such order or decision to be unlawful or unreasonable. No party shall, in any court, urge or rely upon any ground not set forth in said application. An order made after a rehearing abrogating, changing or modifying the original order or decision shall have the same force and effect as an original order or decision. [L. 1961, ch. 248, § 7; June 30.]

**44-1011. Enforcement of orders of commission; petition; transcript; appeals; procedure.** The attorney general or county attorney, at the request of the commission, may secure enforcement of the order of the commission by the district court of the county where the unlawful employment practice or unlawful discriminatory practice shall have occurred or where any person required in the order to cease and desist from an unlawful employment practice or unlawful discriminatory practice or to take any affirmative action resides or transacts business, through mandamus or injunction in appropriate cases, or by action to compel the specific performance of the order. Such proceeding shall be initiated by the filing of a petition in such court, together with a transcript of the record upon the hearing before the commission, and issuance and service of a copy of said petition as in civil actions. The court shall have power to grant such temporary relief or restraining order as it deems just and proper, and to make and enter upon the pleadings, testimony and proceedings an order or decree, enforcing, modifying, and enforcing, as so modified, or setting aside in whole or in part, the order of the commission.

The attorney general, county attorney or any person aggrieved by an order made by the commission may obtain judicial review thereof in the said court by filing with the clerk of said court within thirty (30) days from the date of service of the order, a written appeal praying that such order be modified or set aside. The appeal shall certify that notice in writing of the appeal, with a copy of the appeal, has been given to all parties who appeared before the commission at their last known address, and to the commission by service at the office of the commission at Topeka. The evidence presented to the commission, together with its findings and the order issued thereon, shall be certified by the commission to said district court as its return. No order of the commission shall be superseded or stayed during the proceeding on the appeal unless the district court shall so direct.

No objection that has not been urged before the commission shall be considered by the court unless failure or neglect to urge such objection shall be excused because of extraordinary circumstances.

The court shall hear the appeal with or without a jury and the court may, in its discretion, permit any party or the commission to submit additional evidence on any issue. Said appeal shall be

heard and determined by the court as expeditiously as possible. After hearing, the court may affirm the adjudication. If the adjudication by the commission is not affirmed, the court may set aside or modify it, in whole or in part, or may remand the proceedings to the commission for further disposition in accordance with the order of the court.

The commission's copy of the testimony shall be available at all reasonable times to all parties for examination without cost, and for the purpose of judicial review of the order. The review shall be heard on the record without requirement of printing.

The commission shall be deemed a party to the review of any order by the court.

The jurisdiction of the district court of the proper county as aforesaid shall be exclusive and its final order or decree shall be subject to review by the supreme court as in other cases upon appeal within thirty (30) days of the filing of such decision. [L. 1961, ch. 248, § 8; L. 1963, ch. 279, § 6; July 1.]

**44-1012. Posting of law and information.** Every person, employer, employment agency and labor union subject to this act, shall keep posted in a conspicuous place or places on his premises a notice or notices to be prepared or approved by the commission, which shall set forth excerpts of this act and such other relevant information which the commission shall deem necessary to explain the act. [L. 1961, ch. 248, § 9; L. 1963, ch. 279, § 7; July 1.]

**44-1013. Unlawful acts; penalties.** Any person, employer, labor organization or employment agency, who or which shall willfully resist, prevent, impede or interfere with the commission or any of its members or representatives in the performance of duty under this act, shall be guilty of a misdemeanor and upon conviction shall be punished by imprisonment for not more than one (1) year, or by a fine of not more than five hundred dollars ($500), or by both such fine and imprisonment; but procedure for the review of the order shall not be deemed to be such willful conduct. [L. 1961, ch. 248, § 10; June 30.]

**44-1014. Act inapplicable to adherents of certain religious creeds.** This act shall not apply to any member of or adherent to a religious creed whose tenets or practices include a refusal to recognize the flag of the United States of America or a refusal to serve in the armed forces of the United States of America. [L. 1961, ch. 248, § 11; June 30.]

*Following are the other Kansas statutes pertaining to civil rights:*

**Chapter 12, Art. 7**

**CITIES—Planning and Zoning**

(General Statutes of Kansas—1949)

**12-713.** Nothing herein contained shall be construed as authorizing the governing body to discriminate against any person by reason of race or color.

**Chapter 21, Art. 24**

**CRIMES AND PUNISHMENTS—Miscellaneous Offenses**

(1959 Supplement to General Statutes of Kansas—1949)

**21-2424.** If any of the regents or trustees of any state university, college, or other school of public instruction, or the state superintendent, or the owner or owners, agents, trustees or managers in charge of any hotel, as defined in section 36-101 of the General Statutes Supplement of 1957, or acts amendatory thereof, or any restaurant as defined in section 36-301 of the General Statutes Supplement of 1957, or acts amendatory thereof, or any place of public entertainment or public amusement, for which a license is required by any of the municipal authorities of this state, or the owner or owners or person or persons in charge of any railroad, bus, streetcar, or any other means of public carriage of persons within the state, shall make any distinction on account of race, color, religion, national origin or ancestry, the person so offending shall be deemed guilty of a misdemeanor, and upon conviction thereof in any court of competent jurisdiction shall be fined in any sum not more than one thousand dollars ($1,000).

**21-2461.** No person a citizen of the United States shall be refused or denied employment in any capacity on the ground of race or color, nor be discriminated against in any manner by reason thereof, in connection with any public work, or with the contracting for or the performance of any work, labor, or service of any kind on any public work by or on behalf of the state of Kansas, or any department, bureau, commission, board or official thereof, or by or on behalf of any county, city, township, school district or other municipality of said state.

**21-2462.** The provisions of this act shall apply to and become a part of any contract hereafter made by or on behalf of the state, or any department, bureau, commission, board or official thereof, or by or on behalf of any county, city, township, school district, or other municipality of said state, with any corporation, association or person or persons, which may involve the employment of laborers, workmen, or mechanics on any public work; and shall apply to contractors, subcontractors, or other persons doing or contracting to do the whole or a part of any public work contemplated by said contract.

**21-2463.** Any officer of the state of Kansas or of any county, city, township, school district, or other municipality, or any person acting under or for such officer, or any contractor, subcontractor, or other person violating the provisions of this act shall for each offense be punished by a fine of not less than fifty dollars or more than one thousand dollars, or by imprisonment of not more than six months or by both fine and imprisonment.

## LABOR AND INDUSTRIES—Labor Organizations

(General Statutes of Kansas—1949)

ACT OF 1941

**44-801.** No labor organization of any kind, agency or representative committee or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or any other conditions of work, shall be the representative unit for the purpose of collective bargaining in the state of Kansas in any of the trades, crafts, skilled and unskilled, work, labor or employment of any kind or capacity, which in any manner discriminates against, or bars, or excludes from its membership any person because of his race or color: *Provided*, That the provisions of this act shall not apply to labor organizations within the provisions of 48 U. S. Statutes 1186 and 49 U. S. Statutes 1189, title 45, sections 151 to 188, both inclusive.

KANSAS ANTI-DISCRIMINATION COMMISSION
STATE CAPITOL • TOPEKA, KANSAS

# PURPOSE

The Kansas Anti-Discrimination Commission has two major responsibilities:

(1) To administer the Kansas Act Against Discrimination, and

(2) To establish a long-range educational program designed to eliminate discrimination in employment based upon race, color, religion or national origin.

This pamphlet is a part of the Commission's educational program. It is written by a prominent Kansan who has kindly agreed to lend his talents to our field of concern.

# ABOUT THE AUTHOR

Dr. Harold W. Guest is Head of the Department of Economics and Business Administration at Baker University, Baldwin, Kansas.

He was born near Otsego, Mich., in 1895 and received a B. A. degree from Albion College in 1921, an M. A. degree from the University of Illinois in 1922, and a Ph. D. degree from Stanford University in 1926.

Doctor Guest is a distinguished Kansas educator. Before coming to Baker University he taught at the University of Illinois, Lafayette College, and Stanford University. In 1943 he was granted a leave of absence from his present position at Baker to serve as an Economist with the U. S. Bureau of Labor Statistics. Again in 1945 he was called by the Government to lecture at the Army University in Biarritz, France.

Besides being active in community life at Baldwin, Professor Guest is a member of the American Economic Association and also of the American Association of University Professors. He is the author of *Public Expenditure* and has written book reviews, articles on economics and education, and reports for the Bureau of Labor Statistics.

The Kansas Anti-Discrimination Commission is grateful to the author for contributing his thoughts on why discrimination is bad for business.

# DISCRIMINATION IS BAD FOR BUSINESS

"The practice or policy of discrimination against individuals in relation to employment by reason of their race, religion, color, national origin or ancestry is a matter of concern of the state." This quotation is not taken from an address or a written statement of a demagogue or a reformer. Instead it is the opening sentence of the Kansas act prohibiting discriminatory employment practices, passed by the 1953 legislature. The expressed purpose of the act is to "eliminate discrimination in all employment relations." Further along in the text of the act, the legislature has asserted that "the opportunity to secure and hold employment without discrimination is a civil right of every citizen." Thus discrimination in employment relationships takes its place with violations of the traditional rights of free speech, free press, freedom of worship, freedom of assembly, and freedom to petition as something against which the state obligates itself to cast its weight.

But the case against discrimination in employment is not based entirely upon the duty of the state to do justice and to defend the rights which belong to all the citizens of a free society. There are compelling economic reasons also—reasons which bear on the profit and loss statement of the business firm, the pay check of the worker, the prices paid by the consumer, and even the tax bill paid by everybody. Discrimination is not only bad because it is unjust but also because it is bad business. It is bad business when practiced in employment relations because it is an obstacle to securing the best qualified employees to fill the jobs.

Some will object that no competent man of business who is about to hire a new employee will ever base his selection upon anything but the ability of applicants to do the job. Common sense confirms this view on the assumption that he wants to get the most possible output for what he spends for wages. Traditional economic theory confirms it also. In the well-known words of Adam Smith, he will be "led by an invisible hand" to promote the public interest as well as his own gain. His desire for profit will cause him to be concerned only with the comparative merits of those who apply for jobs, and prejudices will not be allowed to get in the way of rational pursuit of self-interest. But in spite of these conclusions of common sense and traditional economic theory, the fact remains that it takes

no more than a little knowledge of the ways of the world to know that the reverse is commonly true—that all too often reason is overwhelmed by emotion and judgment is stultified by prejudice.

A simple example will help to make this more clear. An office manager requires the services of a copy typist and interviews a number of applicants for the position. If he automatically screens out all applicants who have certain obvious racial characteristics, names beginning with O' or ending in ski, or religious beliefs different than his own, his action is clearly in disregard of the merit principle. He has acted on these individuals without taking the time to determine what abilities for the job they may have. Even if he uses a battery of psychological, aptitude, and other tests to help him decide who is best among those who survived the screening, there is more than a slight possibility that typists with equal or greater speed or accuracy may have been eliminated without any chance to take the tests. In effect, he has said that the color of the skin, the national origin, the religious affiliations of the person employed are more important than performance on the job. Can this possibly be justified on a business basis?

A common reply to this is that if the employer is so foolish and so shortsighted as to let his prejudices cloud his business judgment, he receives ample punishment in the reduction of efficiency and higher costs of operation. Either he will see the folly of what he is doing and abandon his prejudiced behavior, or he will suffer the losses which follow as consequences. This is probably true, but it does not take into account two very vital facts. First, prejudice is of such an irrational nature that it blinds those afflicted with it to its consequences and thus they continue in the same behavior patterns placing the blame for their misfortunes elsewhere. Second, since placement and promotion in employment situations is not based solely on merit when prejudice results in discrimination, society suffers as well as the victim of discrimination and the firm which practices it. The decrease in efficiency of operation and the increase in costs of production is almost certain to result sooner or later in higher prices and lower wage levels. It is no mere historical coincidence that the prosperity and welfare of many of our states has improved as the practice of discrimination in employment has receded. Rather, these signs of general improvement are the normal consequence of opening doors of opportunity to qualified people who in the past had been barred by discrimination from making their maximum contribution to the national output and income. Neither is it any mere accident that the commanding needs of wartime production made discrimination based on prejudice

retreat and gave a great impetus to the merit system of employee selection, placement, and promotion. In peacetime, it may be felt that it is unwise to disturb the deep-seated folk patterns upon which discriminations of all sorts are based. But in time of war, when the nation's very safety is at stake, it is unthinkable that such irrational elements should be regarded as immovable obstacles to maximum effectiveness in the use of our human resources. If the fireman carrying the hose is a black man, no sane person would be so foolish as to insist that nothing be done about saving his house until a white substitute had been found and put on the job.

It would be grossly unfair to leave the impression that when discrimination in employment relations is practiced, it is invariably the fault of employers. On the contrary, some of the most flagrant offenders against the principles of employment on a merit basis have been labor organizations. Local policies and even constitutional rules of eligibility constitute effectual means of barring undesired races and nationalities from union affiliation. Thus the employer who operates a union shop under agreement with such a union finds it impossible to avoid discrimination when the union itself practices discrimination. Any attempt he makes to handle employment relations on merit only and without discrimination against any will be frustrated by the unyieldingness of the membership rules of the labor organization which is certified by public authority to represent the workers of his establishment in collective bargaining.

Just as the employer who practices discrimination in employment is injured by it, so also there is strong reason to believe that unions often suffer detriment from discriminatory membership policies and rules. Historically, the excluded groups have constituted a menace to wage and working standards, and since they have no reasons to be loyal to the union they have sometimes been the source from which strikebreakers could be drawn and the mainstay of other anti-union activities. Besides this, such discrimination has seemed to justify legislation which tends to weaken the union shop. For example, the Taft-Hartley Act concedes the right of unions to make their own rules with respect to membership eligibility, but "no employer shall justify any discrimination against an employee for nonmembership in a labor organization . . . if he has reasonable grounds for believing that such membership was not available to the employee on the same terms and conditions generally applicable to other members . . ." It is significant that this appears in the section which deals with unfair labor practices for employers.

Both employers and organized labor encounter difficulty in carrying out a policy of nondiscrimination in a situation in which the socially approved pattern of attitude and conduct is one of discrimination. For that reason, any program that aims to deal effectively with the discrimination problem must be aimed at the general public as well as at employers and labor organizations. Such a program can succeed only to the extent that sound information and straight thinking are substituted for superstition and outbursts of prejudiced passion. One of the first steps towards this end is to secure recognition of the fact that employment practices which discriminate against people because of their race, color, religion, or nationality are bad business policy as well as incompatible with the ideals of democracy.

# PREFACE TO CHANUTE SURVEY

The following statistics are the result of a survey on employment practices in Chanute in 1956 carried out by the Kansas Anti-Discrimination Commission.

The survey covered seventy-five different employers in the area and covered a broad range of employment opportunities.

Unfortunately a complete report on the survey is unavailable at this time. The figures suggest, however, that employment practices in Chanute seem to follow those of the state in general. That is, minority group members, Negroes and Mexican Americans are held fairly rigidly to janitorial and laboring job categories and that very few employers are willing to assume a leadership role in breaking down the barriers of discrimination.

## CHANUTE SURVEY

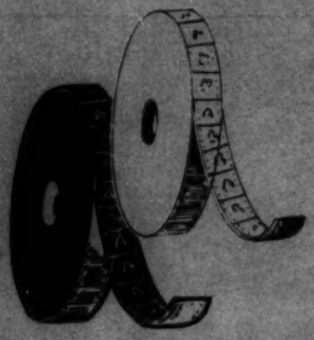
# FILMS

(16 mm., sound)



**"All the Way Home"** . . . 28 minutes. Documentary of an outbreak of interpersonal and interfamily tension among white families after property for sale is shown to a Negro family. Strength and weaknesses of an organized, homogenous, and stable community are implied as the community faces the possibility of change to an interracial neighborhood. High School and Adults.

**"Brotherhood of Man"** . . . 11 minutes. Animated color cartoon. The central character wakes to find strangers from all over the world in his backyard and soon learns that people are all pretty much alike. All Ages.

**"Burden of Truth"** . . . 67 minutes. A hard-hitting, soul-searching study of racial discrimination that draws no conclusions. This film "exposes dark areas still needing the light of understanding and truth." High School and Adults.

**"Chuck Hansen—One Guy"** . . . 30 minutes. Through the eyes of a factory worker, we attend a plant conference about the roots of prejudice, its costs, and the need for its elimination. High School and Adults.

**"Commencement"** . . . 20 minutes. Story concerns industrial management in its approach to an Equal Job Opportunity Policy for production workers together with important roles the community and its minority group members must assume. High School and Adults.

**"Crisis in Levittown"** . . . 31 minutes. Violence occurred after a Negro family moved into an all white community of 60,000. This film raises many questions concerning "integrated" housing which should be of importance to every citizen of the United States. High School and Adults.

**"For Fair Play"** . . . 33 minutes. Experience of a Negro machinist to secure and hold employment for which he is qualified. The story told in narrative, illustrates thrillingly and accurately the benefits, practical and spiritual, which comes to persons and businesses cooperating in fair employment practices. High School and Adults.

**"Ideas in Action"** . . . 28 minutes. Kinescope film showing the role of the Kansas Commission on Civil Rights in administering the 1961 Kansas Act Against Discrimination. A young Negro man who has encountered racial discrimination secures a job, for which he is qualified, through the Commission's compliance program. High School and Adults.

**"Morning for Jimmy"** . . . 28 minutes. Action centers on Jimmy, a young Negro boy who encounters racial discrimination while seeking a part-time job, but learns a lesson of hope for the future. Through his teacher's wise counsel and visits with Negroes who are successfully employed in their chosen fields (not actors, but people in their real-life jobs), Jimmy begins to understand that with education and training, he, too, can find his proper place. Youth, High School, and Adults.

**"Picture in Your Mind"** . . . 15 minutes. Urges everyone to examine his mind to see whether his mental picture of other fellows is based on true facts or false beliefs. High School and Adults.

**"Property Values and Race"** . . . 24 minutes. Based on Dr. Luigi Laurenti's study in San Francisco, Oakland and Philadelphia coupled with studies by other independent research studies in other cities across the U. S. including Kansas City. Film verifies that "the entry of nonwhites into previously all-white neighborhoods is much more often associated with price improvement or stability than with price lowering." Seniors and Adults.

**"Skipper Learns a Lesson"** . . . 12 minutes. A dog, Skipper, discovers the errors of his ways when an accident shows him that color and appearance are unimportant in judging others. Elementary.

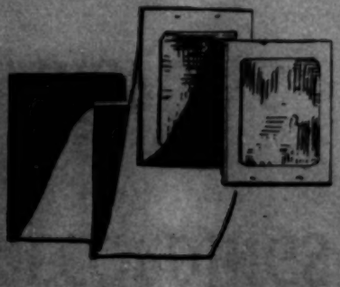
**"The New Girl"** . . . 28 minutes. Mary, a Negro, is the "first" in the office at the company. The human elements of the break with tradition are vivid. Management, the other girls in the office, the community, and Mary, all play their parts. Film has realism and builds faith in America. Youth, High School and Adults.

**"The Toymaker"** . . . 15 minutes. Color. Two puppets who think they are alike discover a superficial difference—one has stripes, the other spots. This difference builds tension and finally violence. They are saved by the Toymaker. All age levels.

**"To Live Together"** . . . 33 minutes. A summer camp shows that prejudices of children are shown to be reflections of their parents' attitudes. Designed to evoke discussion. High School and Adults.

# FILMSTRIPS

(35 mm.)



**"About People"** . . . 63 frames. Color cartoon. This strip is based on Eva Knox Evans' book, *All About Us*. It tells the story of people; why they are different and in which ways they are alike. Cultural anthropology is explained in a manner understandable to secondary and primary grade children.

**"How to Be Happy and Free"** . . . 50 frames, black and white. Illustrates the importance of ignoring group labels and getting to know people as individuals. Adult and secondary school age.

**"None So Blind"** . . . 55 frames. Color, with words on each frame. A light satire on problems of prejudice and a thoughtful analysis of the need for good human relations. Adult and secondary school age.

**"Rumor Clinic"** . . . 3 frames. A study of the way a rumor is changed as it circulates from one person to another. An interesting "game" that can be used to form the basis of a dramatic discussion. High School and Adults.

**"Spiral of Social Change"** . . . 40 frames. Black and white. How discrimination and prejudice depress the status of minority groups and how they respond to fairness.

**"Story of George Washington Carver"** . . . 70 frames. Color, words on each frame. The story of a great American scientist and the contributions he made to agricultural and synthetic research.

(OVER)

## RECORDINGS
(33⅓ rpm.)

**"These Great Americans"** . . . 13 transcribed 15-minute programs dealing with problems of human relations in America today.

**"The New Frontier"** . . . 13 thrilling transcribed 15-minute programs probing problems of human relations in America today.

# ANALYSIS OF THE PROPOSED KANSAS CITY PUBLIC ACCOMMODATIONS ORDINANCE 29153

Prepared by:
The Kansas City Commission on Human Relations

The proposed Kansas City Public Accommodations Ordinance would provide a specific basis in law for assuring all citizens and visitors to our city the right of access to facilities, goods, and services offered to the general public. Personal services are not included in the coverage of the ordinance.

Although some persons may consider this to be a new right, in a real sense this right of access is not new. It can be forcefully argued that this right has always existed for all citizens of this nation.

However, practice, custom, and habit have combined to produce a situation in which the reaffirmation of this right by governmental action is necessary. This reaffirmation of a long-existing right may be seen by some as the creation of a new, special right. That is not so.

The preamble to the proposed ordinance recognizes the harmful effects to the entire city of the continuation of such practices, customs, and habits. It says: "...The Council of Kansas City hereby declares that racial prejudice and bigotry and the discrimination and disorder occasioned thereby threaten not only the rights and privileges of its inhabitants, but are injurious to public morals, safety, and the general welfare...." By a vote of eleven to two the ordinance was adopted by the Council, "...to the end that such prejudice and bigotry shall be reduced or eliminated...."

The proposed ordinance would extend the protection against unfair discriminatory practices already provided by Kansas City's present, successful public accommodations ordinance, which has been in effect since early 1962. The present ordinance prohibits the refusal, withholding, or denial to any person, for any reason directly or indirectly relating to the race or color of such person, any of the accommodations, advantages, facilities or services of any hotel, motel, or restaurant which offers food or lodging to the public.

Experience in the administration of this ordinance has shown it to be workable and successful. Since November, 1962, the Commission on Human Relations has received complaints against eleven places of public accommodation. The complaints against nine of these were successfully resolved by conciliation. This means that in the cases of those nine facilities the changes in practice called for by the ordinance were accomplished quietly, without the calling of public attention to the situation. Efforts are continuing in the other two cases.

Local experience is thus consistent with the experiences of other cities and states where even more extensive protection from discrimination in places of public accommoda-

tion is provided to all persons (See table). Compliance with the letter and spirit of a just law fairly administered has produced a healthier, more democratic climate and no calamities.

The substantial, specific benefits to the entire community offered by this step toward the establishment of a single class of citizenship far outweigh the fears and narrow arguments which have been raised against it. The Commission on Human Relations is deeply concerned that the public discussion on this matter has centered around what <u>might</u> happen in taverns.

The ordinance would apply to taverns where alcoholic beverages are sold. This means that any resident of Kansas City or visitor to our city who meets the usual requirements of sobriety, behavior, and appropriate dress may enjoy a drink alone or in the company of his friends in the most convenient or attractive bar without embarrassment of refusal of service or the inconvenience of traveling to a "safe" place.

THE SIGNIFIGANCE OF THIS ORDINANCE GOES FAR BEYOND THIS SINGLE PROVISION. OF EVEN GREATER VALUE AND BENEFIT TO THE ENTIRE CITY ARE THE ADDITIONAL PROTECTIONS OFFERED BY THE ORDINANCE.

THE ORDINANCE WOULD APPLY TO:

* ANY PUBLIC CARRIER, CONVEYANCE OR ELEVATOR AND THEIR FACILITIES. This means that any person traveling in or through Kansas City by public transportation may enjoy all of the conveniences and comforts offered by or in connection with such public transportation.

* ANY BUSINESS, STORE, SHOP OR PLACE PUBLICLY DEALING IN GOODS, WARES AND MERCHANDISE. This would assure the right of any prospective buyer to shop, test, compare and buy. It would also protect the right of the prospective seller to show, persuade, convince, and sell. Experience in Kansas City has demonstrated that both buyers and sellers benefit from non-discriminatory merchandising.

* ANY PUBLIC BOARDWALK OR OTHER PUBLIC HIGHWAY OR THOROUGHFARE. This simply means that public streets and highways are there for the use of all of the public.

* ANY PUBLIC AUDITORIUM, MEETING PLACE, OR HALL, EXCEPT WHEN THEY ARE LEASED OR RESERVED FOR PRIVATE MEETINGS. This means that lectures, programs, plays, concerts, motion pictures, and conventions in Kansas City may be attended and enjoyed by all persons who are interested. The educational and cultural values of such events held in public halls are, therefore, available to all persons.

* ANY PLACE OF AMUSEMENT, RECREATION, OR SPORTS, OR FOR EXERCISE OR RELAXATION HELD OPEN TO THE PUBLIC. The need for wholesome recreational activities is universally recognized. This provision of the ordinance would assure the availability of recreational facilities and opportunities to all orderly persons.

* ANY PUBLIC LIBRARY OR PUBLIC MUSEUM. The educational, cultural, and recreational values offered by such facilities enhance the lives of all persons who use them.

* ANY HOSPITAL, DISPENSARY, OR CLINIC OPEN TO THE GENERAL PUBLIC. The ready availability of medical care and hospital facilities to the sick or injured can be literally a matter of life or death. The acutely ill or injured person may not have time to travel to a facility where he is "welcome."

* ANY TRADE, COMMERCIAL OR PROFESSIONAL SCHOOL AND ALL OTHER SCHOOLS OPERATING FOR PROFIT WHICH ARE OPEN TO THE GENERAL PUBLIC. In this day of increasing occupational specialization and demand for education and training the availability of such opportunities is essential to qualifying for meaningful employment and preparing for productive citizenship. Talented, trained people are urgently needed in Kansas City. Opportunities for training and self-improvement must be available to all persons who can use them if the needs of local business and industry are to be met. The opportunity to acquire skills with which to earn a decent living is vitally important to Kansas City's economic and social health.

These are the rights, privileges and facilities which the majority citizens of Kansas City would be expected to share with persons who have often been denied them for reasons unrelated to personal merit. If Kansas City is to become an even greater city, it must extend and protect the rights and liberties of all persons within its borders. The proposed Public Accommodations Ordinance is a significant step in that direction.

THE REAL ISSUE IS SIMPLY THIS: KANSAS CITY CANNOT AFFORD DISCRIMINATORY PRACTICES IN PLACES OF PUBLIC ACCOMMODATION. THEIR SOCIAL AND ECONOMIC COSTS, BOTH NOW AND IN THE FUTURE, ARE TOO HIGH.

## *States Having Equal Public Accommodations Legislation

Public accommodations in most non-Southern cities comparable to Kansas City are prohibited by State Statute from discriminatory practices or terms in the offering of accommodations, facilities, goods, or services.

NOTES:

(1) "Broad Coverage" - example: "All persons entitled to full and equal advantages of places of public accommodation, amusement, recreation and conveyance...." (Interpretation usually broad).

(2) "Enumerative Coverage" - example: "...To eliminate and prevent discrimination, segregation, or separation in hotels, motels, cabin camps and restaurants." (Interpretation usually specific).

(3) On July 1, 1961, the St. Louis, Missouri, Public Accommodations Ordinance went into effect. The Ordinance applies to "all places or businesses offering...to the general public services for the peace, comfort, health, welfare and safety of such general public including, but not limited to, public places providing food, shelter, recreation and amusement."
As of September, 1963, approximately 100 complaints had been filed against places of public accommodation in St. Louis. All but one of these were resolved by conciliation, without resort to the legal procedures provided in the ordinance.

(4) On May 14,1963, the city of Louisville, Kentucky, adopted an ordinance prohibiting discrimination in all places of public accommodation. These are defined as "any place of business offering...to the general public services or facilities...including public places providing food, shelter, entertainment or amusement."

(5) On September 3, 1963, the city of St. Joseph, Missouri, adopted an ordinance prohibiting racial discrimination at hotels, motels, restaurants, and places offering entertainment.

(6) On December 24, 1963, the city of Kansas City, Kansas, adopted an ordinance prohibiting discrimination which applies to those businesses "licensed by the city which offer or hold out to the general public, service or facilities for the peace, comfort, health, welfare or safety," and such "public places providing food, shelter, recreation, entertainment or amusement."

FREED AFTER 47 DAYS IN JAIL--JOIN PICKET LINE

St. Louis, Mo., March 5--Without even taking time out to shave after leaving jail, five of the 15 local CORE leaders imprisoned since January 15 joined the picket line on March 2 at the Jefferson Bank & Trust Co., where St. Louis CORE is pursuing its campaign for fair employment.

The five are Lucian Richards, Chairman of St. Louis CORE; Robert Curtis, former Chairman of the group; Roberta Tournour, wife of CORE Field Secretary Eugene Tournour; James Peake, Jr. and Taylor Jones.

These five, along with 10 other leaders of the bank campaign were released earlier in the day by a three-judge panel of the U. S. Eighth Circuit Court of Appeals pending appeal of their writs for habeas corpus.

Sentenced to terms ranging from 60 days to a year on contempt charges arising from the bank campaign, they had been imprisoned for 47 days. The three with 60-day sentences were released on their own recognizance since most of their time has been served. Bail for the other 12 ranged from $500 to $1,000 depending on the length of their sentences.

FOR IMMEDIATE RELEASE

ATTN: Marvin Rich or Jim Peck

WIN BANK DRIVE MARKED BY MASS ARRESTS AND LONG JAIL TERMS

St. Louis, Mr., April 2--The Jefferson Bank & Trust Co. hired five Negroes March 30, thus ending a St. Louis CORE campaign marked by hundreds of arrests of nonviolent demonstrators inside and outside the bank and the sentencing of 15 of the group's leaders from 60 days to a year in jail.

The unusually long prison terms were for contempt of an injuction issued last August by State Circuit Judge Michael Scott. The 15 CORE leaders were in jail from January 15 until March 2 when a three-judge panel of the U. S. Circuit Court of Appeals freed them pending appeal of their habeas corpus writs. Within hours, five of them were back on the picket line in front of the bank.

Immediately following the sentencing, over 1,000 persons marched in protest on City Hall and 250 Catholics, many of them priests and nuns, held a rally which John Dunsford, associate law professor at St. Louis University, characterized as "a public confession that we have sinned in the pride of race."

When President Johnson came here on February 14 for the city's 200th anniversary celebration, 84 St. Louis CORE pickets protested. As they neared his hotel, they were arrested and held without charges until his speech was over. Several thousand persons had petitioned the President to shun the St. Louis anniversary because of the failure of city officials to help resolve the fair employment issue at the bank.

In the course of the campaign, more than 75 Negroes had secured jobs at other St. Louis banks but the Jefferson Bank remained adamant.

#####

Public Law 87-415
87th Congress, S. 1991
March 15, 1962

# An Act

Relating to manpower requirements, resources, development, and utilization, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That this Act may be cited as the "Manpower Development and Training Act of 1962". Manpower Development and Training Act of 1962.

## TITLE I—MANPOWER REQUIREMENTS, DEVELOPMENT, AND UTILIZATION

### STATEMENT OF FINDINGS AND PURPOSE

SEC. 101. The Congress finds that there is critical need for more and better trained personnel in many vital occupational categories, including professional, scientific, technical, and apprenticeable categories; that even in periods of high unemployment, many employment opportunities remain unfilled because of the shortages of qualified personnel; and that it is in the national interest that current and prospective manpower shortages be identified and that persons who can be qualified for these positions through education and training be sought out and trained, in order that the Nation may meet the staffing requirements of the struggle for freedom. The Congress further finds that the skills of many persons have been rendered obsolete by dislocations in the economy arising from automation or other technological developments, foreign competition, relocation of industry, shifts in market demands, and other changes in the structure of the economy; that Government leadership is necessary to insure that the benefits of automation do not become burdens of widespread unemployment; that the problem of assuring sufficient employment opportunities will be compounded by the extraordinarily rapid growth of the labor force in the next decade, particularly by the entrance of young people into the labor force, that improved planning and expanded efforts will be required to assure that men, women, and young people will be trained and available to meet shifting employment needs; that many persons now unemployed or underemployed, in order to become qualified for reemployment or full employment must be assisted in providing themselves with skills which are or will be in demand in the labor market; that the skills of many persons now employed are inadequate to enable them to make their maximum contribution to the Nation's economy; and that it is in the national interest that the opportunity to acquire new skills be afforded to these people in order to alleviate the hardships of unemployment, reduce the costs of unemployment compensation and public assistance, and to increase the Nation's productivity and its capacity to meet the requirements of the space age. It is therefore the purpose of this Act to require the Federal Government to appraise the manpower requirements and resources of the Nation, and to develop and apply the information and methods needed to deal with the problems of unemployment resulting from automation and technological changes and other types of persistent unemployment. 76 STAT. 23. 76 STAT. 24.

### EVALUATION, INFORMATION, AND RESEARCH

SEC. 102. To assist the Nation in accomplishing the objectives of technological progress while avoiding or minimizing individual hardship and widespread unemployment, the Secretary of Labor shall—

81143 O - 62

(1) evaluate the impact of, and benefits and problems created by automation, technological progress, and other changes in the structure of production and demand on the use of the Nation's human resources; establish techniques and methods for detecting in advance the potential impact of such developments; develop solutions to these problems, and publish findings pertaining thereto;

(2) establish a program of factual studies of practices of employers and unions which tend to impede the mobility of workers or which facilitate mobility, including but not limited to early retirement and vesting provisions and practices under private compensation plans; the extension of health, welfare, and insurance benefits to laid-off workers; the operation of severance pay plans; and the use of extended leave plans for education and training purposes. A report on these studies shall be included as a part of the Secretary's report required under section 104.

(3) appraise the adequacy of the Nation's manpower development efforts to meet foreseeable manpower needs and recommend needed adjustments, including methods for promoting the most effective occupational utilization of and providing useful work experience and training opportunities for untrained and inexperienced youth;

(4) promote, encourage, or directly engage in programs of information and communication concerning manpower requirements, development, and utilization, including prevention and amelioration of undesirable manpower effects from automation and other technological developments and improvement of the mobility of workers; and

76 STAT. 24.
76 STAT. 25.

(5) arrange for the conduct of such research and investigations as give promise of furthering the objectives of this Act.

SKILL AND TRAINING REQUIREMENTS

SEC. 103. The Secretary of Labor shall develop, compile, and make available, in such manner as he deems appropriate, information regarding skill requirements, occupational outlook, job opportunities, labor supply in various skills, and employment trends on a National, State, area, or other appropriate basis which shall be used in the educational, training, counseling, and placement activities performed under this Act.

MANPOWER REPORT

Reports to President and Congress.

SEC. 104. The Secretary of Labor shall make such reports and recommendations to the President as he deems appropriate pertaining to manpower requirements, resources, use, and training; and the President shall transmit to the Congress within sixty days after the beginning of each regular session (commencing with the year 1963) a report pertaining to manpower requirements, resources, utilization, and training.

# TITLE II—TRAINING AND SKILL DEVELOPMENT PROGRAMS

## PART A—DUTIES OF THE SECRETARY OF LABOR

### GENERAL RESPONSIBILITY

SEC. 201. In carrying out the purposes of this Act, the Secretary of Labor shall determine the skill requirements of the economy, develop policies for the adequate occupational development and maximum utilization of the skills of the Nation's workers, promote and encourage the development of broad and diversified training programs, including on-the-job training, designed to qualify for employment the many persons who cannot reasonably be expected to secure full-time employment without such training, and to equip the Nation's workers with the new and improved skills that are or will be required.

### SELECTION OF TRAINEES

SEC. 202. (a) The Secretary of Labor shall provide a program for testing, counseling, and selecting for occupational training under this Act those unemployed or underemployed persons who cannot reasonably be expected to secure appropriate full-time employment without training. Whenever appropriate the Secretary shall provide a special program for the testing, counseling, and selection of youths, sixteen years of age or older, for occupational training and further schooling. Workers in farm families with less than $1,200 annual net family income shall be considered unemployed for the purpose of this Act. Workers in farm families.

(b) Although priority in referral for training shall be extended to unemployed persons, the Secretary of Labor shall, to the maximum extent possible, also refer other persons qualified for training programs which will enable them to acquire needed skills. Priority in referral for training shall also be extended to persons to be trained for skills needed within, first, the labor market area in which they reside and, second, within the State of their residence. Priority standards.

76 STAT. 25.

(c) The Secretary of Labor shall determine the occupational training needs of referred persons, provide for their orderly selection and referral for training under this Act, and provide counseling and placement services to persons who have completed their training, as well as follow-up studies to determine whether the programs provided meet the occupational training needs of the persons referred. 76 STAT. 26.

(d) Before selecting a person for training, the Secretary shall determine that there is a reasonable expectation of employment in the occupation for which the person is to be trained. If such employment is not available in the area in which the person resides, the Secretary shall obtain reasonable assurance of such person's willingness to accept employment outside his area of residence.

(e) The Secretary shall not refer persons for training in an occupation which requires less than two weeks training, unless there are immediate employment opportunities in such occupation. Duration of training program.

(f) The duration of any training program to which a person is referred shall be reasonable and consistent with the occupation for which the person is being trained.

(g) Upon certification by the responsible training agency that a person who has been referred for training does not have a satisfactory attendance record or is not making satisfactory progress in such training absent good cause, the Secretary shall forthwith terminate his training and subsistence allowances, and his transportation allowances Termination of training.

except such as may be necessary to enable him to return to his regular place of residence after termination of training, and withdraw his referral. Such person shall not be eligible for such allowances for one year thereafter.

TRAINING ALLOWANCES

Agreements with States.

SEC. 203. (a) The Secretary of Labor may, on behalf of the United States, enter into agreements with States under which the Secretary of Labor shall make payments to such States either in advance or by way of reimbursement for the purpose of enabling such States, as agents for the United States, to make payment of weekly training allowances to unemployed persons selected for training pursuant to the provisions of section 202 and undergoing such training in a program operated pursuant to the provisions of this Act. Such payments shall be made for a period not exceeding fifty-two weeks, and the amount of any such payment in any week for persons undergoing training, including uncompensated employer-provided training, shall not exceed the amount of the average weekly unemployment compensation payment (including allowances for dependents) for a week of total unemployment in the State making such payments during the most recent quarter for which such data are available: *Provided however*, That in any week an individual who, but for his training, would be entitled to unemployment compensation in excess of such allowance, shall receive an allowance increased by the amount of such excess. With respect to Guam and the Virgin Islands the Secretary shall by regulation determine the amount of the training allowance to be paid any eligible person taking training under this Act.

Guam and Virgin Islands.

With respect to any week for which a person receives unemployment compensation under title XV of the Social Security Act or any other Federal or State unemployment compensation law which is less than the average weekly unemployment compensation payment (including allowances for dependents) for a week of total unemployment in the State making such payment during the most recent quarter for which such data are available, a supplemental training allowance may be paid to a person eligible for a training allowance under this Act. This supplemental training allowance shall not exceed the difference between his unemployment compensation and the average weekly unemployment compensation payment referred to above.

68 Stat. 1130. 42 USC 1361-1371.

76 STAT. 26.
76 STAT. 27.

On-the-job trainees.

For persons undergoing on-the-job training, the amount of any payment which would otherwise be made by the Secretary of Labor under this section shall be reduced by an amount which bears the same ratio to that payment as the number of compensated hours per week bears to forty hours.

(b) The Secretary of Labor is authorized to pay to any person engaged in training under this title, including compensated full-time on-the-job training, such sums as he may determine to be necessary to defray transportation and subsistence expenses for separate maintenance of such persons when such training is provided in facilities which are not within commuting distance of their regular place of residence: *Provided*, That the Secretary in defraying such subsistence expenses shall not afford any individual an allowance exceeding $35 per week, at the rate of $5 per day; nor shall the Secretary authorize any transportation expenditure exceeding the rate of 10 cents per mile.

Limitations.

(c) The Secretary of Labor shall pay training allowances only to unemployed persons who have had not less than three years of experience in gainful employment and are either heads of families, or heads of households as defined in the Internal Revenue Code of 1954, except that he may pay training allowances at a rate not exceeding $20 a week

68A Stat. 3. 26 USC 1.

to youths over nineteen but under twenty-two years of age where such allowances are necessary to provide them occupational training, but not more than 5 per centum of the estimated total training allowances paid annually under this section may be paid to such youths.

(d) After June 30, 1964, any amount paid to a State for training allowances under this section, or as reimbursement for unemployment compensation under subsection (h), shall be paid on condition that such State shall bear 50 per centum of the amount of such payments. Payments to States.

(e) No training allowance shall be made to any person otherwise eligible who, with respect to the week for which such payment would be made, has received or is seeking unemployment compensation under title XV of the Social Security Act or any other Federal or State unemployment compensation law, but if the appropriate State or Federal agency finally determines that a person denied training allowances for any week because of this subsection was not entitled to unemployment compensation under title XV of the Social Security Act or such Federal or State law with respect to such week, this subsection shall not apply with respect to such week. 68 Stat. 1130. 42 USC 1361-1371.

(f) A person who refuses, without good cause, to accept training under this Act shall not, for one year thereafter, be entitled to training allowances.

(g) Any agreement under this section may contain such provisions (including, as far as may be appropriate, provisions authorized or made applicable with respect to agreements concluded by the Secretary of Labor pursuant to title XV of the Social Security Act) as will promote effective administration, protect the United States against loss and insure the proper application of payments made to the State under such agreement. Except as may be provided in such agreements, or in regulations hereinafter authorized, determinations by any duly designated officer or agency as to the eligibility of persons for weekly training allowances under this section shall be final and conclusive for any purposes and not subject to review by any court or any other officer. Finality of determinations.

(h) If State unemployment compensation payments are paid to a person taking training under this Act and eligible for a training allowance, the State making such payments shall be reimbursed from funds herein appropriated. The amount of such reimbursement shall be determined by the Secretary of Labor on the basis of reports furnished to him by the States and such amount shall then be placed in the State's unemployment trust fund account. State unemployment compensation payments. 76 STAT. 27. 76 STAT. 28.

(i) A person who, in connection with an occupational training program, has received a training allowance or whose unemployment compensation payments were reimbursed under the provisions of this Act or any other Federal Act shall not be entitled to training allowances under this Act for one year after the completion or other termination (for other than good cause) of the training with respect to which such allowance or payment was made.

(j) No training allowance shall be paid to any person who is receiving training for an occupation which requires a training period of less than six days.

ON-THE-JOB TRAINING

SEC. 204. (a) The Secretary of Labor shall encourage, develop, and secure the adoption of programs for on-the-job training needed to equip persons selected for training with the appropriate skills. The Secretary shall, to the maximum extent possible, secure the adoption by the States and by private and public agencies, employers, trade associations, labor organizations and other industrial and community groups which he determines are qualified to conduct effective training

programs under this title of such programs as he approves, and for this purpose he is authorized to enter into appropriate agreements with them.

Training standards.

(b) In adopting or approving any training program under this part, and as a condition to the expenditure of funds for any such program, the Secretary shall make such arrangements as he deems necessary to insure adherence to appropriate training standards, including assurances—

(1) that the training content of the program is adequate, involves reasonable progression, and will result in the qualification of trainees for suitable employment;

(2) that the training period is reasonable and consistent with periods customarily required for comparable training;

(3) that adequate and safe facilities, and adequate personnel and records of attendance and progress are provided; and

(4) that the trainees are compensated by the employer at such rates, including periodic increases, as may be deemed reasonable under regulations hereinafter authorized, considering such factors as industry, geographical region, and trainee proficiency.

(c) Where on-the-job training programs under this part require supplementary classroom instruction, appropriate arrangements for such instruction shall be agreed to by the Secretary of Health, Education, and Welfare and the Secretary of Labor.

NATIONAL ADVISORY COMMITTEE

SEC. 205. (a) The Secretary shall appoint a National Advisory Committee which shall consist of ten members and shall be composed of representatives of labor, management, agriculture, education, and training, and the public in general. From the members appointed to such Committee the Secretary shall designate a Chairman. Such Committee, or any duly established subcommittee thereof, shall from time to time make recommendations to the Secretary relative to the carrying out of his duties under this Act. Such Committee shall hold not less than two meetings during each calendar year.

76 STAT. 28.
76 STAT. 29.

(b) The National Advisory Committee shall encourage and assist in the organization on a plant, community, regional, or industry basis of labor-management-public committees and similar groups designed to further the purposes of this Act and may provide assistance to such groups, as well as existing groups organized for similar purposes, in effectuating such purposes.

(c) The National Advisory Committee may accept gifts or bequests, either for carrying out specific programs or for its general activities or for its responsibilities under subsection (b) of this section.

Compensation.

(d) Appointed members of the Committee shall be paid compensation at the rate of $50 per diem when engaged in the work of the Committee, including travel time, and shall be allowed travel expenses and per diem in lieu of subsistence as authorized by law (5 U.S.C. 73b–2) for persons in the Government service employed intermittently and receiving compensation on a per diem, when actually employed, basis.

60 Stat. 808; 75 Stat. 339, 340.

(e) (1) Any member of the Committee is hereby exempted, with respect to such appointment, from the operation of sections 281, 283, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes (5 U.S.C. 99), except as otherwise specified in paragraph (2) of this subsection.

62 Stat. 697, 793.

(2) The exemption granted by paragraph (1) of this subsection shall not extend—

(A) to the receipt or payment of salary in connection with the appointee's Government service from any source other than the private employer of the appointee at the time of his appointment, or

(B) during the period of such appointment, to the prosecution or participation in the prosecution, by any person so appointed, of any claim against the Government involving any matter with which such person, during such period, is or was directly connected by reason of such appointment.

STATE AGREEMENTS

SEC. 206. (a) The Secretary of Labor is authorized to enter into an agreement with each State, or with the appropriate agency of each State, pursuant to which the Secretary of Labor may, for the purpose of carrying out his functions and duties under this title, utilize the services of the appropriate State agency and, notwithstanding any other provision of law, may make payments to such State or appropriate agency for expenses incurred for such purposes.

(b) Any agreement under this section may contain such provisions as will promote effective administration, protect the United States against loss and insure that the functions and duties to be carried out by the appropriate State agency are performed in a manner satisfactory to the Secretary.

RULES AND REGULATIONS

SEC. 207. The Secretary of Labor shall prescribe such rules and regulations as he may deem necessary and appropriate to carry out the provisions of this part. Regulatory authority.

76 STAT. 29.
76 STAT. 30.

PART B—DUTIES OF THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE

GENERAL RESPONSIBILITY

SEC. 231. The Secretary of Health, Education, and Welfare shall, pursuant to the provisions of this title, enter into agreements with States under which the appropriate State vocational education agencies will undertake to provide training needed to equip persons referred to the Secretary of Health, Education, and Welfare by the Secretary of Labor pursuant to section 202, for the occupations specified in the referrals. Such State agencies shall provide for such training through public education agencies or institutions or, if facilities or services of such agencies or institutions are not adequate for the purpose, through arrangements with private educational or training institutions. The State agency shall be paid 50 per centum of the cost to the State of carrying out the agreement, except that for the period ending June 30, 1964 the State agency shall be paid 100 per centum of the cost to the State of carrying out the agreement with respect to unemployed persons. Such agreements shall contain such other provisions as will promote effective administration (including provision (1) for reports on the attendance and performance of trainees, (2) for immediate certification to the Secretary of Labor by the responsible training agency with respect to each person referred for training who does not have a satisfactory attendance record or is not making satisfactory progress in such training absent good cause, and (3) for continuous supervision of the training programs conducted under the agreement to insure the quality and adequacy of the training provided), protect the Agreements with States.

United States against loss, and assure that the functions and duties to be carried out by such State agency are performed in such fashion as will carry out the purposes of this title. In the case of any State which does not enter into an agreement under this section, and in the case of any training which the State agency does not provide under such an agreement, the Secretary of Health, Education, and Welfare may provide the needed training by agreement or contract with public or private educational or training institutions.

RULES AND REGULATIONS

Regulatory authority.

SEC. 232. The Secretary of Health, Education, and Welfare may prescribe such rules and regulations as he may deem necessary and appropriate to carry out the provisions of this part.

## TITLE III—MISCELLANEOUS

APPORTIONMENT OF BENEFITS

SEC. 301. For the purpose of effecting an equitable apportionment of Federal expenditures among the States in carrying out the programs authorized under title II of this Act, the Secretary of Labor and the Secretary of Health, Education, and Welfare shall make such apportionment in accordance with uniform standards and in arriving at such standards shall consider only the following factors: (1) the proportion which the labor force of a State bears to the total labor force of the United States, (2) the proportion which the unemployed in a State during the preceding calendar year bears to the total number of unemployed in the United States in the preceding calendar year, (3) the lack of appropriate full-time employment in the State, (4) the proportion which the insured unemployed within a State bears to the total number of insured employed within such State, and (5) the average weekly unemployment compensation benefits paid by the State. The Secretary of Labor and the Secretary of Health, Education, and Welfare are authorized to make reapportionments from time to time where the total amounts apportioned under this section have not been fully obligated in a particular State, or where the State or appropriate agencies in the State have not entered into the necessary agreements, and the Secretaries find that any other State is in need of additional funds to carry out the programs authorized by this Act.

76 STAT. 30.
76 STAT. 31.

MAINTENANCE OF STATE EFFORT

SEC. 302. No training program which is financed in whole or in part by the Federal Government under this Act shall be approved unless the Secretary of Labor, if the program is authorized under part A of title II, or the Secretary of Health, Education, and Welfare, if the program is authorized under part B of title II, satisfies himself that neither the State nor the locality in which the training is carried out has reduced or is reducing its own level of expenditures for vocational education and training, including program operation under provisions of the Smith-Hughes Vocational Education Act and titles I, II, and III of the Vocational Education Act of 1946, except for reductions unrelated to the provisions or purposes of this Act.

39 Stat. 929.
20 USC 11-15, 16-28.
60 Stat. 775; 72 Stat. 1598.
20 USC 151-15ggg.

OTHER AGENCIES AND DEPARTMENTS

SEC. 303. (a) In the performance of their functions under this Act, the Secretary of Labor and the Secretary of Health, Education, and Welfare, in order to avoid unnecessary expense and duplication of functions among Government agencies, shall use the available services

or facilities of other agencies and instrumentalities of the Federal Government, under conditions specified in section 306(a). Each department, agency, or establishment of the United States is authorized and directed to cooperate with the Secretary of Labor and the Secretary of Health, Education, and Welfare and, to the extent permitted by law, to provide such services and facilities as either may request for his assistance in the performance of his functions under this Act.

(b) The Secretary of Labor and the Secretary of Health, Education, and Welfare shall carry out their responsibilities under this Act through the maximum utilization of all possible resources for skill development available in industry, labor, public and private educational and training institutions, State, Federal, and local agencies, and other appropriate public and private organizations and facilities.

APPROPRIATIONS AUTHORIZED

SEC. 304. (a) There are hereby authorized to be appropriated $2,000,000 for the fiscal year ending June 30, 1963, $3,000,000 for the fiscal year ending June 30, 1964, and a like amount for the fiscal year ending June 30, 1965, for the purpose of carrying out title I.

(b) There are hereby authorized to be appropriated $97,000,000 for the fiscal year ending June 30, 1963, $161,000,000 for the fiscal year ending June 30, 1964, and a like amount for the fiscal year ending June 30, 1965, for the purpose of carrying out title II.

(c) There are hereby authorized to be appropriated $1,000,000 for the fiscal year ending June 30, 1963, $1,000,000 for the fiscal year ending June 30, 1964, and a like amount for the fiscal year ending June 30, 1965, for the purpose of carrying out title III. 76 STAT. 31. 76 STAT. 32.

(d) There are hereby authorized to be appropriated $5,000,000 for the fiscal year ending June 30, 1962, for planning and starting programs under this Act.

LIMITATIONS ON USE OF APPROPRIATED FUNDS

SEC. 305. (a) Funds appropriated under the authorization of this Act may be transferred, with the approval of the Director of the Bureau of the Budget, between departments and agencies of the Government, if such funds are used for the purposes for which they are specifically authorized and appropriated.

(b) Any equipment and teaching aids purchased by a State or local vocational education agency with funds appropriated to carry out the provisions of part B shall become the property of the State.

(c) No portion of the funds to be used under part B of this Act shall be appropriated directly or indirectly to the purchase, erection, or repair of any building except for minor remodeling of a public building necessary to make it suitable for use in training under part B.

(d) Funds appropriated under this Act shall remain available for one fiscal year beyond that in which appropriated.

AUTHORITY TO CONTRACT

SEC. 306. (a) The Secretary of Labor and the Secretary of Health, Education, and Welfare may make such contracts or agreements, establish such procedures, and make such payments, either in advance or by way of reimbursement, or otherwise allocate or expend funds made available under this Act, as they deem necessary to carry out the provisions of this Act.

(b) The Secretary of Labor and the Secretary of Health, Education, and Welfare shall not use any authority conferred by this Act to assist in relocating establishments from one area to another. Such limitation shall not prohibit assistance to a business entity in the establish- Limitation.

ment of a new branch, affiliate, or subsidiary of such entity if the Secretary of Labor finds that assistance will not result in an increase in unemployment in the area of original location or in any other area where such entity conducts business operations, unless he has reason to believe that such branch, affiliate, or subsidiary is being established with the intention of closing down the operations of the existing business entity in the area of its original location or in any other area where it conducts such operations.

SELECTION AND REFERRAL

Membership in labor organizations.

SEC. 307. The selection of persons for training under this Act and for placement of such persons shall not be contingent upon such person's membership or nonmembership in a labor organization.

DEFINITION

"State."

SEC. 308. For the purposes of this Act, the term "State" includes the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

SECRETARIES' REPORTS

Reports to Congress.

76 STAT. 32.

76 STAT. 33.

SEC. 309. (a) Prior to March 1, 1963, and again prior to March 1, 1964, the Secretary of Labor shall make a report to Congress. Such report shall contain an evaluation of the programs under title I and part A of title II, including the number of persons trained and the number and types of training activities under this Act, the number of unemployed or underemployed persons who have secured full-time employment as a result of such training, and the nature of such employment, the need for continuing such programs, and recommendations for improvement.

(b) Prior to March 1, 1963, and again prior to March 1, 1964, the Secretary of Health, Education, and Welfare shall also make a report to Congress. Such report shall contain an evaluation of the programs under part B of title II, the need for continuing such programs, and recommendations for improvement. The first such report shall also contain the results of the vocational training survey which is presently being conducted under the supervision of the Secretary.

TERMINATION OF AUTHORITY

SEC. 310. (a) All authority conferred under title II of this Act shall terminate at the close of June 30, 1965.

(b) Notwithstanding the foregoing, the termination of title II shall not affect the disbursement of funds under, or the carrying out of, any contract, commitment or other obligation entered into prior to the date of such termination: *Provided*, That no disbursement of funds shall be made pursuant to the authority conferred under title II of this Act after December 30, 1965.

Approved March 15, 1962, 10:40 a.m.

○

# BRIEF EXPLANATION OF AMENDMENTS TO THE MANPOWER DEVELOPMENT AND TRAINING ACT

The following is a brief summary of the MDTA amendments approved by the President on December 19th.

The general effect of the amendments is to broaden the scope of the law, and to make changes found to be necessary after a year's experience. They accomplish this by creating some new provisions in the MDTA and amending others.

## Basic Education Skills

The amendments

* provide for basic education training (in language and numbers skills, for example), for unemployed persons who need this education to qualify for regular occupational training programs.

## Youth Training

The amendments

* grant authority to expand occupational training and further schooling for youths ages 16 through 21 who can't obtain employment because of inadequate educational background and work preparation.

## Training Allowances

The amendments

* ease the eligibility requirements for training allowance by providing that an unemployed person must have two years' gainful work experience (instead of three, as previously) and be either a family or household head or (a new provision) be a member of a family in which the head of the household is unemployed. (Only one member of a family can receive a regular training allowance, but this does not include youths who are receiving the special youth allowance);

* provide for an increase of up to $10 a week in the regular training allowance that can be paid a trainee when it is necessary to enable him to complete training;

* provide that persons who need basic education training may be paid 20 weeks of training allowances in addition to the 52 weeks

of allowances that can be provided for regular occupational training;

* lower the age when youths may be eligible for youth training allowances to 17 (from 19);

* provide that a youth must have been out of school for at least a year or must have completed high school to be eligible for an allowance;

* increase the total amount of money that can be used for allowances for young people.

Part-time Work

The amendments

* allow persons engaged in full-time school-type training to work part-time for up to 20 hours a week without having their allowance reduced.

Financing the Program

The amendments

* delay for a year the time when States must contribute to the funds paid out for training allowances and training costs and also lower from one-half to one-third the amount States must contribute that first year;

* increase to $407,000,000 (from $161,000,000) the amount of Federal funds that may be spent on training activities in fiscal year 1965, and provide $281,000,000 for fiscal year 1966.

Educational Facilities

The amendments

* permit States to provide training through private education and training facilities when those facilities can provide training substantially equivalent to, but cheaper than, public institutions;

* authorize the Secretary of Health, Education, and Welfare to arrange for appropriate education agencies to provide basic education training.

Advisory Committees

The Secretary of Labor, where appropriate, will require that labor-management-public advisory committees be organized on a community, State, and/or regional basis.

Labor Mobility Studies

The Secretary of Labor is given authority to set up a limited number of labor mobility demonstration projects that provide loans and/or grants to assist unemployed workers to move when they have a bona fide job offer in another part of the country.

The Manpower Development and Training Act was created to train unemployed workers to fill occupational shortages resulting from the "Automation Revolution." It is a known fact that automation eliminates approximately 300,000 jobs yearly. Yet, it is scarcely emphasized that automation has equally increased employment opportunities for skilled personnel. Here lies one of the greatest weapons to foster equal employment opportunities for Negroes.

Training for jobs

By Section 202(a) of the Act, broad and diversified training programs, which range from drafting and stenography to training mechanics and cooks are provided. The Secretary of Labor refers interested people to training programs which are arranged by the Sec'y of Health, Education, and Welfare and officials of the state where the program is to be located. Programs are to use public educational agencies, or if such places are not adequate, private educational or training institutions may be used. On-the-job training programs are created by the Sec'y of Labor with the state and/or with private and public agencies, labor organizations, trade associations, and other industrial and community groups. The sponsoring organization must meet the standars established by the Sec'y of Labor for facilities, curricula, etc. Projects (except on-the-job ones) must be approved by the state and national governments.

Priority for selection of trainees is given to those who are currently unemployed. (Workers in farm families with a total yearly income of less than $1,200 are considered unemployed.) Priority is also given to persons who will be trained for skills needed 1) in their areas and 2) in their states.

Training allowances

Those trainees who are unemployed, have at least 3 years of work experience and are heads of families or households are paid an allowance which cannot be greater than the un-

employment compensation paid in the state, including consideration for dependents. When training facilities are not nearby, money for transportation and maintaining separate households is available. Trainees who are between the ages of 19 and 22 are provided subsistence payments up to $20 a week. A handicap related to allowances is that they are paid by the states as agencies of the federal government.

Advisory Committee

A National Advisory Committee of 10 members, representing labor, management, agriculture, education, training, and the public in general, is appointed by the Sec'y of Labor to help set up and assist labor-management-public committees and similar groups designed to further the purposes of the act; the committee is also to assist other, already existing, groups of this kind.

To start a program

In order to begin a project a proposal for the project and a budget for it must be submitted to and approved by the state vocational education agency which has been named in an agreement between the state and the Commissioner of Education(who is acting for the Sec'y of H.E.W.) and by the Commissioner of Labor.

To participate in a training program

The potential trainee applies or is called to his local public employment office where he is interviewed, counseled, and tested to determine hes suitability for a particular occupation. The training periods vary according to the skill being taught. In order for one to be accepted for training there must be reasonable expectation of employment in the occupation being trained for.

If he is accepted, he completes a training course which has been developed by state vocational education authorities. He then returns to the employment office for placement service.

Problems

MDTA programs in the South in the first eight months of operation have trained only 234 Negroes, according to the report of the Civil Rights Commission. That figure represents only 11% of the total MDTA trainees while Negro unemployment in the South is 30%. Further, training has been offered to Negroes in only a few of the occupations provided by the commission. In the professional and managerial class, more than one half the Negroes were trained as low-salaried medical aides. In the clerical and sales categories, 90% of the Negroes were trained as stenographer-typists. In the service category, such jobs as tailoring, typewriter- repairing were available to most of the Negroes. Others were trained as waiters and waitresses.

Some of our problems in getting training positions are the result of poor education. But the stumbling blocks are much bigger than poor education.

Anti-Negro state officials in training plans are to our disadvantage. This is of importance because the states or their representatives are responsible for approving training programs, payment of training allowances, selecting, counseling, testing and placement of trainees.A further problem is that the Act states that people cannot be accepted for training without "reasonable expectation of employment"; in the South this provision can be interpreted by state authorities to mean that since a white man will not want to hire a Negro for any job but a "Negro job" (cleaning, digging), there is not reasonable expectation of em - ployment.

The handicap of state power can be corrected by several things. We can arrange for "on-the-job" programs since the Sec'y of Labor is directed by Section 204(a) of the act to arrange programs with <u>private and public agencies, labor organizations, and other industrial and community groups</u> as well as with the states.

Thus a group of citizens can go directly to the Sec'y of Labor if the desired program can be described as "on-the-job' training. We can contact directly representatives of MDTA whose jobs are to set up programs in communities where they are wanted and who can direct to other possible sources of aid. The representative can possibly influence state and local authorities to approve programs or admit Negroes to them by showing them that the community as a whole would benefit from the program or by the use of other arguments. We also can push to get Negroes working in public employment agencies and to influence the Dept. of Health, Education, and Welfare to limit the interpretation of "reasonable expectation" so that the provision will not protect segregation policies.

We cannot protect our efforts to get jobs from the state power provided by the act unless we have a power ourselves in the community. Behind a "citizens' committee" seeking a training program must be a political power, an economic one, the power of demonstrations, a power.

There are amendments to the Manpower Development and Training Act before the Congress now (S. 1691, S.1831 and H.R. ). Several of the provisions refer to problems abou t which we are especially concerned. The proposed amendments increase the amount of money to be spent, put off the time when states will have to begin matching federal funds, and extend the training program to 1967. They provide that the age at which unemployed youth can receive allowances for training be lowered from 19 to 16 years and that more young people will be trained. They provide <u>basic education</u> (fo periods up to 52 weeks) for people who are not qualified to enter training programs with the understanding that those people learning basic skills (such as reading and working math problems) will then enter training programs for a particular occupation. SNCC workers must make special efforts to encourage people to apply for participation

the programs and for the introduction of programs into their communities.

Possibilities for the future

We must look at the job possibilities which are actually created by MDTA (which is the most significant and far reaching retraining law that we have). 1794 projects, providing approximately 63,000 jobs were approved last year. Yet, 63,000 jobs is not anywhere near the 2,000,000 jobs which the Manpower Research Office estimates (in its report #2) will be needed each year to offset advances in technology. Even if Congress passes the appropriation amendments in the form proposed by the House ($422 million for next year and $281 million for the following) and even if all the states matched the funds for 5 years (When state directors of vocational education were asked by the American Vocational Educational Association if their states could participate in MDTA when matching funds were requested 34 said no.) even then a maximum of 334,000 jobs per year can be generated. This is 16.7% of the need. Jobs needed by Negroes are included in that 2,000,000 per year. We must, in the future, make as great a use as possible of training and education provisions of this and other similar acts and, somehow, help in getting more legislation of this kind.

MDTA Programs

in areas in which the Student Nonviolent Coordinating Committee has projects as of July, 1963.

FRIDAY, MARCH 13, 1964.

# South Bend, Grim but Unshaken, Starts Long Road Back to Work

By AUSTIN C. WEHRWEIN
Special to The New York Times

Some three months ago, the 122-year-old Studebaker Corporation, where the average age of production workers was 55, announced it was about to close its big red-brick plant here.

Today, grimly aware that things will get worse before they get better, community leaders have decided they must undertake a "saturation" program that will draw on Federal, state and local governments, unions and management.

A retraining program is already in operation and by the end of March 450 people will be taking courses that range from "chef training" to computer operation.

One section of the retraining program is in the Studebaker plant itself, with the willing cooperation of the company.

There Jerome C. Borlik, a 45 year-old "trim -repairer," who was laid-off Dec. 19 after 24 years with "the corporation" is taking a 48-week refrigeration and air-conditioning course.

### 'Too Young to Retire'

He supports a wife and two children on his savings, surplus food distributions, and $36 a week in unemployment compensation.

He searched South Bend, Detroit and Chicago for work but, he said, found that anyone over age 35 bore "the stigma of age."

"I'm too old, too young to retire," he said with a sad smile.

Like other Studebaker workers he could never force himself to believe that the corporation would really quit here—in the city where he was born and owns his own home.

He feels "degraded" when he collects Government surplus food and bitter about personnel men, older than he was, who turned him away. Nor is he sure he will find work in his new trade, and expects to search far beyond South Bend for a new job when he finishes his course.

Taking the aptitude tests for retraining was an ordeal that made him jittery and nervous, although he felt he did well and relaxed as he got into them.

Mr. Borlik is typical of many others.

This industrialized community of 165,000 population has a diversified heavy industry base and is far from flat on its back. There is a determined optimism and civic pride.

But there is also the nagging knowledge that since

Continued on Page 45, Column 1

# SOUTH BEND SPURS RETRAINING PLANS

Continued From Page 43

Studebaker moved its remaining automobile production to Hamilton, Ont., that salvation lies in hard, coordinated work rather than a sudden miracle.

Secretary of Labor Willard Wirtz, it is hoped, will soon approve the plan that will be geared to the Labor Department's Office of Manpower Automation and Training.

The program will set up a corps of 40 experienced counselors to "hold the hand" of older workers, guide them through an expanded retraining program and then help them find jobs.

It is also anticipated a determined effort will be made to break down employer resistance to hiring older men. The "hard core" problem will be more than 2,000 men of age 50 and over.

### Studebaker Takes Part

United Community Services of St. Joseph County, the Community Chest organization, will be in charge and it is hoped the program will start this spring. It is a demonstration project, in which Studebaker and the University of Notre Dame will play a part, and has wide implications for every community suffering from unemployment caused by plant closings or automation.

It will also be a test for the first time of a new provision in the Manpower Automation and Training Act that offers Federal subsidies for the moving costs of workers who find jobs elsewhere.

The plan is the product of both local efforts and an interagency committee created on Christmas Eve by President Johnson to coordinate Federal activities that could benefit South Bend in its period of crisis.

Last October the unemployment rate here was 2.1 per cent. It is over 9 per cent now.

Studebaker employment, representing about 10 per cent of the normal St. Joseph County work force, was 8,800 last November. Today 1,700 blue collar and 1,000 white collar people are still on the payroll.

### Future Uncertain

By June 30, all but a few hundred maintenance workers will be gone.

The fate of the office staff depends on whether the company sells the administration building with the other production units, or otherwise decides to pull out entirely.

In other words, it is not at this time known what will happen to the white collar workers.

Unemployment compensation will start to run out for the bulk of Studebaker workers next June.

William Aramony, executive secretary of United Community Services, who drafted the coordinated plan, said there was a feeling among workers at Studebaker akin to the emotional feeling a farmer has for the soil. Sons and fathers worked side by side—it was known as a place of three-generation workers.

Explaining why counseling support is especially needed, he noted that many of these people never had the experience of applying for another job.

### Special Help Urged

"Without special help, it is not likely these workers will accept retraining and place themselves in a better position to secure employment."

Fear of taking and possibly failing a test, especially among older immigrant workers of limited education, will require special attention by the counselors, he said. He suggested tests be given after, rather than before, retraining.

Counselors will be drawn from the United Auto Workers and from the company's industrial relations staff, he said. They will keep track of every Studebaker worker, even helping with home problems.

"Counselors will be available to older workers on a 24-hour-a-day, around-the-clock, basis," he said.

Efforts will be made at the same time to search out job opportunities, especially in service industries. He reported, for example, that jobs were available in the kitchens at the University of Notre Dame.

"Training without job placement would be a cruel hoax," Mr. Aramony said.

### Facts Are Stored

All community agencies, public and private, will be mobilized to search out job opportunities here and in other communities.

An attempt will be made to "isolate fact from fancy," he said when it came to talking to employers about hiring older workers. The University of Notre Dame, a part of a Government-supported research program, is storing facts on all unemployed Studebaker workers at its computer center.

Negro workers, many of limited education, will need special help and will be given training to upgrade their reading and writing and arithmetic ability.

Studebaker will contribute facilities worth more than $70,000 and the Federal Government's share of the 14-month program would come to about $1 million.

Without the program, direct relief costs for the hard core of these unemployed would be an estimated $2,750,000 a year.

***Members' Support Urged***

# Union Backs Holland Bill To Better Manpower Act

The International union has swung its full support behind House Resolution 8419 which would amend the Manpower Development and Training Act of 1962 to liberalize its provisions for providing subsistence, relocation and basic education allowances to aid in the retraining of the nation's unemployed.

**IN A WIRE** to Congressman Adam Clayton Powell (D-NY), chairman of the House committee on Education and Labor, President Arnold S. Zander stated that AFSCME considers "H.R. 8419 a vital investment in the future of our nation."

Zander stressed that "the youth problem continues serious with more than one million unemployed. If corrective measures are not taken, this group and their dependents will become permanent beneficiaries of public assistance."

**HR 8419,** introduced by Rep. Elmer J. Holland (D-Pa.) would extend the Manpower Development and Training Act (MDTA) for two additional years. It would also lower the age for those eligible for subsistence allowances to 16.

The bill also would raise the number of disadvantaged youth who can be trained under the act and provide "basic education" for 52 weeks for those not sufficiently qualified to take skill or occupation training.

**ANOTHER** provision of the bill, which goes much farther than a similar Senate measure, calls for "relocation allowances" for unemployed workers who have to move to new areas.

Congressman Holland said that "if an individual, with a needed skill, is unemployed in one section of the nation, and is willing to move with his family to another where employment is assured him, it is more economical to have the federal government assist in this move than to train other workers in that particular skill."

The congressman added that the youth problem "is very serious. Statistics shows we have over one million unemployed between the ages of 16 and 21—or approximately 25 percent of our total unemployment. If corrective measures are not taken immediately, this group will become permanent beneficiaries of public assistance and, I might add, th families beyond them."

**HE SAID** that the "under-educated adult in the unemployed ranks creates a situation we can no longer afford to ignore. Over 800,000—18 years of age and over — unemployed — have less than eight years of schooling. The cost of supporting them and their families on relief for the rest of their lives will be much greater than a program aimed at educating them and enabling them to again become employable."

AFSCME members are urged to write their Congressmen and Senators in support of the legislation.

**Preparing Boston Youth For The World of Work**

## The Program

The Boston Youth Training and Employment Program is an experiment intended to improve the employability of young people, particularly in disadvantaged areas, and to place them in jobs suited to their abilities.

The program extends to December, 1964, and is financed by a $372,275 grant from the Office of Manpower, Automation and Training, U. S. Department of Labor.

It is set up to serve about 1,600 out-of-school, out-of-work youths in the 16 through 21 year-old age group.

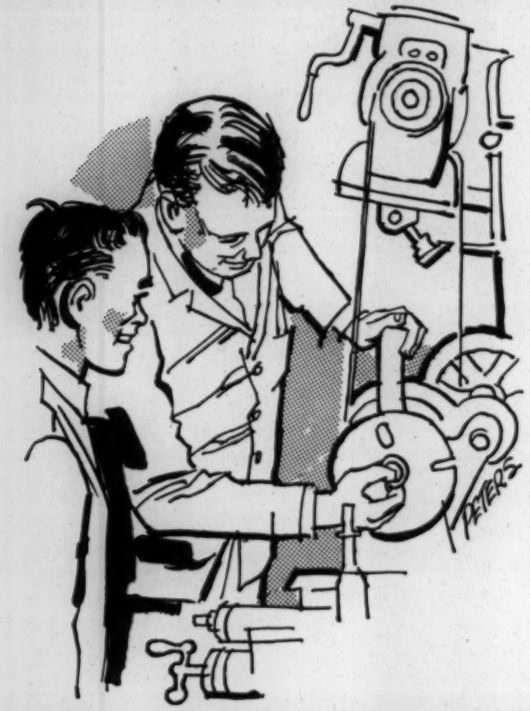
Youth unemployment will be a continuing problem in Boston which, like most large American cities, has many out-of-school, out-of-work and unmotivated youths who lack marketable skills and who need special job preparation if they are to avoid lives of idleness and dependency.

Because of this, it is hoped that those aspects of the program which prove effective will be adopted as a continuing answer to the unemployment problem under local financial auspices after the Federal experiment is completed.

## The Participants

An array of private and public agencies are teamed in conducting the program, which was planned and designed with their advice and cooperation.

Recruiting of youths is carried out by the Youth Activities Bureau of Boston with an expanded staff of detached workers, and by public and private agencies, schools, clergy and others.



Norfolk House Centre is conducting a Roxbury training and employment center and United South End Settlements a similar South End center. Special teachers from the Boston School Department provide remedial instruction at the centers and the State Employment Service staffs them with counselors for employment placement purposes.

Long range, intensive, vocational counseling and training is being provided in separate centers under programs operated by Jewish Vocational Service and Morgan Memorial. Special training in private schools will be made available through the services of the Youth Activities Bureau. The Boston School Department conducts special vocational training programs.

## The Process

Located physically in Roxbury and the South End, the program's facilities are available to youths from throughout the city. Young people may apply to the employment centers directly, but local agencies recruit others who need the program's services.

Youths are given tests to determine interests and aptitudes. Professional counseling helps a youth choose the right path toward continued education and training or employment. Job orientation helps to develop sound attitudes toward work. Vocational training provides skills for gaining and holding jobs. Placement personnel will find the jobs.

Each youth is treated as an individual.

Some youths are encouraged to return to school. Some require on-the-job or vocational counseling or educational assistance related to particular job objectives. However, many are ready for immediate job placement.

Constant evaluation of the program will determine if it achieves its objectives.

## The Role of ABCD

Action for Boston Community Development, Inc., (ABCD) helped plan the program and is the conduit for funds to carry it out. ABCD coordinates the work of the participating agencies and assists in opening employment opportunities.

A private, non-profit corporation, ABCD does not carry out programs, but designs, develops, and helps finance them in cooperation with public and private agencies which carry them out.

ABCD's Board of Directors includes the Mayor of the City of Boston and many of the city and state's civic, educational, governmental, business, management and labor leaders.

ABCD intends to inaugurate a wide range of experimental programs in health, education, employment, recreation and similar fields. It has already sponsored a group of experimental programs in the public schools and a comprehensive attack on juvenile delinquency.

It is financed primarily by the Ford Foundation, the President's Committee on Juvenile Delinquency and Youth Crime, and the Committee of the Permanent Charity Fund.

The building up of unemployed and frustrated Negro youth in congested areas of the city is a social phenomenon that can be compared to the piling of inflammable material in an empty building in a city block. Potentialities for trouble — indeed, possibilities of disaster — are surely there.

# Jobless Pay And the Longterm Unemployed

**When unemployment strikes,** a wage earner loses his source of income through no fault of his own. Unemployment insurance was devised to restore part of this income loss until the worker found new employment. This served the subsistence needs of the jobless worker and his family and it served the larger community by maintaining a flow of purchasing power.

But the currents of change over the past quarter century have left the federal-state system of unemployment compensation obsolete. Millions of workers remain outside the system; benefits have lagged while the income loss gap has grown; underfinancing of some state systems has left them in perilous condition.

A new and even more acute problem has been created as a result of rapid technological change and the impact of automation: workers are discovering that skills and experience acquired over a lifetime suddenly are made obsolete; some are not only thrown out of work—they become jobless indefinitely and perhaps permanently.

The Kennedy Administration, after considerable study, has recommended to Congress several permanent improvements in the nation's federal-state jobless pay system. The Kennedy proposals were introduced by Senator Eugene J. McCarthy (D-Minn.) and Representative Cecil R. King (D-Calif.).

The McCarthy-King bill is a response to several persistent problems in unemployment insurance. But it also embodies important new ideas.

Currently there are over 4 million unemployed persons, but only half of these are drawing benefits. Between 30 and 40 percent of the unemployed are denied any benefits because of where they work and because of restrictions in state eligibility requirements. Ten to twenty percent have been out of work so long that they have exhausted their benefit rights.

The McCarthy-King bill will have the effect of covering 3 million more workers in different kinds of employment and it will reduce the number who use up their benefit rights before finding a job.

As in previous proposals, employes of nonprofit organizations would be covered and also employes in small establishments. The method of financing coverage for "nonprofit employes" would, however, be left to each state to decide. This will permit special consideration for the problems of nonprofit organizations where immediate cost increases might cut desired services.

But the most significant example of new thinking in this bill is the benefits for the very longterm unemployed, up to 52 weeks; these are called "federal unemployment adjustment benefits." They are designed to help that large group of the unemployed who have used up all their state benefit entitlement but still have not been able to find work.

The bill recognizes that the increased incidence of unemployment lasting longer than 26 weeks calls for

*Labor's* **ECONOMIC REVIEW**

Prepared by Raymond Munts,
Department of Social Security
Reprinted from July 1963
AFL-CIO AMERICAN FEDERATIONIST

a re-evaluation of old concepts of unemployment insurance duration.

### Federal "Adjustment" Benefits

When unemployment insurance was enacted, most people thought of it as a short-term benefit program, usually 16 weeks, for people who had worked during the recent period or base year. Today, it is realized that jobless pay must fulfill a broader role.

The technological changes in business and industry and the rapid shifts in markets and products have introduced very longterm unemployment on an extensive scale.

For these reasons, the McCarthy-King bill will provide federal adjustment benefits continuously in recession and nonrecession periods for the very longterm unemployed beginning with their 27th week of unemployment and through their 52nd week.

Government statistics define "very longterm unemployment" as 26 weeks or more. Between 1957 and 1962, this extreme degree of unemployment rose 150 percent.

It is indicative of the lag in the nation's thinking about this problem that government monthly unemployment reports don't even tabulate unemployment for 39 or 52 weeks. However, from experience with the Temporary Unemployment Compensation Acts of 1958 and 1961, more is now known about those out of work 39 weeks or more. It is known that 64 percent of those who drew temporary unemployment compensation benefits in 1961 and 1962 exhausted their entitlement and used up all 39 weeks without, at the end of that period, having found a job.

It also is known from studies of unemployment insurance beneficiaries who exhausted their state benefits that the number of longterm unemployed remains high even in nonrecession years.

The following table shows the increase in long duration unemployment since 1956:

Increasing Length of Unemployment, as Percentage of Those Drawing Jobless Pay

| | 1956 | 1961 | 1962 |
|---|---|---|---|
| Drew first jobless payment | 100% | 100% | 100% |
| Out of job more than: | | | |
| 26 Weeks ..... | 15 | 29 | 21 |
| 39 Weeks ..... | 6 | 16 | 10 |
| 52 Weeks ..... | 2 | 9 | 5 |

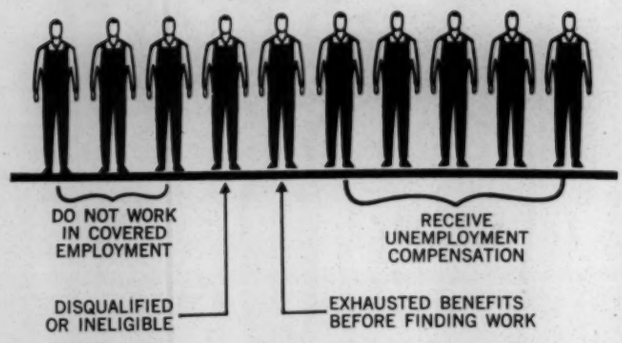
Clearly a benefit program that may have been appropriate several years ago would be inadequate now.

Objections have been raised that some people draw jobless pay who should not—people who work only short periods and don't really want to work more.

Actually, the persons covered by the temporary federal extensions in 1961-62 were clearly deserving. Sixty out of every hundred were men. The same proportion were the primary or sole wage-earners in the household. Most had been in the labor force for the previous three years.

The great concern over part-time workers, pensioners, etc., also proved to be unfounded. Only four percent were part-time workers and only four percent

### HOW THE UNEMPLOYED FARE



received a pension which resulted in a reduction of their weekly benefit amount.

However, in a longterm benefits program that is to operate on a continuing basis, whether or not national recession conditions exist, it becomes especially important that only well-qualified persons should be entitled to "adjustment" benefits. Administrative methods for eliminating those not really able and available for work can justifiably be backstopped by stronger eligibility requirements.

**To assure that only** the qualified unemployed shall be eligible for the longterm "adjustment" benefits, the McCarthy-King bill proposes that they must have worked one year during the previous two and at least half the time during the previous three years.

This requirement is in addition to having exhausted their state benefit amount and having been unemployed for 27 weeks.

The specifics of the qualifying requirement are as follows: To be eligible, a worker must have at least 26 weeks of employment in the state base period and at least 78 weeks in the 156-week period consisting of his state base period and the two immediately preceding years—the "federal qualifying period."

It is estimated that 60 percent of those who exhaust their state benefits will be entitled to the longer "adjustment" benefits.

Everyone who qualifies for the federal adjustment benefit will be entitled to 13 additional weeks, plus an additional week for every two weeks of employment in the "federal qualifying period" beyond 78 weeks, as follows:

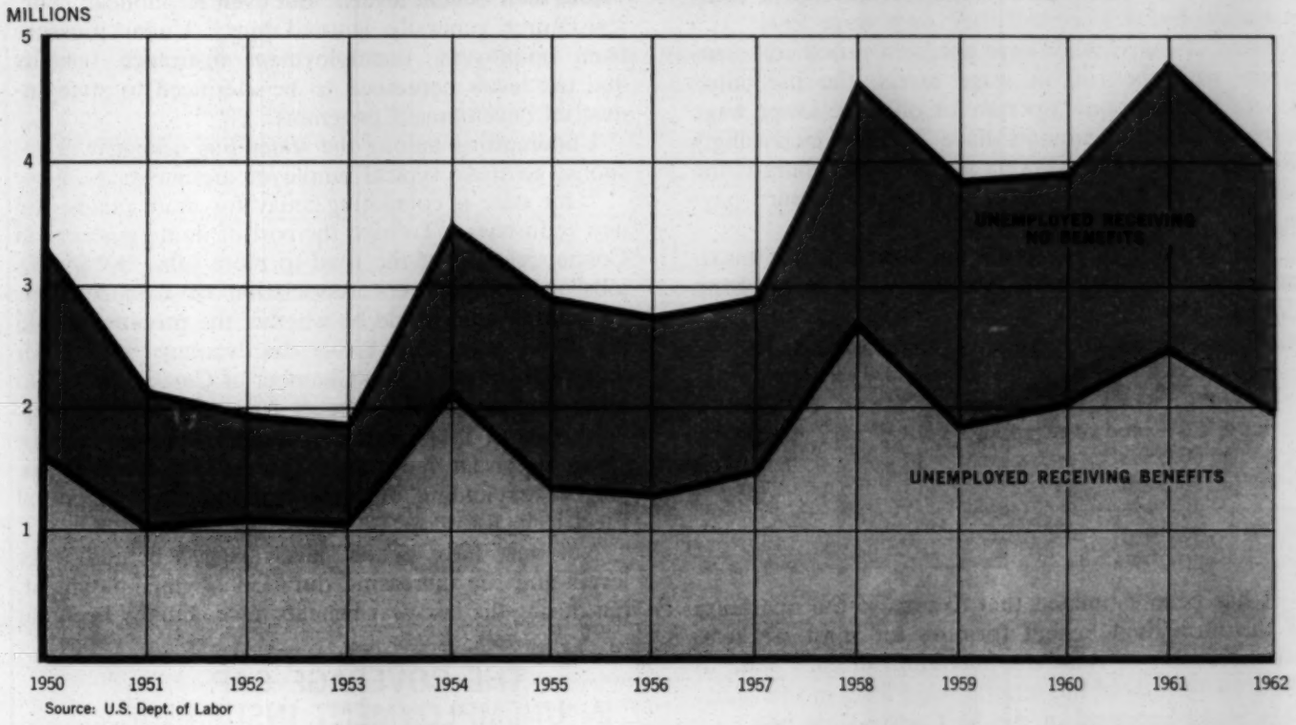
Employment in Qualifying Weeks and Component Benefit Weeks

| | |
|---|---|
| 78—13 | 92—20 |
| 80—14 | 94—21 |
| 82—15 | 96—22 |
| 84—16 | 98—23 |
| 86—17 | 100—24 |
| 88—18 | 102—25 |
| 90—19 | 104—26 |

In short, a worker who has worked half of the previous three years can draw 13 weeks of federal adjustment benefits and one who has worked two-thirds or more of the period can draw 26 weeks.

The weekly benefit amount paid to the worker would be the benefit required by the federal standard,

**TOTAL AND INSURED UNEMPLOYMENT** (Yearly Averages, 1950-62)



Source: U.S. Dept. of Labor

whether or not the state actually conforms to the standard. Where the state does conform, the adjustment benefit will continue at the same amount as paid under state law.

### The Six-Month Watershed

The significance of federal adjustment benefits is that they delineate areas of financial responsibility as between states and the federal government, with the federal government taking full responsibility for long-term unemployment beyond six months.

To pay for the adjustment benefits, a federal payroll tax of three-tenths of 1 percent will be added to the existing federal portion of the jobless pay tax. Most of this additional tax would pay for the adjustment benefits; some would go to an equalization fund.

These longterm benefits, then, are to come from a federal fund with no consideration as to which state pays the money or which state gets it back. The central focus—instead of being the economically meaningless borders of a state—is to be the unemployed worker and the national economic dislocations that cause longterm unemployment.

As with any new proposal, there are some elements of uncertainty. For example, will states decide to tighten up their wage qualifying requirements because of the more strict federal requirement for adjustment benefits? The President's proposal includes a watchdog advisory committee to study such effects and report on further corrective legislation if experience warrants it.

Another unknown exists because many workers will exhaust state benefits before the 26th week when they become eligible for federal adjustment benefits. Will states extend their duration to fill this uncompensated gap? An ideal fit exists where states provide a uniform entitlement of at least 26 weeks for all jobless beneficiaries, but only 9 states now do this.

Despite the problems, however, the federal adjustment benefits are a forceful approach to meeting the cash needs of the longterm unemployed according to the principles of social insurance.

In the words of the President's transmittal: "Long unemployment of this group is largely structural and involves a difficult period of personal adjustment to a changed situation. This adjustment will be facilitated by income maintenance as an earned right, which respects and preserves the dignity of the individual as a member of the labor force, rather than by subjecting him to the means test of public assistance."

### The Weekly Benefit Amount

It is fundamental to the unemployment insurance system that the worker's weekly benefit should have a reasonable relationship to his regular weekly wages. In this way his unemployment period represents a cutback in his own standard of living rather than some arbitrary, fixed level of subsistence.

This objective is accomplished by the individual benefit formula (the so-called "high quarter formulas") which sets the weekly payment according to the worker's earnings in some previous period. These individual benefit formulas in nearly all states provide benefits of about half the worker's weekly wage and sometimes they provide a higher proportion for the lowest wage earners.

Most state laws originally set the ceiling or statewide maximum high enough relative to wages generally that the individual benefit formula could operate over a wide range of wage levels. In this way the

great majority of covered workers could expect compensation for at least half their own wage loss.

Since the maximums have not been raised commensurate with the rise in wage levels, the individual benefit formulas now operate for only the lower wage earners. The maximums have become increasingly restrictive; for most workers now the maximum is the only relevant figure, a form of fixed subsistence payment.

The following table shows the decline in the maximum benefits relative to general wage levels from 1939 to 1962:

| Maximum Benefit as Percent of Each State's Average Weekly Wage | Number of States and Territories | |
|---|---|---|
| | 1939 | 1963 |
| 70% and over | 18 | 0 |
| 60-69% | 17 | 1 |
| 50-59% | 15 | 7 |
| 40-49% | 1 | 29 |
| 30-39% | 0 | 13 |
| 20-29% | 0 | 1 |

It has been estimated that to restore the operation of the individual benefit formula for most workers, it is necessary to raise the maximum in each state to about two-thirds of the general wage level in that state. This is the proposal of the McCarthy-King bill.

This does not mean that workers would get two-thirds of their own wage; it means only that for more people their benefit would be determined by the individual benefit formula—some reasonable relationship to their own weekly wage. In short, more people would get half of their weekly wage loss.

The approach in the McCarthy-King bill has several advantages over the present situation: (1) Raising the maximum will restore unemployment benefits to the basic role of underpinning the standard of living of unemployed workers—*their* standard, not some arbitrary dollar standard; (2) In this way, the great majority—possibly three out of four covered workers—can expect a weekly benefit of at least half their own wage loss should they become unemployed; (3) Setting the maximums as a percentage establishes different dollar ceilings appropriate to the different wage level in each state; (4) Percentage maximums also assure automatic adjustment of the maximum benefit amount with further movement of wage levels and keeps the program always up-to-date.

### The Record of the States

Unemployment insurance proposals were ignored by the states until the federal government in 1935 forced their hand. The federal government simply levied a tax and said the states could have the money if they offered a program.

This is why unemployment insurance is a federal-state system. At first most states adopted benefit levels as recommended by the Social Security Administration. But competition among the states for industry and the adoption of variable tax rates through experience rating quickly broke up the uniformity in benefit levels.

In 1954, President Eisenhower urged the states to restore their benefit levels. But even Republican state legislatures generally ignored him. Under pressure from employers, unemployment insurance benefits and tax levels continued to be sacrificed to state industrial development programs.

Undercutting among the states has occurred in response to these typical employer arguments:

"Our state is competing today for more plants and new industries. To hike the cost of doing business in Connecticut is not the road to more jobs, but to less jobs" (Manufacturers Association of Connecticut). "A central issue would be whether the proposal would put Ohio at a competitive disadvantage with other industrial states" (Ohio Chamber of Commerce). "No other southern states—except Arkansas and Alabama—have seen fit to extend benefits. These southern states represent our major competition for the new jobs of expanding business and industry" (General Electric in Kentucky).

Not only have benefit levels lagged behind wage levels and the increasing duration of unemployment, but during the last year benefits have actually been cut

[1] Calendar 1962

[2] Where two figures are shown, the larger includes maximum dependents' allowances.

[3] Fiscal 1962

[4] Where two figures are shown, the lower represents the shortest possible duration. In most states this is the entitlement of a claimant with minimum weekly benefits and minimum qualifying wages. But in ten states a higher than minimum weekly benefit amount may result in shorter duration where the distribution of earnings are concentrated in the high quarter.

[5] Taxable wages have remained at the first $3,000 of employes' earnings since 1939, except in Tennessee ($3,300); Delaware, Hawaii, Idaho, Massachusetts, Nevada, Rhode Island, West Virginia ($3,600); California ($3,800); Utah ($4,200); Alaska ($7,200); and Oregon ($3,600 or $3,800, depending on level of reserve).

[6] Benefits are extended when unemployment in state reaches specified levels in California, Connecticut, Idaho, Illinois and Vermont, by 50%, and in North Carolina, by 8 weeks.

[7] Maximum weekly benefit is determined as specified percent of average weekly covered wages: Arkansas (50%), Washington, D. C. (50%), Kansas (50%), North Dakota (50%), South Carolina (50%), Utah (50%), Vermont (50%), Idaho (52.5%) and Wyoming (50%); semi-annually in Wisconsin (52.5%), and Colorado (50% of average weekly wage in selected industries). The base years used for setting the maximum are not necessarily the fiscal 1962 used in this table, which explains why the percentage figure in the fourth column may vary slightly from the statutory percentage.

[8] Augmented amount includes $6 per dependent up to individual's average weekly wage.

in Virginia, Wyoming, Colorado, Ohio, South Dakota, Oregon, Montana and Tennessee. In addition, many states have eliminated large numbers of workers from the program through tighter qualifying requirements or longer penalty disqualifications.

A major contributing factor in the squeeze of unemployment insurance benefits this year is the condition of state reserve funds which have been depleted as a result of continuous underfinancing since World War II.

### Dangers of Continuous Underfinancing

Jobless insurance is paid for by a payroll tax on employers. The record in state legislatures and Congress shows that employer organizations have made every effort in the last 25 years to lower their tax rates at the expense of the basic objectives of the program.

Since the war, tax rates have been consistently lower than are required to maintain reserve levels. In many states this was part of a conscious policy to "develop a favorable industrial climate." Experience rating has operated most effectively for the purpose of planned underfinancing.

The fixed tax base has also worked to this end; as wage levels have risen the taxable portion of payrolls has become a smaller and smaller part of the total. The taxable wage base today represents only 60 percent of payrolls. Until 1939, by contrast, the total payroll was taxable; in that year the $3,000 limit was imposed to bring the tax base in unemployment insurance into line with that in O.A.S.I. (Social Security). The O.A.S.I. base has been raised three times since 1939, but the jobless insurance base has stayed at $3,000.

It is clear that reserves have declined steadily and that tax rates have been held consistently below the stability level. Tax rates have increased slightly since the recession of 1958, but relative to payrolls they are still only half of prewar rates.

The continuous underfinancing since the war is illustrated by the following figures showing reserves and taxes relative to payrolls for all states:

| | Year End Reserves As Percentage of Payrolls | Average Tax as Percentage of Payrolls |
|---|---|---|
| 1939 ..... | 5.3% | 2.7% |
| 1942 ..... | 6.2 | 2.0 |
| 1945 ..... | 10.4 | 1.5 |
| 1948 ..... | 7.9 | 1.0 |
| 1951 ..... | 6.6 | 1.2 |
| 1954 ..... | 6.0 | .8 |
| 1957 ..... | 5.0 | .9 |
| 1960 ..... | 3.4 | 1.2 |
| 1962 ..... | 2.9 | 1.4 |
| 1963 ..... | .. | 1.3 |

Underfinancing has depleted reserves in 23 states to the point where they are below the "solvency level." This means that the reserve is insufficient to pay benefits for 18 months under recession conditions. In seven of these states, the reserve is critical in the sense that there are insufficient funds to pay even 12 months benefits under recession conditions.

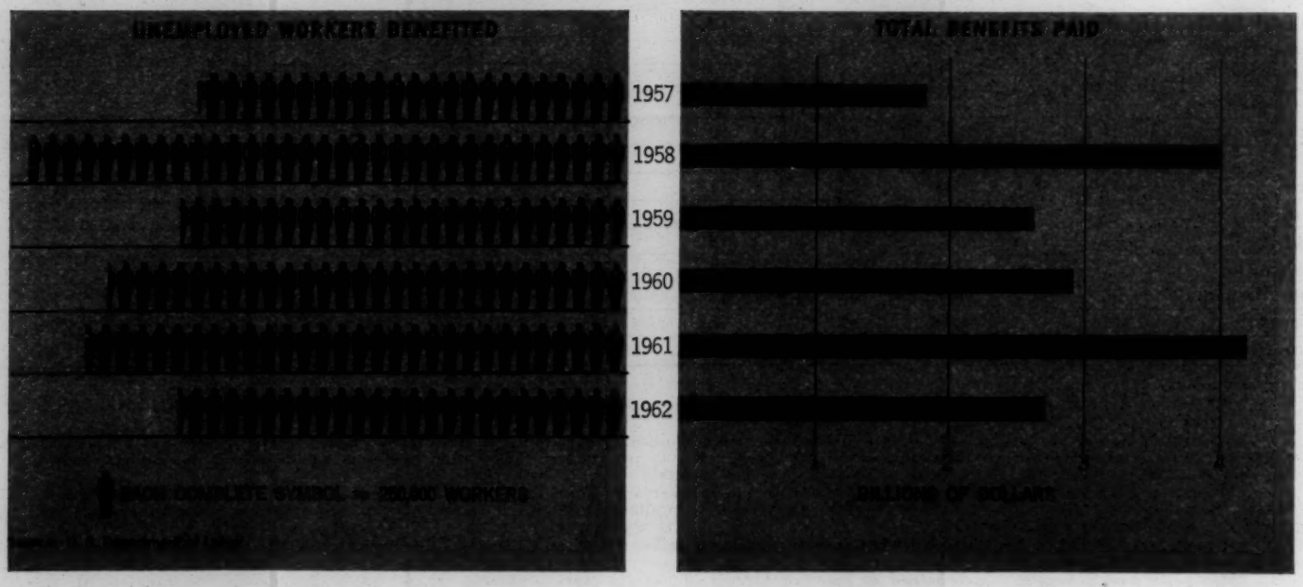
What happens when reserves drop to this point? The legislative experience in Wyoming, Minnesota, Ohio and Michigan this year illustrates how jobless benefits provisions are subject to attack when the reserves are low—even when the depletion of reserves is due to underfinancing rather than liberal benefits.

### Experience Rating

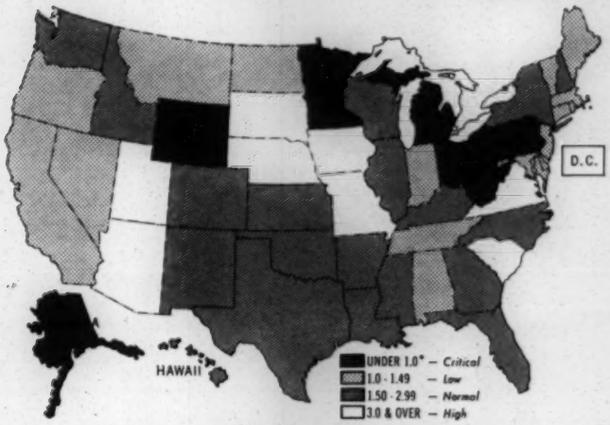
Experience rating is a system of allowing each employer's tax rate to vary with the volume of jobless benefit claims from his employes. It operates in every state. It is supposed to be an incentive to stabilize employment: In practice, it encourages low rates, low benefits and unfair disqualifications.

Even when state funds drop to a dangerous level, employers argue for continuing experience rating. An increasing number of states now continues experience rating at every fund level right down to zero. It is clear that the arguments advanced for experience rat-

## UNEMPLOYMENT COMPENSATION BENEFITS



## CONDITION OF JOBLESS PAY FUND RESERVES



State reserve ratio as a multiple of highest 12 month benefit cost rate as of Dec. 31, 1962. This is approximately the number of years the fund could pay benefits without income under recession conditions.

ing—such as incentive to stabilize, opportunity to pass on costs to consumers, etc.—are not really so significant for the employer community as are low rates in and for themselves.

### How McCarthy-King Shores Up Financing

The McCarthy-King bill would alleviate some of the financial problems of the jobless pay program in several ways:

1. By setting benefit standards, the bill gives each state a definite objective for its financial decisions. Tax rates can be adjusted to the cost of benefits instead of the other way around.

2. Raising the taxable wage base from $3,000 to $5,200 will work towards reestablishment of the payroll base that originally financed jobless payments.

3. Through equalization grants from a federal fund, especially heavy benefit costs would not have to be borne in full by a state.

An equalization fund is a necessary part of a system built on state-by-state financing. Otherwise, as is now the case, when each state must plan for the maximum drain on its reserves, it holds its benefits at a low level in fear of some extreme contingency.

The equalization (or reinsurance) fund would be financed from the federal portion of the employer tax contribution. The fund would pay two-thirds of a state's benefit costs for a year in excess of 2.7 percent of the state's taxable wages for that year.

Another advantage of such grants is that they reduce the amount of revenue which high cost states would have to raise and, therefore, further one of the original purposes of the Social Security Act, namely the minimizing of interstate variations in unemployment tax rates.

### What Are the Prospects?

In past years many distinguished economists have urged the need for congressional reforms of unemployment insurance, including Eveline Burns of Columbia; Douglas Brown, Richard Lester and Herman Somers of Princeton; William Haber and Fedele Fauri of the University of Michigan; the late Sumner Slichter of Harvard and Dale Yoder of Stanford. So have private organizations such as the Rockefeller Brothers Fund, the National Consumers League, the American Public Welfare Association and the National Association of Social Workers.

Last year the President's Advisory Committee on Labor-Management Policy recommended that "the duration, coverage and amount of unemployment compensation, where inadequate, should be increased and made subject to realistic uniform minimum requirements under the federal-state system."

Judging from past experience, opposition to the bill will come from the U. S. Chamber of Commerce, the American Retail Federation, the American Hotel Association and the National Association of Manufacturers. It can be expected that the Interstate Conference of Employment Security Agencies, the organization of unemployment compensation administrators, will also oppose the measure. Efforts of business groups and the Interstate Conference will be coordinated by Unemployment Benefit Advisers, Inc., a Washington lobby devoted to keeping Congress out of unemployment insurance.

The bill has been assigned to the House Ways and Means Committee, which probably has a full schedule this year with taxes and social security health insurance on its agenda. The real test for the McCarthy-King bill will come in 1964.

# What productivity does to jobs

**Columbia University group comes up with new data on changes in output per man. It thinks study can explode 'hysteria' over automation, point need for new jobs**

**The figures** you see in the table to the right are something of a milestone in the long, slow task of measuring the productivity of U. S. industry—one of the toughest jobs that statisticians face.

As compiled by Columbia University's Bureau of Applied Social Research and published for the first time by Business Week, the table contains what may be the most detailed data on productivity growth ever assembled. Included are estimates of productivity growth—as measured by output per worker—for many industries that have so far eluded the best efforts of the growing band of would be measurers.

**Added factors.** For this reason alone, the Columbia study will be welcomed by economists and businessmen. But that isn't all. The man in charge of the study, A. J. Jaffe, Director of Manpower & Population Research at the Bureau, says the implications of the study go far beyond measuring productivity growth.

As Jaffe sees it, the study will help to:

- Explode "the current hysteria over automation." Jaffe's data indicate that there is nothing unusual about the recent pace of productivity growth. Only about half of U. S. workers are now employed in industries where productivity is growing faster than 2½% per year. Only about one worker in 20 is now employed where labor productivity is growing at more than 5% per year. Even in manufacturing, Jaffe says, "Productivity growth was lower during the 1950s than it was in the 1920s."
- Correct the prevalent idea that productivity in manufacturing has been growing faster than in nonmanufacturing industries. Actually, the average is about the same. As the table shows, only the aircraft industry (including missiles) has been able to better 5% in productivity growth. By the same token, no manufacturing industry shows up among the laggards—the industries where productivity growth is less than 1% per year.
- Pinpoint the task that the U. S. faces if it is to provide jobs for the millions of new workers who will be crowding into the labor force in the '60s.

**Unemployment problem.** Jaffe's data indicate, however, that available jobs will have to grow faster during the 1960s than they did in the '50s if the U. S. isn't to continue to suffer from chronic unemployment. By 1970 the labor force will total some 84-million workers. But if the trends that affect employment continue the same as in the 1950s, the jobs available by 1970 will be "on the order of 75-million." The upshot would be unemployment of

9-million, an unemployment rate of 11%.

**Service trades.** What's more, as Jaffe sees it, the problem of getting enough job growth will be made tougher by the new trend to mechanization in many of the service industries where productivity growth was lowest—and job growth fastest—during the '50s. Education for example, may be able to better its less than 1% per year improvement in productivity through the use of teaching machines.

"Even the U. S. Post Office," says Jaffe, "feels under pressure to improve its labor productivity so as to cut costs."

For these reasons, Jaffe doesn't think that there will be any slowing down in the rate of increase of productivity in the current decade. Instead, he thinks the job of getting full employment will have to fall on some combination of earlier retirement or later departure from school, a shorter work week, and a speedup in the growth of consumption.

**The work week.** In Jaffe's judgment, the surest way to assure full employment in 1970 is to cut the average length of the work week. Historically, the work week has come down by about two hours in each decade. But there was no decrease during the 1950s.

Jaffe calculates that just getting back to the long-term pace of decrease would be enough to get full employment by the end of the decade. "If by 1970, the length of the work week should decrease by four hours," says Jaffe, "employment would come very close to the needed 84-million."

Of course, the alternative to a shorter work week—a move that most economists think would worsen the competitive position of U. S. industry in international trade—is to speed up the rate of growth of consumption. The Columbia group is not prepared to "specify a list of government actions which are guaranteed to increase consumption."

**Limitations.** Though readily granting that Jaffe's figures are adequate for the major use to which the Columbia group has put them—projecting employment trends—connoisseurs of productivity measurement will be quick to caution against their uncritical use for other purposes.

For one thing, Jaffe's data measure output per worker rather than output per man hour. This means that the ranking of industries by rate of productivity growth in the table could be thrown off by industry differences in rate of change in the length of the work week. But most economists would be likely to agree with Jaffe in thinking that the effects of the lack of hours data for some industries doesn't have much effect on the productivity ranking.

Then too, the Columbia group's study—unlike the manufacturing data of John W. Kendrick of the National Bureau of Economic Research [BW Oct.21'63,p181]—doesn't provide separate figures on the contributions of capital, labor, and technology to productivity growth. Thus the new figures will not be of much use in the difficult task of figuring out the reasons for the enormous differences in the pace of productivity growth that show up in the table. **End**

Statement by the AFL-CIO Executive Council

on

National Economy

Washington, D. C.
May 19, 1964

Unemployment has remained about 5½ percent of the labor force in the last five months, despite the continuing expansion of economic activities and booming profits. In the face of rapid increases in both productivity and the labor force, the rise of sales and production has not been great enough to create the employment opportunities needed to reduce joblessness. Moreover, the anticipated expansion during the rest of this year, under the impetus of the tax cut, is not expected to reduce unemployment appreciably.

Automation is continuing to spread -- reducing manpower requirements in many white collar occupations, as well as in production and maintenance types of employment. And the labor force is growing rapidly, with the influx of young people seeking their first jobs. The persistent high level of unemployment remains America's number one problem in 1964.

For the third consecutive year, however, after-tax corporate profits are continuing to rise twice as fast as the gross national product. In the first-quarter of 1964, corporate profits, after taxes, were running about 33 percent above 1961. But annual labor income was only 16 percent greater than the 1961 level. Despite the obvious volatility of profits, these trends underscore the existence of a distinct and dangerous lack of balance in the economy.

Industry's productive capacity, which increased 4 percent last year, is expected to expand 5 percent in 1964 and by a similar amount next year. Who will buy the goods and services this growing, automated capacity can produce, if workers' buying power continues to lag?

Consumer markets, which account for about 70 percent of total national production, must expand along with the economy's growing ability to produce more goods and services, more efficiently. Failure to maintain such balance results in unemployment, with roller-coaster ups and downs of business activities, unless weakness in consumer markets is offset

-more-

by increased federal budget deficits. If the buying power of workers' wages -- the base of consumer markets and the entire economic system -- continues to lag behind the nation's rising productivity, it will be increasingly difficult to wipe out the plague of high unemployment.

Lack of balance in the economy has been growing for many years. In the decade, 1953-1963, the corporate cash-flow -- after tax profits plus depreciation allowances -- rose 90 percent. In contrast, total personal income after taxes, increased only 60 percent.

In the last five years, the cash-flow of non-financial corporations, after payment of rising dividends to stockholders, was nearly $9 billion greater than their investments in new plants and machines. The corporations are loaded with cash.

Part of these excess corporate funds have been invested in Western Europe, contributing to the balance of payments deficit and often resulting in the export of American jobs. Another part of this hoarded cash has been used for stock manipulations, corporate mergers and retirement of outstanding stock. Last year, manufacturing and mining corporations retired more than twice as much outstanding stock as they issued in new stock.

In this process, corporate executives and stockholders have gained vast benefits. In the last decade, dividend payments soared 90 percent and stock prices skyrocketed 180 percent.

The funds paid out by General Motors to its stockholders in <u>extra</u> dividends, last year, were equal to 73 cents an hour for every hour worked in 1963 by every GM hourly worker in all the corporation's plants in the United States. Reports indicate that the nation's top business executives received salary increases of 11 percent in 1963 -- more than three times as much as has been proposed for wage and salary earners -- in addition to stock options and expense accounts.

However, workers' buying has lagged behind the nation's rapidly rising productivity since the mid-1950s. Between 1956 and 1963, the real volume of production per manhour rose 24.4 percent in the total private economy -- a yearly rate of 3.2 percent. But the buying power of all employees in the private economy per hour worked, including fringe benefits, increased only 17.1 percent -- 2.3 percent a year.

Obviously some major groups have fared even worse. In the last seven years, the buying power of the hourly earnings of factory workers rose a mere 11.8 percent; bituminous coal miners, only 3 percent; workers in wholesale trade, 12.4 percent and retail trade, 13.9 percent -- none as much as 2 percent a year. Even after adding the real value of improvements in non-payroll fringe benefits, such as pensions, it is evident that a great and growing gap has been developing between the buying power of workers and the rapid rise of national productivity.

The American economy cannot reach healthy expansion and full employment with a top-heavy load of booming profits, soaring dividends and capital gains, while workers' buying power lags. Such unbalanced trends in the 1920s eroded the foundation of the economy and brought about the Great Depression of the 1930s. Balance is required between the economy's ability to produce and its ability to sell the rising output of increasingly automated industries.

What America needs is not a lid on collective bargaining and wage increases -- as some people suggest -- but strong unions, effective bargaining and substantial improvements of wages and fringe benefits.

In addition, America sorely requires special efforts to lift the wages and working conditions of the lowest-paid workers, through extended coverage of the Fair Labor Standards Act and an increase in the minimum wage to $2 an hour.

Moreover, idle manpower and productive capacity should be put to work, through increased public works programs, to improve America's public services -- our schools, health facilities, housing urban areas and mass transit systems. The job-creating accelerated public works program, which is now being phased out, should be extended, with a $2 billion federal appropriation, to increase employment in the creation of public improvements of lasting worth.

In this way can America generate the more than four million new job opportunities needed each year, through the remainder of this decade -- over 80,000 new jobs each week -- to reduce unemployment to a minimum and keep it there. Only in this way can the American economy be assured of the stability and strength it must have if the nation is to fulfill its obligations at home and around the world.

Background material on Income, Employment and Occupation

Family Income: Median Income of White and Non-white families (1950-60)

| Year | Non-white as % of white | Year | Non-white as % of white |
|---|---|---|---|
| 1950 | 54% | 1956 | 53% |
| 1951 | 53 | 1957 | 54 |
| 1952 | 57 | 1958 | 51 |
| 1953 | 56 | 1959 | 52 |
| 1954 | 56 | 1960 | 55 |
| 1955 | 55 | | |

Source: Current Population Reports, Bureau of the Census. 1950-59 from Series P-60, #35; 1960 from Series P-60, #37

The above data are for all U.S. families. The situation in various regions of the nation may differ slightly. For example, in the South the gap between Negro and White is wider, in the North, somewhat narrower. The most startling and tragic fact is that in a decade loudly proclaimed for its prosperity, the very wide difference between Negro and white family income remained unchanged.

Unemployment

Unemployment Rates
by Color and Educational Attainment
March 1962

| Age/race | Elementary School | | High School | | College |
|---|---|---|---|---|---|
| | Less than 8 | 8 years | 1-3 | 4 years | 1 yr. or more |
| 18-24 yrs. | | | | | |
| white | 21.5 | 15.9 | 16.0 | 9.0 | 5.1 |
| non-white | 18.5 | 32.7 | 24.7 | 17.4 | 12.0 |
| 25-54 yrs. | | | | | |
| white | 8.5 | 6.9 | 6.0 | 3.4 | 2.1 |
| non-white | 9.6 | 12.2 | 14.0 | 11.3 | 4.5 |

Source: Monthly Labor Review, Dept. of Labor, BLS, May 1963 Table 10, p. 513

"As in previous years, unemployment fell heaviest on the non-white worker. The jobless rate for non-white was about double that of white workers (11% compared with 5%). Non-white teenage boys and girls had the highest rates of any population group (21% and 28% respectively). The rates for white youngsters was high -- around 12% - ...but far lower than those of non-whites in the same age group. A large disparity also persisted among adults. For example, the unemployment rate for non-white men 25 years of age and over was 2½ times that for white men in the same age group..."

"Non-white workers accounted for 22% of the jobless in 1962 as contrasted with 20% in 1957. They were 28% of the very long-term unemployed compared with 24% five years earlier, although still representing only 11 percent of the labor force."

Employment and Earnings, Vol. 9, #7, Jan. 1963. U.S. Dept. of Labor, BLS, p. vii.

Employment

The employment picture in recent years has been quite discouraging, and the future holds more of the same. Between 1950 and 1960 the physical output of manufacturing industries increased by 70% with no increase in production worker employment. The table below shows the trend of employment between 1953 and 1963 for the durable goods industries.

Overall employment trends:

Employment in Durable Goods Mfg. Industries
Selected months - seasonally adjusted
(in thousands)

| Industry | July, 1963 | April, 1963 | % Change 1953-63 |
|---|---|---|---|
| Total | 10,275 | 9,591 | - 7.0% |
| Ordinance & accessories | 249 | 216 | -13.0 |
| Lumber & wood prod. | 766 | 613 | -20.0 |
| Furniture & fixtures | 378 | 382 | - 1.0 |
| Stone, clay & glass | 585 | 579 | - 1.0 |
| Primary metals | 1,403 | 1,174 | -16.0 |
| Fabricated metals | 1,179 | 1,131 | - 4.0 |
| Machinery | 1,568 | 1,476 | - 6.0 |
| Electrical equip. | 1,356 | 1,544 | +14.0 |
| Transportation equip. | 2,011 | 1,721 | -14.0 |
| Instruments & related prods. | 343 | 365 | - 6.0 |
| Misc. Mfg. | 428 | 390 | - 9.0 |

Source: Employment & Earnings, Dept. of Labor, May, 1963

During the 1950's the entire increase in total employment resulted from increases in the non-manufacturing sectors of the economy retail and wholesale trade, service industries, government, etc. Approximately 6 million jobs became available in these sectors for 7 million additional workers -- one million were added to the ranks of the unemployed. During the 1960's, 13 million additions will be made to the labor force. The present trends of automation show destruction of 1.4 million jobs a year. Unless a vast national effort is made to create employment, the unemployment figures by 1970 will be staggering.

The impact of this on the nonwhite worker is already clear. When opportunity declines for whites, it stops altogether for the Negro. Between 1956 and 1962 the only area where significant expansion of Negro employment took place was in government. Approximately 85% of the increase in nonwhite employment during this period was in the public economy.

Between 1960 and 1962, there was an increase in government employment of nonwhites of approximately 200,000. For the economy as a whole, employment for nonwhites rose by about 100,000, indicating that in the private economy, there was an actual loss of nonwhite jobs.

Occupation By

1950 an

| Occupation | MALE White 1950 | White 1960 | Non-White 1950 | Non-White 1960 |
|---|---|---|---|---|
| All | 100.0% | 100.0% | 100.0% | 100.0% |
| All White Collar | 40.3 | 43.7 | 12.3 | 16.1 |
| Prof., Tech., & Prop. | 7.7 | 12.5 | 2.5 | 4.7 |
| Mgr., Off., & Prop. | 16.3 | 16.0 | 4.0 | 3.2 |
| Clerical & Kind | 9.2 | 8.0 | 4.4 | 5.9 |
| Sales & Kind | 7.1 | 7.2 | 1.4 | 2.3 |
| All Blue Collar | 53.2 | 50.0 | 63.7 | 66.5 |
| Crafts | 21.5 | 22.0 | 10.7 | 10.6 |
| Operative | 24.3 | 21.0 | 28.1 | 28.6 |
| Laborer | 7.4 | 7.0 | 24.9 | 27.3 |
| All Service | 6.5 | 6.3 | 24.0 | 17.4 |
| Private Household | .2 | .1 | 2.9 | .2 |
| Service Except Private Household | 6.3 | 6.2 | 21.1 | 17.2 |

Occupation: Two facts are clear from the data in the above t severe occupational disadvantage. In 1960 45 per cent of no as laborers or in the service industries -- the proportion o 40 per cent of the non-whites were found in private household cent for their white counterparts. A second grim fact is tha in eliminating this destructive disadvantage.

Planning action

In planning action on the problem of employment it would be valuable for local groups to have as much available information on the local economy as possible. Much of this can be obtained from various federal, state and local agencies. At the federal level, the Area Redevelopment Administration (Dept. of Commerce) publishes Statistical Profiles of Redevelopment Areas; the Bureau of Labor Statistics (Dept. of Labor) publishes community wage and occupation studies and surveys of local labor markets. Most states publish extensive data on employment, unemployment, etc. The labor or commerce departments of the state government are usually responsible for this material. Some cities also publish data which should be available on request.

General outline for data gathering:

Current Employment: (private & public)

I. Private: 1) Manufacturing (number, size, product, local ownership or branch)

2) Non-manufacturing (#, size, ownership)
   a) Retail & Wholesale
   b) Service industries
   c) Commerce & banking, insurance

(complete information on unionization of all industries and trades)

3) Occupational break-down for each of above
   White collar, blue collar, skilled, semi-skilled & unskilled.
   Managerial, professional & technical

4) Current racial composition of above categories

II. Public:
1) Federal (agencies & volume of employment)
2) State " " "
3) Local " " "
4) Occupational break-down of each of the above (educational requirements)
5) Current racial composition of employment

III. Profile of the unemployed
1) How many?
2) What industries were they attached to?
3) What occupational category? Skills?
4) Race, education, age and sex?

IV. If possible, the above information should be attained for two periods of time--present and an earlier period. This will permit you to examine the changes which are taking place -- this is usually more important than the picture at any one moment. For example, a particular industry, trade or occupation may be large today but data for an earlier year may show it to be declining rapidly. Another area, employment may appear small but may be growing rapidly -- this is especially true with the rapid automation that is taking place in many sectors of the economy.

7

# SOME PROPOSALS FOR GOVERNMENT POLICY IN AN AUTOMATING SOCIETY*

by Herbert H. Gans

Senior Fellow, URBAN STUDIES CENTER,
Rutgers-The State University of
New Jersey, New Brunswick, New Jersey,
on leave as Associate Professor of
Urban Studies, University of Pennsylvania.

At a recent conference on the problems of the low income population, one of the participants proposed this assignment: What measures for coping with poverty and unemployment could the Administration develop if it wanted to - or had to - formulate a crash program like that of the First Hundred Days of the Franklin D. Roosevelt administration.

The seventeen proposals that follow stem from this assignment. They are a set of individual - and often unrelated - schemes, rather than parts of an integrated program. As a result, they take little cognizance of what is already being done or proposed, for example, in federal depressed area programs, occupational retraining, job formation, education of the unskilled, and the struggle against racial discrimination. Even so, few of the proposals are original.[1] Some are suitable for a crash program; others are longer-range schemes.

Most of the proposals are probably not politically feasible at present. My assumption is, however, that in a crisis - and I think such a crisis may be on the way - new political alignments develop which quickly redefine political feasibility. The important criterion is whether the proposals are workable, and rational; that is, whether they achieve the intended ends, and without unanticipated consequences deleterious to these ends.

I would be the first to admit that most of the proposals are not fully thought out. Indeed, I have written this paper in the hope that they will be subjected to critical comments, and that these will produce schemes that can be undertaken.

## II - The Proposals

The proposals are based on the assumption that in the coming decades, automation and other technological-economic trends will lead to continuing increases in productivity and concurrent decreases in unemployment. The shrinkage of jobs is thus becoming a major problem of American society, and increasingly for more than just unskilled workers.

There are three major types of problems with which the society - and its economy - must deal: the upgrading and shifting of workers and potential workers into the skilled jobs (blue collar, white collar and professional) that will be available; the creation of more jobs, especially for unskilled and semiskilled workers; and the elimination of poverty, a problem left over from the past. Proposals 1 to 4 deal with the first; 5 to 15, with the second; and 16 to 17, with the third.

---

*I am indebted to a number of people for critical comments on an earlier draft, especially Stanley Aronowitz, Robert Dentler, Christopher Jencks, Ralph Showalter and Melvin Webber.

[1] I owe an obvious debt to Donald N. Michael, "Cybernation: The Silent Conquest," Santa Barbara: Center for the Study of Democratic Institutions, 1962. Moreover, many of the proposals were appropriated - even if unintentionally - from friends and colleagues with whom I have discussed this topic over the past year.

## The Shift to Skilled Jobs

The movement of workers from unskilled to skilled occupations essential to the economy is necessary to find employment for those left jobless, and to fill the unfilled jobs that even now exist in considerable number. These aims might be aided by the following:

1. Incentives to Encourage Entry into Unfilled Jobs.

Recruitment for presently unfilled jobs might be increased by certifying entire occupations as Unfilled, and developing programs that eliminate the causes of the undersupply of workers. Higher salaries, better working conditions and training programs for new recruits (see also 3 and 4 below) should be used to encourage entry. An additional possibility is tax reductions, especially during the training period, and while the individual holds the beginning, low paid jobs in the Unfilled occupation.

Among the Unfilled occupations which need workers most urgently are the helping or caretaking professions: teaching, social work, public health, social psychiatry, etc., which require long years of training and hard work, but lack the financial and social rewards of independent professions like medicine and law.

2. The Creation of Helping Sub-Professions.

Perhaps even more important than additional recruitment into the helping professions would be the creation of an entirely new occupational stratum: people who work in the helping professions but on a "subprofessional" level. The needed skills could probably be taught in one or two years programs, or slightly longer ones combining apprenticeship with formal instruction. Recruitment into this stratum should be encouraged among high school or college students who do not - or do not yet - feel themselves ready for professional training, and among adults who want to change occupations.[2] By calling them subprofessions, opposition from the established professions will be reduced, and new curricula can be developed which would avoid some of the lengthy but unnecessary instruction which has become entrenched in these professions.

The greatest need is for subprofessionals, of working and lower class origin especially, who could help the low-income population attain the social and cognitive skills needed to become part of the larger society.[3] Others are needed in almost all welfare and municipal service programs which suffer from a shortage of staff.

These two proposals are needed not only to raise the level of social services and add new jobs to the economy, but also to reduce the current workloads of the existing professions, which is rapidly becoming an overload for some of its members. Expansion of the professions and subprofessions would also halt the stratification of American society into an overworked professional minority and an underemployed majority, a trend that has many undesirable social and political consequences.

---

[2] There may be adults who, whatever their jobs, want to be teachers or social workers, but who are too old to start professional training. They might be attracted to the subprofessions - assuming of course that the work would be financially and socially rewarding.

[3] For more detail, see Herbert J. Gans, The Urban Villagers, New York: Free Press of Glencoe, Chap. 12, especially pp. 273-278, and Frank Riessman, "The Revolution in Social Work: The New Subprofessional", forthcoming.

3. Incentives to Encourage Occupational Shifts.

Many economic and social obstacles now prevent people from making career or even job-type changes once they are adults, although this applies more to white collar workers than blue collar ones. Some of these obstacles can perhaps be overcome by a grant program which would allow adults to leave the labor force temporarily without loss of income so as to retrain themselves for new jobs. A grant, modelled on the G. I. Bill and equivalent to a going salary or wage, should be made available to anyone wanting to undertake training for an Unfilled job. This scheme might be more successful than current retraining efforts, because it would recruit people who want to be retrained for an occupation of their own choice. It would not, however, be likely to attract the unskilled, who need to make occupational shifts more urgently than anyone else.

Eligibility to participate in this grant program should also be available to adults who dropped out of school in adolescence, and now want to complete their high school and college education. This would attract dropouts who have seen the error of their ways in adulthood, as well as people who are dissatisfied with their initial career choice, and would like to get more education for an as yet unspecified job change.

4. Incentives for Earlier Entry into the Skilled Occupations

Another way of encouraging people to train themselves for skilled work - especially those not planning to go to college - would be combined apprentice-education program which starts in high school and allows students to enter an occupation of their choice while still in school. This proposal, suggested by Arthur Perl, might appeal to youngsters who are unhappy in high school, as well as those who cannot afford to go to college at present. If the grantees are satisfied with their job choice, the apprentice-education program could be continued through college, thus allowing them to obtain a free college education while earning some wage. Income grants, such as those suggested in 3 above, might have to be added as students marry.

A more general variant of this proposal, originally suggested by William Wheaton, would be to give needy students grants to help them complete high school, even if they have not yet made a job choice. This would not only help children who must drop out of school because the family needs their wages, but those who are pulled out of school by the lure of an income and the cars, clothes and entertainment it can buy. A grant program is not the solution to the drop-out problem, of course, for as S. M. Miller and others have pointed out, the fault lies with the lack of meaning of the school curriculum for the lower class youngster, his inability to study, and the desire of the school to push him out.

The Creation of New Jobs

The second, and in some ways the most important problem is to create new jobs, especially for the unskilled and semiskilled. This is extremely difficult, given the trends of the economy, and the fact that such jobs cannot be of the make-work variety. Before suggesting some proposals along this line, it is worthwhile to discuss another approach, the reduction of work-hours to spread existing jobs among larger numbers of people. Although this idea has been questioned by the Kennedy Administration, it is likely to become more necessary in the years to come.

5. Industry Incentives to Develop a Secondary Work Force

One way of reducing work hours would be for the government to subsidize industry to adopt a standard work week of 25-30 hours - at present pay - and to eliminate overtime. This would encourage the creation of a secondary work force, which would hold the same job the other 15-20 hours a week. This force might hire young people - especially in connection with 3 and 4 above - or older people who want to work fewer hours.

Tax reductions and income incentives, such as suggested in 16 and 17 below, might be necessary to encourage people to shift to the secondary work force.

6. Incentives to Workers to Reduce Work Hours

Another approach, suggested by Christopher Jencks, would be to encourage people who want to work fewer hours to do so. This could be done by taxing overtime work, or by reducing taxes for those who want to work fewer hours - thus tying taxation to the number of work hours - or to give people income grants to reduce the differences in pay between full-time and less than full-time work.

This scheme, like the previous one, would of course encourage moonlighting. It should be noted, however, that moonlighting is possible only when extra jobs are easily available, and then primarily because wages are too low to permit workers a decent standard of living from one job. This can be resolved only by raising wages. Moreover, moonlighting could be discouraged by taxing second jobs at a higher rate than first ones. Finally, a study should be made to see whether moonlighting is clearly undesirable, or whether it does not also create jobs that would otherwise not exist. Since moonlighting jobs generally require fewer than forty hours of work per week, they might be the kinds of jobs suitable for the secondary work force proposed above.

7. Elimination of Involuntary Workers from the Labor Force

Another way of spreading the work would be to make it profitable for people who do not really want to work to leave the labor force. This would include especially older people, and mothers who work for income rather than job satisfaction. In addition to permanent departures, it might be desirable to encourage temporary departures from the labor force for those who want to take some time off for travel or just loafing, although this is not likely to create permanent new jobs.

Some day it may even be necessary to discourage anyone other than the breadwinner in each household from working, either by raising taxes for second and third workers, or by giving allowances to wives and mothers to stay home. Women who want to work and pursue careers should not be discouraged, but those who do not really want to work should be kept out of the labor market as much as possible.

8. Grants for Currently Unpaid Volunteer Work

One way of discouraging women from taking jobs would be to pay them for volunteer work. Many women - and men - work hard in voluntary organizations and derive the same satisfactions as others do from a job. Indeed, being an officer in an important local voluntary association can be a full time job. Paying such officers from government funds would not only encourage them to stay out of the labor market, but it might also attract more people into community service.

9. The Professionalization of Work

Another way of reducing work hours and spreading work would be to encourage the already ongoing professionalization of many jobs, and the extension to them of the temporal fringe benefits - or job interruptions - available especially in the academic profession. All workers should eventually be able to obtain long vacations, sabbaticals, travel grants, periodic return to school, "visiting" appointments in other places, and the like.

10. Export of American Consumer Goods Overproduction and of Skilled Workers

Private enterprise and the government could cooperate in the export - at low cost or

absolutely free - of some of our consumer goods overproduction to the developing areas, not only to raise their standard of living, but also to build up the demand for such goods, and thus to create new jobs in this country.

This is a variant of Seymour Melman's scheme to export machine tools, and David Reisman's "Nylon War" idea of sending consumer goods to Russia to reduce cold war tensions. It would cover yet other items that would be of mutual benefit. Emphasis in such a giveaway should be on those goods not already produced - not likely to be produced in the near future - in the developing areas.

11. "Export" of American Skilled Workers

Another way of opening up jobs here would be to encourage workers whose skills are in oversupply here to work overseas in the developing areas where such skills are in demand, either on the job, or for training the domestic labor force. This scheme may falter because of the reluctance of settled blue collar workers to leave America or even the locality in which they were raised, but it might be possible to encourage young blue collar workers to spend some time overseas as part of their apprenticeship, perhaps in a kind of Peace Corps stressing blue collar skills.

## Jobs for the Unskilled

The most difficult task is to expand job opportunities for the unskilled. The best solution is to make certain that as many young people as possible are trained for marketable job skills, and the number of unskilled is reduced to a bare minimum by the next generation. Thus, providing jobs for the unskilled should be a temporary need, and if so, some policies may be justified as a short range solution that would not be desirable on a permanent basis.

12. Employer Incentives for the Hiring of the Unskilled

One solution would be to discourage private enterprise from resorting to those types of automation which sharply reduce jobs, either by incentives or taxes which would reduce the cost advantages of automating. Another approach would be to offer tax reductions and more direct financial incentives to employers to hire the unskilled, especially those who suffer most from unemployment: the very young and those in late middle age. Such incentives would have to be awarded in such a way that no one of adult working age would be released in order to hire them, and that new jobs would be created as a result. It is, however, doubtful that this proposal could create a significant number of jobs.

13. Temporary Adjustment of the Minimum Wage Law

Another method for creating new jobs might be to cut back the legal minimum wage to, say, 75 cents an hour, and have the difference between it and an adequate wage made up by federal payments to the affected wage-earners. This cutback might lead to the development of new businesses, and with it an expansion of job opportunities for the unskilled. Since such a proposal would in effect mean a government subsidy for marginal firms - where working conditions are often the poorest - and since it would also imply a regression from the wage levels for which unions have fought over a century, such a proposal might have dangerous consequences. Therefore it would need careful study, perhaps through some pilot experiments, in order to see whether the benefits in terms of the number of new jobs would outweigh the social and political costs. If the experiments were successful, the scheme could be tried on a wider scale. The dangers in this proposal might be ameliorated by making it a temporary device; that is, to continue only until the new business is on its feet, after which it would be required to pay the going wages.

14. Encouragement of New Businesses Using Unskilled Labor

A more positive approach to the same problem would be to encourage the formation of new businesses, especially in the area of services, by a low cost loan and loan-insurance scheme - the latter somewhat like FHA - which would facilitate the starting of the business and eliminate a large part of the risk. Early mortality would not necessarily be prevented, but the costs of failure would be born in part by the government.

Market studies and imaginative social invention might indicate a number of feasible new businesses and services. For example, farmers near urban areas might transform their farms into resorts providing low cost vacations for city dwellers. Car rental agencies which would rent out used cars, and commercial baby sitting or lawn care enterprises might be profitable.

15. A Blue Collar National Service Corps

One of the best ways of employing the unskilled is a public works program. In addition, it might be desirable to set up a National Service Corps - somewhat like the new C.C.C. suggested by Paul Goodman and others - which would carry out those additional public works and municipal service functions that are too expensive, or of too low priority to be financed from local revenues or a federal public works program. This Corps would also train youngsters in marketable skills.

Among the most important projects to be carried out by such a Corps would be the rehabilitation of preservable substandard urban housing to bring it up to a livable level. This is suggested by the failure of slum clearance to improve the housing conditions of the poor, and by the possibility that the now proposed rehabilitation programs, to be carried out by subsidizing private enterprise, would raise rents beyond the occupants' ability to pay. If rehabilitation were carried out by a service corps, guided by skilled workers, many people might be employed, and housing conditions could be improved immeasurably, although only if the scheme were part of a government public works program to build additional new housing for the low income population.

In addition, the Corps might also help in the provision of municipal services that can stand some improvement, for example mail delivery, garbage removal, street cleaning, the care of recreational open space, and of public buildings and the like.

## The Elimination of Poverty

Poverty is of course intimately related to unemployment, and would be reduced if the previous proposals were carried out. In addition, the raising of substandard incomes can be accomplished by the following:

16. The Elimination of Income Taxes among the Low Income Population

This measure, which has been proposed many times in recent years, should be tried out to determine whether it would significantly reduce proverty and also increase purchasing power to increase the vitality of the economy. But it is probably not enough.

17. Direct Income Grants to the Low Income Population.

If tax abatement is insufficient, it will be necessary to resort to direct grants, based on the conception that everyone is entitled to a standard minimum income, whether obtained from work or other sources.[4] People who are earning less than this

[4] This proposal has recently been presented in greater detail by Robert Theobald, "Abundance: Threat or Promise," The Nation, May 11, 1963., entire issue.

minimum - perhaps $4000 for an urban family, somewhat less for a rural one, and for people without children, etc. - should therefore be eligible for federal grants - not welfare payments - awarded on the same equalization principles now used in allocating grants to the states. Costly as such a scheme would be, the great spur to purchasing power that would result is likely to reduce the net cost to the government. There is of course a danger that such grants would discourage some from working, but experience with welfare payments has made it clear that most people would prefer to earn their income from work. When the day comes that work is no longer available to everyone, an income grant - financed in part from the "profit" of automation - is likely to be considered a less visionary or irresponsible scheme than today, and I can visualize a future era in which all members of society will be eligible for such a grant.

III - The Problem of Implementing the Proposals

All of the aforementioned proposals stem from the assumption that normal methods of job formation, either in private enterprise or in government, will not be enough in the future, and that new approaches have to be found. Moreover, these approaches require that job formation be planned with other than present criteria, that efficiency, profit, and cost-price ratios must sometimes be superseded by social benefit considerations like those which nominally justify the governmental subsidy of family farms. This means not only a more extensive government involvement in the economy and in the planning of that economy than ever before, but also a search for public funds which would pay the initial and sometimes permanent costs of creating the new jobs.

One obvious source of these funds is a diversion of much of the money now spent for missiles and lunar exploration. Another would be the taxation of industry for increasing automation, so that a proportion of its savings would be turned over to the government to pay for the social and economic consequences of automating. But neither of these sources are likely to be enough, and the rest of the funds would have to come from an increase in taxation of the general public. Whether or not the economy can stand a sharp rise in taxes without downturns in productivity is one important question. How to persuade people that taxes must rise is another.

Middle class people could probably pay more taxes than they now do without having to make serious cutbacks in their private expenditures, but this would not be sufficient to gain their assent. One drawback is that Americans believe government spending is almost always wasteful and infringes on their freedom to make their own spending decisions. This belief can only be altered by demonstrating to people that they need the government services for which they pay, and one method of demonstration is to raise a part of the cost of government by user charges, rather than by taxation. This would enable people to see what they are paying for, although it would also allow them not to use services for which they do not want to pay. It might, however, help to create a new climate of opinion about taxation.

Another way to lighten the psychological burden of taxation is to reduce the multiplicity of taxes, and find a way to collect all of them, federal, state and local, in a lump sum income tax. Another would be to find a way of levying taxes in relation to expenditures, so that they would be low during those periods of the lifecycle when home purchases, raising children, etc. create the greatest pressure on the family budget, and high when these pressures abate.

But whatever the method of increasing taxes, it will require a redistribution of income from the haves to the have-nots, which is likely to be met by intense resistance from the former, and by the inability of the latter to exert political pressure on our political institutions.

The federal government has so far been quite unresponsive to the needs of the low in-

come population, and has not felt any real urgency about the state of the economy. Congress is especially insensitive to the problem. One reason is that unemployment affects only a portion of the country and of the society. Not only are the depressed areas highly concentrated geographically, but as Eric Larrabee and David Riesman have pointed out, the economy is a dual one, consisting of affluent and poor sectors, in which the latter is powerless. Congress is elected primarily by the affluent sector - it does not really campaign in the poor one - and the funds which finance election campaigns come almost entirely from a very small portion of the affluent sector. This imbalance might be ameliorated if political campaigns were financed from taxes, rather than by contributions, for this might increase the dependence of Senators and Representatives on a larger number of voters. Even so, it is not likely to produce a legislature that will be favorable to any scheme involving income redistribution or large scale change in the economy.

The real difficulty is that the people in the poor sector of the economy are neither numerous enough, nor unified in area - or even self-interest - nor effective in making their needs felt. They vote less often than others, but even when they vote, their ballots carry little weight because they live in Northern cities or Southern states with one-party political machines, or in districts which have been effectively gerrymandered to reduce their influence within the political structure.

Until this population can demonstrate the power of number at the ballot box, and make its needs felt vocally in other ways, neither Congress nor the Administration will have much incentive to act in their behalf. In all probability, no major changes in the economy, or in government's role in the economy will come about until there is political action by the poor and the unemployed, be this in the form of picketing, protest marches, political organizations, or unions of the unemployed, or all of these.

IV - Work and Social Worth

Even if the government can initiate changes in the economy to increase job opportunities, a high degree of unemployment is probably here to stay. If present trends continue, most of it will be found among an evergrowing minority of permanently unemployed people, who will endure a life of misery and despair, and will be sacrificed to maintain the present economy.

Many of the proposals presented above seek to prevent the creation of such a group, and to share the work equitably. Yet even if this can be done, it is still possible that in the future, there will not be enough full time employment for everyone who wants it. In addition to the economic consequences, this possibility has some significant social and emotional ones that need to be dealt with.

These consequences result from the traditional American - and Western - culture pattern by which man acquires his social worth, and thus much of his self-respect and ego-strength from his job. If that job is not available, widespread anomie resulting from uselessness is likely to develop, and ways must therefore be found to enable people to be - and feel - socially useful in other, non-work activities.

Now it is true that for many people, especially blue collar workers, the job has never provided much satisfaction, being primarily a source of income to finance the search for satisfaction elsewhere. But even people who do not identify with their work feel useless if they do not have a job, a feeling which permeates their role in the family-visible especially in the marital difficulties of Negro men who have suffered so long from instability of employment - and their entire life. Eventually, joblessness leads to total apathy, despair and personality disintegration.

Criteria of social worth will of course change somewhat as employment opportunity

decreases, but they will probably do so much more slowly than the latter. Even the Great Depression did not do away with the attitude that unemployment is a personal failing.

Consequently, it becomes necessary to discover which institutions, old or new, can enable people to be and feel socially worthy when they are jobless or only employed part-time. The ideal target is a society in which nonwork institutions are more important than work, and in which the departure from the labor market is anticipated rather than feared. This ideal has been proposed in many utopias, past and present, but so far it has been mainly a dream of overworked intellectuals which has not been shared by the rest of society. Now the dream may have to become a reality.

At present, the problem is conceived largely as the availability of extra spare time which must somehow be filled with leisure activity - the socalled threat of leisure. As a result, education for leisure is being advocated again, as it was during the Depression. I am skeptical that this is a solution. For one thing, most people, especially in the middle class, do not lack leisure ideas, but only clusters of time and money with which to carry them out, and of course, the inability to depart from the labor force. Moreover, a considerable amount of leisure training is already being offered as part of the college education - why else are so many schools described as country clubs or playgrounds. Leisure training for the noncollege population may help some people, especially among the most poorly educated, although they would probably not apply for it, since their primary need now is for work.

But the main failing of education for leisure is that it fails to come to grips with the real problem. As depression era studies show, people become less interested in leisure activity when unemployed, because jobloss deprives them of social and personal worth - and leisure cannot easily provide for this loss because it is by definition largely socially useless.

I have not so far seen any feasible solutions to the problem. The professionalization of jobs, and the interruption of work by sabbaticals, as well as the upgrading of rewards for community service (see 8 and 9 above) will help a little. So would a concerted attack on the Puritan ethic, and a recognition of the virtues of spontaneous socializing and loafing that still exist in the cultures of the lower, working and lower middle classes.[5] But these proposals are not enough.

Social planning and social research must begin to find ways of revising the institutional arrangements and beliefs that provide social and personal worth. This task offers an opportunity for meaningful social invention that must combine the best features of utopian thinking, social planning, and political pragmatism, backed up by policy-oriented social science research.

Such planning might begin with the study of societies and groups in which worth is not measured by work, including the leisure classes of past Western society, the adolescents, bohemians, hoboes and Skid Rowers of our own, and especially the preindustrial and preliterate societies which have gotten along without a concept of work and job. Not that such findings can be easily transferred to the modern situation. The three institutions which in the past have been most effective in instilling belongingness: the small community, the tribe and the extended family, play a minor role in a large urban-industrial society, while hoboes and bohemians have been despised for their deviant ways. The only hopeful feature of this problem is that there is still some time - perhaps a generation or two - to find a solution.

---

5 It is ironic that these cultures are under attack by upper middle class critics, reformers and caretakers who seek to instill their own work priorities and Puritan-like leisure attitudes at a time when they are in danger of becoming anachronistic.

RESOLUTION MAR 18 1964 UNEMPLOYMENT & AUTOMATION

Unemployment and poverty level existence as we know it today is serious, but only a harbinger of much more to come as automation reaches maturity and additional "defense" spending loses its "utility".

We support the token gestures toward the solution of the current problem. Among these are extended and increased unemployment compensation; extensive retraining program for the technologically displaced persons; public works program in needed projects and services; updated vocational training which bears a relationship to the present needs of industry; a "G-I Bill" for all college age students, male and female, who qualify for post high school training; and a domestic"peace corps" with skilled concerned workers.

In addition to the above measures, we support a minimum wage of $2.00 per hour; a work week of 25 hours; a law out lawing"moonlighting"; compulsory retirement at age 55; and compulsory registration of all jobs with state employment agencies.

All the above measures are token steps called for within the the framework of our profit motivated, private property oriented economy. None of these measures will reach the person who has never become a member or an associate of our affluent society. The cry is made for jobs because we accept the old standard that the poor must work in order to eat. With all our intricate legal devices to protect the innocent, there is only one crime for which punishment is meted out with consistency, that is the crime of being poor.

If we are to solve the problem of poverty, we must address it directly. A subsidy to the large farm, the mill operator, an air-line or a suburban railway, a tax cut, a defense contract, reduction of the rate of interest in the Federal Reserve System, all of these may filter down to some of the poor, but this kind of economics, if the elimination of poverty is our goal, is like flying to Hong Kong to save money on a new suit.

We must underwrite the family as our most valuable natural resource. If we can subsidize every other facet of our economy and many foreign countries dedicated to the destruction of democracy, the time has come when we must subsidize our citizens who are always good enough to die for their country, why not good enough to live for it?

Therefore be it resolved that:
The head of every family of four should receive a subsidy sufficient to bring his or her income up to $5,000 per year and $1,000 for each additional child until such child becomes self supporting.

Resolved that, All single workers, male or female,should receive a subsidy sufficient to bring their income up to $3,000 per year.

Resolved that, Unwed mothers with one child should receive $3,000 per year with $1,000 for each additional child until he or she becomes self supporting.

Resolved that, Anyone whose condition of unemployment or underemployment could benefit by increased training or relocation should be given the opportunity for either or both at government expense.

Resolved that, Retired workers should recieve a minimum of $2,500 per year per person, with all medical, hospital, surgical and nursing home care defrayed by the government.

Resolved that, All orphans, handicapped, or disabled persons shall become wards of the state who will see to their care, welfare, education and if possible, rehabilitation through foster homes or whatever method best meets the need.

Resolved that, None of the aforementioned benefits shall be contingent upon the liquidation or surrender of any personal assets such as the deed to ones personal residence, a motor vehicle, the tools of ones trade, books or any other personal possession with the exception of investment capital.

Resolved that, Anyone falling within the framework of the aforementioned minimums for decent existence shall pay no income tax on the minimum income or on any additional benefits such as education or medical care.

Resolved that, Through the income tax proceedure, an absolute maximum on personal income should be established at $50,000 per year with provisions for spreading this income over a number of years in those professions where peak earning power is limited to a few years or subject to great fluctuation.

Finally, be it resolved that, None of the aforementioned benefits shall be limited or denied on the basis of color, creed, national origin or moral standards.

# THE NEW SOVEREIGN IMMUNITY

©

Edgar S. and Jean Camper Cahn

Increasingly, the prime function of federal officials is to give out money in order to fulfill some national goal. There are many steps to the process -- establishing criteria, determining eligibility, assessing capability, evaluating past performance, setting the range of permissible experimentation. By these means, broad legislative mandates are given concreteness; the ambiguous and often contradictory desire of Congress is given content; national goals are translated into specific programs with specific price tags.

Administrators, in making this complex set of determinations, are not infallible. They have the power to advance or thwart social goals, to benefit or not to benefit the intended beneficiaries, to realize or to subvert the democratic will as expressed, however imperfectly, in legislative programs.

Yet, in this area of overriding and ever expanding significance, the traditional checks to human fallability are strangely absent. The political process does not go into full gear in appraising and reappraising every grant, every policy, every rule and regulation. And the courts, despite their role as overseers of the application of law to particular cases, abstain, for the most part, from intervening in these decisions.

We have, then, a no-man's-land of official anarchy -- a state of affairs inherently repugnant to both the rule of man and the rule of law. These decisions of officials fall below the threshold of notice by the political process. And they have been off limits to the courts. In perspective, the riots may be only a reflection of that sovereign lawlessness -- its mirror image seen, as through a glass, darkly.

One purpose of this article is to piece together those judicial precedents and statutes which would enable the legal system to subject these decisions to scrutiny and officials to standards of accountability. The elements of a coherent body of law exist already to a far greater extent than appreciated. They need to be brought together, utilized and their development vastly accelerated.

But the contribution which statutes and rules of law can make is necessarily limited. Rules of law are not self-executing. And in matters of judgment the best means of validation yet devised is the democratic process: the majority's only justifiable source of complacency is its reliance on dissent. The rule of law can only complement the political process; it cannot supplant it. Thus, it will take more than rules; more than the creation of bodies of legal precedent. For what is here involved is the democratization of the decision-making process and the extension of the rule of law -- into a realm where neither presently hold sway.

In this special sphere, the creation of new institutions and the structuring of new forums is required to translate rules into realities and to extend the democratic process to Grants of the Sovereign.

I.

We begin with a recent and classic exercise of the sovereign will -- the October 1966 decision of the Office of Economic Opportunity (the federal anti-poverty agency) to deny further funds to an organization called The Child Development Group of Mississippi (hereafter CDGM).

CDGM had been established early in 1965 to run a program for pre-school children that would provide medical treatment, food, learning experiences, psychological guidance, socialization, supervised play, and specialized care for children from impoverished families. It was part of a national effort known as Head Start which had been launched by the poverty agency to overcome the deficiencies which severely handicap poverty-stricken children when they enter school. OEO officials had encouraged the formation of this group and been instrumental in its organization because it was felt that existing institutions would not administer an effective Head Start program for Negro children. In 1965, CDGM received $1.4 million to run a summer program for six thousand children, throughout the State of Mississippi. Few whites would participate in the program and most of those who did withdrew because of intimidation by white citizens' councils and other groups. Harassment by local police, arson, shootings and intense political pressure plaqued the program from the outset. Despite severe congressional attacks led by Senator Stennis, OEO made a grant of $5·6 million to run a program for the summer of 1966 for nine thousand children.

Partly by choice and partly by necessity, the program was distinctive in a number of ways. Most impressive was the extent and depth of local support, of parent participation and community involvement in the program. Thus, for instance, many of the centers were built or renovated by volunteer labor and contributed materials; play equipment, childrens' clothes, furniture were typically built by parents and volunteers; between the summers of 1965 and 1966, 50 centers serving over three thousand children were kept in operation through volunteer efforts.

Other features of the program also require mention. Although CDGM was a state-wide organization, the centers, spread through 38 counties were actually run and administered locally, with a central staff providing technical assistance, training, curriculum materials, field supervision and logistical support. This decentralization of decision-making power and responsibility produced a special kind of grass roots democracy with local centers branching out into such activities as consumer education and welfare rights advocacy. It also produced instances of chaotic administration and book-keeping.

Because there is not an adequate supply of child development specialists anywhere, let alone in Mississippi, CDGM had to supplement the specialists it could import by training most of its staff from local sources. In consequence, of two thousand employees, 98% were Mississippians -- and over 90% were recruited from the ranks of the poor and then trained, supervised and promoted as ability was demonstrated. Thus, by choice and necessity, CDGM set out to prove that an adequate and, in fact, superior child development program could be run almost entirely by non-professionals.

During the summer of 1966, CDGM made application for a third grant to run a year round program. On October 2nd, 1966, OEO announced that it would not refund CDGM and simultaneously communicated that fact to the Board of CDGM. No prior notice of the decision had been received, no bill of particulars was provided then or ever, and no opportunity to rebutt the charges or remedy defects was ever afforded. The official grounds given for this decision included mismanagement of funds, poor administration, poor program quality, alleged deviation from Head Start goals and policies, and the virtually all-Negro composition of both staff and pupils. Other allegations, including nepotism and conflict of interest, were also made

In response, the Citizens' Crusade Against Poverty, a coalition of religious, labor, civil rights and other organizations, organized a massive campaign to reverse this decision. A Citizens' Board of Inquiry composed of eminent individuals was established to inquire firsthand into the charges made against CDGM. Other tactics included appeals to the White House, mass meetings, picketing, newspaper advertisements, congressional pressure, delegations of prominent civic leaders, newspaper and TV coverage and preparation for litigation.

Within less than two weeks after the announcement not to refund CDGM, OEO made grants totalling over twelve million dollars to organizations specially selected as replacements for CDGM. To administrators within OEO, the decision was unpleasant but not novel. I meant sacrificing a highly controversial, predominantly Negro organization and establishing a new organization that purported to be integrated and that was acceptable to the dominant political and

economic interests in Mississippi. Some of the officials involved claimed that they would have sided with CDGM but for the damaging charges that over $200,000 had not been properly accounted for. Others felt it was a choice between CDGM and the survival of the entire poverty program which during the critical months was pending before the Senate Appropriations Committee (of which Senator Stenni: of Mississippi was an extremely powerful member.)

To partisans of CDGM, the battle was symbolic. CDGM epitomized all that the poverty program itself stood for: grass roots participation, a self-help effort, a break-through against discrimination, an innovative use of non-professionals, a shift in the civi rights movement from protest to program -- and a choice in the Deep South between the Old Order and the New.

It is just such decisions of a discretionary and judgmental nature which cumulatively determine the shape, thrust and effectiveness of each of the vast array of federal programs enacted to help the poor. The high stakes involved -- both symbolic and monetary - combined to provide a unique occasion for a utilization of the full range of tactics available to challenge such decisions

It also provided the occasion for a thorough examination of CDGM's legal rights and remedies. We shall consider these now in some detail. What began as a crash job by a handful of lawyers to draw up a complaint in anticipation of litigation, mushroomed into workshop conference on the Rule of Law and Federal Grant Making Agencies, based upon a concerted research effort by over 70 law studen and 20 professors drawn from 6 law schools together with 15 attorn from prominent Washington, Philadelphia and New York law firms.

The following section draws heavily upon the research conducted by these students under the supervision of Jean Cahn as Counsel for CDGM and Chairman of the Workshop Conference.

## II

## THE LEGAL RIGHTS OF FEDERAL GRANTEES -- A CASE STUDY OF CDGM

The hornbook law at first glance presents a particularly bleak picture.

No one has a right to do business with the federal government Grants and contracts are acts of largesse, to be bestowed by the government as it wishes. Short of a flagrantly arbitrary or unconstitutional exercise of that power, courts will not second-guess th judgment of the administrators. These decisions rest upon factors with which the courts claim no special expertise. The separation o powers doctrine engenders a general aversion to judicial meddling i the affairs of the executive branch, especially in those decisions classified as "discretionary." Considerable latitude must be allow administrators if they are to move flexibly -- and administrators a not the courts are best aware of the full range of factors, politic and programmatic, that must be balanced. It is presumably up to Congress to act if it is displeased with the way in which its legis lation is being implemented.

The matter is made more difficult by considerations of stand ing and injury. CDGM was a creature of the federal government and, to the extent that its existence was dependent on federal largesse, existed at the pleasure of that government. Since the same amount funds would be spent regardless of what organization received them and since approximately the same number of children would benefit, r one could be said to have been specially injured because no partic lar child enjoyed a right to participate.

The picture becomes darkest when one considers the question o remedies. Even if one could secure court intervention, the traditio nal approach of courts to such problems is to remand the matter to the appropriate agency for disposition in accordance with procedure to be promulgated by the agency. In short, all one gains is a remand to a biased arbiter who has already served notice of his judg ment on the merits. While traditional doctrines of bias might appea applicable, it is unlikely that the court will disqualify the agency and fashion a new institution which can provide a fair de novo re- view. A court will tend to feel obliged to take the word of an agency which says it will reconsider the matter in accordance with new review procedures. Thus it appeared at first glance that judi- cial intervention, even if it could be secured, would be fruitless.

None of the above statements or considerations proved dispositive for two reasons.

First, under a variety of statutes and court decisions, CDGM had an extremely strong case for securing judicial intervention and certain significant, albeit limited, forms of remedy.

Second, as a tactical matter, if CDGM could just survive int( the court (and not be thrown out on a motion for summary judgment) it could use discovery procedures to obtain certain documents which we known to exist and which substantially cleared CDGM of all charges and corroborated the contention that political pressure had forced the decision. Just to be able to demand those documents, to flush certain issues into the open, to get in a forum where the rules of the game are relatively predictable, would virtually have assured a negotiated settlement. No federal agency, least of all one with OE(

special mission, can readily afford to surrender proof of its own error or to admit that capitulation to political pressure forced a decision at odds with the best interests of the program. While yielding to political pressure goes on every day, the threat of exposure in a neutral formm, the mere airing of the counter charges, let alone the use of discovery procedures, makes getting into court in and of itself, critically important.

It is thus a matter of no small irony that CDGM's surest bet for getting into court was Title VI of the Civil Rights Act.

A. Grantees Rights Under Title VI of the Civil Rights Act.

Title VI creates an explicit right to judicial review where refusal to continue assistance is based on racial discrimination. If CDGM was charged with being racially segregated, then it was entitled to the same procedural protection, delay and review as Governor Wallace. OEO officials had been either candid, or careless enough to point to CDGM's predominantly Negro composition as one of the prime reasons for the decision.

Assuming one could demonstrate that one of the grounds for refusing to refund CDGM was that it was racially segregated, then CDGM would have had a right to a full hearing, to judicial review (and possibly to a reversal of the decision, by demonstrating its willingness to comply voluntarily with Title VI). Possibly, CDGM could even have secured an injunction against dispersal of funds to rival groups pending completion of the extremely lengthy and complicated procedure prescribed by Title VI.

Furthermore, the right to a hearing under Title VI might conceivably have been used to secure a hearing and judicial review on all the other charges. CDGM could argue that OEO was manufacturing the other charges to create an independent ground for denial of funds as a deliberate attempt to deprive CDGM of its procedural rights under Title VI. Given the special solicitude which Congress showed in creating the Title VI remedy, an agency presumably cannot circumvent the law by manufacturing spurious alternative grounds for denying funds in the very manner prohibited by Title VI. This kind of pendant jurisdiction argument might have secured judicial review of all the charges.

But even if a court would not have gone this far, OEO would have been placed in a public forum where it would be forced to acknowledge that it was destroying a vital organization run by poor people because whites found the organization distasteful on account of race.

The Title VI road to judicial review may be of use to any federal grantee in the South faced with termination because of the opposition of whites. The charge can usually be made that the composition of the groups was the basis for the action. This becomes a Title VI issue (with right to judicial review) because regulations promulgated under Title VI typically go beyond overt segregation and cover those situations where the composition and structure of a program produces a segregated situation even though no explicit act of discrimination or segregation can be found. Throughout the South, small grass roots organizations and civil rights organizations are likely to find themselves suddenly ineligible for funds because whites will not join.

The utility of Title VI as a route to judicial review (and thus as an indirect weapon against political pressures put on an agency) may well extend beyond the South. Increasingly urban programs are neighborhood based -- and their racial composition is likely to be cited against them whenever political factors make it desirable for them to be "reorganized out of existence." Title VI can be a major vehicle for scrutinizing and challenging official decisions which undermine the capacity of certain urban grass roots organizations to maintain their integrity and their fidelity to the interests of their members.

The facts which provide a local group such as CDGM with the basis for a cause of Action under Title VI will also support a claim of violation of First Amendment Rights.

The relationship between Title VI and First Amendment claims is not accidental. For CDGM was attempting to give meaning to right in a far richer sense than any civil rights statute or court desegregation order could. CDGM is a microcosm of all those endeavors to deal with individual injuries and deprivation through communal effor by seeking to forge the beginnings of a new society based upon dignity, opportunity and participation.

In this sense, Title VI is a mere derivative of the First Amendment claim. For legal equality all too often consigns courts to the unpleasant role of presiding over the painstaking and equal parsing of poverty, hunger, ignorance and deprivation. Title VI doe not generate new resources, new hopes, new possibilities. It can provide some protection for communal efforts such as CDGM. But the First Amendment is the more immediate and more explicit repository of government's interest in nurturing new communal efforts which can offer the substance of full equality. Thus, First Amendment Rights become of increasing importance. For if we cannot deal with such acts of discretion which menace genuine attempts to enrich the range of options available, then we will be left only with an unending squaring off between the aggrieved and their caretakers.

First Amendment Rights

The denial of funds to CDGM was based partly if not substantially on the fact that employees of CDGM and participants in its program were advocates of civil rights and in some cases members of

civil rights groups such as SNCC or associated in some way with the "Black Power Crowd." The nature of Senator Stennis' involvement, the statement made by Herbert Kramer, OEO Director of Public Affairs the use of Howard Law Students to investigate civil rights sympathies and activities of CDGM employees and Board members, and the extensive demand for information regarding civil rights activities made of CDGM by the Director of the Atlanta Regional Office leave no room for doubt on this score.

Accordingly, OEO's action in refusing refunding amounted to the imposition of a disability because of political views and associations.

A long line of cases makes it plain that the First Amendment prohibition on laws abridging the freedom of speech bars the government from imposing a disability on someone because of his political beliefs. Disability in this sense includes discharge or ineligibility from government employment or refusal to allow one to follow a given trade or profession.

To protect this right, it has been held that one has a right to keep his political views to himself as protection against possible unconstitutional consequences.

In defining disability, it is wholly irrelevant that the person may not have a right to the benefit he seeks:

> "We need not pause to consider whether an abstract right to public employment exists. It is sufficient to say that constitutional protection does extend to the public servant whose exclusion pursuant to a statute is patently arbitrary or discriminatory."
> Wieman v. Updegraff, 344 U.S. 192

And more pithily

> "One may not have a constitutional right to go to Baghdad, but the Government may not prohibit one from going there unless by means consonant with due process of law."
> Home v. Richmond, 110 U.S. App. D.C. 226, 229, 292 F.2d 719, 722

The disability here is a serious one, since it effectively precludes CDGM from performing the functions for which it was created. Also the accompanying defamation prevents and will continue to prevent CDGM and those individuals associated with CDGM from securing other Government grants, contracts and employment in this and related areas.

There was no attempt to show that these political views presented a clear and present danger to the achievement of Congress' goals embodied in the Economic Opportunity Act. Nor is there the extended congressional finding regarding the nature of the threat to national security. Nor, in the case of SNCC and "Black Power" is there the extended congressional finding regarding the communist conspiracy and the nature and threat it posed to national security.

Absent that finding, judicial deference to an extended congressional finding with regard to the clear and present danger posed by communist conspiracy is certainly not owed to the vague and ad hoc administrative concern with SNCC and Black Power as posing a possible threat to the Economic Opportunity Act programs. Moreover, the "Black Power" classification is far vaguer than the communist classification, embracing a spectrum of beliefs and views ranging from "self-help programs" and conventional forms of association for mutual advantageous purposes to advocacy of hatred and violence.

OEO's language regarding SNCC and Black Power recognizes no such distinction and embodies no such deliberative fundings as that arguably involved in national security cases.

OEO cannot claim that it properly imposed a disability on account of the civil rights affiliations, sympathies or membership of CDGM officials, employees and beneficiaries on the ground that such views were so repugnant in the South that they would inevitably prevent organizations which employ such persons from mobilizing broad based support from a hostile community. Here, the governmental obligation is clear: to protect the constitutional right to belief and association rather than to suppress speech and associatic on grounds that the exercise of such rights is distasteful to many in the community. The government must side with the individual exercising his constitutional rights rather than the mob who wishes to suppress those rights.

Having made these statements and imposed this disability, OE( cannot simply take it back and manufacture other grounds which are not constitutionally offensive. Once the government has given an unconstitutional reason for an action, or a reason unacceptable on other grounds, it should not be allowed to persist in that decision simply by going through the motions of withdrawing the improper grounds and manufacturing spurious reasons to accomplish the same a(

The relationship of rights of association to the exercise of free speech is too well known to merit discussion here. But it becomes increasingly apparent -- as the limitations of individual jc training and educational programs become apparent -- that organizational efforts, communal enterprises, cooperatives, neighborhood

corporations, community unions and other associational activities will emerge as the most effective route to social change and to elimination of the causes of poverty.

It is precisely at this point that the dependence of such efforts upon governmental support, or at least toleration, is likely to make prctection of the First Amendment Rights embodied in those efforts of paramount importance.

The First Amendment Rights of individuals and groups to engage in such efforts without suffering penalties for the beliefs and associations of individual members become all the more important with developments that blur the distinction between the public and private sector and which make private non-profit corporations a major recipient of public funds. Well over 60% of the 800 community action programs employing over persons are private corporations. The disturbing implications of this new hybrid creature become clearest with the extension of the Hatch Act or its equivalent to all participants in poverty programs, which may amount to a constitutionally suspect sterilization of the political rights of one fifth of a nation.

The centrality of associational rights to the War on Poverty -- and the danger of tampering with them -- becomes clearer by reference to certain aspects of labor law which developed or crystalized in the 30's. Once again we are faced with conditions of unrest sabotage and violence. And, once again, the possibility of collective bargaining, of fair representation, of dialogues conducted in good faith may rest upon the creation and preservation of organizations based upon the principle of a community of interest. It is

doubtful that industrial peace could have been built on a foundation of company unions. Rights of association, combined with the principle of collective bargaining, was the solution this society found to wildcat strikes and industrial violence.

We face now a similar problem -- the renegotiation of the terms of a contract which goes beyond wages and hours and working conditions -- a social contract which governs still more totally the possibility of dignified existence and security and personal fulfillment. The alternative to reaching such a contract is the wildcat strike -- not against the industrial order but against the social order. We call it a riot.

If the poverty program is to cope with this threat to the rule of law, the right to organize, to work collectively, to come together around a community of interests will have to be protected as a sine qua non of the effort to end poverty. That government contracts and dollars areinvolved does not alter this principle. Protection of these rights against the discretionary acts of officials becomes more and more critical as political pressures and hysteria operate encouraging bureaucrats to create "safe" groups, to find "balanced" organizations to administer programs and, simultaneously, to withhold funds from any group which takes a controversial stand, which accepts members who are deeply alienated toward society -- and which does not meet "management's" view of a satisfactory "union."

In consequence, the manipulative actions of OEO in seeking

to destroy one organization and create more acceptable ones will at points subvert the aims of the poverty program and thus might properly be said to violate, not only the First Amendment, but also the enabling legislation itself, the Economic Opportunity Act.

The Governing Statute -- The Economic Opportunity Act of 1964.

It is possible to contend that OEO's decision not to refund CDGM and instead to fund hastily established rival organizations subverted the Act by:

-- equating the purpose of anti-poverty programs with the creation of groups dominated by individuals responsive to those interests presently politically dominant in Mississippi and avowedly opposed to the purpose of the Economic Opportunity Act;

-- superimposing token bi-racial groups as a substitute for democratic representation and community participation;

-- disregarding the statutory requirement that community action programs shall be "developed, conducted and administered with the maximum feasible participation of the poor."

-- actively aiding and authorizing the development of programs in secrecy and without community participation;

-- deferring token compliance with the requirement of maximum feasible participation until a time when it would be meaningless;

-- ignoring and refusing to enforce requirements to provide the public with reasonable access to information regarding programs awaiting funding;

-- failing to give the required notice of the receipt of an application;

-- ignoring the requirement that an applicant or organization must demonstrate a prior concern with poverty.

A limited right to sue under a statute was recognized in Sanders v. FCC, 309 U.S. 470 (1940) where the Supreme Court took notice of the legislative conclusion that vesting power in the FCC to establish licensing procedures would protect the public interest. The Court insisted that unless Sanders were given the right to question the legality of the Commission's action, no one would be likely to raise those issues which would give substance to the Act's

concern with the public interest. (309 U.S. at 477)

Nonetheless it is noteworthy that this and later cases insist merely that an agency listen to certain voices, consider certain interests and afford opportunity for a variety of views to be heard. They are essential procedural in nature -- going to the mode in which a determination of public interest or statutory purpose is reached rather than taking issue with the decision itself and the weight given to competing values.

It is perhaps typical of the law in this field that the central issues in debate -- the range of appropriate ways to eliminate poverty -- affords the weakest legal grounds for scrutiny of a decision which it is contended thwarts the purpose of an act. A court would be predictably reluctant to make judgments on legislative purpose which are so clearly substantive and discretionary and where so many variables must be balanced in arriving at a decision. Statutory preambles are notoriously vague and ambiguous. If we are to enter an era of judicial intervention on substantive issues, it will be because of a newly developing trend to write into a statute specific requirements, specific performance specifications, specific procedures and formulas where deviation is clearly recognizable and not nearly so speculative and judgmental.

There are many administrators -- dedicated, well-intentioned and courageous -- to whom such a development would be abhorrent. They would claim that the extensive articulation of criteria and procedures would shackle them. Based upon personal experience with both the juvenile delinquency program and the poverty program, we

would acknowledge that the gains made, the innovations launched, the processes set in motion may only have been possible because of the essential lawlessness which characterized the highly intuitive, judgmental, political (in the non-partisan sense) and unorthodox styles of the administrators. Freedom from scrutiny, from being called to account at every step was probably indispensable to trying new methods, by-passing old groups, avoiding the monopolistic strangleholds of established agencies and approaches.

Such an approach, we would submit, is only desirable -- or defensible -- during an initial grace period following the enactment of new legislation creating or significantly expanding and altering the shape of a program. During that period, which usually lasts about a year after the first authorization and appropriation takes effect, a certain recklessness, secrecy, guesswork and unorthodoxy is necessary -- if only to gain a sufficient base of experience to begin articulating goals and standards with greater specificity than that contained in the legislation.

After that first year, circumstances alter. For one thing, certain property rights begin to accrue in grantees, so that the minimal requirements of due process steadily increase. But, even without this factor (to be discussed later), we would put our faith, after an initial grace period, in the progressive articulation, appraisal, refinement and revision of standards defining objectives. The reasons are many.

First, administrators naturally tend to overstate the indispensable nature of unchecked discretion. Such claims are not self-validating. We have seen the effectiveness of lawlessness to

produce distinctive and otherwise unobtainable results diminish markedly after an initial period of innovation. Administrators tend to credit their own style for the effectiveness of their original lawlessness -- while blaming subsequent ineffectiveness on external circumstances.

Neither blame nor credit can be so apportioned. Initial achievements are a product, not simply of administrative flexibility -- but also of the original grant of discretion which carried its own momentum and which implicitly conferred a politically protected immunity of limited duration. Within that period, one can do much to realize its full potential -- or nothing. But administrative discretion creatively used primarily exploits such freedom; it does not create it.

Conversely, external events are only partly responsible for making the style of lawlessness ineffective. The best protection against reaction, political retaliation and the pressures of changing circumstances is likely to be the law. But the lawless official (good or bad) does not seek assistance from the rule of law, from the values of procedure, of uniform standards, of precedent, of rational justification. Instead he moves to secure the intervention of some bureaucratic <u>deus ex machina</u> to deliver him from his present straits. Characteristically, lawlessness when faced with obstacles to achieve an objective (whether good or bad) resorts to further lawlessness, by escalation, by a demand for more power, or by an appeal to some higher authority. Sooner or later one exhausts one's appeals. The sources of power, and of emergency assistance, run dry. And, in the process, one has established a <u>modus operandi</u> which renders vul-

nerable all past accomplishments while leaving one powerless either to defend or to advance. Well-meaning administrators might do well to heed Sir Thomas More's warning:

> More: What would you do? Cut a great road through the law to get after the Devil?
>
> Roper: I'd cut down every law in England to do that!
>
> More: Oh? And when the last law was down, and the Devil turned round on you -- where would you hide, Roper, the laws all being flat? This country's planted thick with laws from coast to coast -- man's laws, not God's and if you cut them down -- and you're just the man to do it -- d'you really think you could stand upright in the winds that would blow then? Yes, I'd give the Devil benefit of law for my own safety's sake.
> A Man For All Seasons.

Second, administrators tend to overstate the extent to which standards, criteria and procedure will shackle them. Performance standards can be used to define end results rather than methods -- leaving freedom to innovate in method and approach -- and implicitly rewarding those breakthroughs in performance which can only be secured through innovation. To be sure, some standards and some procedures inhibit. But others can protect and encourage creativity. So the debate is not rightly framed as one for or against standards -- but rather as a debate between different kinds of standards.

Third, there appear to be almost natural laws of bureaucratic growth which seem to work inexorably to make the gains from lawlessness increasingly marginal and the costs increasingly prohibitive.

The initial legislative license expires. Excuses for mistakes based upon just getting under way become less and less accept-

able politically. The consequences of one's actions become more and more apparent and one is increasingly called upon to defend the past in order merely to survive -- let alone to secure more discretionary power. The need to proceed in a somewhat orderly fashion grows -- and it becomes more and more difficult to do something controversial innovative or risky without being seen, stopped, questioned and subjected to an ever increasing number of safeguards and review procedures.

Within the agency, free wheeling administrators find themselves more and more boxed in, possessed of less power, facing more frustration and more obstacles. A bureaucratic dialectic operates to eliminate the innovator, or to fence him in. Over time, discussion and exploration polarize into debate. Positions become frozen and incapsulated in different organizational units which have different perspectives and positions. Most frequently the alignment takes the form of a cold war between "policy oriented" and "management oriented" officials often reflected in a split between staff and line.

While perspectives are difficult to characterize, the management minded person seems more concerned with closing the gap between need and resources, between supply and demand -- by some orderly process which constricts and makes manageable the dimensions of the problem. The policy oriented persons seem more concerned with retaining fidelity to the original need even though this usually increases the gap between resources and need and stimulates demand and dissatisfaction with existing programs. By a natural process of attrition, turnover and frustration, some of the policy oriented

innovators leave or are forced out. This carries with it special consequences, for they take with them the source of their power, which is highly personal, individual and based on contacts, networks, special sensitivities and savy. The same loss is not true of management oriented officials. Their successors inherit their power to a far greater extent because it inheres in the function rather than in the individual. The management oriented official is relatively fungible; the policy oriented official is not. With each departure, the relative strength of policy oriented innovators diminishes; the frustration increases, driving out still more innovators. Turnover accelerates and the shift in style from creative and free wheeling to managerial and bureaucratic inertia increases geometrically. As a purely practical matter, the capacity of lawlessness to effect good diminishes rapidly.

Fourth, administrators appear, fundamentally, to distrust the political system and the democratic process. And so they subvert it by ambiguity and silence, by preserving immunity from scrutiny, by a refusal to articulate what they are doing and seeking to do -- except in a matter which is calculated to reflect creditably and secure more funds.

This desire to avoid scrutiny and possible criticism is in part the product of considerations of administrative convenience. It is a nuisance and a burden to initiate and sustain an informed national dialogue. But it is also the product of a desire to conceal program deficiences which stem from inadequate resources out of fear that Congress will retaliate for this implicit criticism of its appropriations.

Whatever the causes, administrators act as if they find democracy distasteful -- if not downright dangerous. That distrust is likely to be self-confirming. For where there is no candor no disclosure, no scrutiny, no articulation of choices, the response of the political system will not necessarily merit commendation.

It is a vicious cycle -- which can only be broken by increased specificity about goals, procedures, criteria, policies chosen and alternatives rejected. We believe such candor and explicitness is necessary to call forth the necessary national commitment of resources, to insure that program objectives are realized and to preserve democracy itself.

At present, statutes do not contain the kind of specificity necessary for judicial -- or political -- scrutiny of agency performance. To the extent that such articulation takes place, it is done through the promulgation of agency regulations which, ironically, until recently have been viewed as the private possession of administrators to be jealously guarded. Those regulations are typically silent at critical junctures, unreadable and unmanageable. Nonetheless, the nearest thing we have to full disclosure is to be found in agency rules, circulars, memoranda and policy statements. And thus, the law governing the effect of such documents is of considerable importance.

Regulations promulgated under a Statute

Agencies customarily have power to establish policies, standards, criteria and procedures and to promulgate regulations as seems appropriate to the implementation of their statutory mandate. Once an administrative agency makes a rule, it is bound by that rule and

obliged to follow it.

The agency is not free to disregard those regulations, even though they have not been published in the Federal Register. The regulations are binding even though they are far more generous than that which the agency was required to provide.

Thus an agency once having acted to promulgate procedures can no longer act as if it had unfettered discretionary powers. The language of the court in Cappador v. Celebrezze is particularly apposite:

> And once appropriate rules have been established, the discretion conferred in day to day administration cannot have been assumed to extend to unreasonable deviation from such rules on an ad hoc basis at the whim of the Administration.

A court will require a showing that one has been hurt or adversely affected by the agency's failure to follow regulations. In the CDGM case and in other situations with which we are familiar the most useful regulations have been those governing funding priorities, re-funding procedures, contract dispute procedures, sign-off procedures, inter-agency delegation agreements and coordination procedures.

Usually one can find an agency regulation or procedure which has not been enforced and which, had it been enforced, might plausibly have provided some protection or averted the alleged injury. The press of business, the pattern of agency staffing, the inter- and intra-agency power struggles all make it difficult to follow all regulations with any degree of consistency. A regulation might more aptly be described as a cross between an ex post facto justification for a past action and a bulletin from the bureaucratic battle

front indicating who had prevailed on a given issue and who had secured more administrative terrain for himself. Only occasionally are regulations descriptions of actual agency practice.

Consequently, the threat of compelling an agency to follow its own procedures, to conform to its own policies is formidable. Agencies can ill afford to expend on a continuous basis the staff time, the facilities, the delay, or even the candor which their own regulations often require. Just a remand by a court ordering an agency to observe its own policies may be an adequate substantive remedy because of the nature of the strain imposed by such an order.

It is natural therefore, that agencies are often derelict in promulgating regulations -- and once having promulgated them are particularly secretive about them. While such regulations are theoretically in the public domain, in fact such regulations have in the past not been made available even on request -- except to specially favored, or feared, parties.

That has all been altered by the new Freedom of Information Act, which makes it possible to gain access to rules and regulation and even makes it possible, in certain circumstances, to compel their promulgation.

This Act was not in effect when the CDGM controversy arose, and thus CDGM was in a far weaker position to compel the articulatic of uniformly applicable standards of conduct and enforcement and to obtain access to OEO's own reports, documents which formed the basis for the official decision. It was reliably reported that OEO had in its possession copies of a General Accounting Office report which

substantially exonerated CDGM of all charges of mismanagement of funds and poor accounting procedures. Similarly, allegations of political pressure underlying the decisions could not be corroborate directly although the existence of correspondence substantiating this charge was reported by reliable sources.

Discovery procedures, in the course of litigation, might ultimately have secured access to those documents. But because the threat of litigation is most potent when unused, most grantees of the federal government would be understandably loathe to institute suit purely in order to obtain the correlative discovery rights.

With the new Freedom of Information Act, that pitfall is now eliminated. It is possible to sever one's demands for information and for promulgation of rules and regulations from one's litigation on the ultimate issue. The Act, the new section 3 of the Administrative Procedure Act, creates a right to judicial review of any refusal by an agency to supply certain kinds of information. One does not have to be a party aggrieved or interested in order to secure such redress because Congress was specifically concerned with the narrow construction that had been given those concepts under prior legislation. This Act, the work of ten years, promise to be one of the most potent legal tools available for scrutinizing and challenging the conduct of federal officials. Briefly the new Freedom of Information Act requires every federal agency to

(1) publish certain information in the Federal Register;

(2) make available much other information in a convenient place where any citizen can read and copy;

(3) provide other information upon request;

(4) prove the need and authority for withholding any other government records.

Experience with the old section 3 had educated Congress as to how readily agencies disregard statutory mandates to disclose information and even to disseminate regulations. In consequence, the new Act provides two means of compelling compliance with the Act:

(a) A refusal to provide information is subject to judicial review, takes precedence on the docket and is given expedited treatment. The agency is not entitled to any presumption that its determination to withhold information is legally correct.

(b) A person cannot be adversely affected by a rule of which he does not have proper notice nor can any opinion, memorandum, policy or instruction to staff be used against one if it was not made properly available.

There are to be sure nine classes of information which are excepted from the Act -- and these are worded so ambiguously that they may turn out to undo all that the Act sets out to accomplish.

However, the Attorney General has intimated that he expects federal agencies to respect the spirit as well as the letter of the law -- and since it will fall upon the Justice Department to defend agencies which refuse information, the Attorney General is in a powerful position to insure that the presumption in favor of disclosure and liberal interpretation is honored.

Two factors, other than litigation and court decisions, will ultimately determine the import of this Act. First, Congress must monitor implementation of this Act carefully; there are already

clear signs that at least certain Congressmen and Senators are prepared to do so.

Second, and possibly more important, compliance will rest upon the extent to which the Act is used by the general public, by the press and media, by grantees and citizens groups. While the Act in theory gives the same standing to all citizens to demand information, the equity of the demand will doubtless have a direct impact upon response. Much will also depend upon the particular words used in asking for information.

The new section 3 creates an enforceable right to disclosure and to articulation of the basis for an administrative decision which seems revolutionary -- only because of the inexplicable and inscrutable modus operandi now prevalent throughout the federal agencies.

The mode of decision-making to which CDGM was subject is typical rather than an exception. CDGM received notice of the decision months after it had been made and actions taken to insure that it could not be reversed. It was given no notice of the charges, no bill of particulars, no chance to be heard, no access to the information used against it, no chance to respond to charges, no opportunity to remedy defects, and was subject to a penalty substantially harsher than that applied in cases where similar charges had been actually proven against other grantees. Other federal grant and loan programs administered by HEW, Labor and Agriculture proceed in the following order: verdict first, rationale later and evidence (if at all) last.

The nature of the review and the relief available under such circumstances is governed in the first instance by agency regulations. Despite recent erosions of a substantial nature, the doctrine of exhaustion of administrative remedies still prevails. Some of the more unfortunate consequences of that doctrine will be eliminated by the Freedom of Information Act which at least enables one to know just what remedies there are which one must exhaust. Equally important, however, are the minimal standards to which agency procedure must conform.

An agency is not free to provide an over complicated, inadequate, or unduly burdensome mode of review.

The Administrative Procedure Act.

Judicial review may thus be available if agency procedures do not conform with the requirements which the Administrative Procedure Act levies upon federal agencies.

In order to invoke these procedural requirements, one must show that a legally protected interest has been injured by agency procedure. The APA does not create such an interest by itself. The right to judicial review is posited on the prior existence of a legal right which has somehow been violated or adversely affected. Section 10(a) of the Administrative Procedure Act explicitly provides judicial review only for persons

> "suffering legal wrong because of any ageny action or adversely affected or aggrieved by such action within the meaning of any relevant statute..." [Emphasis added]

From one point of view, the APA only provides protection for a right -- which presumably would have been protected anyway by

either common law or by the Fifth Amendment.

The Administrative Procedure Act does, however, enunicate a clear right to judicial review where procedural safeguards, embodied in the APA, are not provided by the government agency. Thus, for instance, failure to provide adequate notice, failure to hold a hearing, failure to provide an adequate and rational basis for the decision amount to violations of the Administrative Procedure Act. And thus, the APA conferred on CDGM standing to assert the absence of proper procedure -- even though it did not create a substantive right to a grant.

The case law under the Administrative Procedure Act makes it clear that standing to challenge violation of the APA is inherent in the statutory scheme, since judicial review is the enforcement mechanism of the statute.

> It would be a disservice to our form of government and to the administrative process itself if the courts should fail, so far as the terms of the statute warrant, to give effect to its remedial purposes where the evils aimed at appear.

In this case, it would not have been sufficient for CDGM merely to allege that it had been beaten out by another competitor and consequently suffered financial injury. It would have to show injury beyond that arising out of competition per se -- and going t other elements of injury flowing directly from the improper procedures of the agency.

Not only would CDGM have standing as an unincorporated association to challenge OEO's procedure. but other beneficiaries including private individuals -- parents and children -- would have

standing to obtain judicial review for failure to follow the procedural safeguards embodied in the APA.

The Administrative Procedure Act can be used to force an agency to promulgate regulations setting forth the substantive standards and the procedures it will use in reconsidering a decision it has already made. As the Court stated in Gonzales v. Freeman:

> Neither appellants nor others similarly situated can turn to any official source for guidance as to what acts will precipitate a complaint of misconduct, how charges will be met or refuted, and what consequences will flow from misconduct if found... Such disbarment cannot be left to administrative improvisation on a case-by-case basis. The Government power must be exercised in accordance with accepted basic norms.

Section 6 of the APA establishes certain minimal requirements of due process which would have to be incorporated in such proceedings -- including the right of all parties and interested persons to be heard in agency proceedings, and the requirement that all proceedings be conducted with reasonable dispatch and with prompt notice given of decisions.

The Administrative Procedure Act is most useful when treated as an enumeration of the elements of due process which should be afforded by an agency. Thus, a claim under the Administrative Procedure Act is almost certain to be coupled with a Fifth Amendment due process claim. Assuming one can cross the threshold question of a legally protected right to life, liberty or property, the courts are likely to rely upon invoking the Administrative Procedure Act to give an expansive enumeration of the minimal requirements of due process that must be accorded by administrative agencies.

Deprivation of Due Process

The gravamen of CDGM's dispute with OEO involved the claim of deprivation of Due Process. While the exact nature of the procedures which a grantee might secure is likely to depend upon the court's application of the Administrative Procedure Act, the underlying issue -- whether there has been a deprivation of Due Process - is a constitutional issue raising at least two questions:

First: what is the nature of the property interest which a grantee of the federal government such as CDGM might claim was taken without due process?

Second: is the underlying purpose of the Due Process Clause to protect the specific interests of individuals or to operate independently as restraint upon the operations and conduct of government?

The Property Interest of Grantees.

The most useful analysis of this question is to be found in the case of Gonzales v. Freeman, 334 F.2d 570. In Gonzales, the defendants were debarred by the Secretary of Agriculture from doing business with the Commodity Credit Corporation without any kind of hearing under any formalized procedure.

The court started off by acknowledging that no one has a righ as such to do business with the federal government -- but found that fact not to be dispositive of the issue before it. They rejected the right-privilege dichotemy as sterile and instead asked: was Gonzales deprived of a "substantial interest" -- for if he was, then even in the absence of a right, he was entitled to the protection of

the Administrative Procedure Act and the Fifth Amendment.

The court found that Gonzales did have a "substantial interest" but that term is obviously not self-defining. Instead, it too is a conclusory word -- the product of a balancing process in which the values of unfettered discretion and administrative convenience are weighed against the types of hardship suffered by the complaining party.

The court emphasized that

> The interuption of an existing relationship between the government and a contractor places the latter in a different posture from one initially seeking contracts and can carry with it grave economic consequences.

Grave economic consequences, in themselves, do not constitute a "substantial interest" and the court enumerated the kinds of factors which it balanced against administrative discretion in arriving at a finding that a legally (and constitutionally) substantial interest had been infringed without due process. Those factors were:

-- the size and prominence of the contractor;

-- the ratio of his government business to non-government business;

-- the length of his contractual relationship with government;

-- his dependence on that business;

-- his ability to secure other business as a substitute for government business.

Other cases have recognized other factors which might be considered as giving rise to a substantial interest or "property" within the meaning of the Fifth Amendment. Those cases might be classified under the following types of interests:

(a) eligibility for continuing contractual relations or franchises.

(b) right to perform certain acts and engage in certain occupations.

(c) impairment of substantial property investment in special equipment.

(d) impairment of ongoing business or professional practice.

(e) impairment of present status as government employee or student.

(f) impairment of good name or reputation.

(Hearing and attendant processes seem clearly the sole remedies for official defamatory statements because courts have long accorded high executive government officials absolute privileges from defamation suit.) All these lines of case law were, to one degree or another, in point to CDGM. And they are likely to be in point with respect to other grantees.

Thus, for instance, CDGM had made a considerable investment in highly specialized equipment (including the building of five community centers, re-modelling or making addition to nearly every other center, building or re-finishing playground equipment, tables, benches, shelves, toys, wading pools.) The federal requirement of contributions in kind is likely to produce a substantial investment which, though it does not give the grantee the automatic right to continue in business at least gives him a sufficient investment to entitle him to due process before its value is destroyed by federal fiat.

In addition, CDGM's status was similar to that of the holder of a franchise. The federal government is loathe to run or license duplicative and competitive poverty programs in the same communities and, in consequence, competing applicants stand in a position similar

to that of airlines, radio stations and other holders of government franchises. Similarly, the uniqueness of federal programs, the nature of the special qualifications required and the lack of utility of those qualifications for other activities puts the federal grantee in a situation similar to that of the licensed professional who is prevented from engaging in a business or occupation.

Furthermore, a strong case can be made (based on the nature of the relationship, the original understanding, the customary practice of agencies and even official memoranda regarding re-funding procedures) that past efforts have been made in reliance upon an understanding of continued re-funding. While re-funding is always understood as conditioned by the availability of funds and satisfactory past performance, it is also equally assumed that barring such contingencies, there will be re-funding at past levels or even at significantly higher levels. Efforts, expenditures and investment in reliance upon such expectations (which usually are tacitly if not explicitly encouraged) strengthen the proposition that grantees of federal programs possess a "substantial interest" which cannot be destroyed by government action without certain clearly established procedures.

The expansion of this concept of property will have one clear result. It will put existing grantees in a favored position legally over new applicants. This is useful when one is trying to protect the life of a "good" program. But such doctrine cuts two ways -- affording equal protection to mediocre and poor programs controlled by groups interested in maintaining the status quo.

Such is now the case, for instance, with an organization called The Friends of the Children of Mississippi -- which is seekin to secure federal funding to operate in five counties where another organization, Mississippi Action for Progress now has an exclusive franchise. For a year, FCM has maintained centers which have functioned largely on volunteer efforts with subsistence financing from the Field Foundation. Now in seeking Government funding, it faces two choices: absorption by merger with MAP, subcontracting with MAP, independent funding directly from OEO or substitution of its program for that of MAP. This story can be repeated nation-wide where new grass roots organizations have sought anti-poverty funds only to find that the existing community action agency has established a monopoly grip. We see no adequate justification for preventing competing programs from functioning in the same geographi area -- and, in fact, this has been OEO's stated, if not its actual policy.

Nonetheless, so long as OEO proceeds, despite congressional urging, to treat grants as exclusive franchises to operate in an are then the courts' decisions in United Church of Christ v. FTC and Sanders v. FTC appear directly in point. It is in no way inconsis-tent with the above summarized concepts of property to require that the renewal of a grant to MAP or to a community action agency be viewed as the renewal of a franchise with a full determination of th desirability of so doing, based upon a review of past performance with opportunity guaranteed to rival groups to come in and challenge the grantees' fitness, to prove that it is not in the public interes to renew the grant. The agency, under such a procedure, would be

required to articulate both the criteria applied and the findings made in order to demonstrate it was in the public's interest (as contemplated by the Economic Opportunity Act) to renew the grant. And this determination would be reviewable by a court to ascertain whether due consideration had been given to all the considerations mentioned, whether the points of view of competitors and of the consumer or intended beneficiary had been given adequate hearing and consideration. This does not defeat the concept of "substantial interest" of present grantees. It does imply that concepts of property must be placed in the larger context of due process -- and the meaning of due process explored more fully.

The law -- both decisional and statutory -- appears to be moving away from a simplistic view of due process as simply conferring an immunity to certain kinds of governmental action upon specific "property interests" and moving towards a concept of due process conceived as an operative internal limitation on government itself. The difference between limitation on power and the conferring of immunity is not as metaphysical as a Hohfeldian analysis might imply. The difference shows up

-- in concepts of property

-- in case law on standing

-- in definitions of benefits and gratuities

-- in an expansion of the means available to hold government accountable in the exercise of its powers.

The expansion (some would call it erosion) of the property concept is only one manifestation of the expanded use of due process as a limitation on actions of government which harm any one in any way.

A second movement toward the use of due process as a limitation on government comes in the developing case law on standing. Standing is no longer determined by seeing, first, who has a property interest that has been injured. Rather, the court says: if there is an area of governmental activity which must be kept under surveillance, we will recognize standing in those groups or parties which are likely to be motivated to assist in providing that surveillance. In Sanders a competing media was used as a policing mechanism. Producers with a profit motive would, it was perceived, have a stake in insuring that the "public interest" was protected. In United Church of Christ v. FCC, it was perceived that consumers -- the listening audience -- as well as producers would be motivated to police governmental decision-making processes. Standing then becomes a way, not of recognizing injury, but rather of looking for ways to convert due process into an effective means of holding the processes of government to certain fundamental norms.

Third, and closely related to the concept of property, is the changing nature of notions of gratuity and benefit. The case law increasingly recognizes that gratuities and benefits, acts of largesse cannot be withdrawn at will and whimsy -- and thus, in a variet of contexts, has stated that the recipients of largesse and privileges may not have a constitutional right to that largesse-- but nonetheless government is not free to withdraw the enjoyment of those privileges willy nilly. Moreover, the nature of gratuities appears to be changing such that one may have a constitutional right to schooling, police protection and other services "bestowed" by government -- at least where such services are needed to remedy an unconstitutionally wrought injury or handicap.

## II.

## BEYOND RULES OF LAW

The preceding section has attempted to review and assess the doctrinal resources of the law -- both court decisions and statutes -- for making a successful assault on the citadel of the new sovereign immunity. They present in their entirety a formidable source of authority for subjecting official decisions to scrutiny and for increasing the accountability of officials exercising discretionary powers. The CDGM controversy -- while it gave rise to the research summarized in the foregoing section -- also provided the context for assessing the limitations of those rules.

First, it is reasonably clear that litigation alone would not have sufficed to reverse the decision.

Second, the effort involved in preparing for litigation by itself was so time-consuming and expensive as to preclude its use by the vast numbers of grantees whose injuries do not arouse the same kind of indignation, where the stakes involved are not nearly so large, dramatic or symbolic, where the injury suffered is death by attrition rather than by execution, and where the equities involved are far less one-sided.

Third, much of the factual basis for the legal case stemmed directly from the covert assistance of sympathetic OEO officials combined with a distinctive blend of candor and lack of sophistication. Had these officials been more circumspect, more shrewdly Machiavellian, more dishonest or insensitive, they would have moved in a much more polished way to give CDGM the semblance of due process and thereby would have gravely undermined both CDGM's legal and

moral case. From this two lessons could be drawn. First, one cannot approach the government purely as an adversary; a variety of relationships must be cultivated which start from the premise that officials genuinely want to do their duty and are even grateful for external pressure being brought which will provide them with the occasion and the pretext for doing what they wanted to do all along. Second, silence and bureaucratic sophistication can be lethal. And techniques, extending well beyond formal discovery, must be devised to supply the kind of information which is indispensable to securing any kind of redress or framing any kind of demand for relief.

Fourth, an attack upon sovereign immunity which is dependent entirely upon complaints is likely to miss many of the most fundamental issues. Complaints tend to be only about the things we know about and only about situations which we feel entitled, as a matter of right and equity, to complain about. Thus, for instance, OEO is an agency which has received disproportionate criticism in large par because it has held itself out as responsive to criticism, as being willing to listen. The same cannot be said of many agencies and departments which administer major programs which supposedly are for the benefit of the poor. Their very unresponsiveness immunizes the from criticism. Their lack of accountability insulates them from effective surveillance. The CDGM case may be said to illustrate the sad proposition that we fight most with our friends; our enemies we leave alone. We must recognize that the distribution of complaints against federal agencies may be in inverse proportion to where the real problems are.

Fifth, the relationship between federal grantees and federal agencies is such that victory and vindication can be Pyrrhic if it destroys the underlying relationship of faith and confidence. Harassment and retaliation by the agency are always possible. An agency determined on gradually eroding the strength and legal rights of a grantee can usually prevail. And litigation often has the effect of abrogating irrevocably the relationship it seeks to preserve. Officials dealing in the field of social welfare are not accustomed to being sued; they take it personally as a reflection on their integrity and their good intentions. And it will take a good bit of experience before poverty officials respond to litigation or the threat of litigation with the objectivity and professional detachment of their counterparts in the regulatory agencies which are sued with great regularity.

Sixth, often programs go awry, not because of a particular decision of an agency but because of rules and policies and patterns of conduct which are not essentially "adjudicative" in nature as was the CDGM case. The rule-making, policy-making functions of government, the administrative and organizational decisions regarding staf monitoring, enforcement and delegation are treated by law as "legislative" decisions not subject to judicial review in even the limited way that adjudicative decisions are. To get at the substance of decision-making in government, one must proceed beyond specific decisions governing specific individuals or groups and go to underlyin causes embedded in rules and patterns of administration that are easily overlooked as part of the eternal scheme of things. One always has the impression: this is how things always have been done

and always will be done under a given act. Officials mask the range of alternatives available to them -- and even tend to believe that they have no choice but the course taken. Much of the lack of effectiveness of government programs, much of the impersonal inequities and injuries that programs work result from rules and policies that need never have been made but which are never challenged because it never occurs to anyone that they represent a choice among alternatives, a choice which could be revised by a simple act of discretion.

Nowhere is this better illustrated than in the facts which underly the recent Supreme Court decision in Thorpe v. Housing Authority of Durham. It is just such invisible choices which have converted a national program to provide "a decent home and a suitable living environment for every Ameriman family" into public housing as we know it today -- a program which conjures up an image of massive vertical ghettoes devoid of any sense of community -- bleak, over-crowded, pervaded by an atmosphere of despair and insecurity.

The Thorpe case involved the eviction of a woman who had organized a tenant's council in her housing project. Mrs. Thorpe maintained that she had a constitutional right to a hearing that would have accorded her all the aspects of due process (including notice of the charges against her, confrontation of witnesses, opportunity to introduce evidence on her own behalf.) The Supreme Court avoided a decision on Mrs. Thorpe's constitutional rights because of a circular promulgated by the Federal Housing Assistance Administration (HAA) stating that

> "since this is a federally assisted program, we believe it is essential that no tenant be given notice to vacate without being told by the local authority, in a private conference or other appropriate manner, the reasons for eviction, and given an opportunity to make such reply or explanation as he may wish."

The case was remanded to the lower courts for disposition in the light of this circular.

Ironically, no one, including the author of the circular, knows whether it is binding or is prepared to say whether it could be made binding if the HAA chose to make it so.

This case raises far broader issues than those before the court. These issues arise because responsibility for administration of public housing is split between the federal agency and the local agency. On the one hand the statute says that:

> "it is the policy of the United States to vest in the local public housing agencies the maximum amount of responsibility in the administration of low-rent housing program including responsibility for the establishment of rents and eligibility requirements."

On the other hand, it makes such locally established standards:

> "subject to the approval of the [federal] authority, with due consideration to accomplishing the objectives of this Act while effecting economies."

It would appear, in short, that the local authorities have the initiative -- but that HAA monitors those local policies to secure conformity with national goals. It can seek to assure implementation in a variety of ways:

(1) by including certain requirements in the Annual Contributions Contract, the contract between the federal

government and the local agency. This contract contains extensive terms and conditions. Violations of these conditions can result in loss of "owernship" of the project.

(2) by exercising its statutory power to promulgate rules and regulations (contained in the "Low Rent Management Manual." These requirements are binding and are "the minimum consistent with fulfilling federal responsibilities under the United States Housing Act." They are als apparently incorporated by reference as part of the Annual Contributions Contract.

(3) by promulgating advisory statements of policy and recommendations which are contained in the Local Housing Authority Management Handbook.

(4) by promulgating Circulars and Bulletins which may or may not be mandatory depending upon their nature and upon the designation given them by the HAA.

(5) by exercising a separate statutory power to require local authorities to keep records. (Thus the circular in the Thorpe case stated that the local public housing authorities should offer a conference before eviction and required the local authority to keep records on all evictions including the reason for eviction, the date of the conference, etc. Even if the directive to provide pre-eviction conferences was only advisory and exhortatory the requirement to keep records on the extent of compliance with this exhortation was clearly obligatory.)

(6) by direct personal intervention even where no statutory power exists. (In at least one case, after the Regional Office of the Housing Assistance Administration stepped in, the local authority rescinded its policy against admitting unwed mothers.)

Notwithstanding the extraordinary leverage which it has over local housing authorities, the federal agency, HAA and its predecessor have:

(1) denied power and authority to shape or control the way in which public housing projects are administered;

(2) countenanced or ignored blatant disregard of constitutional rights of privacy, association, due process and equal protection on the part of local authorities;

(3) utilized its rule-making and exhortatory powers to make the lot of tenants more oppressive and more readily

subject to arbitrary, discriminatory and abusive treatment.

(4) responded only grudgingly and partially to pressures from tenants groups and court decisions to influence local authorities to alter their practices;

(5) declined to monitor the relationship between local policies and federal goals and declined to intervene affirmatively to remedy manifest subversions of congressional intent.

It is clear, then, that we are confronted with a program where there is ample discretionary authority -- both exhortatory and mandatory -- but where there has been almost total failure to use it

We deal here in an area where test cases and the usual approaches of reform by judicial intervention are particularly inadequate for a variety of reasons:

1. The retaliatory power of the local housing authority is virtually total.

2. Individual test cases raising critical issues of law can be -- and regularly are -- mooted because the local housing authority gives in rather than risk an adverse court decision -- and then persists in the same practice.

3. Where issues have received treatment by the courts, local authorities feel free to ignore them.

4. Tenants associations which have the potential for effecting reform on the local level are nipped in the bud by evicting leaders and organizers.

5. Local housing authorities maintain that their violation of a federal policy or regulation is a matter strictly between them and the federal agencies and take the position that since tenants are not parties to the contract between the federal government and the local authorities, they cannot benefit from invoking conditions in that contract.

This is not to say that law suits will not establish major changes in federal housing policy. The circular in Thorpe was clearly a response to the pressure of potential and pending litigation:

> "Within the past year increasing dissatisfaction has been expressed with eviction practices in public low-rent housing projects. During that period a number of suits have been filed throughout the United States generally challenging the right of a Local Authority to evict a tenant without advising him of the reasons for such eviction."

Nonetheless, considerable latitude for creative federal supervision and affirmative action is clearly present -- the absence of such initiative is most noticeable where the constitutional rights of tenants are involved and where prevailing local practices have demonstrably failed to achieve the purposes set forth in federal legislation.

Ironically, within the HAA, one finds:

(1) a prevailing belief that HAA lacks legal authority to do much that it can clearly do;

(2) an intense desire to effect necessary reforms;

(3) a somewhat furtive hope that external pressure from somewhere will emerge to provide the agency with a plausible pretext for doing what it wants to do and has the legal authority to do;

(4) a tendency in the General Counsel's office to interpret the powers of the HAA in the most restrictive fashion or, alternatively, to discourage innovation by saying that the law is ambiguous as to how far the agency may go in instituting, encouraging or requiring reform. The absence of clear and explicit authority for action is then used to undermine and restrict the general and broad grants of power expressly conferred on the agency;

(5) a cadre of dedicated officials uniquely possessed of the expertise, experience and inside knowledge of the kinds of changes needed to overhaul the public housing program;

(6) insecurity over exercising initiative and anxiety over the possibility of being accused of trying to reform the abuses of local authorities.

Significant improvement in public housing programs will require two kinds of change in federal rules and practices.

First, specific policies and rules will have to change. These could be incorporated in The Low Rent Management Manual or in the Annual Contributions Contract.

Second, and perhaps more fundamentally, the Housing Assistance Administration must begin to make provision for effective enforcement of all rules and all terms of its contracts. This may seem elementary -- but presently, the only means of enforcement is actually taking over the possession and ownership of a local project This is manifestly too drastic; so far as can be ascertained, this sanction has never been imposed -- so that for all intents and purposes, there is no means of enforcement.

Creation of effective means of insuring compliance with federal rules and policies would involve:

-- the creation of an inspection and enforcement unit within the HAA to investigate reports of non-compliance and to recommend action;

-- the development of a range of intermediate, milder sanctions for minor breaches of the contract including fines, contempt proceedings and provision for dismissal of local offices for cause;

-- the vesting of legal power in individual tenants to enforce rules, policies and contractual conditions by explicitly providing that they can rely upon such rules and policies either as a defense in an eviction proceeding or affirmatively in a suit to compel an official to discharge his duty;

-- the affirmative promotion of tenants' associations as a means of insuring effective protection of tenants' rights and enforcement of HAA policies;

-- the provision by regulation of a role for tenants' organizations in the management, administration and policy-making of local housing authorities;

-- the provision of free legal assistance to tenants faced with eviction or seeking to compel compliance by local officials with HAA policies.

Such changes might be made by legislation, but it is exceedingly difficult to generate congressional action to deal with matters which Congress wisely left to the discretion of administrators. It is precisely this kind of interstitial law-making function which lies beyond the conventional political process. Means must be devised to democratize that process, to make it subject to scrutiny and discussion and to render it less inscrutable, unfathomable and unreviewable.

We are dealing thus with an area where entirely different modes of intervention must be developed if such discretionary decisions of officials are to be scrutinized and their actions rendered accountable.

Long before the legal process is triggered in its traditional way by resort to the courts, administrative remedies must be exhausted -- but to be exhausted they must be created. Because at present there are no administrative remedies to exhaust, intervention in the discretionary decision-making processes of officials requires the creation, from scratch, of administrative sources of redress.

The instruments and institutions which presently exist to provide administrative remedies date back to the 30's and to a concern with the exercise of regulatory power by officials. They are not directly applicable -- nor does their counterpart exist with respect to the grant-making and policy formulating activities which characterize government today. The methods of control presently available were designed primarily to ensure that the regulatory powers of the government were exercised fairly and in accordance with the elemental notions of due process. They involve essentially streamlined versions of the judicial process.

Today, however, we deal with the grant-making and benefit dispensing activities of government. The process is essentially judgmental and discretionary. And the methods devised for checking abuses of regulatory power do not suffice because procedural concerns are typically subordinated to considerations of flexibility, effectiveness, efficiency and administrative convenience. If there is to be an insistence on exhaustion of administrative remedies before courts intervene to scrutinize this new class of discretionary decisions, then we will need to design functionally suitable administrative procedures which incorporate the concept of performance standards.

A beginning must be made -- but the beginning must be based upon an acknowledgement of certain propositions which emerge from the preceding discussion.

First, the existing set of rules and statutes are inadequate by themselves. They need to be expanded; and they need to be asserted.

Second, it would not be realistic to approach the problem purely in terms of rules -- even if they were far more adequate and extensive than they presently are. It takes manpower to assert rules, to invoke them -- and thus, we need to think, not only in terms of rules, but in terms of the resources, the manpower and the institutions necessary to invoke them and assert them.

Third, an institution which evokes this set of rules (and tries to evolve new ones) for the purpose of subjecting discretionary acts to scrutiny and administrators to genuine accountability

is not engaged in a purely ministerial task of asserting rights. There appears to be a myth prevalent in some quarters about legal aid agencies, neighborhood law firms: that the lawyers somehow mechanically pull levers called rules and out pop rights. Much more was intended in bringing neighborhood legal services into being -- and much more is intended here than an institution which performs ministerial legal functions. Neighborhood law firms were intended to be the embodiment of a perspective: the perspective of need, or urgency, of grievance and injury as a counterveiling force to the empire building, alliance preserving, long range strategic considerations which preoccupy and paralyze bureaucracies created to serve the poor. That perspective implies a set of priorities, a method of establishing priorities, a set of relationships between the institution and the community to be served which, if ignored, squanders resources irreparably among innumberable "good deeds." Likewise, an institution designed to affect the discretionary acts of officials in giving grants and administering federal programs cannot be simply a litigation factory -- even if it were to deal wholly with case law and statutes. It is itself an independent force -- not merely an "agent."

Fourth, it is clear that an institution designed to bring the democratic perspective (the perspective of the intended beneficiaries of a program, the perspective of the consumer and the citizen) to bear on those discretionary acts presently vested with sovereign immunity must be concerned with more than the creation and assertion of rules. CDGM provides a case where a vast array of tactics were improvised to secure review. The range of tactics ultimately

employed in that controversy ran the gamut from mass demonstrations, mass meetings, pickets, movies, newspaper advertisements, petitions, editorials, to private negotiations, small delegations of distinguished civic leaders, a formal board of inquiry and direct involvement of political figures. These in turn opened up a variety of channels of communication, review and reconsideration both within OEO and throughout the Executive Branch. The process of creating such modes of administrative review and remedy needs to be refined -- and the patterns of administrative relief changed from ad hoc crisis responses to standard procedures and customary modes of official behavio

This has practical consequences -- which we shall explore in Part III. It also has jurisprudential implications that the rule of law is not simply and solely a matter of rules. Rules must be invoke and enforced. They are not self-executing. Further, it suggests tha law is not solely or even centrally an affair of rules but rather con sists in constellations of forums where pressures bearing the imprimatur of legitimiation are brought to bear in predictable ways to make conduct conform to certain norms.

Courts are only one such forum; rules of law are only one such pressure. And if this is so, it means that extension of the rul of law in a democracy -- and the definition of law itself -- cannot b divorced from the whole range of institutions and forums, values, pro cesses, pressures, presuppositions and expectations which determine the permissible limits of conduct.

This entails an explicitly normative jurisprudence -- a democratic jurisprudence. How one defines law depends on why one asks the question: what is law? And so anthropologists, linguists,

sociologists and psychologists might all find different and, for them, valid answers. We ask the question as members of a democratic society and we find that that identity means that we cannot approach the question, "what is law" independent of our notion of man, of man's wishes and of the instrumentalities devised to fulfill those wishes. To those who say, that confuses law and politics, we respond, at what point do we banish man and his institutions from jurisprudence? To those who say: we must define law as independent of the political system for law surely exists in non-democratic socities, we respond by saying that to so define law is <u>not</u> a neutral act but one which fundamentally subverts the possibility of law as it should be in a democracy. The values and institutions, aspirations and axioms we call democracy define the nature of that process. Where the source of legitimation, authority and sovereignty is defined as deriving from the people, law cannot be divorced from the source of legitimation or the institutions conferring legitimation. McCluhan would say: the process defines the product. Yeats put it better:

> O body swayed to music, O brightening glance,
> How can we know the dancer from the dance.
>
> "Among School Children"

Rules and choreography have something in common. And Yeats' question becomes more complicated and more obviously relevant if the dancer must be licensed and accredited, if the stage must be built of marble, and if the dance to speak must speak to an audience from which many are wrongly excluded.

Rules themselves are only symbols, a shorthand symbol for a moment in time seized from the continuous interplay of conflicting forces and values. So, too, the institutions that embody them are vehicles of a perspective and unique products of the interaction of different perspectives. And each institution which applies, or declines to apply, a rule colors that rule -- so we say, with Yeats, rules cannot be divorced from the process of applying them -- and law cannot be divorced from the ordered quest for human dignity that is the democratic enterprise. There then is no neutral jurisprudence for one who wishes to define law in a democracy. Law is the way we have found of structuring possibilities and probablities, the possibilities of life, liberty and the pursuit of happiness, the possibility of dialogue, the possibility of dignity and self-fulfillment.

The definition is admittedly normative -- for a democratic jurisprudence seeks ways to extend the concerns of the polity, the sources of legitimation, directly and effectively into all forums which are presently closed. It does not deny the authoritative, legally binding impact of undemocratic, unresponsive bureaucracies. Nor can it ignore the internal lawlessness of the process. It is thus explicitly normative in that it seeks to extend the pressures, the concerns and the perspectives of the citizenry into those areas of "the sovereign" from which he has been excluded -- and it makes that enterprise expressly an extension of the rule of law as well as of politics.

Thus the following proposal deals with law as much as it

does with enfranchisement in the political sense. For law is a human enterprise. The concept of judicial review itself represents a turn in the object of our appeal from divine wisdom of "the sovereign" to the judgment and scrutiny of the citizenry that is part of what Wallace Stevens called "The Maker's Ra ge to Order." Man is The Maker.

III.

## IMPLEMENTING A DEMOCRATIC JURISPRUDENCE

## A PROPOSAL FOR A CITIZENS' RIGHTS AND COMPLAINT CENTER

We are confronted then with a vast no-man's land at the heart of our legal system -- territory off-limits to the courts and beyond the ken of the traditional political process. This is more than an anomaly -- a no-man's land is the antithesis of democracy itself.

DeToqueville prophetically warned of two chief sources of this state of affairs: a representative system by which men periodically bestir themselves to select their masters and then relapse back into a state of total subservience; and a benevolent bureaucratic state which exercises a legislative function vast in scope and minute in detail.

The remainder of this article sets forth a proposal developed in response to issues raised by the CDGM controversy for the establishment of an institution which would investigate complaints and monitor the discretionary actions of federal officials.

Such an institution, once established, would only be the first step of many needed to span the void that stretches between judicial abstention and political unresponsiveness -- but, hopefully, it would initiate an evolutionary process that would extend the effective functioning both of democracy and of the rule of law into the administrative process.

Over time, we may see emerge a variety of official self-policing mechanisms and the institutionalization of modes of behavior which embody more fully the values of due process,

accountability and responsiveness. But it would appear that we must start by creating an institution external to government and financed with funds from the private sector before any chain reaction produces a new synthesis of governmental structures and procedures.

The simple and seemingly plausible solution would be the creation of a federal Ombudsman -- an office that would be charged with the power to investigate citizens' complaints, to initiate investigations and to compel changes of practices by censure and other means. It is, as yet, by no means clear what kinds of adaptation such an institution would have to undergo to be suited to a federal system of the size and diversity of this nation.

The Founding Fathers viewed the policing function as residing in the first instance (as well as the last) with the people. Arguably, the creation of an Ombudsman would constitute a partial transfer of the policing function from the citizenry to the government in a manner at odds with that tradition. It may well be possible, philosophically, to reconcile governmental exercise of the self-policing function with a tradition that vests the censorial power in the people over the government. But as a practical matter, government hardly seems over-anxious to assume this responsibility.

For three years, there has been on the books a statute creating a federal Ombudsman of sorts -- albeit with limitations. That statute has yet to be utilized, the position filled and the first appropriation requested. The Act is the Administrative Conference Act of 1964, one of the first acts passed under the Johnson Administration. It stems from recommendations of the

Administrative Conference, established through executive order by Presidents Eisenhower and Kennedy as the counterpart of the judicial conference to examine the procedure and structure of federal agencies, and make recommendations that would improve the fairness and efficiency of their mode of operation. The center of focus was clearly the regulatory agencies -- and the support for the bill came both from the organized bar and from business which had an obvious interest in creating a body which would police the regulatory agencies.

But the Act is drawn in such broad terms that it clearly has the potential of going considerably beyond the originator's conception. Its jurisdiction is as broad as that of the Administrative Procedure Act. And its mandate is to oversee all aspects of agency procedure, organization or management which:

> may affect the equitable consideration of public and private interests, the fairness of agency decisions, the speed of agency action, and the relationship of operating methods to later judicial review.

John Marhsall would doubtless have found such a grant of jurisdiction adequate, even though it explicitly excludes a consideration of substantive policy. The structure of the conference is unwieldy -- being designed as a small legislature. Significantly it was given explicit authority to investigate specific complaints of private citizens as well as to make general procedural recommendations. This legislative body would be composed of roughly two thirds top government officials and one third private individuals, presumably experts in administrative law and representatives of groups with special interests or expertise in these

areas. It would have no power to compel acceptance of the recommendations and resolutions it enacted -- but the involvement of officials in this para-legislative process would clearly create pressures to respond to recommendations based upon public scrutiny and official debate of their own operations.

It is difficult to avoid the conclusion after three years have passed without a Chairman being appointed that this is not the first priority of the executive branch. It is reported that there is less than great enthusiasm over this Act, particularly in the powerful Bureau of the Budget.

The acceptance by government of the self-policing role as an appropriate and integral function is yet to come. Government has a difficult time underwriting the adversary process -- even in the area of legal services where vested rights are involved and where the adversary role of the legal profession is enshrined in law and tradition.

A. Affecting Official Behavior -- Questions of Power, Posture and Methodology.

1. Power

The question of how to affect bureaucracy is usually approached as a matter of raw power. This approach simply inquires: what are the sources of pressure that can be brought to bear upon an official or an agency. The traditional answers include direct political pressure, legal pressure, mass demonstrations, public censure -- but range to more subtle and sophisticated methods.

The CDGM controversy illustrates both the value and the futility of approaching the question of responsiveness and accountability as a pure question of power. The power approach took the form of establishing a national coalition the backbone of which was the various church groups. Picketing, congressional inquiries, newspaper stories, mass meetings, all applied pressure. Escalation of a conflict into the bureaucratic equivalent of nuclear warfare may on occasion be necessary; it is rarely if ever sufficient. The capacity to escalate is more important than the exercise -- just as the power to threaten litigation is often required to avoid litigation.

A direct power confrontation rapidly depletes the available source of power. And those reserves, once used, are not readily replenished. However, the creation of a private complaint center, in itself, would alter the power position because merely by existing it could offer a focal point around which to coordinate effort and funnel communication. Its existence would constitute a statement that the capacity to "go to the mat" is available if necessary. It would accumulate the expertise and sophistication necessary to activate and coordinate appropriate sources of power with a considerable economy of effort, and would have accumulated a network of information, contacts, complaints and incentives that no ad hoc campaign can duplicate.

The balance of power only structures the range of the possible; it does not determine, where, within that realm, the ultimate decision will be reached. The outcome is then likely to depend upon the forum chosen, the techniques used, the alternatives framed

and the style of negotiation adopted.

For the bulk of problems that arise, one can invariably find some source of power -- a friendly congressman, some important civic groups, the threat of litigation, or exposure, the offer of support on other issues, the existence within the agency of heterogeneous groups -- which brings some kind of satisfactory solution (even if not an optimal one) within the range of the possible. The question then becomes how to reach the most desirable, or least undesirable, of the possible alternatives. And this requires a more fine-grained analysis than that typically implied by the word "power."

Posture and Style

Different kinds of problems can be resolved in different ways. Some simply call for information, for the clearing up of a misunderstanding for smoothing over personality differences. Sometimes a seeming conflict simply involves skillful negotiation to arrive at a compromise; sometimes it involves the intervention of a third party to serve as mediator or arbitrator of a dispute.

Top administrators are acutely, if fitfully, concerned over the actions of the vast bureaucracies over which they preside. They know only too well how the letter and spirit of agency policy has a way of being mired and destroyed as it trickles down. One cannot start from an a priori assumption that every complaint calls for hostile confrontation. A "good guy-bad guy" view of the world is neither accurate nor helpful in dealing with officialdom.

One thing is certain, however. The dependent status of grantees sharply inhibits if it does not preclude rational

communication over conflicts and issues of the federal government. The grantee, disgruntled over a particular decision is forced either to beg for grace or, alternatively, to go on an all out offensive, pulling out all the stops and escalating the issue to a political confrontation. Neither is conducive to a rational or equitable outcome. Thus the question of power often becomes a matter of posture: how to structure the terms of communication so that the relationship of dependency does not govern the process of designing a solution.

What then are possible alternatives to the posture of supplication on the one hand and hostile retaliation on the other? There are two processes, or patterns of communication, not now available to grantees of the federal government which might constitute substantial improvements on present modes of communication for resolving disputes. They are mediation and third party representation. A complaint center, simply by inaugurating such processes would significantly increase the range of options available to both officials and grantees. By doing so, it would help change the issue from one of power to one of policy and equity.

Mediation

The mediation process appears particularly appropriate to the grantor-grantee situation. It is no accident that mediation developed in the field of labor relations where one deals not with a contract in the ordinary sense but with a continuing relationship where the parties must learn to live with each other and where individual grievances and difficulties must be dealt with in such

a way as not unnecessarily to damage the underlying employment relationship. Mediation then is tailored to keep things moving rather than to make them grind to a halt while the parties do battle. Thus mediation, properly used, seems most appropriate to the grantee situation where the object is to resolve disputes without jeopardizing the program's objectives or continued funding.

There are a number of aspects of mediation as an approach to dispute resolution which make it a particularly effective mode of handling conflicts and of bringing subtle pressures to bear on officials to evolve a satisfactory solution.

These factors which contribute to producing and shaping agreements which might otherwise not be forthcoming include:

-- eschewing debate over who was to blame in the past and concentrating on a joint quest for a mutually satisfactory understanding governing the future conduct of both parties;

-- appeal to the natural instinct to satisfy a neutral mediator as to one's reasonableness and good faith;

-- a desire to save face where the quid pro quo for a consensual agreement is that the past will be forgotten and forgiven on both sides;

-- an untangling of the issues actually in dispute from those which are irrelevant;

-- a disengagement of the specific dispute from the more fundamental continuing relationship which is to be preserved intact against the threat of escalation of the conflict to embrace the total relationship;

-- the rewarding of concessions as a sign of judgment rather than as a sign of weakness;

-- the increase in objectivity and perspective which comes from the intervention of a stranger to a dispute.

There are many types of mediation. It can be entirely voluntary and consensual, or it can be compulsory and closely akin to arbitration. And officials may protest that handing a matter over to a mediator and sharing confidential information with him would be an improper delegation of their prerogatives and authority. Such justifications for refusal to mediate are not very plausible given rather inexplicable discrepancy between government's willingness to submit contract disputes to arbitration under standard contract dispute clauses and its reluctance to invoke similar procedures where grants are involved. Even so, it is not uncommon to invoke the "good offices" of an official who is higher up in authority and who, if not entirely disinterested, at least does not have the same degree of personal ego involvement as those directly involved in the dispute.

The use of expert panels, the increased use of inter-agency committees and advisory committees composed of private citizens may be precursors of formal mediation panels for disputes between grantees and the federal government. The Complaint Center might itself provide a neutral forum for mediation, but more likely, its role would be to secure the intervention of an official or distinguished citizen as mediator, or formally to propose that both parties utilize mediation as a way of resolving their differences. Thus while the advisory stance of the Complaint Center would not make such a proposal out of order, the parties themselves may hesitate to make such a suggestion, fearing that it involves a loss of face. And a proposal to mediate may be specially attractive when coupled with a second process provided by the Complaint Center: third party

representation.

Third Party Representation

Federal officials often seem invested with the Delphic oracle's aura of mystery, inaccessibility and incomprehensibility. The grantee seeking a change of heart, or simply guidance and information, is usually at a total loss as to how to proceed in this enigmatic world. And, typically, he over-reacts to every suggestion, every gesture and every seeming hint.

At the same time, the official faced with a dispute is caught between the external perception of him as all-powerful and the internal sense of the precariousness and insecurity of his position, his impotence to accomplish much that he desires, and his constant manoeuvering to consolidate his position and secure more power whether for selfish or idealistic reasons. Every dispute, every disagreement, every controversy is perceived as a demand upon him to exercise power he feels he lacks, to risk his own plans and strategies by becoming the grantee's advocate before superiors. He responds to such threatening requests by seeking to make sure that the demand is as safe and reasonable and unobjectionable as possible, by imposing new barriers and requirements of proof as a way of deferring the moment of decision. In so doing, he further reinforces the impression that he has final authority in the matter. Often the official's fears are unfounded -- but that makes them no less formidable as obstacles to resolution of a conflict. The official engages fundamentally in a balancing process -- weighing the demand upon his generosity and the appeal to his principles against the cost of possible disapproval by his immediate superiors.

Disapproval takes subtle forms. One becomes viewed as an "agitator" within the agency rather than a person of balanced mature judgment. One ceases to be trusted with responsibility for fear that one may "take sides". And one becomes labelled as a professional do-gooder who cannot be trusted by the bureaucracy if one's relevant world of approval is that of the people to be served rather than the approval of one's own bureaucratic compatriots. This disapproval takes the form of the fear that one will be viewed as disloyal because one's judgment has been tainted by the "external" influence of principles and passion. And the fear of disapproval, real or imagined, is often more potent than the desire to appear magnanimous, beneficient or even principled in the eyes of the grantee.

This mode of discourse and communication must be fundamentally restructured so that what is at issue is not the beneficience of an official but the integrity and fairness with which programs are being administered. There is a need to inject some degree of reality, or predictability, of clearly defined substantive and procedural standards into this murky situation governed by fear and uncertainty on all sides.

Formalized representation by a third party can go far toward structuring the situation, generating basic ground rules, increasing the pressure to make decisions in accordance with publicly articulated and definable standards. For the official who genuinely desires to act in a principled fashion, the insistence that he do

so by the complaining party provides a source of protection and justification for his actions. The more competently framed and sophisticated the demand, the easier it is to make a principled response.

For the grantee, afraid to precipitate a demand for fear of rupturing a delicate relationship (and incurring displeasure) the interposition of a third person as advocate relieves him of this burden, enables him to escape a sense of anxiety and guilt for insisting on explanations and justifications and makes the world with which he must deal far less frightening, mysterious and unpredictable.

For this reason, the third party representation which a complaint center could provide offers a posture or stance which can fundamentally change an issue from one or largesse to one of conduct in accordance with duty, publicly defined and publicly scrutinized.

Methodology

Depending upon the nature of the complaint or problem and the stage which has been reached, different postures and modes of communication will be effective and appropriate. But underlying the question of posture -- and anterior to it -- is the question of methodology. What does one do? Where does one start? How does one proceed?

Neither posture, nor power, answer these questions. Any issue can be handled in low key or high with an assertion of power or without, in a hostile spirit or an amicable one, by mediation or confrontation.

For this reason, it is essential to delineate a methodology which defines basic procedures before a choice of posture or a decision to invoke certain sources of power can be intelligently reached.

Such a methodology is implicit in the analysis contained in Part I and Part II of this piece. CDGM essentially involved an instance of what traditionally is called the adjudicative function performed by administrative agencies. The analysis of the Thorpe case and its implications for public housing involved a consideration of the rule-making or quasi legislative functions performed by administrative agencies. The following methodology flows from viewing a complaint center as an intervenor in the adjudicative and rule-making functions performed by administrative agencies.

Many of the problems that arise call for the reversal or reconsideration of a decision which is essentially adjudicative in nature. Others arise because of the need to alter a rule or policy (which includes not only substantive policy rules, but "legislation" which sets priorities of an agency, allocates resources and also structures the agency itself).

If the agency action involved is primarily adjudicative, action concerned with the application of policies or rules to a particular party, then the starting point is to seek a clarification of where things stand procedurally and what procedures or channels are afforded either within the agency or without for taking an appeal. Particularly where the substantive demand does not involve a legally vested right, it is easier (and usually sufficient) to demand fairness, openness, consistency and impartiality -- in other

words, to convert a substantive demand into a procedural demand.

Thus the first set of approaches derives from the "judicial" aspects of administrative action. They are procedural in nature:

-- ascertaining what the appeal routes are;

-- holding an agency to its own procedures;

-- forcing the promulgation of procedures by an agency to ensure fairness of adjudication and adequacy of review;

-- forcing articulation of the grounds for a decision (in order to compel consistency with officially promulgated agency policy);

-- establishing procedures whereby adversely affected parties are afforded opportunity to intervene and present their case.

These steps work -- largely because most agencies deviate from their own procedures extensively and because to invoke such procedural safeguards is to require officials to account for their actions and to justify their decisions to a degree which they are often reluctant, unwilling or even unable to do. Consequently to demand an explanation to require that procedures be followed to the nth degree can be an effective way to secure a reconsideration from agencies which are understaffed, overworked and which rely upon cutting procedural corners in order to function at all.

It should be noted that if one goes to the trouble to demand what review procedures are available, it is a common experience to find that one need go no further. The request to know one's "rights" often suffices to produce a settlement through negotiation or mediation. But one may have to assert those rights to secure not merely a resolution but also vindication.

This approach, while useful, has drawbacks. In effect it "judicializes" the administrative process. And the grievance may well be the direct product of over-judicializing decision-making process, of over-complicating procedures, too many layers of review which stultify administrative creativity and diffuse responsibility too thinly. In short, bureaucratic red-tape can be useful but it can also mean that only those parties which have either inside pull or leverage, or exceptional staying power, can beat the bureaucracy on its own terms.

Thus, one may find it necessary or desirable to deal directly with the fundamental defect (substantive or procedural) which gave rise to the problem. If this is what appears needed then it is most useful to view agency's rules, whether procedural or substantive, as "legislation" by the agency.

In effect, this implies the extension of political participation into the rule-making functions of administrative agencies. The real decisions which affect people's lives most significantly are ones which are virtually unaffected by the vote one casts every two or four years. Genuine political participation in the governmental process requires the development of new forms or representation and new means of participation in determining the content of rules, decisions and policies by federal agencies.

If we view agency rules, policies and procedure as laws of legislation then changing those rules calls for new legislation. Effecting a change in policy will then include all the traditional elements of the "legislative process" including pointing out the need for a change, gathering evidence in support of that position,

drafting a proposed rule or policy, generating debate on the proposal, securing adoption of the rule and, finally, securing prompt and full implementation of the rule. These are the varied stages of the rule-making process as it actually occurs in agencies -- albeit not always in a systematic and orderly fashion.

But sometimes a more fundamental change than a rule may be required; in effect, each agency in setting policy is like a legislature with its own composition, its own outlook and structure and perspective. To change agency policy may require a kind of reapportionment of that legislature so that different points of view and different interests prevail. Thus, for instance, one of the direct factors in the Secretary of Agriculture's decision to alter the administration of the Food Stamp Program was the result of a confrontation and accord reached in the Economic Opportunity Council where, in effect, other agencies and departments were given a voice and a "vote" with regard to the actions of a department historically concerned with the producer and not with the consumer.

Whichever route one takes -- new "legislation" or fundamental reapportionment -- methods are required which will enable the public to participate either directly or by proxy in the agency's rule-making or quasi-legislative process.

If we go back to the traditional distinction between adjudication and rule-making in administrative law, it becomes possible then to enumerate two complementary approaches derived from viewing the agency as a "court" on the one hand and a "legislature" on the other.

It is, of course, recognized that the nature of the administrative process is mixed -- both adjudicatory and rule-making in nature. Specific adjudications lay down rules and precedent. Conversely rule-making partakes of adjudication because frequently an agency rule is promulgated in response to a specific case or crisis which requires the formulation of policy. In consequence, many issues will require the utilization of both "judicial" and "legislative" approaches.

But the distinction is nonetheless of importance for two reasons.

First, it provides the basis for a checklist of methods which avoids the necessity of approaching each case from scratch and re-inventing the wheel in determining ways to handle each new complaint. But, second and more fundamentally, the distinction provides a basis for a systematic enumeration of institutional mechanisms and techniques which may produce a new set of institutions and a new body of legal concepts qualitatively different and distinct from the judicial or legislative models from which it derives.

We have attempted to delineate the need for a new institution and to define its purpose and method of operation. Yet no institution established for this or any other purpose can be trusted to remain honest or faithful to its original mission. The age old question must be faced: who shall watch the watchers? Such an institution carries with it no special immunity to the pressures of expedience, survival, funding, respectability and success.

Even were these pressures not present, there would be the difficult issues of priorities and choices. Every federal program could bear scrutiny. And each can doubtless make some special case for exemption from scrutiny -- for the time being.

So too, different complaining parties will each urge that his case is uniquely urgent, uniquely significant, involves special equities and special considerations of friendship or indebtedness. Each choice, each decision by the Complaint Center will raise questions of credibility as to the capacity, the competence or the integrity of the institution.

And, the ramifications of each choice, the pressures and the contending claims -- both meritorious and irrelevant -- can produce a screening and selection process which converts a complaint center into the self-righteous counterpart of those very bureaucracies it purports to police. The poor have surely had enough of that pernicious infinite regress: the struggle to secure help to secure help to secure help....

How then is it possible to insure that such an institution will retain fidelity to its mission, will use its resources with maximum effectiveness, will remain responsive to the changing needs and concerns of those whom it was intended to serve?

This question embodies two perspectives: that of the moment, and that of evolution over time. For the present, we must attempt to articulate standards, criteria and procedures, in the exercise of our best intuition. For the future, we must build in processes, mechanisms, safeguards to insure continuing reassessment, responsiveness and restructuring. And we must consciously set in

motion forces which will have a continuously corrective effect upon the natural tendency toward inertia, rigidity, empire building and unresponsiveness.

The touchstone of performance is to be found in a definition of mission: to extend the rule of law and the democratic process into the grant-making process in order to maximize the contribution which specific programs can make toward the realization of national goals. And, as a matter of preference, accident and greatest need the Center would concern itself only with those governmental activities aimed at, or having the potential of, contributing to the eradication of poverty with all its attendant evils.

Experience demonstrates that a statement of mission -- however lofty -- will not suffice. The poor have been told that the mission of education is to provide opportunity; of welfare, to assure maximum subsistence with dignity; of public housing to assure the security of a shelter for all; of the Bureau of Indian Affairs, to act as steward of an historical trust and sovereign obligation.

Divergence from mission comes at two points: in making individual decisions to take or not to take a particular complaint (or investigate a particular program); in the cumulative effect of individual decisions, each of which may be irreproachable standing alone but, taken together, define a direction, a strategy, a priority or thrust which subverts the original purpose. Consequently, two sets of criteria are required; the first governing specific decisions and actions; the second setting standards against which an overall record can be periodically judged.

Criteria for making individual decisions.

The best one can do -- before one has a body of experience from which to draw -- is to set forth those considerations which would weigh heavily in deciding to take a complaint or initiate investigation into a specific program. There are three classes of considerations which will affect a decision to involve the Complaint Center: the nature of the issues presented (by the complaint or as a result of independent research and investigations the nature of the affected party; and, the nature of the agency or department involved.

The Issues Involved.

The answers to the following questions would weigh heavily in any specific decision to become involved or not:

(a) is the complaint felt to be urgent and of widespread importance by the poor?

(b) does the complaint raise an issue which appears to go to the heart of a program's ineffectiveness or detrimental effects?

(c) will handling this complaint prevent future similar complaints from arising?

(d) will handling this complaint substantially alter patterns of official policy and practice?

(e) is the particular complaint a good "test case" where the issues are well framed and the equities relatively clear?

The Nature of the Complaining Parties.

(a) will failure to handle this complaint result in the destruction or severe harm to an important program, group or organization?

(b) will failure to become involved in this complaint be interpreted by the complaining party (and more broadly) as a form of betrayal or rejection or reluctance to become involved in controversy?

(c) will assistance to a group strengthen its capacity to become self-sustaining, to fend for itself and to demonstrate new modes of cooperative effort to eradicate poverty?

The Nature of the Agency, Department or Program Involved.

(a) is the agency, or program or department one which has escaped scrutiny and which has by unresponsiveness insulated itself from criticism?

(b) are the activities and program of the agency of significance or potential significance in eliminating poverty?

(c) can scrutiny of an agency result in the re-focusing of its energies and the diversion of more of its resources to those in direst need?

(d) can intervention result in a shift in the administrative structure and perspective of a program?

All of these considerations must be considered within the context of available resources. More, however, is involved than simply trying to avoid over-committing one's resources and spreading oneself too thin to be effective

There must be a rough allocation in advance among different types of activities. The pressure of demands to run interference for complainants, to make phone calls, to provide information, to assist in grantsmanship, to find out where things stand with respect to a particular grant, to put in a good word for a program, to expedite an application, can absorb the total energies of an institution. Yet, some such service may be necessary in order to pinpoint critical policy issues. One cannot just "wait around for the big case" because the big case never comes unless one performs certain day to day service functions.

Beyond this service function, a substantial portion of complaints can be handled adequately -- and perhaps even most

appropriately -- by referral -- to a congressman's office, to a government agency, to a local poverty program, or legal service program or similar institution. However, such referrals, to be done conscientiously, require not only the development of a referral system but a monitoring of referrals to make sure that referrals do not simply become a way of passing the buck. Referrals thus can involve a substantial commitment of staff resources, particularly because there must be follow up.

Next there are the problem areas which never come to the surface unless one is prepared to invest resources in research to see how a program is operating, who is benefitting from it and how it should be changed. Complaints are unlikely to be directed at the Justice Department for failure to intervene affirmatively in cases of police brutality, at the Federal Trade Commission for not policing those consumer frauds of which the poor are the most constant victim; at On-The-Job-Training programs for minority groups and persons with few skills, at the Bureau of Indian Affairs for continuing to invest heavily in building residential schools for Indian children while publicly articulating a policy of doing away with residential schools, at the Farmers Home Administration for delegating lending authority to private parties which have consistently discriminated against the poor. No one complains -- because no one appreciates the potential or recognizes the obligation of these programs to engage in substantially different policies and activities. But to conduct the research to locate these kinds of problems requires the diversion of staff and resources away from the service function, away from day to day

provision of crisis assistance into projects which will not alleviate the ever-mounting backlog of complaints.

The allocation of resources amongst these competing needs: information and advice, referral, indepth servicing of complaints, special research projects -- necessarily involve a second set of criteria: those involving overall performance.

Criteria for judging overall performance.

In the final analysis, there are only two judgments that must be made about the composite activities of an institution such as the Complaint Center: did it retain fidelity to its mission? And, was it effective in doing so? This latter question entails not just an assessment of impact but also a more fundamental evaluation of the centrality and significance of the institution's mission.

Fidelity to Mission.

This involves both an affirmative and a negative determination. The affirmative determination starts by asking: was there a demonstrable change in the decision-making processes of government so that, in particular cases and, hopefully, beyond particular cases, an agency began to articulate standards and procedures and policies more fully, abide by those policies and procedures and became more accountable for its actions and its performance to those whom it was intended to benefit?

The negative side involves asking: did the institution just act as a trivial facilitator and expediter? Was it content to win ad hoc battles, to make "deals" and to enter into a

symbiotic relationship with the federal establishment similar to that which often exists between the public defender and the prosecutors office. The Complaint Center's purpose is not plea bargaining and its fidelity to its mission must be assessed not in terms of the compromises made but in terms of the principled nature of actions taken, the agreements secured and the official behavior generated. Concommitantly one must ask whether important issues were avoided. At least as important as the nature of the particular outcome was the way in which it was reached and the extent to which it constitutes not a defeat or a victory for the complainant, but a defeat or a victory for the rule of law and the democratic process.

An easily overlooked but central aspect of fidelity to mission is the nature of the distribution of cases and issues in which the institution becomes involved. For what is called "creaming" in individual service and training programs has a counterpart in the realm of complaints: helping only the most powerful and articulate groups; scrutinizing only familiar and responsive programs, fighting only cliche battles along traditionally drawn lines.

A complaint center will have to be continuously on its guard against inadvertantly developing too narrow a clientele and a fixation for particular agencies and programs. Thus, judging overall performance will surely involve a consideration of the distribution of complaints over various agencies and programs, the composition of persons and groups served -- ethnic, urban or rural, geographical, grass roots or established groups, etc.

A second, and even more difficult assessment to make, is one of effectiveness. A complaint center cannot help but do some good for some people. The need is so great and the resources for securing remedies so scarce. The issue becomes not whether some good is done -- but whether the potential for effectiveness is realized. It is possible to dissipate all one's energies over a myriad of trivial good works, feel virtuous and yet have fundamentally avoided one's responsibility and commitment. Because some return is certain on any investment of effort, the issue becomes whether the complaint center has acted in such a way as to provide the highest possible return on its investment.

Consequently, it will be indispensable for a complaint center to institute a careful book keeping system of the sort which law firms keep in order to bill clients. There must be some way of keeping track of how much time of what kinds of staff doing what kinds of things was expended to secure a given result. Without that basic information, no assessment of effectiveness is possible. In the complaint field, some fundamental cost accounting will be necessary -- to assess performance and even to justify existence. The value of the result achieved (good or bad, success or failure) will doubtless be subject to debate. But if there is to begin to be a rational allocation of resources to achieve certain ends, we must know what the cost in time and dollars is of various kinds of assistance and intervention.

There will undoubtedly be difficulty in arriving at any objective assessment of the nature and value of the return. But we can begin by recognizing that different kinds of returns must be

defined for each of the four classes of effort, and different time periods will be involved.

Thus, for instance, in providing information and advice the experted return will be defined largely in terms of number, caseload, promptness and quality of information and assistance provided; customer satisfaction is probably the most important indication, but credibility to local groups and information gained about local problems and resources are also important.

With respect to referrals, the results may well be defined in terms of customer satisfaction, of increased agency responsiveness and possibly of changes in agency policy.

In-depth servicing of complaints will involve still different returns: the establishment of precedent, changes in agency procedures and priorities, assuring the survival of a significant program or organization are the chief "performance standards."

Research and special investigations of programs are most closely akin to long term investment. Over a period of months, or even years, one may begin to see fundamental changes in program direction, in policies, in staffing patterns, in priorities, in monitoring of performance, in articulation of standards and procedures. But such an investment almost invariably involves sacrificing present satisfaction and quick results for future gains. And therefore the return on the investment must be judged against a different time period than is involved in providing a single piece of information, securing a referral or following through on a complaint.

In attempting to judge effectiveness, two things must be specified with particularity:

The time and effort invested.

The initial expectation as to the nature and immediacy of results desired.

Finally, an assessment of effectiveness involves an inquiry into the underlying worth of the institution itself, an examination of its basic premises and presuppositions -- a testing of its hypothesis that an institution directed at intervening in the decision-making processes of administrative agencies is indeed a distinctively effective way of increasing the accountability of officials, of extending both the rule of law and the democratic process into administrative agencies. And even if it is effective, the question must be faced as to whether resources expended for this purpose would not be better expended to alleviate poverty more directly.

Totally honest self-examination may be an impossibility. It certainly exceeds the capacity and the performance of most. And, consequently, the articulation of criteria, of standards, of objectives, will not suffice. The process by which those criteria are applied will be as critical as the criteria themselves. If a man may not be judge in his own case, then surely, no institution can afford blithely to assume to that a commitment to evaluation is a guarantee of honesty or the implementation of that evaluation.

Who does the evaluating? What are the safeguards to insure honesty? What are the mechanisms to produce full candor and disclosure? And it is here that the democratic process has the greatest direct bearing and offers the least fallible of alter-

natives. The matter cannot be left entirely to professionals -- though expertise and professional judgment have an essential contribution to make. Evaluation must be performed by those who will suffer most from poor performance and will gain most from improved performance. That perspective is that of the consumer, or, more precisely, of two classes of consumer:

(a) Actual consumers, actual customers, groups that have been served and helped -- including those who are dissatisfied;

(b) potential consumers, those who have not been helped, those who are most likely to feel that, regardless of what was done for others, not enough was done for them.

The reaction and assessment of both groups of consumers, past and potential, is essential to honest evaluation. But it is not enough to conduct an honest evaluation unless an evaluation is made, is listened to, heeded and implemented. There must be some way of insuring that evaluation is not a one shot, once a year or every two year process -- but that it is an integral part of the continuous redefinition of direction, priorities, goals and underlying purpose of the institution.

First, there should be formal provision for those who do the evaluating subsequently to become decision-makers so that they can be assured that their concerns are listened to and incorporated. Thus on the board of the Complaint Center, there should be provision for two classes of individuals; those who represent a sample of those actually served by the Complaint Center, who know its failings and strengths at first hand; and, second, representatives of the total range of groups and individuals and interests to which the Complaint Center is avowedly responsive.

Second, there must be provision, within the staff operations for the development of roles, of staff positions so that the consumers can be insiders, can be involved in the internal operations of the institution and affect its activities and judgments directly on a day to day basis.

This does not mean that one is required to follow some constitutional one-man one-vote formula, for the goal here is not proportionate representation in a mathematical sense but representation to insure responsiveness and integrity as a qualitative matter. Yet the strategy of involvement, of participation, can become a covert means of coopting the leadership, of buying off criticism, of silencing those who are dissatisfied.

And consequently it is not enough to establish a certain kind of institution, to provide for independent evaluation and to incorporate the evaluators into the decision-making process. What one controls, one can pervert. What one incorporates, one can corrupt. And, consequently, one must endeavor to set in motion forces and pressures over which one has no effective control if one is to be assured that "the watchers will be watched."

There are two obvious ways of doing this. First, one can stimulate demand for one's services by decentralizing, by intensifying the volume of demands, by advertising, by the establishment of ad hoc groups to make demands. This will make it more difficult to shut out problems, deny responsibility for them, or pretend that they do not exist.

But, second and even more effective, one must stimulate competition -- involve other groups and institutions in offering

competing services so that as a matter of survival, one does not have the "safe" insulation of monopolistic status to insure that one can ignore criticism with impunity. The response of middle class social welfare agenices, of certain civil rights organizations and of professional groups to the poverty program was in many cases hostile -- but it was hostility directed at direct competition, at a threat to survival in terms of prestige and power and funds because the poverty program had entered "turf" which these organizations and groups had claimed as their own. Thus, if the Complaint Center is to be kept both honest and effective, it will have to be prepared to stimulate competition, to attract other groups and individuals to performing similar functions -- by prodding government to set up an Ombudsman, by training local indigenous leaders to perform the watchdog function independently, by stimulating private organizations to perform similar functions and by sharing information, research, legal analyses, reports and contacts. The alternative may well be a cosy oligopoly where the Complaint Center, the labor unions, the civil rights groups, the religious organizations, the professional groups and political organizations all stake out their own territory and agree to leave each other alone.

It is perhaps too much to expect any institution continuously to attempt to make life difficult for itself -- to stimulate unbearable demand, to invite threatening competition. An occasional gesture, a one shot effort is possible. But with the best of intentions, no institution is likely to divert too much of its resources into stimulating competition for funding sources, for

recognition for grass roots support and for sources of confidential information. The job of stimulating demand, and of creating competition may have to be performed largely by others.

And thus, the best assurance that a complaint center will be responsive to the needs and demands of the poor, will retain fidelity to its mission and will seek to achieve maximum effectiveness rests with subjecting the Complaint Center itself to the control of the democratic process -- rests in structuring accountability and responsiveness into the design of the institution itself.

Yet such an attempt is likely to meet opposition from two sides -- from professionals who say the poor are incapable of making informed decisions about the operation of such a sophisticated institution; from the poor who recognizing the degree of expertise and sophistication involved in the conception of the institution will find it convenient to attack the institution as fundamentally undemocratic and elitist.

In consequence, the relation of such an institution to the democratic process can be clarified only after disposing of two polar fallacies; one, The Fallacy of the Monolithic Man; the other, The Genetic Fallacy of Democracy.

The Fallacy of the Monolithic Man underlies the professionals' argument for elitist control of institutions.

The Fallacy is based on three basic propositions:

(a) the poor tell us what they want when they ask for help.

(b) if professionals devoted 100% of their effort to responding to the demands of the poor, one would never

get to the significant underlying causes but would deal only with symptomatic, unending crisis demands.

(c) therefore, the poor cannot be permitted to control institutions or decide what professionals are to do if those institutions and those professionals are to achieve significant social change on behalf of the poor.

Thus, the choice of priorities, the design of programs, the allocation of resources must necessarily be a matter for professional decision.

The fallacy is contained in the first proposition: that the poor tell us what they want, when they ask for help. It assumes that a person can only speak in one mode -- and that a person asking for help is only capable of approching the problem of allocating resources in the way which he does when he is in the process of seeking assistance. That is nonsense. When a person is asking for help, he is asking for help. He is not making a decision about the optimal allocation of resources. He is an advocate, his own advocate. He is not a judge. That does not mean he is not capable of being one -- if that role were assigned him. Professionals have structured the situation where the poor may only speak in one capacity -- asking for help, acknowledging need and dependency. Having structured the process by which the poor may make demands on their resources -- they then decry the irrationality of a system which allocates resources by giving help to whoever comes in the door on a first come first serve basis. But the poor are not monolithic: they are composite individuals, capable of speaking and deliberating in a variety of modes. And the poor person who asks for help is quite capable, in the context

of a community meeting or a discussion, of saying that resources must not all be devoted to the service function, to meeting crisis demands but that some must be diverted to effecting significant change.

Until recently, there has been no attempt to create forums in which the poor have been asked to make decisions as composite human beings, as human beings who have something valid to say about the allocation of resources from the point of view of their community. And so, instead, they are turned into selfish, dependent individuals. By confining them to speaking in that role we prove their incapacity to function responsibly in any other role. Yet, as a profession which drafts corporate charters and constitutions, lawyers are specially sensitive to the fact that different decisions require different kinds of deliberation -- that mergers, or acquisitions or sale of assets involve more serious decisions and that different rules and different procedures must be followed in order to insure that the best interests of all are preserved. The issue is not whether shareholders can make decisions but, rather, how can the decision-making process be structured to increase the likelihood that that decision will be deliberative, carefully considered and rationally chosen.

Yet, if the professionals are wrong in their assertion that their expertise necessarily entitles them to control, the poor are equally in error when they charge that any institution employing a professional or designed by a professional is necessarily tainted by paternalism.

Currently, the statutory mandate that the poor are involved in the planning process has given the genetic fallacy great currency. If the poor are to be involved in the planning, then the next logical question is: but who does the planning of how the poor are to be involved in the planning?

And this infinite regress can be readily converted into an indictment of any effort, any program or any institution. For, regardless of the point in the evolution of a program wherethe poor are involved, it is always possible to point to an earlier point at which they were not involved. And, from that, it is easy to charge that the entire undertaking is tainted with the poverty program's version of original sin.

The essential fallacy here is the assumption that the accident of origin necessarily defines the nature of the object. An institution is what it is -- either responsive or unresponsive, faithful or unfaithful to its mission, effective or ineffective.

At the beginning, there may well be a grace period, much as we suggest there is with public agencies, where the standards both of procedural regularity and of democratic participation apply with less force than they do once the first tentative definition of program and priorities and policies has been formulated sufficiently to permit intelligent public review. There is a necessity to start somewhere -- and whoever takes the initiative is in some sense acting unilaterally -- even when he acts to consult others. The call for a Constitutional Convention in 1787 was viewed by many as high handed, aristocratic, dictatorial and anti-democratic. The process of perfectingdemocracy is unending, but it must be begun.

And the hard question still remains: in the beginning, if an institution does not meet the optimal and ultimate demands of a perfect democratic representation and total involvement, must it at least meet some minimal requirement? Must there be some minimal quantity of democratic involvement, some minimal investment in consultation and discussion and dialogue in defining the institution?

We believe that in planning an institution, there is one threshold question which cannot be treated entirely unilaterally which must be subjected in some measure to broadly based scrutiny: namely, the extent of the resources which will be devoted to the democratic process during the first period of operations. Democracy is expensive. It costs money to hold meetings, to consult people; it takes time, staff and resources: a commitment to democracy must be reflected not only in organization charts but in budget. And just as we believe that the poor can make a rational and informed decision in allocating resources among competing demands such as service and social change, consumption and investment, so too, we believe that the poor are capable of making a decision as to the portion of resources which they wish to expend on the democratic process -- on scrutiny, on surveillance, review and effective control. It is conceivable that the poor would rather have results than conferences, changes in federal programs rather than board meetings. But we think that this decision -- this initial rough allocation of the dollars to be spent on the democratic process -- must be made in concert with those who are supposed to be served by such an institution. That choice must be put, not in terms of dollars and percentages, but specifically in terms of

what those dollars will buy: how many meetings, how many reports what kinds of disclosure, how many phone calls, how many publications, what kind of accounting with what kind of detail and specificity, and what kind of participation in making the next budget for the next period of operations when there is a record of performance to judge and review.

It will require some initial investment, during the planning period, to consult and confer as best one can in whatever way one can. But even a private firm wishing to peddle a product would invest in market research. And, in this case, the product is in part the nature of the institution itself.

Does the consumer want meetings about the nature of the institution or does he want actual processing of complaints and policing of agency performance? It is our belief and our experience that the poor are capable democratically of saying: we want a job done.

But they will also demand to be in a position to determine whether the best possible job is being done for the least amount of money -- and whether some of those jobs could not be done by poor people as well for the same or less. The right to scrutinize involves the right to decline to scrutinize -- and that threshold determination is the minimal democratic mandate.

In short, in a democracy, the question: who will watch the watchers, is answered by the people. And the people have the right to say: "no one need watch the watchers right now;" so long as they retain the right, later on, to change their mind.

# AREA REDEVELOPMENT ACT

## I INTRODUCTION

On May 1, 1961, President Kennedy signed into law the Area Redevelopment Act, known as ARA, to bring the resources of the federal government to bear to "help areas of substantial and persistent unemployment and underemployment to take effective steps in planning and financing their economic redevelopment."

This program is an attempt on the part of the federal government to "create a partnership of private enterprise, community leadership, state governments and many federal agencies -- all working together to build stronger local economies that will provide the new jobs that are needed." The tools that Congress made available under this act are:

1. Long term, low interest loans to help establish new industrial or commercial enterprises or to help existing firms expand in redevelopment areas. These loans can run for as long as 25 years, and currently bear an annual interest rate of 4 per cent.

2. Loans or grants to help build new public facilities -- like sewage plants, railroad spurs or access roads -- which communities must provide to help new or expanding industry. These loans can run for as long as 40 years and currently bear an annual interest rate of 3 3/8 per cent.

3. Technical assistance, to help break "bottlenecks." These usually involve special studies by private firms, universities, state agencies or federal agencies, financed wholly or in part by ARA funds.

4. Programs to retrain jobless workers, usually for new jobs created in the area, but also to equip workers with skills for existing job vacancies.

5. Subsistence allowance for workers while they are in training.

In addition the Area Redevelopment Act amended the Urban Renewal section of the Housing Act, to provide special help for redevelopment areas in tailoring some of their urban renewal activities to the need for creating new job opportunities. Also, ARA brings together many federal agencies, in what is called "one-stop service" and focuses their resources on the problems of redevelopment areas. ARA acts as the contact point between the communities and other federal agencies, making it possible to get the answers on all available federal programs, at one point. ARA funds and programs are not however, used to bring "runaway plants" into a community. Congress said that the purpose of the Act is not to transfer jobs from one area of the country to another but to create new jobs.

## II CRITERIA

### A. Area Conditions

The unemployment levels necessary for an area to come under the ARA program are, by the law, precisely defined. For urban areas with fairly large labor markets, there are two standards:

1. Current unemployment must be six per cent or more, after discounting seasonal factors; and

2. The annual average rate of unemployment must have been either:

   a) 50 per cent above the national average in three of the preceding four calendar years; or

   b) 75 per cent above the national average in two of the preceding three calendar years; or

   c) 100 per cent above the national average in one of the preceding two calendar years.

In addition, there are rural areas and small labor markets which qualify under one or more of the following standards:

1. All Indian reservations with serious unemployment or underemployment problems.

2. Areas of low median family income $1,560 or less. (One-third the national median.)

3. Areas of low median farm income $1,170 or less. (One-fourth the national median.)

4. Counties which were part of an earlier rural development program of the Department of Agriculture.

5. Areas of low production farming.

6. Very small areas (labor force under 15,000) with substantial and persistent unemployment. (The criteria are roughly the same as for urban-industrial areas.)

NOTE: The national unemployment average in 1958 was 6.8 per cent; in 1959, it was 5.5 per cent, in 1960 it 5.6 per cent; in 1961 it was 6.7 per cent; in 1962 it was 5.6 per cent.

The decisions on designating redevelopment areas are made by the Area Redevelopment Administrator acting for the Secretary of Commerce. Facts and statistical data necessary to making these decisions are provided by the Departments of Agriculture, Commerce, Interior, Labor and other federal and state agencies. While no local initiative is required to have a redevelopment area so designated, in borderline cases where a community feels that it has a serious problem, but does not meet the standard requirements, the community may bring additonal evidence to the attention of the ARA.

B. The Overall Economic Development Program (OEDP)

In order for a designated redevelopment area to receive assistance under the ARA program, it is necessary for a group to file an OEDP (Overall Economic Development Program.) This will hopefully mean that community leadership will take the initiative in economic redevelopment. The OEDP includes the following basic essentials:

1. A description of the representative local organization responsible for the OEDP

2. A background picture of the redevelopment area as a place to live and work

3. An assessment of the labor market and skills, natural resources, physical facilities, transportation networks, available markets, and available and potential financial resources

4. Analysis of the "bottlenecks" impeding progress

5. A program of action for creating new employment opportunities. Help in drawing up the OEDP may be otained from the ARA Field Coordinator. After the local group has completed the OEDP it is submitted to the State Agency designated by the governor to coordinate redevelopment activities. It then goes to the ARA in Washington for review and approval. If the OEDP is for a rural area, ARA seeks the advice of the Department of Agriculture. Thus, the area should work out its plan with the local Rural Areas Development Committee, and submit it simultaneously through Department of Agriculture channels.

C. The Training Program and Criteria

Besides bringing new industry into an area, one of the important aspects of the ARA program is its job training program. This training covers a wide variety of fields -- from semi-skilled production workers to white collar crafts or "refresher" courses in highly technical skills. Occupational training under ARA is applied to help solve the various manpower problems which are especially acute in redevelopment areas, particularly in connection with new employment generated by ARA loans and grants which lead to the establishment of new industries or the expansion of existing ones. Under the law, the ARA is authorized to pay subsistence allowances to ARA trainees for the period of their training, a maximum of 16 weeks. These payments are equal to the average weekly unemployment compensation payment benefit payable on the state.

To be eligible for an ARA training program, the local group must first draw up and submit an OEDP. Then the local public Employment Service office determines the occupational shortages, screens applicants and selects for training those who can be reasonably expected to obtain jobs following the course. The training programs themselves are set up by local and State Vocational Educational Authorities.

**SUMMARY**

While the ARA program can make vast changes in the economically underdeveloped areas of the country, there are two observations that must be made about the program and its implementation.

1. In many of the redevelopment areas in the South, Negroes comprise a substantial proportion of the population.

2. Through the lack of any anti-discrimination clause and through lack of knowledge of the program, Negroes have been systematically excluded from the local redevelopment committee.

The result is that Negroes are excluded from the job training programs administered under ARA, and when the plant(s) are built and management calls for trained people, Negroes, lacking training, are turned away.

Because of these problems, Mr. James T. McCain, Director of Organization, CORE and CORE General Counsel, Mr. Carl Rachlin held a meeting with the top administrators of the ARA program in Washington. As a result of this meeting the ARA intimated that if Negroes in the local area complained "in time" to the ARA that they had been systematically excluded from the local planning, the ARA would hold up on grants, loans, etc. The ARA's policy has, to some degree, been borne out through further discussions with the local ARA representative in New York. In fact, the Administration has just sent out forms requiring a census and analysis of the job categories in the "designated redevelopment areas" by race. This is to insure that in industries built with ARA funds, non-whites are not excluded in training programs and employment opportunities in all job categories. Also, in some instances, the ARA has turned down the OEDP's of local committees that are all white and then helped to structure committees that more fully represent the ethnic patterns of the local area.

Enclosed is a list of the counties designated by the ARA as "redevelopment areas." If your chapter is within one of these areas or if you have close contacts within one the areas mentioned, you should do the following:

1. Find out whether a local redevelopment committee has been set up. If so, is there strong minority representation? If not, notify this office and the ARA.

2. If there is no committee, notify this office.

The National staff of CORE will help in either getting local Negro representation on the committee or in setting up local development committees.

For further information, contact: Norman Hill, Director, PROGRAM DEPARTMENT
James McCain, Director, ORGANIZATION DEPT.

# THE AREA REDEVELOPMENT ACT

The Area Redevelopment Act provides federal assistance (through loans and grants, advice, and training programs) to areas which are economically underdeveloped. An area may be designated a "redevelopment area" (and therefore eligible for help) if it has substantial and continuing unemployment.

Loans can be made to public and private applicants for purchasing and developing land and facilities for commercial or industrial use (including construction and repair of buildings), provided the aim is not to relocate industry from one area to another and provided the money is not to be used for working capital. The project for which the loan is made must be likely to provide more than temporary relief of unemployment. The money is borrowed on reasonable terms, and the borrower must be judged capable of repaying it. Up to 65% of the cost of a project can be loaned under the act; at least 10% of the cost is to be paid by the state, or by a community or area organization which is not governmental. Applicants for loans must be approved by the state or local authorities of the area.

Before assistance is given a plan for the over all economic development of the area must be submitted to the Secreatar of Labor and must be approved by him; the proposed project must fit into this plan.

Loans and grants may be made for purchasing or developingland for public facilities and for construction or improvement of public facilities. Assistance in deciding the needs and potential of an area (for example, technical assistance, market research) is provided by the Secretary of Labor..Technical assistance can also be obtained for areas not designated "redevelopment areas" if there is a substantial need for it.)

Training for jobs in redevelopment areas is made available by the Sec'y of Labor (with training allowances equal to the state unemployment compensation) providing an overall economic development plan has been approved. The maximum period of training is 16 weeks.

Nearly 600 ARA rural development areas are in the South and border states, many in counties heavily populated by Negroes. Eligibility for ARA participation was made possible for many of these counties by low Negro family income. As of June, 1963 there were no ARA Negro trainees in Alabama, Florida, Georgia, South Carolina, Tennessee, and Virginia - states where in 1960 the Negro unemployment rate ranged from 20 to 40% of the unemployed. Louisiana and Mississippi had no ARA training programs in 1963. In all, about 160 Negroes were trained in the South; these trainees represent only 12% of the total number of Southern ARA trainees.

One problem is that all programs must be state approved before loans are made. This makes it difficult for projects proposed in the South by Negro community organizations. Further, the act favors communities where there is some money, some capital. At least 10% of the cost must be paid by the sponsoring group (or 5% if the state government is paying 10%) and 25% more must be found. In our areas the funds to begin a project may be hard to get. In addition to these problems, the Overall Economic Development Plan must give a picture of the community's total planned development. Some of the criticisms by ARA of the plans so far have been: 1) employment goals were not realistic; 2) sources of technical assistance have been overlooked; 3) statements on the growth of population and the labor force and the manpower plans of the program have

not been developed; 4) the causes of unemployment have not been spelled out.

THINGS TO DO:

First discover whether your district is classified as a "redevelopment" area. Then, SNCC workers should give serious consideration to any possible community projects that can function in the communities where they work. Try to inform the people in your community about ARA, and interest them in finding projects that are possibel.

In attempting this, consider carefully the resources of the area and the community.

PROPOSED AMENDMENT TO THE MANPOWER TRAINING LAW

In his message to the Congress on June 19, 1963, President Kennedy suggested several amendments to the Manpower Development and Training Act of 1962 (MDTA). These were to

> increase the authorization ceiling and to postpone the effective date of State matching requirements *** to lower the age for training allowances from 19 to 16, to allocate funds for literacy training, and to permit the payment of a higher proportion of the program's training allowances to out-of-school youth, with provisions to assure that no one drops out of school to take advantage of this program.

Among the late President's suggestions included in the proposed amendments were that:

> A. The Federal government pay all of the costs through 1965 so as to encourage more participation. (As presently set up, States had to match federal funds in programs.)
>
> B. It authorized basic training for persons whose education would not qualify them for training as the program is now set up. (People can get the basic education they need to qualify for retraining as a part of the program.)
>
> C. It emphasizes youth training by lowering the age from 19-17.
>
> D. It increases training allowances to youth. Unskilled youth can receive an allowance while in training.
>
> E. It permits trainees to do up to 20 hours part time work without losing the allowance and widens eligibility for programs.

One of the leading makers of automation equipment, John L. Snyder, chairman and president of U.S. Industries, Inc., testified to the Senate Subcommittee on Employment and Manpower on October 3 as follows:

> Last week, before a Senate labor subcommittee, a top productivity expert from the Bureau of Labor Statistics stated that the Department felt that rising productivity --- another way of describing automation -- would eliminate 200,000 jobs a year, or 4,000 jobs a week.
>
> Personally, I think this is a gross underestimate of the real situation and that automation is a major factor in eliminating jobs in the United States at the rate of more than 40,000 a week, as previous estimates have put it.

Experience under the act so far demnnstrates that three important changes are necessary at this time. First, to sustain the program over a period long enough to permit a fair appraisal, the present State matching requirement has to be postponed for 1 year. Second, the plight of the undereducated unemployed needs more attention and special provision is now made for them. Third, the present provisions for unemployed youth have likewise been improved.

The inadequately trained youth represents the hard-core unemployed of today.. The uneducated represents the hard-core unemployed of

tomorrow. Without help they have no other prospect than as public charges, currently and in the future. Yet the bulk of these unemployed have the capacity to be helped and can be put on the road to productive employment.

Historically, vocational education has been available throughout the country for many years. But it had little impact upon training of the displaced unemployed for the simple reason that no adequate means were available to maintain the financial support needed by a breadwinner for his family during the period needed to complete his training. The act passed by the Congress last year was primarily to plug this void. Some 60 percent of its appropriations is spent for training allowances alone.

AVERAGE UNEMPLOYMENT AMONG NEGROES IS 20%.

The Negro Community must O R G A N I Z E to bring retraining programs to the unemployed.

1. Contact your local employment office and find what retraining programs exist. (If the local employment office is not cooperative, contact the Student Nonviolent Coordinating Committee (SNCC) and SNCC will inform you of the existing programs in your community.

2. Apply for participation in the program.

3. If there is no retraining program in your community contact the local employment office.

4. SNCC must accompany the people who apply for retraining and a record must be kept of everything that happens.

ORGANIZE YOUR COMMUNITY TO DEMAND JOB RETRAINING.

# MEMORANDUM

From Edward Howden, Executive Officer, California FEPC

To CIVIL RIGHTS LEADERSHIP, OTHER KEY PEOPLE

You will be interested in the following information concerning FEPC, fair housing, and other significant State Government developments, not all of which have been reported fully statewide:

## 1. GOVERNOR'S CODE OF FAIR PRACTICES

Enclosed is your copy of Governor Brown's just-issued Code of Fair Practices. It is, we believe, the strongest executive order of this nature yet promulgated in any state. It seeks to codify and sharpen, for guidance of the Executive Branch, the State's public policy against discrimination because of race, religion, or ancestry.

I think you will find, on close reading, that this is a truly historic document. And I am convinced that it will prove to be far more than a document in the months ahead, as each State agency critically reexamines its practices and bears down upon all forms of discrimination or inequity within its reach.

FEPC contributed significantly to the writing of this new Code and will have a hand in its implementation. Again -- as with the FEP Act, the Fair Housing Act, and other big civil rights measures -- Governor Edmund G. (Pat) Brown's all-out stand has been forthright and powerful.

## 2. FEPC PROGRAM STRENGTHENED

New offices. In the first such move since 1960, the Legislature, in this year's regular session, provided a modest but important augmentation of FEPC's capacity to cope with inequality of employment opportunity. Establishment of our first offices outside the San Francisco and Los Angeles metropolitan areas was authorized: one in Fresno, one in San Diego, each to be manned by one FEP Consultant (investigator-conciliator) and a secretary. These new offices, to

be opened in September, will administer both the FEP and Fair Housing Acts in their respective areas. Main thanks for these actions are due Assemblymen George N. Zenovich of Fresno and James R. Mills of San Diego; the leadership (Democratic) of both houses; and the Governor.

The Commission repeats and reemphasizes that it is available to the individual who wishes to file a complaint or simply make an inquiry concerning apparent job discrimination (and now housing bias, as well). No person who believes he or she has encountered racial or religious restriction in employment should fail to inform FEPC of this experience or consult us concerning a possible complaint. It is well to remember that upon the individual and the civil rights organization rests in large measure the responsibility for making use of the hard-won Fair Employment Practice Act of the State of California. FEPC can best help the person who brings his problem to FEPC -- whether by mail, or telephone, or direct visit. It is mostly up to you.

Note our new pre-complaint information form, a copy of which is enclosed. This is especially useful for persons who are unable to come to one of our offices. Let us know if you would like to have a supply.

Affirmative action. Since last spring the FEP Commission has been giving serious attention to ways of achieving greater impact upon widespread remaining patterns of job discrimination and segregation. While mindful of its primary legal duty to the individual complainant, the Commission has sought new means of influencing broadly the hiring and upgrading practices of an entire industry or occupation in the direction of full compliance with the spirit of the FEP law. Actually, from the beginning we have striven for such compliance during conciliation of the individual case and through Commission-initiated investigations. We have chalked up many "firsts" and "breakthroughs" while working on such cases, and have witnessed increasingly significant changes in employment traditions.

Yet the task remaining is obviously of great magnitude. It demands the utmost energy and imagination on the part of all of us. In addition to FEPC's other responsibilities, therefore, we shall henceforth devote all possible effort to encouragement of meaningful affirmative compliance on the part of employers, unions, placement agencies, and training and counseling resources.

FEPC is of course limited by budget -- mainly personnel, that is -- in the ground we can cover. Even as augmented, we shall still have only 14 field personnel to handle employment cases throughout this vast State. We are nonetheless determined to expedite case processing to the greatest degree possible and to engage in increasingly effective affirmative actions on a broad scale, through conference, negotiation, survey, and like methods, in addition to our continuing information-education program

3. FAIR HOUSING BUDGET APPROVED: REFERENDUM THREATENS

The Governor's request for $117,000 for FEPC administration of the new Rumford Fair Housing Act was cut to $75,000 by the Legislature in the special session. Senator Hugh Burns, in moving the cut, suggested that by the time FEPC

had undergone several months' experience with the new law we would again be before the Legislature, in the 1964 budget session, and that upward adjustments, if warranted, could then be made.

Now promoter Robert Weinmann -- who helped manage defeat of Berkeley's fair housing ordinance last spring -- has launched a signature petition to submit the Rumford Act to referendum. No known industry organization of substance has endorsed the infant campaign. The California Real Estate Association has officially declared itself against the Weinmann move. Should he be successful, however, in securing the 293,000 valid signatures required by midnight September 19, the urgently needed new Fair Housing Act would be suspended and a statewide civil rights battle of unprecedented proportions would be in prospect. We shudder at the consequences for future human relations in California should the promoters of this referendum succeed in their ill-advised campaign.

4. THE COMMISSION'S MEETING SCHEDULE for the fall is:

| | |
|---|---|
| September 17-18 | Los Angeles |
| October 9-10-11 | San Francisco and San Jose |
| November 6-7-8 | Los Angeles |
| December 5-6 | San Bernardino |

Most of the Commission's sessions are open to press and public. Representatives of civil rights organizations are of course welcome. If you have a particular subject in mind for which you would like time reserved on the Commission's agenda, please write or telephone Edward Howden or Aileen Hernandez in the San Francisco office or Lawrence Lucks in the Los Angeles office.

To: Fair Employment Practice Commission, State of California

**INFORMATION ABOUT APPARENT EMPLOYMENT DISCRIMINATION**
because of race, color, religious creed, national origin, or ancestry.

STATE OF CALIFORNIA

# *Governor's Code of Fair Practices*

## ARTICLE I — Declaration of Policy

Nondiscrimination is the policy of the State of California in all of its activities. Employees shall not only rigorously enforce that policy; they shall also take affirmative action to assure equality of opportunity in the internal affairs of state government and in its relations with the general public.

## ARTICLE II — Employment Policies of State Agencies

State officials and supervisory employees shall appoint, assign, train, evaluate, and promote state personnel on the basis of merit and fitness, without regard to race, color, religion, national origin, or ancestry. All state agencies shall promulgate clear, written directives to carry out this policy and to guarantee equal employment opportunities at all levels of state government. They shall regularly review their personnel practices to assure compliance. Where existing staffing patterns suggest something less than complete adherence, they shall determine the causes and, if necessary, initiate special recruitment programs to correct the situation. They shall conduct continuing orientation and training programs with emphasis on human relations and fair employment practices. The State Personnel Board shall take positive steps to insure that the entire examination process, including the qualifications appraisal panel, is free from either conscious or inadvertent bias.

## ARTICLE III—State Services and Facilities

All services of every state agency shall be performed without discrimination based on race, color, religion, national origin, or ancestry. No state facility shall be used in furtherance of any discriminatory practice, nor shall any state agency become a party to any agreement, arrangement, or plan which has the effect of sanctioning such practices. Each state agency shall critically analyze all of its operations to ascertain possible instances of noncompliance with this policy, and shall instigate sustained, comprehensive programs to remedy any defects found to exist.

## ARTICLE IV — State Contracts and Subcontracts

Every state contract and subcontract for public works or for goods or services shall contain a clause prohibiting discriminatory employment practices by contractors and subcontractors based on race, color, religion, national origin, or ancestry. The nondiscrimination clause shall include a provision requiring state contractors and subcontractors to give written notice of their commitments under this clause to any labor union with which they have a collective bargaining or other agreement. Such contractual provisions shall be fully and effectively enforced, and any breach of them shall be regarded as a material breach of the contract. As part of its annual report each state agency shall submit to the Governor certification of compliance with these provisions by all contractors and subcontractors.

## ARTICLE V—State Employment Services

All state agencies, including educational institutions, which provide employment referral or placement services to public or private employers shall accept job orders only on a nondiscriminatory basis. They shall refuse to fill any job order

designed to exclude any
group because of race,
origin, or ancestry. Th

**ARTICLE X — Housing Accommodations**

No person, corporation, or firm which is licensed or chartered by the State to engage in the business of selling, leasing, renting, financing, building, or developing housing accommodations shall discriminate against any prospective buyer, lessee, or tenant because of race, color, religion, national origin, or ancestry; nor shall any licensee or charter holder seek to promote the sale or lease of any residential property on the ground that a person of minority racial, religious, or ethnic background has established or will establish residence in the neighborhood. Any real estate broker or salesman, corporate owner, lending institution, homebuilder, or developer who fails to comply with this policy shall be subject to such disciplinary action as is consistent with the legal authority and rules and regulations of the appropriate licensing or regulatory agency.

**ARTICLE XI — Public Schools**

Through its policy declarations and staff services, the State Board of Education shall assist local school districts in eliminating racial imbalances and *de facto* segregation in the State's public schools. The Board shall also pursue its programs of promoting fair employment practices for certificated teachers and approving textbooks which realistically portray the contributions of minority groups to the history and culture of this State and nation.

**ARTICLE XII — State Financial Assistance**

Race, color, religion, national origin, or ancestry shall not be considered in state-administered programs involving the distribution of funds to qualified recipients for benefits authorized by law; nor shall state agencies provide grants, loans, or other financial assistance to public agencies, private institutions or organizations which engage in discriminatory practices.

**ARTICLE XIII — Law Enforcement**

Through the Attorney General's Office, the State shall encourage local law enforcement agencies to develop special training programs in the field of human relations, to establish formal procedures for the investigation of citizen complaints of alleged abuses of authority by individual peace officers, and to promote mutual understanding and respect for the law enforcement officer's duty to maintain the peace and the citizen's right to protection of his constitutional guarantees.

**ARTICLE XIV — Annual Reports**

Each state agency shall report annually to the Governor, between December 15 and January 1, all programs undertaken during the past year to effect this Code of Fair Practices. The report shall cover both internal activities and external relations with the public and with other state agencies.

**ARTICLE XV — Publication and Posting of Code**

Copies of this Code of Fair Practices shall be distributed to all state officials, employees, and the governing boards of all political subdivisions of the State. The Code shall be posted in conspicuous locations in all state facilities.

Edmund G. Brown

*Governor of California*
Sacramento, July 24, 1963

# GOVERNOR'S CODE OF

This nation and state were founded on the principle that all men are
blessings of democracy without discrimination.

To carry out the clear mandate of our Federal and State Constitution
in employment, housing, schools, and places of business. These laws, enu
been supported by executive action and upheld by judicial decree.

But the laws, court edicts, and official pronouncements are only a be
forbidden, a more subtle, but equally restrictive, *de facto* discrimination
old forms of discrimination but that we act affirmatively to assure thos
in its rewards.

To meet the obligation of the State and under the authority vested i
Code of Fair Practices to be the official policy of the Executive Branch

Division of Fair Employment Practices

# Promoting Equal Job Opportunity

## A GUIDE FOR EMPLOYERS

The Fair Employment Practice Commission administers the California law against discrimination in employment on account of race, religious creed, color, national origin, or ancestry. In carrying out its duties, the Commission seeks to help employers, employment agencies and labor unions to improve their practices, widen employment opportunities for individuals from groups which have suffered discrimination, and promote the full use of California's potential work force.

This guide supplements the FEPC "Checklist for Fair Employment" with specific suggestions for affirmative action in the spirit of the fair employment law.

## POLICY AND RESPONSIBILITY

1. Issue a forthright statement of nondiscriminatory policy with regard to hiring, upgrading, training, layoffs, rehires and working conditions. Publicize it to employees at all levels, and to customers and the community. Make it explicit in training sessions, manuals and company publications.

2. Make a specific, written assignment of responsibility to the company's head of personnel, with equally specific delegation of separate functions to those responsible for training, employment, labor relations and public relations. Require regular reports by all.

3. Review the ethnic pattern of employees, job by job and department by department. If evidence indicates reluctance or failure to hire or upgrade members of any group, take appropriate action.

4. Include a nondiscrimination clause in union contracts, and in contracts with suppliers, vendors, concessioners and services. Insist on compliance.

## RECRUITING

1. Advertise job vacancies in minority news media. State "All qualified applicants welcome" or the equivalent.

2. Utilize mass media and company publications to project an image of the company as employing minority workers. Publicize the achievements of those employees.

3. Place job orders with the State Employment Service (California Department of Employment) and with employment agencies which comply fully with the Fair Employment Practice Act. Review past recruiting methods to discover which sources do not refer minority applicants, and what geographic or housing limitations tend to prevent minority persons from applying or being employed. Take positive steps to overcome these obstacles, and thus enlarge the labor pool from which your company draws.

4. Make your needs know to minority churches, school principals, teachers and counselors, and to organizations such as NAACP, CORE, CSO, Urban League, agencies affiliated with community welfare councils, human relations commissions, Division of Apprenticeship Standards and FEPC.

5. Encourage minority employees to refer qualified friends and relatives.

6. Conduct plant tours for minority students, teachers and counselors. Employ them in summer replacement positions.

7. Send speakers---preferably members of minority groups themselves--- to "career days" and like events, and like events, and to conduct general recruiting at schools and colleges. Meet with parent and teacher organizations in minority communities.

8. Send special letters to, or meet with, employment agencies and school placement offices to emphasize your equal employment policy.

9. Work with colleges, junior colleges and adult education institutions to encourage courses and programs in which minority employees or prospective employees participate. Assist school districts in establishing "school-work" (4-4) programs. Contribute to scholarships on the basis of need as well as academic excellence.

## HIRING

1. Display the FEPC poster where applicants and interviewers will see it. Review procedures of personnel department and medical and security departments to eliminate any possible discrimination, real or apparent. Be sure that all personnel extend a truly friendly, courteous reception to all applicants, whether or not they are hired.

2. Review tests and criteria to see that they are valid for the position, uniformly applied, and free of inadvertent bias against persons not experienced at this kind of testing. Retrain employment representatives, interviewers and testers to make sure that your equal opportunity policy will be carried out. As new personnel people are hired, this should be part of their indoctrination.

3. Survey and analyze lead-in or entry-level positions. Emphasize their availability to minority applicants.

4. Make a conscious effort to place members of minority groups in positions or departments which they have not previously entered, especially in "public contact" positions.

5. Tally applicants and referrals by ethnic group. (Caution: Do not record the racial or ethnic identity of individuals on pre-employment forms or records.)

6. Public employers should frequently include members of minority groups on oral boards and interviewing panels.

## TRAINING

1. Review the ethnic pattern of employee groups receiving training. If classes are not integrated, learn why and take positive steps to see that minority employees enter the program. Where indicated, establish special training classes.

2. Encourage minority employees to participate in school courses and take advantage of educational reimbursement plans. Counsel them regarding methods of self-improvement and opportunities for advancement in other departments.

3. Recognize and publicize the advancement of minority employees and their work in unusual jobs.

4. Place minority workers in trainee positions, especially those which lead to skilled, supervisory or executive levels.

## TRANSFER AND UPGRADING

1. Review all positions normally filled by promotion from within---including supervisory, inspection and quality control positions---to make certain that minority employees have equal opportunity for promotion to them. Review qualification and experience records of minority employees to determine whether they are under-utilized. Maintain a roster of those qualified for upgrading or special training.

2. Transfer minority employees to "public contact" positions such as receptionist, interviewer, salesman, buyer or public relations representative.

3. Place minority individuals as secretaries or administrative assistants in the offices of department or division heads.

## FOLLOW-UP AND COMPLAINTS

1. Make annual surveys of ethnic pattern, job by job and department by department. Require explicit reports by all those assigned responsibilities in your equal opportunity program.

2. Place responsibility for handling complaints of discrimination on those who normally handle complaints---but emphasize their special importance. Discuss each complaint with all concerned, and take appropriate action.

3. Cooperate with FEPC and the President's Committee on Equal Employment Opportunity in processing complaints and working out solutions.

## SPECIAL NEWS MEDIA

Following is a partial list of publications and radio and television stations which are useful in reaching Negro or Spanish-speaking Californians. (The information-education of FEPC will advise you concerning media for other minority groups.)

State of California

Division of Fair Employment Practices

# QUESTIONS AND ANSWERS
# about the
# CALIFORNIA FAIR HOUSING LAW

**What is the California Fair Housing Act?**

It is the law against discrimination in housing. It declares that discrimination because of race, color, religion, national origin, or ancestry in housing accommodations is against public policy in California. It forbids such discrimination in the sale, rental, lease, or financing of housing, and establishes methods of preventing and remedying violations.

**When did it go into effect?**

September 20, 1963

**Who enforces it?**

The Fair Employment Practice Commission, staffed by the Division of Fair Employment Practices. They have administered the Fair Employment Practice Act since 1959.

**Why was a law needed?**

Negroes, Mexican Americans and other ethnic groups have been excluded from many residential areas and in effect restricted to segregated living in ghettos. Serious social ills are the result. California law has recognized the problem since 1959. Provisions of the Unruh and Hawkins acts of that year were incorporated in the 1963 Rumford Fair Housing Act. The principal innovation in the Rumford Act was the assignment to FEPC of responsibility for administrative enforcement and for conducting a program of education and affirmative action to eliminate discrimination in housing.

**Are there similar laws in other states?**

Yes, in Alaska, Colorado, Connecticut, Massachusetts, Minnesota, New Jersey, New York, Oregon and Pennsylvania.

## COVERAGE

**In California, what portion of the housing market is covered?**

About 70 per cent, it is estimated.

**What kinds of housing are covered by the Fair Housing Act?**

Public and redevelopment housing;

Publicly assisted, owner-occupied, single-unit homes;

apartments in structures of three or more units;

all activities of real estate brokers and salesmen;

generally, activities of persons or firms engaged in the business of housing or mortgage lending.

**What kinds are not covered?**

Housing operated by religious, fraternal, or charitable organizations not for profit;

Privately financed, single-family homes and duplexes.

## COMPLAINTS

What is unlawful under the Fair Housing Act?

The law forbids the owners of most housing accommodations, and their agents, to refuse to sell, rent or lease to any person or group of persons because of race, color, religion, national origin, or ancestry. Banks, mortgage companies, other financial institutions, builders and developers, and others in the business of housing, are similarly forbidden to discriminate.

Suppose tenants or neighbors put pressure on an owner to keep him from complying with the law?

It is unlawful for any person to aid, abet, incite, compel or coerce a discriminatory act. Complaints may be filed against such persons by a landlord or seller.

Ordinarily, who may file a complaint?

A person claiming to be aggrieved, that is, an individual who believes he has been wrongfully refused housing accommodations because of his race, color, religion, national origin, or ancestry.

Does he have to have the proof in his hand?

No, but the more specific he can be about names, places, dates and times, the better. FEPC will make a full investigation in order to ascertain the facts.

How soon after the incident must a person file his complaint?

Within 60 days. If he doesn't learn about the alleged violation until after that, he may be allowed another 60 days in which to file. It is generally to the advantage of all parties, however, if a complaint is filed promptly.

Is there any other legal remedy?

An aggrieved person may choose to retain an attorney and go to court under the Unruh Act. In that case he has a year after the incident to file suit. But if he wants FEPC to handle the matter (without charge) he is required to waive any right to bring such a suit in court.

How does a person file a complaint?

FEPC has offices in Los Angeles, San Diego, San Francisco and Fresno. An individual who is unable to visit them in person may telephone or write a postcard or letter to one of those offices, asking assistance. In many cities, the State Labor Commissioner's office or Employment Service will help refer inquiries to FEPC.

Why file a complaint?

Every Californian has the right to equal opportunity in obtaining housing for which he is qualified. If he is denied such opportunity, it is not only for himself that he should ask FEPC assistance, but for the sake of others who suffer discrimination and for the good and welfare of the entire state. The law will work only when it is used.

## INVESTIGATION

Who investigates a fair housing case?

The case is first assigned to one of the seven members of the FEP Commission. Under his supervision, a trained staff consultant carries out the investigation.

What is the purpose of the investigation?

The Commissioner must have the facts in order to make a determination. He wants to know exactly what happened. Information must be gathered from all reliable sources.

How do you decide what is discriminatory?

The main test is whether the standards set by the owner, manager, agent, or business firm have been applied equally to all qualified home seekers. If the treatment is different because of race, color, religion, national origin, or ancestry, this is discrimination.

Who decides?

The assigned Commissioner does. If the case goes to public hearing, the decision will be made by a panel of other Commissioners.

May an owner or other respondent be required to give evidence?

The Commission has the power to subpoena witnesses and records, if the respondent does not provide them voluntarily.

Are the respondent's rights protected, as well as those of the complainant?

Yes, it is the duty of the Commission and staff to be fair and objective. Investigation must be prompt, and there are provisions for early dismissal if the evidence does not indicate that the complaint is well founded. (See below, "legal safeguards.")

## CONCILIATION

What happens when there is a finding of probable cause to believe the allegations of the complainant?

The Commissioner immediately endeavors to eliminate the alleged unlawful practice by conference, conciliation, and persuasion.

Suppose no probable cause is found?

The Commissioner must dismiss the complaint. Notice is sent to respondent and complainant, and the latter has 15 days in which he may file an appeal.

What is meant by conciliation?

Efforts to obtain a just and practicable remedy for the person whose rights have been violated, and to correct the unlawful practice, through a negotiated settlement.

Are such negotiations publicized?

The law forbids disclosure of what transpires during endeavors at conciliation.

What are typical terms of conciliation?

In many cases, where the housing accommodation in question is still available, its sale or rental to the complainant may be arranged. If it is not available, a like accommodation, or the next vacancy, may be negotiated. Or there may be a payment of damages to the complainant.

## ENFORCEMENT

Can the Commission prevent the sale or rental of the property while the case is pending?

If there is probable cause for believing that the allegations of unlawful discrimination are true, the Commission may obtain a court injunction to prevent disposition of the property until a determination is made.

If the respondent refuses to agree to a settlement, what can the Commissioner do?

Serve the respondent with a written accusation requiring him to answer the charges at a public hearing. The hearing panel considers the evidence anew, makes findings of fact, and, if appropriate, issues an order requiring corrective action. If it finds no violation of the law, it dismisses the case.

Who conducts such a hearing?

A panel of Commissioners, not including the assigned Commissioner who filed the accusation. The latter may not participate except as a witness concerning the facts.

Are there legal safeguards?

The California Administrative Procedure Act assures all parties due process of law. Questions of law are referred to an authorized hearing officer, and any party to whose position an order is adverse has the right to appeal.

What is the outcome if the Commission decides there was discrimination?

The respondent will be ordered to cease and desist from the unlawful practices found, and to take one of the following actions as determined by the Commission:

1. Sale or rental of the housing accommodation to the aggrieved person, if it is still available.

2. Sale or rental of a like accommodation, if available, or the next vacancy in a like accommodation.

3. Payment of damages to the aggrieved person in an amount not to exceed $500.

## AFFIRMATIVE ACTION

Is the Commission limited to processing complaints?

No, it conducts programs of education and affirmative action designed to promote good will and minimize or eliminate discrimination. It studies problems of discrimination and fosters good will, cooperation and conciliation among the groups and elements of the population of California.

What is affirmative action?

A program seeking the voluntary cooperation of such groups as property owners, public agencies, real estate brokers and associations, builders and developers, mortgage and financing companies, and others in the business of housing. By counseling them as to methods of applying equal standards, and by agreements concerning equal access to housing accommodations, the Commission seeks broad observance of fair practices.

Can others help in carrying out provisions of the law?

Community organizations, religious groups, and citizens generally can contribute to the programs of education and affirmative action. Anyone who learns of apparent violations of the law should inform FEPC so that appropriate action may be taken. Those who agree with the spirit of the law should make this known in their communities, especially to those in the business of housing.

How does the Commission tell people about equal opportunity?

It publishes a newsletter and other publications and utilizes news media to release information concerning the law and FEPC activities. Other methods include posters, exhibits, broadcasts, conferences and a speaker service.

What is the ultimate objective of the Commission's program?

The elimination of discrimination in employment and housing in California because of race, color, religion, national origin, or ancestry, and the establishment of equal opportunity for all Californians.

Where can more information about the law and about FEPC be obtained?

By visiting, phoning or writing FEPC ----

Fair Employment Practice Commission, State of California

# STATEMENT ON SURVEYS AND STATISTICS AS TO RACIAL AND ETHNIC COMPOSITION OF WORK FORCE OR UNION MEMBERSHIP

From time to time various business firms, unions, and government agencies have asked the California Fair Employment Practice Commission to explain how the State FEP Act applies to collecting racial and ethnic information on employees and job applicants. When told that statistical research of this kind is not prohibited by law and is considered desirable under certain circumstances, they have requested guidance as to principles and methods.

The following guidelines apply generally to surveys of racial and ethnic patterns in employment, and to such record-keeping as may be necessary to provide data which can assist administrators in carrying out an affirmative policy of merit employment and equal opportunity. Answers to specific questions may be obtained by writing or telephoning FEPC at one of the offices listed below.

**PRE-EMPLOYMENT INQUIRIES** or specifications as to the race, religious creed, color, national origin, or ancestry of individuals are prohibited by the California Fair Employment Practice Act. The FEP Commission's "Guide to Lawful and Unlawful Pre-employment Inquiries" explains this section of the law, and gives examples of questions which may or may not be asked of an applicant.

Although a job application form may not include any direct or indirect racial or ethnic identification of an individual, it is quite in the spirit of the law to conduct other types of inquiries in order to facilitate or implement a program of equal opportunity for members of all groups. Nothing in FEP law or policy precludes <u>tallying</u>, for statistical purposes, the approximate numbers of applicants or employees of each main ethnic group, or making periodic surveys of the ethnic pattern of a work force, or keeping <u>post-hire</u> records including racial or ethnic data, provided they are never used for discriminatory purposes.

Indeed, in order to achieve equal opportunity for Negro Americans, Mexican Americans, and other minorities, there must be adequate information concerning the unemployed as well as about applicants for specific jobs and jobholders. Relevant statistics are useful, not only in the work of FEPC, but also for the information of management, employment services, labor organizations, and research agencies. Enlightened, affirmative programs to widen opportunities and utilize the manpower potential of minorities can be developed and administered only from a solid basis of relevant facts.

PHILIP M. HAUSER, President of the American Statistical Association, writing of this problem, has said: "Information itself is always neutral. It may be used for 'harmful' purposes but it may also be used for 'beneficent' purposes. Moreover, the absence of information may prevent beneficent action and encourage and perpetuate harmful action."

The National Urban League concluded in 1962 that "at the present time and under the present circumstances the value of mass racial statistics outweighs the admitted dangers" and that such data should be compiled and reported. A high official of the National Association for the Advancement of Colored People has said that the organization advocates the selective collection and publication of racially classified data "where they may be used for constructive ends."

Experience has demonstrated that it is possible for such information to be gathered without affronting the dignity or infringing the rights of individuals or groups, and that it is now essential to do so for the purpose of accelerating progress in nondiscriminatory employment.

IN ORDER TO SERVE this purpose, yet observe firm safeguards against discrimination or misunderstanding, the following principles are suggested:

1. Great care should be taken in choosing the methods of inquiry and transmittal of data on race, color, or ethnic origin. Information

should be obtained quietly, confidentially, and without questioning of individuals orally or through questionnaires. Generally, visual observation plus common-sense supplementary information is the simplest and most satisfactory method. Absolute accuracy is neither possible nor essential. In general, if an employee appears to the observer to be of a given racial or ethnic group, that person will usually be so regarded and treated by others.

2. Post-hire records containing such data which pertain to specific individuals should be maintained for research purposes only, not as part of the operational personnel records of an employee. Such records should contain no identification as to race, color, or ethnic origin.

3. Forms should be designed in such a way as to provide all the information necessary for legitimate statistical and general personnel planning purposes, without such information being disclosed at points where it might be used adversely against individuals by those making specific employment decisions.

4. To be meaningful, a review or survey of the ethnic makeup of a work force should reveal numbers of persons of each main group according to levels of skill or supervision, departments or sections, and other significant breakdowns. Grand totals alone will often be of little or no value in analyzing the results of the survey.

5. No such personnel survey or record-keeping should be concerned with religious preferences or affiliations.

6. Any employer, employment agency, or labor organization undertaking the recording of data by race, color, or ethnic origin should be scrupulous in adhering to these principles and should assume active responsibility for preventing violations of the Fair Employment Practice Act.

Nothing in this statement is to be construed as sanctioning any quota or preferential hiring by reason of race, religion, or ancestry.

Further information may be secured by writing or calling any of the following FEPC offices (all in State of California buildings):

OAKLAND CORE
3534 Telegraph Avenue
Oakland, California
January 12, 1964

Oakland CORE respectfully submits the following proposal for discussion at the California CORE Council Conference, January 17, 18 and 19:

That a CORE Committee be created, state-wide in skeleton, to deal with the racial problems involving Labor unions. One of the purposes of this committee would be to persuade the creation of a bi-racial committee, within each union, which will, acting in good faith, insure non-discriminatory policies and practices by employers when requesting the services of union members.

It is our hope that other purposes of this committee will evolve out of discussion.

civil rights

Respectfully submitted,

s/Eugene Drew

Eugene Drew, Chairman
Employment Committee
OAKLAND CORE

workers & form committees

Congress of Racial Equality
Box 34, Marin City, California

Marin CORE has been working on employment problems from two directions. The Employment Committee has been negotiating with the local branches of the businesses with which CORE has negotiated on a state wide basis. They have had success with Macy's, Montgomery Ward's and Penney's. The Committee staged a highly successful "walk-through" in one of our largest shopping centers, converging on Ward's.

The Job Opportunities Committee has been concentrating on the more individualized problems. One, the person with a specific skill; two, the employer who wants to integrate his work staff and who needs people with a particular aptitude and/or interest (Ex. hobby shop manager); three, interested agencies, businesses and organizations who are willing to work on Job Development. There has been demonstrated a great need for skill training for men.

We first began to get job offers which we could not fill. About this time the State Department of Employment appointed a Minority Group Employment Specialist. We gave her our job listings and information on applicants we had already interviewed. She was able to screen more effectively and cut the disappointing, unsuccessful job interviews down considerably. Marin is particularly fortunate in having a person on this job who has had a great deal of experience in the area of minority employment as well as a strong, personal commitment to the Civil Rights Movement. We are in daily contact with her.

The County Board of Supervisors has taken the initiative in the area of increasing minority job opportunities. Their experience is comparable to that of many other Marin large businesses ..... many people who seem to be likely job applicants cannot pass tests which are standard personnel tools. A pilot program was established for which funds were allocated, the first step being for clerical workers.

In order to find all the people interested in job training and increasing their skills, we did a skill inventory. We were now concerning ourselves not only with the unemployed but with the underemployed. The form we used is a part of this report. Over half of the people responding wanted specialized skill training.

Since it has been mutually advantageous to work so closely with the Department of Employment in its programs related to minorities, we feel a great need for closer contact with the Department at the Area Level. Therefore, we propose the following:

RESOLUTION: THAT CORE ESTABLISH CONTACT WITH THE CALIFORNIA DEPARTMENT OF EMPLOYMENT THROUGHOUT THE STATE AT THE AREA LEVEL. REGULAR MEETINGS OF CORE BRANCH REPRESENTATIVES AND THE AREA DIRECTORS IN THEIR VICINITY COULD ACCOMPLISH THE FOLLOWING:

1. CORE COULD BECOME FAMILIAR WITH ALL THE DEPARTMENT OF EMPLOYMENT PROGRAMS RELATED TO THE EMPLOYMENT AND TRAINING OF MINORITIES.

2. WHERE INADEQUACIES EXIST, A JOINT EFFORT COULD BE MADE TO ADJUST THESE PROGRAMS TO EFFECTIVELY MEET ALL THE NEEDS IN MINORITY EMPLOYMENT.

January, 1964

AGENDA FOR CALIFORNIA CORE COUNCIL CONFERENCE - January 17, 18 and 19

CONFERENCE TO BE HELD IN SAN FRANCISCO: SUN REPORTER BUILDING
1366 Turk Street
San Francisco

FRIDAY EVENING - 8:00 PM

LEGAL PANEL - Carl Rachlin, General Council, National CORE
Bev Axelrod, San Francisco CORE's attorney
Mal Burnstein, Berkeley CORE's attorney
Lester Sweet, Santa Clara Valley CORE's attorney

TOPIC: (1) The Law and Civil Rights
(2) The attorney's role in CORE negotiations
(3) The establishment of Western Regional CORE Attorneys

SATURDAY MORNING - 10:00 AM

FEPC PANEL - Mrs. Aileen Hernandez, Assistant Division Chief, FEPC
Mr. Donald K. Henry, Area Supervisor, FEPC
Mr. Phil Murphy, Conslutant, FEPC
Mr. ~~Monte Possey~~ Hugh Taylor, Consultant, FEPC

TOPIC: (1) History and Policy of the FEPC
(2) FEPC's participation in CORE negotiations

LUNCH BREAK

SATURDAY AFTERNOON - 2:00 PM

(1) Gaining support of Unions: Mr. Paul Jacobs, ILWU
(2) Chapter presentations - Statewide Employment Projects
(3) Group discussion - Statewide Employment Projects

(a) Delegates to break into four (4) separate workshops
(b) FEPC Consultant(s) to work with each group

(4) "MOCK CORE MEETING"

(a) Meeting to be co-chaired by:

(1) Norman Hill, Program Director, National CORE
(2) Will Ussery, 2nd Vice-chairman, National CORE
(3) chet duncan, Western Regional Field Secretary

(b) AGENDA: Selection of Statewide Employment Project

SATURDAY EVENING: "Booze Bash" - time and place to be announced during Saturday morning session

SUNDAY MORNING - 10:00 AM

(1) Socio-Dramas

(2) Evaluation of Socio-Dramas

LUNCH BREAK

SUNDAY AFTERNOON: 1:00 PM - Nat Burbridge, NAACP

(1) Community involvement
(2) Gaining active support of other civic and civil rights' organizations
(3) Selection and use of news media for publicizing projects
(4) Evaluation and critique of conference
(5) Press Conference (if possible) - Press will be invited to attend Saturday and Sunday sessions ONLY!

# WIN FAIR JOB POLICY AT LOS ANGELES SAFEWAY STORES

Los Angeles, Calif., Feb. 13--Following negotiations with Los Angeles CORE, Safeway Stores has issued a policy aimed at bringing about increased employment of Negroes, Mexicans and other minority groups at all its stores in the greater Los Angeles area.

The statement "sincerely welcomes the assistance of CORE and other minority group leaders" and agrees to "regular meetings between Safeway officials and representatives of CORE at least every three months" to review progress.

The company will display "Equal Opportunity Employer" notices at all stores and in all help-wanted ads and will sponsor "Distributive Education Programs" in all local high schools. Also, the company will "re-evaluate and arrange for training for advancement of qualified minority group persons for promotional openings in the Safeway organization."

SHOP-IN TIES UP SUPERMARKET

San Francisco, Calif., Feb. 27--A technique described by San Francisco CORE Chairman William Bradley as a "shop-in" has proved effective in the action campaign by Bay Area CORE groups and the Baptist Ministers Union to make Lucky Stores adhere to a 4-month-old fair employment agreement.

During that period, the company has hired only 18 Negroes out of 320 new employees in contrast to 50 out of 250 by Safeway. And of 1600 Lucky employees in the state, only 50 are Negroes.

When the shop-in was tried for the first time--at the company's Lakeshore Plaza store, one of the policemen summoned by management told the press that the technique had "tied up the store's operations for two hours."

The technique consists of loading shopping cars with merchandise, having the purchases rung-up by a cashier and then asserting you haven't money to pay. After doing this, CORE demonstrators would go back to the shelves and repeat the process.

# CITY-WIDE HOTEL PACT FOLLOWS MASSIVE DEMONSTRATION

San Francisco, Calif., March 12--A city-wide fair employment agreement in the hotel industry was negotiated at City Hall on March 7 following a massive, night-long demonstration at the Sheraton-Palace Hotel which ended with the arrest of 135 participants at 4 A.M.

As part of the contract, the hotel agreed to drop all legal action against the 135 as well as against demonstrators arrested on two previous weekends. Over 1,000 persons had participated in the Sheraton-Palace demonstration, picketing on the outside, marching through the lengthy main-floor corridor and, finally, sitting down at the main entrances. Among the demonstrators were members of CORE groups from the entire Bay area.

The new agreement is between the Hotel Employers Association, representing 33 major hotels and the United Freedom Movement, with which CORE is affiliated, the Baptist Ministers Union and the Ad Hoc Committee to End Discrimination. Field Secretary Chet Duncan was the signer for CORE. Negotiations with the Sheraton chain had been initiated some months ago in Boston by Alan Gartner, member of CORE's National Action Committee.

Under the agreement, the hotels will "bring the total employed of minority groups to a level of from 15% to 20% of total employees...by July 20th." All classified ads will mention that the hotels are "Equal Opportunity Employers."

## Why Catholics Oppose the Initiative Against California's Fair Housing Laws

-- a sermon by The Rev. G.V.Kennard,S.J.
delivered at St. Callistus' Church,
El Sobrante, California, Dec.22,1963.

"Out upon you, that enact ill decrees,
and draw up instruments of wrong;
suppress the claims of the poor,
and refuse redress to humble folk..."
--Isaiah, 10:1

The Catholic Church does not enter lightly into the political arena of a free, self-governing people. To the Bishop and his priests it belongs to proclaim the Gospel and to teach all men what faith and morality demand of them. To the layman it belongs to hear the proclamation, study the teaching, and--in the light of his more intimate acquaintance with the secular life around him--to judge by the light of his own conscience what must be done and to act on his own initiative to bring about a just, harmonious, and peaceful social order. In normal circumstances, this division of labor is carefully observed by the Catholic clergy.

But there come times of crisis when political decisions before the people are so momentous, so charged with moral imperative, and when the enemies of Christian morality are so powerful, so clamorous, so deceitful, so confusing, that Bishops and clergy can no longer be content with expounding moral premises but must go on to draw their conclusions and say to their Catholic people plainly and decisively that such and such a course is wrong.

Catholics of California are today caught up in just this kind of crisis. And the Catholic Bishops of California, true to their teaching mission, are not about to let their people be deceived.

You will find in the December 23rd Western Edition of the New York Times a signed advertisement bearing the name of His Excellency, The Most Reverend Joseph McGucken, Archbishop of San Francisco, together with religious leaders of every major faith, calling for the withdrawal and defeat of the initiative to cancel California's fair housing laws. You have read similar statements by Bishop Donohoe of Stockton and by the Bishop of San Diego. And your own Bishop, through The Catholic Voice of Oakland, has for the last three issues allowed it to be made unmistakably clear that this initiative is contrary to Catholic teaching, contrary to social justice, and must be defeated.

---

[1] Title of the lead editorial for Dec. 6, 1963, in The Catholic Voice, Diocese of Oakland.

But let no one say, "The Church is telling us how to vote". The Church is not ordering, but instructing. The Church is not appealing to your obedience, but to your intelligence and to your conscience. As Catholic laymen you have every right to know the reasons behind this extraordinary entry of the Church into the political arena, and to judge these reasons for yourselves.

I shall therefore explain, in the light of the Catholic moral theology and social philosophy which I spent long seminary years in learning, and which I am licensed by your Bishop to preach to you, why the anti-fair-housing initiative of the California Realtors and Apartment House Owners deserves your repudiation.

This initiative petition is wrong in principle, wrong in method, and wrong in motive.

§ 1.

First, the initiative is wrong in principle. The amendment which it seeks to write into California's Constitution speaks of an "absolute discretion" over the disposal of residential property by its owner. It would forbid any agency of government from controlling in any way the owner's disposal of it, no matter how immoral or hurtful to society such a mode of disposal might be. The amendment therefore seeks to write into our State law that theory known historically as the 'absolute' or 'despotic theory' of private ownership.

According to the 'despotic theory', private property is "the sole and despotic dominion over the external things of the world in total exclusion of the right of any other individual in the universe." [The definition is that of Sir William Blackstone, the 18th-century jurist and legal historian.] The theory asserts much more than the right of individuals to acquire and own private property. It asserts that property rights are absolute, not relative; that they are primary, not derivative. It denies, in other words, that property rights are a part of human rights and are bounded by the rights of other human beings. That is what is meant, though not always clearly understood, by people who speak of property rights as though they were distinguishable from civil rights and as though there could be some kind of opposition between civil and human rights on the one hand, and property rights on the other.

Now, the despotic theory of ownership is flatly rejected by the Catholic Church. The despotic theory of ownership is, from the Catholic point of view, a moral heresy. And not only from the Catholic point of view. The central tradition of Protestant social thought and of Jewish social thought rejects the despotic theory as emphatically as does the Catholic.[1]

---

[1]Said an AP dispatch for December 7th, reporting the convention of the National Council of Churches: "The delegates demanded that churches unite in support of

The Catholic Church has always defended the right to private property; but it is most important to understand what kind of right it defends. The arguments used by Catholic philosophers tell us what kind of right this is. All the traditional arguments reduce to one: private ownership is justified because in the light of human experience it turns out to be the best way to make our God-given fund of material goods serve the common good of all mankind. Hence, private property is not an absolute natural right valid for all times and in the same way regardless of existing conditions and the existing type of society. It is a relative and derivative right, flowing from the social nature of man and from social utility. "The truth is that the social character of private property is not a sort of afterthought of only relative importance. It is of the very essence of private property...The individualist's exaggerated view of private endeavor is one of the greatest hoaxes ever to slip into the stream of conventional wisdom."[1]

---

federal, state and local laws that guarantee, without racial or religious discrimination....the right to rent or buy and occupy housing everywhere."

The Presbyterian General Assembly in 1959, "believing that state legislation which makes discrimination in the sale and rental of dwellings unlawful under certain specified conditions is urgently needed in most states in order to help create a non-discriminatory housing market...urges United Presbyterian Church judicatories publicly to support the passage of fair housing legislation..."

The Oakland Council of Churches adopted the following resolution (quoted in full in the December 20th issue of The Catholic Voice) denouncing the California Realtors' constitutional initiative in these words: "We, the directors of the Oakland Council of Churches wish to express our opposition to the campaign for a constitutional initiative now being supported by the California Real Estate Association, the California Apartment House Owners Association, the Home Builders Association, and others....

"Such a restriction of the authority of a state legislature would be unique among the fifty states and contrary to our traditional concepts of representative republican government. We feel that to deprive present or future legislatures of the power to legislate is unwise, and would establish undesirable precedent.

"More important to us, however, are the moral and human issues involved. The effect of the proposed constitutional amendment...would be to perpetuate evil and unjust patterns of racial segregation and discrimination in housing, and to establish the principle that the right to practice racial discrimination is more deserving of legal safeguard than the right of all citizens to have equal access to the resources of our community.

"The campaign for the initiative, hastily undertaken before a fair test could be made of current legislation against racial discrimination in housing, will serve only to make the urgently needed solution of problems in this area more difficult, and to embitter further relations between racial groups in our state.

"We urge all men of good will and prudence in the state to oppose the initiative campaign, and especially do we call upon the realtors in our city...to urge full and open discussion of fair housing legislation in their group, and to seek to persuade the state Real Estate Association to withdraw its support of the initiative."

Boards of Jewish Rabbis have been equally outspoken in recent public statements. The Jewish position on legislative support for non-discriminatory housing has been advanced forcefully over a period of years by many Jewish community-service organizations. A typical presentation of the Jewish point of view may be found in Chapter II of Justice and Judaism: The Work of Social Action, by Albert Vorspan and Eugene J. Lipman (New York: Union of American Hebrew Congregations, 1956).

[1] Father W.J.Davis, S.J., "Mrs. Murphy's Private Rights", America, October 19th.

But supposing one were to say, that may all be true according to the Catholic theory of property, but the American theory found in our Constitution is different, and the Constitution guarantees me the right to do what I want with my property and sell or refuse to sell it to whomever I want for whatever reason.

Not so. The Constitution does no such thing. No one who has attentively read it or who knows anything about our legal tradition can sensibly claim that the Constitution rejects any and all social control over the disposition of property. Just the contrary is what the Constitution implies when it says that deprivation of property or its use must proceed only by "due process of law". Whether we look at the Judaeo-Christian theory of private property or at the theory of property enshrined in our Constitution, in our laws, and in the decisions of our American courts, we get the same result: the despotic theory of property is unChristian, unJewish, and unAmerican. The Realtors' initiative, therefore, must be judged as a radical rejection of the ethical and religious, as well as the political consensus on which our Constitution and laws are rooted.

The system of laws under which we live has not just happened, nor was it thought up out of the blue in 1789. It is part and parcel of a rich, complex, and thoroughly rational system of principles built up from the early Middle Ages. It is the product of Judaeo-Christian morality and of Greco-Roman reason, and it is the hallmark of Western Civilization. According to this legal tradition, property is not absolute but is a system of rights and duties that are determined by society. According to this tradition, that larger tradition of which American law is an unbroken continuation, it is correct to say that the social institution we know as 'private property' is actually the creation of the laws of the land. "It is a primitive, naive, and false view of private property to urge that it is not subject to the laws which express the national purpose and the national conscience...No civilized society has long tolerated the despotic theory of private property. This conception of property is alien to the central truths of Christendom...", as social philosopher Walter Lippman put it last September.

To be convinced of this, you need only re-read your December 15th issue of The Catholic Voice (page 14), in which three-quarters of a page are given over to a lecture by one of this nation's top authorities on the law of property, Professor Richard R. B. Powell. His lecture proves beyond any shadow of doubt that in American law the criterion is always the same: "Is the claimed exercise of property rights one which is consistent with the public welfare?" If not, no 'property right' exists at all. Professor Powell lists twenty different kinds of laws, all of them upheld by American courts, which deny to individual owners various options in the use and disposal of their property precisely on the grounds that such use would tend to be detrimental to the common welfare. Professor Powell proves beyond question that the

use of one's property, including the renting or disposing of it in the real estate market, in socially damaging ways falls legitimately within the police power of the state to prevent.

Consequently, if a Realtor, or a John Bircher, or anyone else claims as a Catholic to be entitled to hold the despotic theory of property and to try to write it into our state Constitution, he is only confessing his ignorance of both Catholicism and American law.

This discussion of the 'despotic' theory of property has been necessary, even though it is probably true that the California Realtors and Apartment House Owners have no interest in a general theory. They are interested, it seems clear, not in property rights but in monopoly rights. What they are interested in is a particular application of the despotic theory. They are asserting--and bear in mind that this is the nub of the whole controversy--the 'right' of the property owner to discriminate against Negroes just because they are Negroes, if that is his wish. The President of the National Association of Real Estate Boards made this very clear last June when he proclaimed that the "declared rights" asserted in the Realtors' "Property Owners' Bill of Rights" were intended to assert the right of an owner or landlord to determine the acceptability of a vendee or tenant on the basis of such person's "race, color, or creed" [Daniel F. Sheehan, speaking in St. Louis; cf. Realtor's Headlines, June 10, 1963, page one].

The Realtors and their allies are not, officially, defending racial discrimination as a good thing. They are saying officially, to be fair with them, only that if you deny an owner the option of discriminating against buyers of his property by reason of their race alone, you are denying in a fundamental way his 'right' to his own property.

From what we have already seen, it is clear what the answer must be. The answer can only be that there cannot be any kind of 'right'--natural, constitutional, legal, moral, or any other kind--to do what is morally wrong and what, from the legal point of view, the conscience of a people has decided by "due process of law" to ban as harmful to the community.

That leaves us with just two questions. They are questions of fact. Is the act of discrimination against racial and religious minorities in jobs, education, housing or whatnot, actually immoral? and is it harmful to the community?

The answers to these questions are--regardless of what individual Realtors may say (and their organization has at least the good sense and decency not to claim otherwise)--unanimous and certain. From Catholicism, Protestantism, and Judaism we hear a thunderous "Yes! racial discrimination is gravely immoral!" From modern social science we are confronted with a veritable mountain of research that answers: "Yes!

racial discrimination is a malignant social evil--the very greatest social evil of our time."

There is yet another reason why the Realtors' initiative, asserting the despotic theory of property, is so very wrong in principle. If we debar ourselves permanently from using our laws and courts to solve the problem of residential segregation, we are admitting that there is within the free-enterprise capitalist system no remedy beyond that which has already, for a century, proved hopelessly inadequate: namely, the moral virtue of private citizens helplessly pitting their higher aspirations against deeply entrenched, nationwide (and, to some persons, highly profitable) evil social institutions. Very well. If private ownership means this, so the Communists argue, then nothing will do but a change of ownership. The state must become the owner of everything.[1]

We have here a supreme irony. What the Realtors and the Birchers set before us as 'true Americanism' and the 'foundation of our way of life' turns out to be the one theory that, if adopted, would make the victory of Communism inevitable. The Communist theory of property is wrong; but the Realtors' theory of property, which is equally wrong, will make it seem plausible to many people. Both theories are, of course, extremist views. Truth here, as so often in ethical and practical matters, turns out to lie between the two extremes. Property rights do exist; but they consist in a system of rights and duties determined by the needs of the common good in concrete historical situations. Understood correctly as a system of rights and duties toward persons, 'property rights' cannot meaningfully be played off against 'human rights' or 'civil rights' and we must reject this bogus distinction together with the despotic theory of ownership.[2]

---

[1] "Exaggerated individualism has traditionally blasted all social reforms with bromides about freedom from interference, private rights, private initiative, and creeping socialism. But the ironic truth is that no one makes social reforms more necessary than does the individualist. Numerous social problems, calling for government regulation, are the direct result of his laissez-faire principles. Granted, for instance, that I can do as I please with my property, then naturally enough I can shift the location of my plant without regard to employee dislocation; I can hire and fire without regard for collective bargaining; I can engage in rack-renting, in real-estate speculation, and in a host of other activities that result in social harm. Discrimination against Negroes caps a long list of abuses resulting from the liberalist view of "the sanctity of private property". In fact, even the various forms of collectivism, which the individualists so universally fear, frequently follow from this same false premise of the absolute nature of private property."--Father William J. Davis, S.J., "Mrs. Murphy's Private Rights" (America, October 19, 1963). This comprehensive article is reprinted and distributed free by the Catholic Interracial Councils of Oakland, P.O. Box 137, Berkeley, California 94701.

[2] To be fair with the Realtors one should consider their arguments in more detail. See Appendix, page 16.

Here is the place to remark that the controversy over the Realtors' initiative is not between Republicans and Democrats, or between liberals and conservatives. On the issue of legislative backing for equal access to property by all races, both parties are officially on record and in agreement.[1] And the political philosophy known as 'conservatism' is in essence this: social change must be organic and developmental; it must go forward by conserving the established traditions and acquired social habits of a people, not by sudden theoretic leaps and revolutionary transformations. But the American tradition is precisely that which finds the people directing their governments to "secure the general welfare", to safeguard the free economy by governmental controls, to foster all kinds of economic and social welfare by a unique kind of partnership between free voluntary associations of private enterprise with governmental agencies. The Rumford law and the other laws which the Realtors' initiative seeks to cancel stand squarely within the existing American tradition, whereas the initiative itself--as something new, alien, abrupt and radically revolutionary--is profoundly anti-conservative. It is in fact just that kind of 'economic liberalism', to use the exact technical term, which stands condemned over and over in the Papal documents of the twentieth century.[2]

I hope that by now, my fellow Catholics, you begin to understand why our Bishops are so excited and worried by the deceptively simple 'amendment' which the Realtors are asking us to write into our laws, and why the initiative petitions they are asking us to sign are, in principle, so very, very wrong.

§ 2.

But the Realtors' initiative is not only wrong in principle. It is wrong also in method. Mr. 'Spike' Wilson, President of the California Real Estate Association, has said: "The circulation of the initiative petition is only to allow the public the right to vote on an important issue. Surely, no patriotic American wants to deny his fellow citizens the right to vote."[3] About the real motives behind this

---

[1] President Kennedy's message to Congress contained these words: "No property owner who holds his property for the purpose of serving at a profit the American public at large can claim any inherent right to exclude a part of that public on grounds of race or color." Similarly the Republican platform of 1960 said, in dealing with "equality under law": "It becomes a reality only when all persons have equal opportunity, without distinction of race, religion, color or national origin, to acquire the essentials of life--housing, education and employment."

[2] As for example the Quadragesimo Anno of Pius XI, in which we read: "It follows from what We have termed the individual and at the same time social character of ownership that men must consider in this matter not only their own advantage but also the common good. To define these duties in detail when necessity requires and the natural law has not done so is the function of those in charge of the state. Therefore public authority, under the guiding light always of the natural and divine law, can determine more accuratly, upon consideration of the true requirements of the common good, what is permitted and what is not permitted to owners in the use of their property. [§49]"

[3] It is a bitter irony that the Realtors, who are demanding that the people be

touching sentiment we shall have more to say presently. First, what about the argument that the people should be allowed to vote on this 'amendment'?

The first thing to notice is that the argument contains an implicit falsehood. The people have voted already. They have in a sense voted twice: once indirectly when, through their elected representatives they overwhelmingly and after prolonged study voted the Rumford Bill into law. The second time the people voted directly, and it is important to remember this. Before the Rumford Bill was due to become law, the Realtors utilized that direct appeal to the voters known as the referendum. They circulated petitions among the voters which, had they received sufficient signatures, would have suspended the law until it could be voted on at a general election. This was an honorable and open attempt to have the people directly, if they so wished, cancel the law in question. By refusing the necessary signatures to this referendum petition, the California voters in effect voted directly to sustain the Rumford Law and give it a chance to operate.

Now after being twice voted down by the people and their representatives, the Realtors are back again: but this time with great deception. Their newest move, the initiative to 'amend' the Constitution, does not mention the Rumford law in its text. Under cover of a righteous-sounding declaration about the immunity of property rights from government, Realtors are actually asking California to legalize bigotry. The initiative and referendum procedures were intended originally to give the people a remedy against the possibility that powerful special-interest groups (such as the powerful lobby maintained in Sacramento by the Realtors) might induce the legislature to pass laws furthering their own interests but contrary to the people's interests. What we now witness is a reverse kind of situation. The legislature resisted the powerful real estate lobby, listened to religious and community-serving organizations, and passed the Rumford Law. And so the Realtors decided to transfer their expensive lobbying tactics to the public forum in the hope that by such deceptive mis-statements of the issue as their "Property Owners' Bill of Rights" they might confuse the people into voting back the monopolistic and market-restricting practices of which the people's legislature had deprived the Realtors.

There can be no question about the value of referendum and initiative procedures rightly conducted, but there is every question whether the Realtors' deceptive amendment is a proper instrument for an initiative measure. And it is patently dishonest to claim, as the Realtors do, that their opponents are trying to deny the people's right to vote when what they are denying is that the Realtors' initiative is a proper and votable proposal.

---

allowed to decide, do not even extend this right to decide to their own membership. One prominent Realtor has said that the C.R.E.A. is a "monolithic and a captive group". Neither the Contra Costa nor the Oakland Boards, for example, would allow opponents of the initiative to get up and speak at their meetings, nor did they circulate to their membership any arguments opposing the official position imposed from the top.

The reasons why the Realtors' initiative is not a proper initiative measure to put before the people are these: (1) the amendment's language is deceptive and its real purposes are disguised; (2) our state Constitution requires that an initiative be confined to just one issue, whereas the Realtors' initiative embodies many issues; (3) a proposal to prevent the legislature from implementing constitutional rights belongs in the section dealing with the function of the legislature and should not be tacked on as an 'amendment' without organic relation to the rest of the Constitution; (4) an amendment, like the rest of California's laws, should be equally applicable to all persons in the category with which it deals; but the Realtors' amendment cannot apply to all homeowners equally, since FHA-insured and Veterans homes would be immune to its application by reason of federal laws.

The most compelling reason, however, why the initiative is not a proper measure for the people's vote is that by reason of the far-reaching principle which it introduces (the 'despotic' theory of property ownership) the initiative aims not at constitutional amendment but at constitutional revision and upheaval. And while direct constitutional revision may be the practice of tiny, or primitive, or brand new democracies, it is not the way of American democracy and never has been. Ours is not a so-called direct democracy but a representative one: that is, as conservatives in our day never tire of reminding us, we have a Republican form of government.

In adopting our form of government we decided to make the framing of laws the duty of a special group, our ablest representatives, to whom we give at least temporary immunity from our popular passions by guaranteeing them a certain term of office. As Oakland's conservative (and Catholic) Mayor Houlihan pointed out in the December 21st issue of the Tribune, the initiative is subversive of our form of government. "It would", he said, "operate as a restriction of the authority of the legislature contrary to the traditional concepts of representative republican government."[1]

"Let the people decide!" say the Realtors. But do the Realtors really have in mind an appeal to the people's reason, or to their passions? To answer this question, one trip to the campaign headquarters for the initiative (or the John Birch centers, which are passing out the same material) is sufficient. Let me quote from a handout picked up at the downtown Berkeley center from which the Realtors distribute their material:

> "We know that a small minority coalition of pressure groups (California Democratic Clubs, American Civil Liberties Union, Communist Party, Americans for Democratic Action, CORE, NAACP and the Socialist Party) control the State Legislature...This army worked and elected and legally seized control of the Democratic State Legislature, Governor's seat and many congressional seats."

---

[1] Even Realtor spokesman Clare F. Short admits that questions of property rights cannot be determined by just anybody, he writes. "It is impossible for the property owners to do the necessary review and research to protect themselves from legislative erosion of their rights."--see The Catholic Voice, December 15, 1963, p. 15.

This stuff is not rational political debate. It is innuendo; it is fear-mongering; it is the vicious technique of smearing the opposition with the 'Communist' label; it aims directly at that reign of unreason and suspicion in public life of which this nation is sick unto death--even to the death of a President.

And are the Realtors, of all people, just on their record and present performance, the ones to lead California in rational discussion of the issues? Look at their use of words. "Forced housing!" is their battle-cry. Now, anyone who can study the Rumford Law and say that about it is either dishonest or incapable of using the English language in a responsible manner. And see how the Realtors treat opposing argument. The Richmond paper less than two weeks ago told how the Realtors of the Contra Costa Board at their own meeting shouted down and would not even listen to the only member who rose to speak against the official representative of the C.R.E.A. "If in the green wood they do these things, what will be done in the dry?"

I was present this week at a meeting of the Contra Costa Council of Churches at which leaders of the Realtors were invited to state their case and answer questions. I assure you, the priests and ministers present were shocked and sickened at the Realtors' refusal to answer direct questions, speak to the point, and have done with vague innuendoes and outright smears.

No, the tactics, public utterances and campaign material of the California Realtors to date is a pretty fair indication that they intend simply to bypass the people's reason and work directly on their fears, suspicions and hates. Governor Brown has predicted that, should the Realtors' initiative actually get on the ballot, this state will be deluged in racist acrimony such as it has never seen, and that inter-group relations in California will be set back fifty years. Do we want to see California become a mecca for every Negro-hating outfit in the land? Can we stand the inpouring of racist money and the infestation of race-haters that will come crawling out of the woodwork? The Realtors, strangely enough, are making no attempt to deny that this will happen. They seem unperturbed over the corruption of public debate that is certain to overwhelm us, and quite willing that the political process in California be debased to the level of a Dallas hate-fest or a Birmingham brawl.

And it will surely happen, is happening even now, because so much is at stake for the racists. The underlying principle of President Kennedy's civil rights bill coming before Congress is that it belongs to the police power of government to prevent systematic inequality of treatment by reason of race. If America's racists can contrive to show Congress and a watching country that even in progressive California, the number-one state, the citizens will not accept this principle, then American racism may well have won the day. In the light of all this, is it not clear beyond doubt that the Realtors' initiative scheme is, if anything, even more wrong in method than it is in principle?

§ 3.

But the wrongness of the Realtors' initiative comes into even sharper focus when we consider their motivation. It is wrong, and very wrong, for any group of citizens to put their own financial advantage ahead of the common good. (When this is done by selling secrets to the enemy, we call it 'treason'.) And it is doubly wrong to conceal such motivation behind a façade of fine language about rights and freedoms and patriotism, and to decorate deceptive ads, as the Realtors do, with the American Eagle and the colors red, white and blue.

This is a serious accusation, not to be made lightly, especially from the pulpit; and so I beg you to listen most carefully to my words, which I shall most carefully weigh.

I accuse no one individual, not even Realtor President 'Spike' Wilson. I know personally too many good and honorable men who are Realtors. Indeed, not a few of them have courageously stood up against their leadership and fought for principle within their Boards at great personal cost and danger of reprisal and financial loss, and personal ostracism from their associates. Furthermore, it is beyond question that of those Realtors who support the initiative, many do so because they are simply uninformed and have never had the time or the training to consider the social research pertinent to their industry or to weigh the type of question we have been raising. Many, again, like so many people today, are ethno-centric and herd-minded conformists. As in all groups, there are many well meaning persons who go along uncritically with the crowd. The Realtors' professional organization has presented them with only one side of the question, the 'official' party-line worked out by the leaders. But to the great credit of the rank-and-file Realtor, whenever the local Board has allowed both sides to be openly considered there have been some admirable decisions. The Boards of Realty have officially <u>opposed</u> the anti-fair-housing initiative in San Francisco, in Palo Alto, in Watsonville, in Atherton-Menlo Park, and in the San Fernando Valley of Southern California. This shows that, when presented with both sides, Realtors as a group are as capable of reason and principle as any other body of fair-minded Americans.

We must, however, consider the real motivation of the leadership of the California Realtors, since, as we have seen, the case for the radical new amendment is so totally lacking in objective merit. (A learned professor of law recently remarked that "The initiative proposal before the state represents a morality that would be expected in a juvenile delinquent, and a social conscience of a person recently returned from a Rip Van Winkle sleep".) What then are the possible hidden motives that may be at work?

I hope you realize exactly what a 'Realtor' is. The term does not apply to all licensed real estate brokers and salesmen. It is a copyrighted term, owned by an organization which has a (quite legitimate) monopoly on the Multiple Listing Service, which is a device very useful to buyers and sellers of residential property, and one which gives the association possessing it a high degree of influence over the housing market and the racial patterns of neighborhoods. Realtors are organized into local Boards, then into statewide associations, and then again into a powerful National Association of Real Estate Boards.

Now, when a Realtor handles the sale of a home worth $20,000, he extracts for his services a fee of $1,200: six percent. The financial success of the Realtor does not depend so much on the number of homes in the community but on the number of times they are sold. The Realtor has a stake in high residential mobility. Now, people move for many reasons, but especially to get out of an undesirable neighborhood and to get their children into desirable school districts. Neighborhoods are by many people thought to be undesirable if they are racially mixed. In the past, as can be documented, many Realtors actively fostered this belief, and especially the now disproven belief that property values necessarily fall when the minorities move in. So, when the minorities finally begin to move in to the fringes of a neighborhood, white people have generally begun to move out. And because Realtors and other brokers have systematically refused to sell or show homes to minorities in all-white neighborhoods, or to allow Negro agents in most cases to become members of Realty Boards and Multiple Listing Services, and because home-loan businesses and banks have followed the same discriminatory pattern--all of which has been fully documented--neighborhoods in the North are at this time largly unmixed, except at the edges. That is precisely the reason we are stuck with the problem of de facto school segregation, and that is one of the biggest reasons why prejudice lives on: because white people cannot really come to know Negroes of their own economic and cultural class, since they don't have them as neighbors and fellow churchmen and social acquaintances.

All very bad, no doubt. But very good for the real estate business. Because every time the pattern begins to be broken, homes begin to change hands briskly. New lilly-white suburbs are built, families flow outward from the central cities in concentric rings, and every time the Realtor sells a home he picks up six percent of its cost as his fee.

But now comes the Rumford Law, and such things as President Kennedy's Civil Rights Bill. And suddenly there will be no places for white people to move where Negroes and other minorities of comparable income and background won't also be able to move. So, the fast home turnover slows down, and fewer commissions are earned. Moreover, the white Realtor will probably not get, so he fears, many of the sales to minority buyers into previously 'forbidden neighborhoods', since there are plenty of

minority brokers around and they can no longer be kept out of the Boards of Realty.

And so, the 'keepers of the walls', as the Realtors have been aptly called, are bestirring themselves. And they are asking the people of California to write them a blank check for the legalization of bigotry: a simple-sounding Constitutional revision that will make it hereafter impossible for the people's governments to prevent this very profitable quasi-monopoly over transactions in the better homes, or to exchange the present pattern of de facto neighborhood segregation with its high residential turnover for integrated, calm and stable communities offering fewer sales and fewer six-percent Realtors' commissions.

We are now better able to understand why a powerful business organization is willing to play a game so potentially unpopular, so dangerous, and so very expensive.[1] The reason is that unless the Realtors can successfully assert the 'right' of the property owner to discriminate, if he wants to, according to his "absolute discretion" (i.e., independently of any considerations of morality or social responsibility), then the Realtor as his agent will no longer be able to do a lot of the things which he has been doing, at a profit.

Now, there exists an exact terminology for what it is that the Realtors have been doing. They have been exercising, on behalf of white homeowners, a 'monopoly'. They have been 'manipulating' the racial patterns of neighborhoods. They have been practising 'economic collusion'. They have been 'conspiring' to impose 'restraints on trade'. They have systematically 'controlled a market' and 'excluded' a certain portion of the ready-willing-and-able buying public from that market.

Putting the matter this way, we see the Realtors' motivations in their true colors. And the colors are emphatically not the red, white and blue that adorns Realtors' ads. We now see that the Rumford Law is really no different from lots of other laws we have already got and which we wouldn't dream of cancelling: laws that strike down monopolies, price-fixing, and other restrictions against our free-enterprise competitive American economy. Just like these other laws, which our Justice Departments are engaged in enforcing day after day in the interests of a free economy, the restrictions imposed by the Rumford Law on operators in the market are justified by the greater liberties they insure within the whole free-enterprise system. Just laws and restraints are, in our system, only those whose net result is an increase of freedom for all. The crowning dishonesty of the Realtors is that they are trying to apply to the California fair housing laws the very term that exactly fits the practices they have so long engaged in: 'forced housing'.

---

[1] According to an article in The Catholic Voice, Realtors have already amassed one million dollars for the campaign. A professional collector of signatures recently told some civil rights people in San Francisco that he could make $100,000 collecting names for the Realtors, and wanted to know how much they would pay him not to do so!

Now, is this analysis of possible motivation being unfair to the Realtors? Their professions of belief sound so admirable, so patriotic. The answer is simple. To test the purity and single-mindedness of Realtors' devotion to 'property rights', let us look down the list of items in their "Property Owners' Bill of Rights". (You will find it on page fourteen of your Catholic Voice for December 13th.) Where is the right to acquire property, the right to become a property owner? That too is a 'property right', if anything is. It is in fact just the right which has lifted civilized man out of feudalism.

But we find not a single word about it! Do the Realtors hold that we all, regardless of our pigment and just as American citizens, enjoy equal rights to acquire property and to compete equally in a free market for the better homes? As a professional organization the Realtors are being suspiciously quiet about this particular 'property right'. Let them therefore revise their "Property Owners' Bill of Rights" to include all property rights; let them show us some evidence that they mean to include themselves when they warn about the "erosion of liberty". Let them promise publicly to cease and desist from eroding the liberties of millions of dark-skinned Americans by excluding them from the open housing market. Until then, fair minded Americans aware of the Realtors' well documented past practices are entitled to the conviction that the California Realtors' initiative is as wrong in motive as it is wrong in principle and wrong in method.

## Conclusion

What then are we to do? First of all, as your Catholic Voice warns you, "DON'T SIGN!" If you have already signed an initiative petition, unaware of all that is at stake, write to your county clerk and get him to take your name off the petition. Then, persuade other people not to sign. Arm yourself with fact and argument. Introduce the subject in conversations with friends and business associates. In the words of St. Paul,

> "Preach the word, be urgent in season and out of season, convince, rebuke, and exhort, be unfailing in patience and in teaching. For the time is coming when people will not endure sound teaching, but having itching ears they will accumulate for themselves teachers to suit their own likings, and will turn away from listening to the truth and wander into myths." [2 Timothy, 4:1-5]

But more is required. The problem of socially and morally harmful business traffic in indecent films did not begin to be solved until Catholics launched a nationwide consumers' strike against the purveyors of indecent films. This movement was called the 'Legion of Decency'. Today in California there is in existence a somewhat similar movement, launched not by Catholics but by civic and religious leaders of all faiths. It is called The League for Decency in Real Estate. To promote this movement in the two East Bay counties there exists an East Bay Center,

with headquarters at 1646 Prince Street, Berkeley, California 94703. The Associates who direct this center will publicly identify the decent Realtors and other real estate agents and encourage the patronizing of them. They will try to educate the public accurately in the advantages which use of a real estate broker offers to home owners and home seekers. At the same time they will assist the boycotting of those agents who oppose fair housing and the State fair housing laws by spreading the concept of the direct sale and disseminating information about the do-it-yourself approach to real estate transactions in which the broker is bypassed and the seller saves the commission of six percent of his home's value. You may secure the League's releases and contribute to its operation by writing to the East Bay Center at the above address.

This is only a suggestion. What precisely you are to do is a problem of conscience which only you can resolve in the light of your own abilities and opportunities. There cannot, however, be any doubt about the obligation in conscience of all of us, as Catholics and as loyal Americans, to see to the defeat of the initiative against fair housing.

To do any less would be to find no profit in the martyrs' blood of the Birmingham children, and of Medgar Evars---yes, and of John F. Kennedy.

Dear friends, these are strong words to hear from a Catholic pulpit. But then, your Catholic Bishop of Oakland used strong words when by a special memorandum to his priests last August he directed them to place themselves in the forefront of the struggle for racial justice. We have arrived at a moment of truth for our State. It is even more a moment of truth for our Church. This time, and from henceforth, the Catholic Church is determined not to fail the cause of justice.

It is the season of peace, and I have called you to battle. But then, as St. Bernard has said, "God hates the peace of those he has destined for war." No one can love justice, and peace which is "the fruit of justice", without hating the cause of those bent upon strife and who, in the words of our text, "enact ill decrees, and draw up instruments of wrong; suppress the claims of the poor, and refuse redress to humble folk."

And so with high courage---yes, and with holy indignation---let us now get on with the celebration of Mass: that banquet of our oneness with Christ and one another in which we find the purest symbol of the unity, in justice and love, of the whole family of man---white, red, yellow, brown and black---which Jesus Our Saviour was born into this world and died to bring to pass.

***

## APPENDIX

It is hard to take seriously the various arguments which the California Realtors are using to support their initiative petition, in the light of the concealed motivation which they do not describe and in the light of their past performances and utterances. In the campaign which the Realtors waged against the Berkeley fair housing ordinance they were saying--in paid ads and campaign literature that is part of the record--that what was needed was not a local fair housing ordinance but a statewide law, applying equally to all municipalities. Now they have got such a law, and it is a weaker law even than the Berkeley ordinance. And these same Berkeley Realtors are proving that their earlier statements favoring such a statewide law were just campaign window-dressing.

Still, we must try to deal fairly with the Realtors' arguments, in whatever spirit they are offered.

What the Realtors are saying about the Rumford Law seems to imply that they think it not such a bad law in itself, but rather that they are afraid of the precedent which it sets. They seem to be arguing against future possibilities more than against present actualities. They speak of a possible "legislative erosion" of our rights. If the people's legislature can outlaw discrimination against otherwise qualified Negroes, might it not go on to outlaw other kinds of discrimination as well, even those which enrich and diversify our society? Suppose for instance that a landlord wanted only college graduates for tenants in his apartment. How could the legislature justly deny him this right?

The answer is that here and now (and for the foreseeable future) this kind of discrimination is not a widespread, entrenched social evil and therefore a law against it could not be constitutionally justified. Should it ever become such an evil, then the legislature would have to decide in the light of then existing social facts whether outlawing it might be justified. The mere fact that one kind of discrimination at one time was found socially evil and widespread, and was therefore barred by civil law, would not automatically license legislative banning of every kind of discriminating choice, any more than outlawing speeds of over sixty-five miles per hour on highways would automatically justify or make probable the outlawing of all speeds on highways. What the Realtors are forgetting (if they do sincerely entertain such reasoning) is how laws are actually made and what makes laws justifiable under our constitutional system. They seem also to be assuming that future legislatures are likely to be made up of legal nincompoops.

A second argument made by the Realtors is that laws are not a proper way of dealing with social evils such as discrimination by race. "You can't legislate morality", they say over and over; and so they adopt as their own solution the banal and hackneyed appeal to "education".

The answer is, again, that the Realtors are showing a profound ignorance of what laws are. In one obvious sense you cannot make persons moral by passing laws, and no sensible person has ever maintained that you could. But law is not intended directly to make persons moral. Law is intended to prevent people from doing some of the things that are immoral, when those actions have a disastrous social consequence. Laws are a device which people living together have invented to make them do what they know they ought to do even when they do not feel like doing it, and when the absence of legal compulsion would mean that only the good people would so perform. Between trying to legislate morality into people, and trying to legislate certain immoral actions out of a community, there is a vast difference, and one that should be obvious to any person of sense.

Furthermore, laws are the most powerful educational force there is. Nothing educates a citizen faster than to find out that what he is doing is against the law.

Laws can educate in still other ways. The fair housing laws of California, though they are not directly education, nevertheless do set up conditions which are supremely educational: namely, integrated neighborhoods in which neighbors of different races can learn from personal experience how baseless are their prejudices. Paradoxically, by insisting on the right to discriminate against Negroes, Realtors are in effect

opposing the only kind of education that could in the long run be effective.

The ignorance of law in general, shown by the Realtors, comes out in still another way. By repeating the hackneyed and misleading phrase, "You can't legislate morality", they obscure the fact that law is not aimed at the injustice in the hearts of people but at the social causes of injustice. Child labor laws were not intended to make factory owners feel more kindly toward children, but at removing the necessity of employing children in order to compete with other factories which employed children. These laws were aimed at wiping out an unjust practice, at correcting a settled 'institution', at changing a social habit. It was a pattern of behaviour and not personal motives behind that behaviour that was aimed at. So it is also with the Rumford law and the other California laws outlawing unfair and discriminatory practices.

Thus, we come to a connection between law and morality which the Realtors totally overlook. All of us have an obligation to work at the improvement of conditions, the reform of institutions, the removal, by cooperative effort, of the causes of our neighbor's misery. Sometimes, only new laws can do this. That is so in the present case because there are so many irrational, deep-seated and ungetoverable prejudices at work in people. When voluntary and private means have failed, as they have failed for a century to correct racial injustice, then compulsory and public means must be found, as President Johnson reminded us in his first address to the Congress of the United States. The civil law in cases such as neighborhood segregation must step in to secure the common good, as it must in every case of supreme import to the common good when voluntary and subsidiary agencies have failed. This, the universal teaching of Catholic moralists, is what the Realtors' arguments seem to be denying.

Thus all decent citizens have an obligation to support fair housing laws. But Realtors who are in a position to do this more effectively and with closer knowledge of the evil are more obliged than anyone else. It is a tragic dereliction of duty, a grave sin of omission, that Realtors over the years have not lifted a finger to correct the injustices within their own industry. That is why the people's legislatures must now step in to do the job. If, as the Realtors tell us, it is education that is wanted, why have they failed for half a century and more to educate even their own membership? If education against discrimination cannot succeed with Realtors, can it succeed with the public at large?

Finally, the California Realtors' claim that the people should be allowed to decide on their initiative will continue to seem patently insincere so long as Realtors in their campaign material and personal utterances steadfastly refuse to face or answer the kinds of arguments we have proposed in this sermon. If it is public debate they are really interested in promoting, they themselves must agree to speak to the real issues. The following statement, from the Catholic Human Relations Council of Los Angeles [3536 West 75th Place, Inglewood, Cal.] is a typical statement of the reasoning which all California religious groups, Catholic, Protestant, and Jewish, are directing against the Realtors' initiative:

> "...This proposed amendment is contrary to Christian morality, opposed to traditional American principles and of doubtful constitutionality. It would pretend to give owners of real estate 'absolute discretion' in renting or selling their property to whomever they choose.
>
> "The Rumford Fair Housing Act does not endanger legitimate private property rights. It does not force homeowners to sell, nor does it deprive them of the right to keep, freely use, and dispose of their property in morally acceptable ways. Homeowners are still free to select tenants or buyers on any basis they desire, so long as they apply the same criteria to all persons without regard to 'race, color, religion, ancestry, or national origin.'
>
> "Only God has 'absolute discretion' over what He owns and [quoting Pope Pius XI] 'the Creator Himself has given man the right of private ownership not only that individuals may be able to provide for themselves and their families, but also that the goods which the Creator destined for the entire family of mankind may through this institution truly serve this purpose'...The Rumford Fair Housing Act, therefore, clearly conforms to Catholic moral teachings and the initiative against it runs counter to these teachings. It may be vigorously opposed on these grounds alone.
>
> "The initiative may also be vigorously opposed because it runs contrary to traditional American principles. The 14th amendment to the U.S.Constitution commands that 'No state shall...deny to any person within its jurisdiction the equal protection of the laws.' The proposed...amendment would attempt to legalize racial and religious discrimination by forbidding the state to protect its citizens from injustice. Thus the proposed amendment is contrary to the plain meaning of the federal constitution."

THE LEAGUE FOR DECENCY IN REAL ESTATE, AND CORE

[Attached items:

"A Program for Action": a one-page release about the League, its principles and its methods;

"How to Make Believers out of Realtors": a five-page set of notes putting forward the general approach and possible lines of action, used as a basis for discussion prior to the formation of the League and its East Bay Center (some of the ideas have been adopted, others modified);

"Don't Sign!": a seventeen-page sermon delivered at St. Callistus' Catholic Church in El Sobrante, mentioning the League only briefly; included here because of its attempted comprehensiveness in dealing with the anti-fair housing initiative, and as possibly helpful to ministers and speakers.]

The League for Decency in Real Estate is not an organization but a movement. The organization is an East Bay Center directed by some twenty community leaders for the application of League techniques and the spread of the idea to other population centers in California. CORE could be of great assistance in contacting similar persons in other parts of the state, alerting them to the League's approach, and assisting them in setting up similar Centers.

The League is intended as a service project for other organizations, speakers, and news media, and does not try to contact the public directly except as individuals write in to the Center to secure its materials. The East Bay Center will place advertisements (in real estate sections of papers) and issue releases and print up material for use by other groups. CORE could be of greatest assistance in using the League's material in a program of systematic direct action in front of deserving realty offices and headquarters, in contacting church groups, and wherever CORE's speakers deal with the initiative campaign.

The items to be put out by the Center which would be most directly useful to CORE will be:

a do-it-yourself kit (or, a handout describing the sell-it-yourself idea and indicating where the kit may be obtained and what is in it);

an exact analysis of just what services a real estate agent can and ought to (many of them frequently do not) provide in return for their 6 percent commission; this, to show that there is no intention of attaching an industry as such, and to aid fair-dealing agents for whom the League provides free advertising by circulating its

LIST OF APPROVED REAL ESTATE AGENTS--those in a given area who subscribe to the League-sponsored Fair Housing Code, which will be (it is hoped) endorsed by the Council of Churches, the Board of Rabbis, the Catholic Interracial Councils, and the local Conferences on Race and Religion (interfaith); public display of the League's Code in the place of business will be a condition for inclusion of an agent on the approved list. (CORE can be of great service in pushing the concept of the Fair Housing Code, and getting people of good will to look for it the same as they would a union label.)

educational material useful for distributing (counter-distributing) in front of all centers and Birch bookstores where the Realtors are giving out campaign material. (It is most important to nail the 'constitutional rights' argument exactly, the 'right-to-vote' argument and the other sophistries employed, and especially to REVEAL TO THE PUBLIC THE REAL, FINANCIAL MOTIVATION OF THE REALTORS, which many people of good will do not understand [for this, see section three of the sermon].)

All this material should be ready inside two weeks. Local chapters of CORE may write for it to the East Bay Center, 1646 Prince Street, Berkeley, 94703. An effort will be made to see that all California headquarters of CORE have it. Any of the League's material may be freely duplicated by CORE or other groups.

Norman Hill -

can't say any more than whats here....

chet!

The parties hereby agree as follows:

1. The purpose of this agreement is to affirm the Equal Opportunity policy of the Member Hotels of the Hotel Employers Association of San Francisco (hereinafter referred to as the Member Hotels) and to establish implementation of that policy. This agreement shall become effective when signed by representatives of all of the organizations appearing below.

2. The policy of the association is that employee selection and promotion respecting all job categories are determined solely upon the basis of the qualifications of the individual for the job in question, without reference to race or color.

3. F.E.P.C. Equal Opportunity signs will be posted in all Member Hotels bulletin boards.

4. All job requests to unions will include a reminder that Member Hotels are Equal Opportunity Employers.

5. A statistical analysis will be made by each Member Hotel within 60 days, every 30 days thereafter for three months and every 90 days thereafter showing by job category the number of employees who are of minority racial groups, the aggregate number of employees, and the aggregate number of such employees who are of minority racial groups. This information will be made available to the signatories to this agreement.

6. This employment policy statement of Member Hotels will be distributed to any additional persons or groups which may be suggested not to be fully aware of that policy already, by virtue of prior distribution. In this

connection any recommendation which the parties hereto may have regarding employment sources will be submitted to Member Hotels in writing.

7. Employment classified advertising space taken in newspapers by Member Hotels shall state the Equal Opportunity at such hotels.

8. Special emphasis will be given in those advertisements to the fact that this Equal Opportunity policy applies to all job categories.

9. Based upon the assumption that future rates of turnover will approximate those of comparable periods during the past two years, and assuming further that qualified applicants who are of minority racial groups will be available as openings occur, it can reasonably be anticipated that as a general policy at each hotel employees of all minority racial groups as herein defined will be employed in order to bring the total employed of such minority groups to a level of from 15-20% of total employees from time to time having in mind special circumstances which may prevail with respect to fluctuation in business volume and special conditions at certain hotels. In general the objective at each hotel shall be to accomplish such hiring by July 20, 1964. Percentage estimates hereinunder are based upon the assumption that sufficient minority group applicants with previous job experience will be available as openings occur in experienced job categories. The foregoing is not to be deemed to establish a quota for hiring; rather a good faith effort by Member Hotels to implement their hiring policies stated herein is all that is expected. The parties recognize that the results of application of that hiring policy necessarily will be affected by factors such as lack of job

applicants meeting the Member Hotel's standards of qualifications and experience, requirements of collective bargaining agreements, or reduction in the possible job opportunities because of a decreases in turnover, and economic conditions. Should any serious problem arise which the Member Hotels come to recognize as an impediment to the implementation of this paragraph the member hotel affected will promptly notify the other parties.

10. As used herein, minority racial groups means Negroes, other non-whites and persons of Mexican or Latin American descent.

11. On March 7, 1964 all boycotting, picketing and other forms of demonstrations against Member Hotels will cease, and the parties shall refrain from boycotting, picketing, demonstrating or other forms of direct action against Member Hotels during the term of the agreement and shall use their best efforts to dissipate the effects upon the community of the demonstrations conducted heretofore.

12. The term of this agreement shall be from March 7, 1964 until March 7, 1966.

13. Notice for any purpose shall be mailed to the Member Hotels at 870 Market Street, San Francisco, California. With respect to parties hereto who are not Member Hotels c/o Terry A. Francoise, 2085 Sutter Street, San Francisco, California.

14. The parties also agree that there will be no boycotting, picketing or other forms of demonstrations against any hotels which are members of the Hotel Employers Association of San Francisco for at least 30 days after notification to any such hotel that any party hereto wishes to discuss hiring

practices at the said hotel; under no circumstances shall any Member Hotel of Hotel Employers Association of San Francisco be requested to sign any agreement save a duplicate of this one.

15. Nothing in this agreement establishes any hiring quota, or quota for employment.

16. The non hotel parties of this agreement shall and hereby do indemnify Member Hotels from any damage or the results of any lawsuits arising out of the events which occurred on February 28 and 29, 1964, and March 1, 1964 and March 2, 1964.

17. This agreement shall be applicable to all association Member Hotels presently open for business and during the term hereof to future Member Hotels to be constructed at the time such new hotels shall have become fully staffed.

18. This agreement shall be subject to and limited by the provisions of State and Federal law and applicable collective bargaining agreements, and any provision hereof which shall conflict herewith shall be deemed excised herefrom and the remainder of the agreement shall remain in full force and effect in order to carry out the intention of the parties hereto.

19. At the request of the non-member parties hereto, Member Hotels will arrange at reasonable times and intervals conducted tours by no more than three individuals representing the non-member parties of any of Member Hotels for the purpose of ascertaining the extent of implementation of this agreement.

20. Member Hotels agree to dismiss all existing civil suits pending against any of the parties hereto or any other persons resulting from demonstrations heretofore conducted against any of Member Hotels. Member Hotels further agree to notify the District Attorney's Office of the City and County of San Francisco that they do not desire to prosecute any misdemeanor charges growing out of said demonstrations and to request a dismissal of same, it being understood that the final decision rests with the office of the District Attorney and is not within the power and authority of Member Hotels.

IN WITNESS WHEREOF, the parties hereto have executed this agreement this 7th day of March, 1964.

ADDENDUM TO AGREEMENT

The following provisions are added to and become a part of the agreement entered into between the undersigned on March 7, 1964:

It is hereby agreed that all claims or causes for action which may exist against the San Francisco Police Department or any of its individual members by reason of acts which might have occurred in the course of any demonstrations heretofore conducted by the Ad Hoc Committee to End Discrimination against any member hotel, are hereby released and discharged.

This release applies to the Ad Hoc Committee Against Discrimination and all of its individual members and co-participants in the said demonstration.

A FINE BEGINNING

We now present a KCBS editorial entitled "A Fine Beginning". Here is Mr. Jules Dundes, KCBS General Manager and Vice President of CBS Radio:

A large section of San Francisco's retail business has indeed taken "a major forward step" in working out their new agreemertson job opportunities for Negroes.

KCBS extends its heartiest congratulations to all parties concerned. The new human rights agreements constitute a superb Christmas gift to the cause of racial harmony -- and equal opportunity -- in the city of San Francisco.

As you know, two large groups of retailers have agreed with leaders of the civil rights movement on new ways to make opportunities for good jobs available to Negroes. One group covers 30 leading department, furniture, and specialty stores. The other embraces more than 300 groceries and supermarkets -- the great majority of the city's food stores.

The actual hammering out of these agreements was accomplished by the San Francisco Community Relations Group, representing the employers, and leaders of the National Association for the Advancement of Colored People, the Baptist Ministers' Union, the Congress of Racial Equality, and the United Freedom movement.

In addition, KCBS salutes the behind-the-scenes efforts of James P. Mitchell, San Francisco's human relations coordinator.

What do these agreements consist of, and in what way <u>are</u> they a "major forward step", as their proponents claim? KCBS believes the achievement lies in going beyond the passive position of merely <u>not</u> discriminating, to a conscious effort not only to provide job opportunities, but to recruit and train Negroes to qualify for those jobs once they are available.

The retailers have agreed to a number of positive steps. Beyond making it quite clear that they are henceforth equal opportunity employers, they also have agreed to obtain the assistance of State Department of Employment specialists in recruiting job applicants. They will work with school counselors to impress upon students of minority races their opportunities in retailing; they will actively recruit students at local colleges and universities for store jobs; and they will continually review the operations of the program at individual stores.

No one can say that overnight new jobs will be created for San Francisco's 80,000 Negro population in retailing as a result of these agreements. What can be said, however, as Joseph Williams of the United Freedom Movement's employment committee remarked on KCBS, is that these agreements represent a change in attitude on how to combat discrimination. They represent a coming

together that is healthy for both the minority and the majority. They demonstrate how people of good will on both sides can make progress by intelligent negotiation.

What now must be done is to implement these employment agreements in the fullest possible way and in the quickest possible time. KCBS hopes and believes that the retail employers will wholeheartedly live up to both the letter and the spirit of the agreements. And KCBS also hopes and believes that the leaders of the civil rights movement -- who are the leaders of our Negro community -- will work hard at convincing Negro youth that there is in fact an end to job discrimination in retailing. There will thus be a much needed incentive given to the Negro teen-ager to acquire the education and skills he will need to qualify for wider job opportunities.

As Mr. Williams also remarked, these agreements should help to change the impression of many Negro youths that since they can only get unskilled labor jobs they need no special training.

The new San Francisco program is an important beginning...a first step which promises well for the future. It is off to an auspicious start and we wish it well. The people of this city have every right to hope that the retail stores will soon demonstrate to other segments of business and industry that the way to end job discrimination is to go about it in positive fashion, with the will to achieve success.

You have just heard a KCBS editorial. KCBS editorializes frequently, and gives responsible representatives of differing viewpoints the opportunity to be heard.
